Tyler Technologies Signs Sixth Statewide Courts & Justice Contract with State of South Dakota, Valued at $8.8 Million

Dallas, February 23, 2010 -- Tyler Technologies, Inc. (NYSE: TYL**)** has signed a contract with the State of South Dakota Unified Judicial System to implement its Odyssey® Courts & Justice solutions in circuit courts throughout the state. The agreement, valued at more than $8.8 million, includes software licenses, professional services, ongoing maintenance, and support. South Dakota represents Tyler's sixth statewide Odyssey client, joining Minnesota, New Hampshire, New Mexico, Indiana, and North Dakota.

Experts in implementing integrated case management systems, Tyler can configure its Courts & Justice solutions for any size client, from the smallest court to large, statewide judiciaries like South Dakota. Tyler's case management system will streamline court administration and access to case information across the state's 66 counties and seven judicial circuits. In addition to Case Manager, the state will implement Odyssey's Courtroom, Supervision, and eSignatures, as well as a statewide Document Management solution that includes Wiznet eFile & Serve, the industry's leading e-filing solution recently acquired by Tyler.

In late 2007, the state's Unified Judicial System completed an information technology strategic plan as part of a joint effort with the National Center for State Courts. The majority of the strategic objectives identified in the plan were linked directly to the need for a new case management system.

"Our legacy case management system was implemented in the 1980s and we clearly needed to replace it with a system that provided robust functionality, maintainability, and ease of use," explained South Dakota State Court Administrator Patricia Duggan. "We conducted a year-long, thorough evaluation of the products in the marketplace to ensure that we identified the most comprehensive solution to meet our needs. We were looking for a product that offered complete integration — a product where everyone can share critical information. With its across-the-board technology and proven track record in other states, we concluded that Tyler was the right partner to deliver this system."

"It's a privilege to welcome South Dakota to our growing family of statewide Odyssey clients," commented Bruce Graham, president of Tyler's Courts & Justice Division. "The state's thorough review of available options and ultimate decision to go with Tyler underscores their confidence in our ability to deliver a proven case management solution. Our applications consistently provide exceptional functionality, increased efficiencies, and integration capabilities for our clients, regardless of size or organizational complexity."

- more -

Covering an area of more than 77,000 square miles, South Dakota is the 17th largest state in the country. Carved out of the Dakota Territory and admitted to the Union in 1889, the state was named after the Lakota and Dakota Sioux American Indian tribes. Centrally located, Pierre is the capital and Sioux Falls is the largest city. Mount Rushmore is a major state tourist destination located in the Black Hills in the southwest part of the state.

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to enable the public sector–cities, counties, schools and other government entities–to become more efficient, more accessible, and more responsive to the needs of citizens. Tyler's client base includes more than 9,000 local government offices throughout all 50 states, Canada, Puerto Rico and the United Kingdom. Tyler has been named one of "America's 200 Best Small Companies" for three consecutive years by *Forbes* Magazine. More information about Tyler Technologies can be found at www.tylertech.com.

This document may contain "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 that are not historical in nature and typically address future or anticipated events, trends, expectations or beliefs with respect to our financial condition, results of operations or business. Forward-looking statements often contain words such as "believes," "expects," "anticipates," "foresees," "forecasts," "estimates," "plans," "intends," "continues," "may," "will," "should," "projects," "might," "could" or other similar words or phrases. Similarly, statements that describe our business strategy, outlook, objectives, plans, intentions or goals also are forward-looking statements. We believe there is a reasonable basis for our forward-looking statements, but they are inherently subject to risks and uncertainties and actual results could differ materially from the expectations and beliefs reflected in the forward-looking statements. We presently consider the following to be among the important factors that could cause actual results to differ materially from our expectations and beliefs: (1) economic, political and market conditions, including the recent global economic and financial crisis, and the general tightening of access to debt or equity capital; (2) our ability to achieve our financial forecasts due to various factors, including project delays by our customers, reductions in transaction size, fewer transactions, delays in delivery of new products or releases or a decline in our renewal rates for service agreements; (3) changes in the budgets or regulatory environments of our customers, primarily local and state governments, that could negatively impact information technology spending; (4) technological and market risks associated with the development of new products or services or of new versions of existing or acquired products or services; (5) our ability to successfully complete acquisitions and achieve growth or operational synergies through the integration of acquired businesses, while avoiding unanticipated costs and disruptions to existing operations; (6) competition in the industry in which we conduct business and the impact of competition on pricing, customer retention and pressure for new products or services; (7) the ability to attract and retain qualified personnel and dealing with the loss or retirement of key members of management or other key personnel; and (8) costs of compliance and any failure to comply with government and stock exchange regulations. A detailed discussion of these factors and other risks that affect our business are described in our filings with the Securities and Exchange Commission, including the detailed "Risk Factors" contained in our most recent annual report on Form 10-K. We expressly disclaim any obligation to publicly update or revise our forward-looking statements.
