Commentary

- Net interest income increased $3.6MM from 2Q'20 as a result of growth in all categories of interest-earning assets and the positive impact of PPP loan forgiveness; and decreased $125K from 1Q'21 due to the lower interest rate environment and less accretion of fees from PPP loans.
- Noninterest income increased $477K from 2Q'20 primarily due to higher service charges on deposits ($807K); investment advisory fees ($635K); income from investments in limited partnerships ($482K); card interchange income ($418K); and insurance income ($328K); partially offset by lower income from derivative instruments ($2.5MM). Decreased $2.8MM from 1Q'21 primarily due to lower income from derivative instruments ($2.5 MM).
- Noninterest expense increased $369K from 2Q'20 primarily due to higher computer and data processing expense ($761K) partially offset by lower salaries and benefits ($555K); and increased $204K from 1Q'21 due to higher computer and data processing expense ($339K) partially offset by lower professional services ($292K).

(1) Refer to "Non-GAAP Reconciliation" in Appendix.

(2) Efficiency ratio is calculated by dividing noninterest expense by net revenue, i.e., the sum of net interest income (fully taxable equivalent) and noninterest income before net gains on investment securities. This is a banking industry measure not required by GAAP.

Non-GAAP Reconciliation

In addition to results presented in accordance with U.S. generally accepted accounting principles ("GAAP"), this presentation contains certain non-GAAP financial measures. The Company believes that providing certain non-GAAP financial measures provides investors with information useful in understanding our financial performance, performance trends and financial position. Our management uses these measures for internal planning and forecasting purposes and we believe that our presentation and discussion, together with the accompanying reconciliations, allows investors, security analysts and other interested parties to view our performance and the factors and trends affecting our business in a manner similar to management. These non-GAAP measures should not be considered a substitute for GAAP measures and we strongly encourage investors to review our consolidated financial statements in their entirety and not to rely on any single financial measure to evaluate the Company. Non-GAAP financial measures have inherent limitations, are not uniformly applied and are not audited. Because non-GAAP financial measures are not standardized, it may not be possible to compare these financial measures with other companies' non-GAAP financial measures having the same or similar names.
