TYLER TECHNOLOGIES SIGNS ODYSSEY COURTS SYSTEM CONTRACT WITH LEHIGH COUNTY, PENNSYLVANIA

Dallas, April 27, 2004 -- Tyler Technologies, Inc. (NYSE: TYL) announced today that Lehigh County, Pennsylvania has signed a contract to implement Tyler's Odyssey Case Manager system. The total value of the contract, including software and professional services, exceeds $2.7 million. With the signing of this contract, Tyler continues to build on the reputation of Odyssey, the first completely new, Web-based court case management system available to the state and local government marketplace.

Located in eastern Pennsylvania, Lehigh County includes the cities of Allentown and Bethlehem. With a population of more than 300,000, Lehigh County is among the 200 largest counties in the nation. In its search for software to replace its aging in-house courts systems, the County required a courts system that would grow with it and that could facilitate the consolidation of multiple functions and departments. Because Odyssey is a unified case management system as defined by the National Center for State Courts, Lehigh County will consolidate the functions of case processing – imaging, accounting, calendaring, reporting, forms merge, and others – for multiple case types, all in a single software package.

Susan Schellenberg, Lehigh County District Court Administrator, recognized Odyssey's potential. "We wanted to take a big technology step forward and not be constrained by a system that we would outgrow in five years," commented Ms. Schellenberg. "In Odyssey we saw a solution that had strong appeal to our users and technical staff. Odyssey's user interface is intuitive and very well designed. Its technology is built on commodity hardware, is easy to administer, has built-in redundancy, and is highly scalable. No other system even came close."

"This contract with Lehigh County demonstrates Odyssey's broad appeal," said Glenn Smith, President of Tyler's Courts and Justice Division. "Our success in Minnesota, Florida, Georgia and now Pennsylvania is evidence of the nationwide appeal of a system that is designed to move easily from state to state."

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to make local government more accessible to the public, more responsive to needs of citizens, and more efficient. Tyler's client base includes more than 6,000 local government offices throughout all 50 states, Canada, Puerto Rico and the United Kingdom.
