Tyler Technologies Wins Public Safety Software Contract in Midwest City, Oklahoma

Dallas, April 9, 2010 -- Tyler Technologies, Inc. (NYSE: TYL) has reached an agreement with the City of Midwest City, Oklahoma, for the purchase of its Tyler Public Safety solution—broadening Tyler's Public Safety client base in Oklahoma. The solution's applications include Tyler's Computer-Aided Dispatch (CAD), Jail & Property Management, Mobile Citations, and Records Management.

As part of the contract, the Municipal Court of Midwest City has also purchased Tyler's Incode Court Case Management, a fully integrated, graphical application that provides case management, document processing, and cash and bond management.

"While these departments have a way to communicate with each other, it doesn't work very well because they each have different and antiquated software," noted Midwest City Information Technology (IT) Supervisor Allen Stephenson. "With Tyler Public Safety and Tyler's Incode Court Case Management, everyone involved will be operating on the same integrated solution, making the whole process more efficient."

Tyler's solution will allow City departments to track information from the first 911 call to the response from Police and/or Fire, and then in some cases all the way into municipal court proceedings. "From an IT perspective, this software makes it easier to support these departments," Stephenson stated. "It will give them more functionality, better reporting and will allow them all to share their information."

Tyler's Public Safety products are used around the country by police, sheriff, tribal police, transit authority police, and postal police departments, as well fire and rescue units. They offer mobile communications, comprehensive records management, GIS systems to track mobile unit activity, and business and residential alarm system registration. The solution conforms to Uniform Crime Reporting (UCR) standards and integrates with the National Crime Information Center (NCIC).

"Midwest City recognizes that selecting the right tools for the job is critical, especially when the safety of citizens, law enforcement officials, and fire and rescue personnel is at stake," commented Brett Cate, president of Tyler's Local Government Division. "With Tyler's solutions, Midwest City will realize better integration and management of its public safety operations and improved access to records and

- more -

documents. We are pleased to provide the City with solutions that will improve department efficiencies and help its public safety employees better serve their citizens."

Located in the heart of Oklahoma, Midwest City is part of the Oklahoma City metropolitan area, just eight miles from that capital city. With a population of 56,400 it is the seventh largest city in the state. Incorporated in 1943, it lies immediately north of Tinker Air Force Base, the largest single-site employer in Oklahoma.

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector–cities, counties, schools and other government entities–to become more efficient, more accessible, and more responsive to the needs of citizens. Tyler's client base includes more than 9,000 local government offices throughout all 50 states, Canada, Puerto Rico and the United Kingdom. Tyler has been named one of "America's 200 Best Small Companies" for three consecutive years by *Forbes* Magazine. More information about Tyler Technologies can be found at www.tylertech.com.

This document may contain "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 that are not historical in nature and typically address future or anticipated events, trends, expectations or beliefs with respect to our financial condition, results of operations or business. Forward-looking statements often contain words such as "believes," "expects," "anticipates," "foresees," "forecasts," "estimates," "plans," "intends," "continues," "may," "will," "should," "projects," "might," "could" or other similar words or phrases. Similarly, statements that describe our business strategy, outlook, objectives, plans, intentions or goals also are forward-looking statements. We believe there is a reasonable basis for our forward-looking statements, but they are inherently subject to risks and uncertainties and actual results could differ materially from the expectations and beliefs reflected in the forward-looking statements. We presently consider the following to be among the important factors that could cause actual results to differ materially from our expectations and beliefs: (1) economic, political and market conditions, including the recent global economic and financial crisis, and the general tightening of access to debt or equity capital; (2) our ability to achieve our financial forecasts due to various factors, including project delays by our customers, reductions in transaction size, fewer transactions, delays in delivery of new products or releases or a decline in our renewal rates for service agreements; (3) changes in the budgets or regulatory environments of our customers, primarily local and state governments, that could negatively impact information technology spending; (4) technological and market risks associated with the development of new products or services or of new versions of existing or acquired products or services; (5) our ability to successfully complete acquisitions and achieve growth or operational synergies through the integration of acquired businesses, while avoiding unanticipated costs and disruptions to existing operations; (6) competition in the industry in which we conduct business and the impact of competition on pricing, customer retention and pressure for new products or services; (7) the ability to attract and retain qualified personnel and dealing with the loss or retirement of key members of management or other key personnel; and (8) costs of compliance and any failure to comply with government and stock exchange regulations. A detailed discussion of these factors and other risks that affect our business are described in our filings with the Securities and Exchange Commission, including the detailed "Risk Factors" contained in our most recent annual report on Form 10-K. We expressly disclaim any obligation to publicly update or revise our forward-looking statements.
