TYLER TECHNOLOGIES SIGNS MULTI-SUITE SOFTWARE CONTRACT WITH ANDERSON COUNTY, TEXAS

Dallas, April 21, 2006 -- Tyler Technologies, Inc. (NYSE: TYL) announced today that it has signed a contract to provide multiple suites of software products to Anderson County, Texas. Under the contract, Anderson County will implement new systems from Tyler to manage its financial, tax, and courts and law enforcement applications. The contract includes the following Tyler product suites:

- Odyssey Courts and Law Enforcement,
- INCODE Financials and
- Orion Property Tax Administration.

Under the contract, which is valued at more than $1.1 million, Tyler will also provide implementation services, including training, data conversion, and consulting, as well as hardware and ongoing maintenance and support.

Odyssey is Tyler's new generation Web-based courts and law enforcement solution for the state and local government market. Anderson County will use the Odyssey integrated justice system to manage the operations of its district, county and justice of the peace courts, in addition to its sheriff, prosecutor, district clerk and county clerk offices. Scalable and robust, Odyssey incorporates leading-edge technology, including XML, n-tier architecture, an ultra-thin client footprint and component-based design – to encourage growth and maximize the value of a government's investment in new software. The new system from Tyler will enable the county to consolidate multiple functions associated with court case processing – including imaging, calendaring, reporting, forms management, and accounting – in a single software package

Anderson County will also replace its outdated financial and payroll software with Tyler's INCODE software. The INCODE software solution is feature-rich and has a user-friendly look and feel. With its flexible account structure, graphical user interface, multitude of time saving features and robust reporting capabilities, the new INCODE financial software will help streamline processes and improve interdepartmental communication within the county.

Tyler Technologies' Orion property tax administration product is designed to provide assessing and taxing jurisdictions with an easy-to-learn and easy-to-use interface with property information databases. The software offers imbedded document imaging, property inquiries and extensive linking capabilities to track owners, related properties, multiple mailing addresses, and exemption information. Orion is built on the same leading-edge technology platform as Tyler's Odyssey integrated justice system.

-more-

"The agreement with Anderson County is a great example of Tyler's unique ability to provide a broad range of software products and services to meet the specialized needs of local governments," said Glenn Smith, Executive Vice President of Tyler Technologies. "Tyler's ability to provide a comprehensive solution incorporating advanced technologies, together with our strength as a company and our reputation in the marketplace, were significant factors in Anderson County's selection of Tyler. All of our resources are focused on serving the technology requirements of cities, counties, schools and other government offices, and our domain expertise is unmatched in the industry."

Located in East Texas, about two hours southeast of Dallas, Anderson County is the 52nd largest of the 254 counties in Texas. Anderson County has a population of approximately 55,000 and the county seat is Palestine.

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to make local government more accessible to the public, more responsive to needs of citizens, and more efficient. Tyler's client base includes nearly 6,000 local government offices throughout all 50 states, Canada, Puerto Rico and the United Kingdom. *Forbes* Magazine named Tyler one of the "200 Best Small Companies" in America in 2004.
