TYLER TECHNOLOGIES SIGNS CONTRACTS TO PROVIDE EDUCATION MANAGEMENT SOLUTIONS TO SCHOOLS IN VIRGINIA AND ARIZONA

Dallas, June 28, 2007—Tyler Technologies, Inc. (NYSE: TYL) announced today that it has signed contracts to provide the Tyler Education Management Solution (TEMS) for both the Tucson Unified School District of Tucson, Arizona (Tucson), and the Russell County Public Schools of Lebanon, Virginia (Russell).

Both Tucson and Russell are forerunners in their respective states, representing the first school organizations in Virginia and Arizona to adopt the Tyler Education Management Solution. TEMS is a versatile, dynamic system providing a full suite of school information programs and reports to K-12 schools. TEMS includes education-specific applications such as Grade Book, Scheduling, Staff Management, Reporting, Attendance, Discipline, Transportation, as well as a Web-based Parent Portal. TEMS is Schools Interoperability Framework (SIF) certified, and compliant with No Child Left Behind and Qualified Teacher programs. It is rapidly gaining market recognition for its powerful applications and integration capabilities, including integration with Tyler's MUNIS Financial Management Solution. The SIF designation enables TEMS applications to be used with other software programs, facilitating seamless data sharing.

According to Janie G. Overbay, Russell's Database Coordinator, "The Russell County Public School system is delighted to be the first school system in the state of Virginia to fully implement the Tyler Education Management Solution. This is a state-of-the-art student information management system that will allow us to integrate more easily the various operations of the school program. This real-time, Web-based system will move our schools into the twenty-first century in terms of information management, storage, retrieval and disaggregation. TEMS will save our personnel many hours of time because of its enhanced capabilities, and the ease with which our people can be trained with its user-friendly interface."

Tyler's ongoing commitment to provide full-service, integrated solutions to all of its clients is supported by deep expertise in the operations of both education and local government. Providing complete services to clients, from implementation, consulting and conversion to programming and support, Tyler facilitates the system transition and ensures minimal disruption.

Ms. Overbay added, "The amount of support shown by Tyler has been above and beyond anything we could have expected. We look forward to a smooth long-term relationship with Tyler Technologies."

-more-

Lisa Long, Director of Curriculum, Instruction and Technology Integration for the Tucson Unified School District, echoes Russell's enthusiasm. "The Tucson Unified School District looks forward to leading the school systems in the state of Arizona with the first implementation of the Tyler Education Management Solution. The new software will be used to provide electronic scheduling to our middle and high schools. The importance of scheduling, with our students' needs foremost in our minds, is critical to our organization."

Located in southwestern Virginia, the Russell County Public School system serves approximately 4,200 students in pre-kindergarten through the twelfth grade. There are four primary schools, six elementary schools, one middle school, three high schools, an alternative school, and a career and technology center. The service area of the school district is Russell County, with a population of approximately 30,000.

The Tucson Unified School District is the largest school district in Tucson, Arizona's second largest city and the 32nd largest city in the country. Home to nearly 60,000 students, 3,700 teachers, 3,600 support staff and 200 administrators, the district includes more than 100 schools.

Richard Peterson, president of Tyler's MUNIS Financial Management Solutions, commented, "Tyler is pleased to welcome both the Tucson Unified School District and the Russell County Public Schools to our growing list of schools using Tyler's Education Management Solution. Their choice is clear evidence of TEMS' rich functionality—and of Tyler's expertise in identifying what schools need, designing the right products, and smoothly implementing the solutions. We look forward to our continued relationship with each of these districts and the expansions of TEMS into two new states."

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to make local government more accessible to the public, more responsive to needs of citizens, and more efficient. Tyler's client base includes more than 6,000 local government offices throughout all 50 states, Canada, Puerto Rico and the United Kingdom. Audit Integrity, an independent research firm, named Tyler one of "America's 100 Most Trustworthy Companies" in April 2007. More information about Tyler Technologies can be found at www.tylertech.com.

Tyler Technologies, Inc. has included in this press release "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 concerning its business and operations. Tyler Technologies expressly disclaims any obligation to release publicly any updates or revisions to these forward-looking statements to reflect any change in its expectations. These expectations and the related statements are inherently subject to risks and uncertainties that could cause actual results to differ materially from those set forth in, contemplated by, or underlying the forward-looking statements. The risks and uncertainties which forward-looking statements are subject to include, but are not limited to, changes in competition, changes in general economic conditions, changes in the budgets and regulatory environments of the Company's customers, risks associated with the development of new products and the enhancement of existing products, the ability to attract and retain qualified personnel, and other risks detailed from time to time in the Company's filings with the Securities and Exchange Commission.
