FOR IMMEDIATE RELEASE

DESOTO COUNTY SCHOOLS AND CITY OF BILOXI, MISSISSIPPI SELECT MUNIS SOFTWARE FROM TYLER TECHNOLOGIES

Dallas, Texas, May 28, 2003 —Tyler Technologies, Inc. (NYSE: TYL) announced today that it has signed contracts to provide its MUNIS® financial and human resource management system to two new customers in Mississippi – the DeSoto County Schools and the City of Biloxi. The total value of the two contracts is approximately $1,000,000.

The DeSoto County School System is the second largest and the fastest growing school district in the state of Mississippi. It currently oversees 25 schools and, with a growth rate of over 1,000 students per year, is building a new school every twelve months. DeSoto County is located in far north Mississippi, adjacent to Memphis, Tennessee.

Officials from the DeSoto County School System were interested in finding a proven solution from a provider committed to their geographic area, with the ability to meet the financial management needs of a large and ever-expanding school district. In addition to conducting their own needs analysis, decision makers in the DeSoto County Schools considered recommendations from the cities of Olive Branch and Southaven, both of which are located in DeSoto County and have successfully implemented MUNIS. They also consulted with the Forsythe County School District in Georgia, which is similar in size and growth characteristics to DeSoto, regarding their experience with MUNIS. After extensive research and evaluation of various competing software systems, the choice of MUNIS was a clear one for the DeSoto County Schools.

School officials believe that their research resulted in the selection of the best possible solution to meet their financial management software needs. "We found the most technologically advanced, yet user-friendly software that will accommodate our decentralized style of operations," commented Stacy Graves, DeSoto County Schools Business Manager. "MUNIS will give us the tools to better manage the business of the DeSoto County Schools." Wendell Davis, Assistant Superintendent of Finance, added, "The implementation of GASB 34 and its federally-mandated fixed asset reporting requirements certainly will require a robust system like MUNIS to fulfill the needs of our school system."

The City of Biloxi has also selected Tyler's full suite of MUNIS financial and human resource management software applications to replace its current financial information system software. Located on the Mississippi Gulf Coast, Biloxi is a major gaming and tourism destination. Biloxi is the third largest city in Mississippi, with a population of over 50,000.

With over 800 installed client sites across the nation, Tyler's MUNIS software is a leader in financial, human resource and revenue-based applications for the public sector. "We are committed to providing software that leads the way in both technology and functionality, and all of our resources are dedicated to serving local governments and school business offices. That gives us the experience and depth of product understanding to consistently meet the needs and exceed the expectations of customers like the DeSoto County Schools and the City of Biloxi," commented John Marr, Jr., President of Tyler's MUNIS division.

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to make local governments more accessible to the public, more responsive to needs of citizens, and more efficient. Tyler's client base includes nearly 6,000 local government offices in 49 states, Canada and Puerto Rico.
