OKLAHOMA CITY SELECTS INCODE® MUNICIPAL COURT SOFTWARE FROM TYLER TECHNOLOGIES

Dallas, October 1, 2004 -- Tyler Technologies, Inc. (NYSE: TYL) announced today that the City of Oklahoma City has purchased Tyler's INCODE® software for municipal court applications. In addition, Tyler will provide implementation, training and support services to Oklahoma City. Tyler is providing the municipal court software and related services as a part of an Affiliated Computer Services, Inc. project to develop a comprehensive Integrated Public Safety System for Oklahoma City. The total value of Tyler's contract is approximately $2.2 million.

Tyler's INCODE Municipal Court system has been designed to automate all of the court's operations, from the inception of a case through final adjudication. The system facilitates case management, courtroom scheduling and assignments, warrant and late notice issuance, bond processing, and accounting, collection and auditing of fines and assessed fees.

Included in Tyler's Municipal Court software is a fully integrated document management system. The INCODE Municipal Court system will also be integrated with the City's police records management and other systems to provide the City with a complete integrated computer system.

Oklahoma City will be installing the Microsoft SQL version of INCODE Municipal Court. The implementation is expected to be completed in the third quarter of 2005.

Tyler's INCODE Municipal Court system was first released in 1997 and is currently installed in over 325 sites nationwide. The selection by Oklahoma City illustrates the ability of Tyler's Municipal Court software to scale into larger courts. With a population of more than 523,000, Oklahoma City ranks as the 29th largest city in the nation.

"The Municipal Court of Oklahoma City prides itself on providing outstanding customer service, while maintaining court rules and respect," commented Stacey Davis, Court Administrator for the City of Oklahoma City. "We are excited that our partnership with Tyler Technologies will allow us to continue to provide outstanding customer service, while providing our staff with intuitive and user-friendly software and increasing the capabilities of the Court to manage our ever-growing case load. We look forward to a long relationship with Tyler Technologies."

Dustin R. Womble, Executive Vice President of Tyler Technologies, stated, "The Oklahoma City contract punctuates our growing trend of successes in the Tier 1 and Tier 2 marketplaces. In the past twelve months, the INCODE Municipal Court application has been selected by more than 20 clients in our mid-range to large client market segments. The product's unmatched functionality, feature set, and integration with Microsoft Office and document management systems consistently distinguish it during the selection process."
