# Tyler Technologies Boosts Land & Vital Records Solution Success in Texas with Two County Contracts

**Dallas, April 3, 2009** -- Tyler Technologies, Inc. (NYSE: TYL) has signed contracts with Texas' Henderson and Morris Counties to provide their respective clerk's offices with Tyler's Land & Vital Records solution. These latest agreements bring the total number of Texas clients using Tyler's Eagle software to 18.

Henderson and Morris Counties both opted for a six-year agreement under which Tyler will provide its Land & Vital Records software, as well as network hardware and software. Additionally, Tyler will provide ongoing maintenance and support.

Web-hosted public access will enable Henderson County to offer managed access to data, images and other content related to its Tyler software. Citizens will benefit from the added convenience of being able to view available information online at any time, while County staff will reduce time spent handling inquiries related to files now accessible online. Henderson County also has invested in e-commerce and document preservation services. The County has used Tyler's courts and justice solution since 1998. Athens is the county seat.

"With Tyler's solution, we look forward to providing managed, secured public access to data, images and other records online. We have complete confidence in Tyler's system for recording/filing, imaging, indexing and retrieval of land and vital records, and feel that the Cashiering system will benefit us greatly," commented Gwen Moffeit, Henderson County clerk. "We trust Tyler's Web security to limit public access so records are viewed only when and if they should be. We realize the importance of County records and we appreciate the proven professionalism we have seen displayed by Tyler."

In addition to purchasing Tyler Quickdocs, Henderson County recognized the value of Tyler's Disaster Recovery services, choosing to invest in the security option. With Disaster Recovery services, Tyler will transparently retrieve a nightly copy of the County's data, which will be hosted at Tyler's secure facility. Should Henderson County experience unforeseen problems, Tyler will get its critical processes running within hours.

Morris County, whose seat is Daingerfield and which has used Tyler's courts and justice solution since 1999, has selected Tyler's Recorder and Clerk applications. The County will deploy Tyler Content Manager Enterprise Edition and receive indexing and rekeying services.

"Through deployment of Tyler's Land & Vital Records solution, these Texas counties will enhance the management of records, improve access to such documents and protect their valuable data," stated Brett Cate, president of Tyler's Eagle Solutions. "We're pleased to provide these counties with a solution that can satisfy their needs and enable them to improve services to their constituents."

-more-

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to make local government more accessible to the public, more responsive to needs of citizens, and more efficient.
