Tyler Technologies' Student Information Software Awarded SIF 2 Certification

Dallas, April 20, 2009 -- Tyler Technologies, Inc. (NYSE: TYL) announced today that the latest release of Tyler Student Information by TEMS, the student information system component of Tyler's School Solution, has been awarded Schools Interoperability Framework (SIF) 2 certification. Tyler's system, which is designed specifically for the K – 12 schools market, received SIF 1.5 certification in 2007.

The SIF Association consists of over 2,200 members, including school districts, states, the U.S. Department of Education, and other pre-K – 12 organizations. Member-defined standards are created to ease the sharing of information for school districts by ensuring the interoperability of multiple software systems. The SIF Association's objective is to make sure that school administrators, teachers and other staff have access to accurate and up-to-date data. Interoperability promotes the exchange of data, reduces redundant data entry and ensures the most accurate data for decision making.

"Having Tyler Technologies complete the SIF 2 Certification for its student information system further proves Tyler's commitment to supporting the use and growth of the SIF Implementation Specification in implementations across the U.S.," said Laurie Collins, utilization director for the SIF Association. "We are proud to have them as active association members."

"For Tyler, the SIF 2 certification of Tyler Student Information by TEMS reflects our ongoing commitment to helping schools maximize their software investment," stated John S. Marr, Jr., president and chief executive officer of Tyler Technologies. "An increasing number of school districts are requiring their software solutions to attain this higher level of certification. In an effort to meet the growing needs of our school clients, we felt it was important to take the next step in interoperability."

Tyler Student Information by TEMS is an integrated, Web-based solution built on the Microsoft .NET platform. It is a highly effective system through which school districts can manage essential data. The solution meets No Child Left Behind requirements.

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to make local government more accessible to the public, more responsive to needs of citizens, and more efficient. Tyler's client base includes more than 8,000 local government offices throughout all 50 states, Canada, Puerto Rico and the United Kingdom. Tyler has been named one of "America's 200 Best Small Companies" for two consecutive years by *Forbes* Magazine. More information about Tyler Technologies can be found at www.tylertech.com.
