NEWS RELEASE

Sanmina India Design Center Awarded Latest ISO 13485 Design Certifications For Medical Devices

11/20/2014

SAN JOSE, Calif., Nov. 20, 2014 /PRNewswire/ -- Sanmina Corporation (Nasdaq: SANM), a leading integrated manufacturing solutions company making some of the world's most complex and innovative electronic, optical and mechanical products, today announced that its India Design Center (IDC) has been awarded the ISO 13485:2003 and EN ISO 13485:2012 certifications for medical product design and development. Achieving these certifications recognizes Sanmina's continuing expansion of its global medical design and manufacturing capabilities.

These design certifications enhance Sanmina's ability to provide end to end solutions for medical devices in India, a capability very few global EMS companies have achieved. They are internationally recognized standards that ensure companies produce medical devices that consistently meet government regulations. Compliance with the ISO and EN certifications ensure that more stringent controls and documentation are in place during the design and manufacturing process resulting in greater safety and regulatory control throughout the entire product lifecycle.

"With the growth of the medical device market in India, many global medical companies are now outsourcing in India, taking advantage of government incentives and launching new medical products specifically designed to meet the needs of healthcare in India and other regions," stated Dr. Sundar Kamath, Senior Vice President of Corporate Technology at Sanmina. "These ISO and EN design certifications enable Sanmina to provide medical companies with complete product development services in India, in addition to the manufacturing solutions we have been providing here for many years."

Sanmina's India Design Center and manufacturing operations were both established in 2008. Together, these facilities provide complete design and manufacturing services to leading companies in the aerospace, medical, communications networks, enterprise computing, multimedia and smart infrastructure markets. These certifications add to a comprehensive list of industry certifications for Sanmina in India, including ISO 9001:2008, ISO 14001:2004, AS 9100, TL 9000 and UL certifications.

"This latest achievement demonstrates Sanmina's commitment to provide our medical customers with the highest level of quality and design engineering expertise on a global scale," said Gary Switzer, Senior Vice President of the Medical Division at Sanmina. "Our medical product expertise has grown significantly over the past several years, and we design a broad range of products, from medical devices and disposables to very large diagnostic imaging systems. The India Design Center joins our global network of medical design and manufacturing facilities that help leading medical OEM's develop and launch products all over the world."

About Sanmina Corporation

Sanmina Corporation is a leading integrated manufacturing solutions provider serving the fastest-growing segments of the global Electronics Manufacturing Services (EMS) market. Recognized as a technology leader, Sanmina provides end-to-end manufacturing solutions, delivering superior quality and support to Original Equipment Manufacturers (OEMs) primarily in the communications networks, defense and aerospace, industrial and semiconductor systems, medical, multimedia, computing and storage, automotive and clean technology sectors. Sanmina has facilities strategically located in key regions throughout the world. More information regarding the company is available at **http://www.sanmina.com**.

Sanmina Safe Harbor Statement

The foregoing, including the discussion regarding the Company's future prospects, contains certain forward-looking statements that involve risks and uncertainties, including uncertainties associated with economic conditions in the electronics industry, particularly in the principal industry sectors served by the Company, changes in customer requirements and in the volume of sales principal customers, the ability of Sanmina to effectively assimilate acquired businesses and achieve the anticipated benefits of its acquisitions, and competition and technological change. The Company's actual results of operations may differ significantly from those contemplated by such forward-looking statements as a result of these and other factors, including factors set forth in our Company's Annual and quarterly reports filed with the Securities Exchange Commission.
