FOR IMMEDIATE RELEASE

TYLER TECHNOLOGIES WINS SIX NEW FINANCIAL SYSTEM CONTRACTS IN ILLINOIS

MUNIS® Product Line Continues Successful Expansion in Midwest

Dallas, Texas, November 6, 2002 —Tyler Technologies, Inc. (NYSE: TYL) announced today that it has signed contracts to provide its MUNIS® financial software to six local governments in Illinois. The total estimated value of the contracts, which includes software and professional services, is nearly $2.5 million. The new customers include Winnebago County and the Villages of Glen Ellyn, Bartlett, Wilmette, Glenview and Carpentersville.

Located in north central Illinois, Winnebago County has a population of 255,000. The county seat is Rockford, the second largest city in Illinois, which also signed a contract with Tyler earlier this year to install MUNIS® software. The Villages of Glen Ellyn, Bartlett, Wilmette, Glenview and Carpentersville are all located in the suburban Chicago area and have populations ranging from 27,000 to 38,000. Tyler's MUNIS® suite of software applications includes General Ledger, Budget, Accounts Payable, Requisitions, Purchase Orders, Project Accounting, Fixed Assets, Payroll, Human Resources, Accounts Receivable, General Billing, Utility Billing, Parking Tickets, Business Licenses, Animal Licenses, Work Orders, Permits & Code Enforcement and Report Writer applications. Each of these new customers will also implement MUNIS Office, which provides integration to Microsoft Office™. Winnebago County is also purchasing MUNIS OnLine™, allowing Web access to certain data.

"We are gratified with the reception that MUNIS® has received from local governments in the Midwest region," commented John Marr, Jr., President of Tyler's MUNIS division. "These six significant new customers in Illinois are indicative of Tyler's growing success in taking products established in our traditional markets and expanding into new geographic territories in a relatively short period of time. Highly favorable references from existing MUNIS® customers, including several new customers in the region, were a major factor in winning this business, along with our progressive technology and ability to demonstrate greater functionality and integration than our competitors."

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to make local government more accessible to the public, more responsive to needs of citizens, and more efficient in its operations. Tyler's client base includes nearly 6,000 local government offices in 49 states, Canada and Puerto Rico. More information about Tyler Technologies can be found on the World Wide Web at www.tylertechnologies.com.
