TYLER TECHNOLOGIES AND FAIRBANKS, ALASKA, SIGN CONTRACT FOR MUNIS SOFTWARE AND SERVICES

Dallas, June 4, 2007--Tyler Technologies, Inc. (NYSE: TYL) announced today that it has signed a contract with the City of Fairbanks, Alaska to provide Tyler's integrated MUNIS software solution, including application software and services for financial, payroll, utility billing, business license, work order and content management.

"Selecting Tyler's MUNIS solution is the result of careful consideration and analysis," states Andreas A. Bohman, IT Director for the City of Fairbanks. "The City conducted the search with our citizens' needs in mind, and we've found that Tyler's MUNIS software and services provide the most cost-effective financial and human resources solutions. We look forward to implementing MUNIS, and continuing our operations within current and future budgetary demands."

Tyler's ongoing commitment to provide full-service, integrated solutions to all of its clients is supported by deep expertise in the operations of local government. Providing start-to-finish services to the City of Fairbanks, from implementation, consulting and conversion to programming and support, will facilitate the software transition for the City and ensure minimal disruption.

According to Dick Peterson, president of Tyler's MUNIS Financial Management Solutions, "Tyler has unparalleled experience in the business of government-specific products and services. Our established products, highly trained professional staff and commitment to local government clients has translated into our financial and product stability. We're excited about continuing to expand our geographic reach by providing our quality solutions for the City of Fairbanks, which becomes our second client in the state."

The state's second largest city, Fairbanks is located in the heart of Alaska's interior. The City is a regional hub, concentrating major Alaskan economic resources: intellectual capital, natural resource industry, transportation infrastructure, and cold climate testing facilities. The high latitude, polar location of Fairbanks enables travelers to fly to Japan, Europe, and the East Coast in eight hours or less. Fairbanks is also home to the University of Alaska Fairbanks, the oldest college in Alaska. Considered a global city, Fairbanks is well positioned for significant growth.

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to make local government more accessible to the public, more responsive to needs of citizens, and more efficient. Tyler's client base includes more than 6,000 local government offices throughout all 50 states, Canada, Puerto Rico and the United Kingdom. Audit Integrity, an independent research firm, named Tyler one of "America's 100 Most Trustworthy Companies" in April 2007. More information about Tyler Technologies can be found at www.tylertech.com.

Tyler Technologies, Inc. has included in this press release "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 concerning its business and operations. Tyler Technologies expressly disclaims any obligation to release publicly any updates or revisions to these forward-looking statements to reflect any change in its expectations. These expectations and the related statements are inherently subject to risks and uncertainties that could cause actual results to differ materially from those set forth in, contemplated by, or underlying the forward-looking statements. The risks and uncertainties which forward-looking statements are subject to include, but are not limited to, changes in competition, changes in general economic conditions, changes in the budgets and regulatory environments of the Company's customers, risks associated with the development of new products and the enhancement of existing products, the ability to attract and retain qualified personnel, and other risks detailed from time to time in the Company's filings with the Securities and Exchange Commission.
