41 Non-GAAP reconciliations

The following terms are used throughout this presentation to refer to certain SVB-specific metrics:

- **Core Fee Income –** fees from letters of credit, client investments, credit cards, deposit service charges, foreign exchange and lending-related fees, in aggregate. This is a non-GAAP measure. Please see non-GAAP reconciliations at the end of this presentation for more information.
- **Total Client Funds –** the sum of on-balance sheet deposits and off-balance sheet client investment funds.
- **Fixed Income Securities –** Comprised primarily of available-for-sale ("AFS") and held-to-maturity ("HTM") securities held on the balance sheet.

Important information

Forward-Looking Statements

This presentation contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are neither historical facts nor assurances of future performance, and are subject to known and unknown risks and uncertainties, many of which may be beyond our control. You can identify these and other forward-looking statements by the use of words such as "becoming," "may," "will," "should," "could," "would," "predict," "potential," "continue," "anticipate," "believe," "estimate," "seek," "expect," "plan," "intend," the negative of such words, or comparable terminology. In this presentation, we make forward-looking statements discussing management's expectations about, among other things: economic conditions; opportunities in the market; outlook on our clients' performance; our financial, credit, and business performance, including potential investment gains, loan growth, loan mix, loan yields, credit quality, deposits, noninterest income, and expense levels; and financial results (and the components of such results) for certain quarters in, and for the full year 2018. Although we believe that the expectations reflected in these forward-looking statements are reasonable, we have based these expectations on our current beliefs as well as our assumptions, and such expectations may prove to be incorrect.

We wish to caution you that such statements are just predictions and actual events or results may differ materially, due to changes in economic, business and regulatory factors and trends. Our actual results of operations and financial performance could differ significantly from those expressed in or implied by our management's forward-looking statements. Important factors that could cause our actual results and financial condition to differ from the expectations stated in the forward-looking statements include, among others: deterioration, weaker than expected improvement, or other changes in the state of the economy or the markets in which we conduct business or are served by us (including the levels of IPOs and M&A activities); changes in the volume and credit quality of our loans; the impact of changes in interest rates or market levels or factors affecting or affected by them, especially on our loan and investment portfolios; changes in our deposit levels; changes in the performance or equity valuations of funds or companies in which we have invested or hold derivative instruments or equity warrant assets; variations from our expectations as to factors impacting our cost structure; changes in our assessment of the creditworthiness or liquidity of our clients or unanticipated effects of credit concentration risks which create or exacerbate deterioration of such creditworthiness or liquidity; accounting changes, as required by Generally Accepted Accounting Principles (GAAP); and regulatory, tax or legal changes or their impact on us.

We refer you to the documents the Company files from time to time with the Securities and Exchange Commission, including (i) our latest Annual Report on Form 10-K; (ii) our latest Quarterly Report on Form 10-Q; and (iii) our most recent earnings release filed on Form 8-K. These documents contain and identify important risk factors that could cause the Company's actual results to differ materially from those contained in our projections or other forward-looking statements. All forward-looking statements included in this presentation are made only as of the date of this presentation. We assume no obligation and do not intend to revise or update any forward-looking statements contained in this presentation, except as required by law.

This presentation shall not constitute an offer or solicitation in connection with any securities.

Use of Non-GAAP Financial Measures

To supplement our financial disclosures that are presented in accordance with GAAP, we use certain non-GAAP measures of financial performance (including, but not limited to, non-GAAP core fee income, non-GAAP noninterest income, non-GAAP net gains on investment securities, non-GAAP non-marketable and other securities, non-GAAP noninterest expense and non-GAAP financial ratios) of financial performance. These supplemental performance measures may vary from, and may not be comparable to, similarly titled measures by other companies in our industry. Non-GAAP financial measures are not in accordance with, or an alternative for, GAAP. Generally, a non-GAAP financial measure is a numerical measure of a company's performance that either excludes or includes amounts that are not normally excluded or included in the most directly comparable measure calculated and presented in accordance with GAAP. A non-GAAP financial measure may also be a financial metric that is not required by GAAP or other applicable requirement.

We believe that these non-GAAP financial measures, when taken together with the corresponding GAAP financial measures (as applicable), provide meaningful supplemental information regarding our performance by: (i) excluding amounts attributable to non-controlling interests for which we effectively do not receive the economic benefit or cost of, where indicated, or (ii) providing additional information used by management that is not otherwise required by GAAP or other applicable requirements. Our management uses, and believes that investors benefit from referring to, these non-GAAP financial measures in assessing our operating results and when planning, forecasting and analyzing future periods. These non-GAAP financial measures also facilitate a comparison of our performance to prior periods. We believe these measures are frequently used by securities analysts, investors and other interested parties in the evaluation of companies in our industry. However, these non-GAAP financial measures should be considered in addition to, not as a substitute for or superior to, net income or other financial measures prepared in accordance with GAAP. Under the "Non-GAAP reconciliations" section at the end of this presentation, we have provided reconciliations of, where applicable, the most comparable GAAP financial measures to the non-GAAP financial measures used in this presentation, or a reconciliation of the non-GAAP calculation of the financial measure. Please refer to that section for more information.

SVB: A unique financial services company

35 years of focus on innovation companies, investors and influencers

Strong market position

Strong Market Tailwinds in First Half 2018

Strong Liquidity

- Strong VC funding ($57.5B), exceeds full year total for six of the past 10 years
- Improving pace of U.S. VC-backed, Tech/LS IPOs (43)
- Healthy valuation trends in public/private markets

Higher Interest Rates

- Fed Funds +25 bps in March and June
- 1M LIBOR +53 bps
  3M LIBOR +65 bps
- 5Y Treasury +53 bps

Lower Taxes

- SVB's effective tax rate decreased to 25.9%, compared to 42.0% for FY 2017 and reflects:
  - Federal tax cuts
  - Share-based comp. excess tax benefits

Q2'18 takeaways

EPS: $4.42

Net Income: $238 million

Highlights (vs. Q1'18)

- **Outstanding Growth**
  - Average total client funds: +8.0%
    - Average client funds: +10.8%
    - Average deposit growth: +4.0%
  - Average loans: +4.4%
  - Net interest income: +11.2%
  - Core fee income: +7.1%
  - Investment gains, net of NCI: $26.4M
  - Efficiency ratio: 46.4%
  - Return on equity: 20.82% (+270 bps)
- **Non-interest expense: +15.2%**
- **Stable credit quality**
- **Lower effective tax rate**
- **Bank Tier 1 Leverage ratio: 7.72% (+3 bps)**
- **Improved revenue growth outlook as a result of June rate hike**
- **Regulatory relief from passage of Regulatory Relief Act***

Challenges

- **Improved momentum in exit markets, but still not back to historical levels**
- **Impact of market liquidity on valuations and loan growth**
- **Market anxiety over escalating global trade/tariff war**

* Economic Growth, Regulatory Relief and Consumer Protection Act

Q2'18 key earnings drivers

Positive earnings impact

- +$48.5M of loan and investment interest income from strong loan and deposit growth, higher rates
- +$8.1M of core fees due to higher client investment fees driven by higher balances and spreads
- $19.1M of equity warrant gains due to positive funding and exit environments for our clients
- $26.4M of investment securities gains, net of NCI, due to positive funding and exit environments for our clients
- Lower income tax expense due to excess tax benefits from share-based compensation (24.5% effective tax rate)
- Stable credit quality

Negative earnings impact

+$40.3M of noninterest expense including

- $16.2M of higher compensation and benefits expense, mostly related to outperformance and investments in people
- $12.0M for planned investments in our processes and growth initiatives
- $7.0M write-off of previously capitalized costs related to CCAR preparation*

* As a result of the passage of the Economic Growth , Regulatory Relief and Consumer Protection Act. which will raise the SIFI threshold from $50B to $250B, investments in software/systems for SIFI preparation that were no longer needed were written off. The total write-off was $7.0M of which $6.0M was previously capitalized professional services costs and $1.0M was capitalized employee compensation costs.

Quarterly highlights

	Q2'17	Q3'17	Q4'17[1]	Q1'18	Q2'18
Diluted earnings per share	$2.32	$2.79	$2.19	$3.63	$4.42
Net income available to common stockholders	$123.2M	$148.6M	$117.2M	$195.0M	$237.8M
Average loans	$20.5B	$21.6B	$22.4B	$23.8B	$24.9B
Change	*2.2%*	*5.2%*	*4.0%*	*6.1%*	*4.4%*
Average deposits	$42.1B	$44.0B	$44.8B	$46.1B	$48.0B
Change	*5.5%*	*4.5%*	*1.7%*	*3.0%*	*4.0%*
Average off-balance sheet client investment funds	$49.1B	$53.3B	$57.6B	$64.4B	$71.3B
Change	*6.5%*	*8.5%*	*8.1%*	*11.8%*	*10.8%*
Average fixed income securities	$21.5B	$23.1B	$23.8B	$24.0B	$25.2B
Net interest margin	3.00%	3.10%	3.20%	3.38%	3.59%
Net interest income	$342.7M	$374.0M	$393.7M	$419.9M	$466.4M
GAAP non-interest income	$128.5M	$158.8M	$152.3M	$155.5M	$192.7M
Non-GAAP non-interest income, net of non-controlling interests[2]	$119.0M	$153.2M	$144.5M	$142.5M	$183.2M
Net charge-offs / Average total gross loans (annualized)	0.44%	0.19%	0.23%	0.15%	0.22%
Non-interest expense	$251.2M	$257.8M	$264.0M	$265.4M	$305.7M
Effective tax rate[3]	36.78%	39.58%	53.54%	27.50%	24.53%
Return on average SVBFG stockholders' equity (annualized)	12.75%	14.59%	11.09%	18.12%	20.82%
Return on average assets (annualized)	1.04%	1.18%	0.92%	1.51%	1.75%

1) EPS was impacted $0.80 due to the $37.6M of additional income tax expense due to tax reform and $8.8M of pre-tax losses on AFS security sales in connection with our treasury and tax management objectives.
2) This is a non-GAAP measure. Please see non-GAAP reconciliations at end of this presentation for more information.
3) Our effective tax rate is calculated by dividing income tax expense by the sum of income before income tax expense and net income attributable to noncontrolling interests. Q4'17 included $37.6M of additional income tax expense due to the revaluation of deferred tax assets and investments in low income housing tax credit funds following tax reform.

Annual highlights

	2014	2015	2016	2017[2,3]	6/30/18 YTD
Diluted earnings per share	$5.31[1]	$6.62	$7.31	$9.20[4]	$8.05
Net income available to common stockholders	$263.9M[1]	$343.9M	$382.7M	$490.5M	$432.8M
Average loans *Change*	$11.5B *23.0%*	$14.8B *28.3%*	$18.3B *23.8%*	$21.2B *15.7%*	$24.3B *14.6%*

Average off-balance sheet client investment funds *Change*	$30.0B 24.0%	$39.2B 30.6%	$43.4B 10.5%	$51.5B 18.8%	$67.8B 31.7%
Average fixed-income securities[5]	$16.6B	$22.3B	$21.5B	$22.4B	$24.6B
Net interest margin	2.81%	2.57%	2.72%	3.05%	3.50%
Net interest income	$856.6M	$1,006.4M	$1,150.5M	$1,420.4M	$886.3M
GAAP non-interest income	$572.2M	$472.8M	$456.6M	$557.2M	$348.2M
Non-GAAP non-interest income , net of non-controlling interests[6]	$352.5M	$441.1M	$448.5M	$527.8M	$325.7M
Net charge-offs / Average total gross loans (annualized)	0.32%	0.30%	0.46%	0.27%	0.18%
Non-interest expense	$700.7M	$780.0M	$859.8M	$1,010.7M	$571.2M
Effective tax rate[7]	41.02%	39.95%	39.55%	42.02%	25.90%
Return on average SVBFG stockholders' equity (annualized)	10.46%[1]	11.18%	10.90%	12.38%	19.51%
Return on average assets (annualized)	0.80%[1]	0.84%	0.87%	1.01%	1.63%

1) Includes post-tax net loss of $11.4M related to the sale of our SVBIF entity in India
2) Included in diluted earnings per common share and net income available to common stockholders in 2017 and 2018 are tax benefits recognized associated with the adoption of Accounting Standards Update 2016-09, Improvements to Employee Share-Based Payment Accounting in the first quarter of 2017. This guidance was adopted on a prospective basis with no changes to prior period amounts.
3) In Q1'17 we revised prior periods' presentation of noninterest expense to conform to the current period presentation, which reflect our provision for loan losses and provision for unfunded credit commitments together as our "provision for credit losses". In prior periods' presentation, our provision for unfunded credit commitments were reported as a component of noninterest expense. All prior periods have been revised to reflect this change.
4) EPS was impacted $0.80 due to the $37.6M of additional income tax expense due to tax reform and $8.8M of losses on AFS security sales in connection with our treasury and tax management objectives.
5) Includes available-for-sale and held-to-maturity securities held on the balance sheet
6) Non-GAAP noninterest income, net of non-controlling interests is a non-GAAP measure. Please see non-GAAP reconciliations at end of this presentation for more information
7) Our effective tax rate is calculated by dividing income tax expense by the sum of income before income tax expense and net income attributable to noncontrolling interests. Included in 2017 is $37.6M of additional income tax expense due to the revaluation of deferred tax assets and investments in low income housing tax credit funds following tax reform.

2018 full-year outlook (as of 7/26/2018)

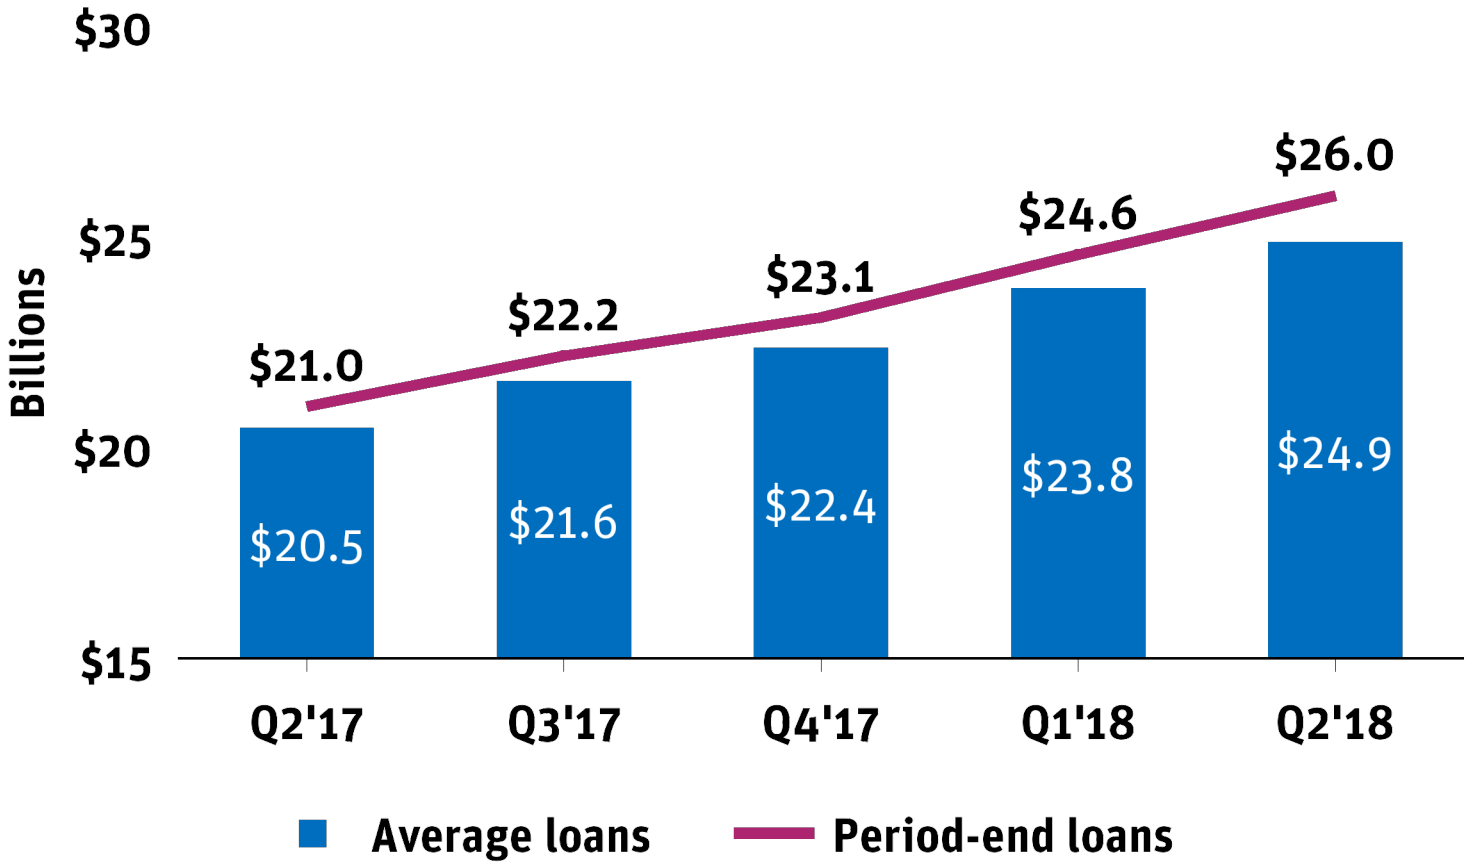
Please see our most recent Financial Release and earnings call transcript for complete information on management's assumptions and forecasts regarding this outlook.

Business Driver	2018 Full Year Outlook vs. 2017 Full Year Results	Change from 4/26/18
Average loans	Increase at a percentage rate in the high teens	No change
Average deposits	Increase at a percentage rate in the low teens	**Outlook increased** to low teens from previous outlook of low double digits
Net interest income	Increase at a percentage rate in the mid thirties	**Outlook increased** to mid thirties from previous outlook of low thirties
Net interest margin	Between 3.55% and 3.65%	**Outlook increased** to between 3.55% and 3.65% from previous outlook of 3.50% and 3.60%
Allowance for loan losses for total gross performing loans as a % of total gross performing loans	Comparable to 2017 levels	No change
Net loan charge-offs	Between 0.20% and 0.40% of avg. total gross loans	**Outlook decreased** to between 0.20% and 0.40% of avg. total gross loans from previous outlook of 0.30% and 0.50%
Non-performing loans/total gross loans	Between 0.40% and 0.60% of total gross loans	**Outlook decreased** to between 0.40% and 0.60% of total gross loans from previous outlook of 0.50% and 0.70%
Core fee income*	Increase at a percentage rate in the low thirties	**Outlook increased** to low thirties from previous outlook of high twenties
Non-interest expense (excluding expenses related to non-controlling interests)*	Increase at a percentage rate in the low teens	**Outlook increased** to low teens from previous outlook of low double digits
Effective Tax Rate	Between 26.0% and 28.0%	**Outlook decreased** to between 26.0% and 28.0% from previous outlook of between 27.0% and 30.0%

* These are non-GAAP measures

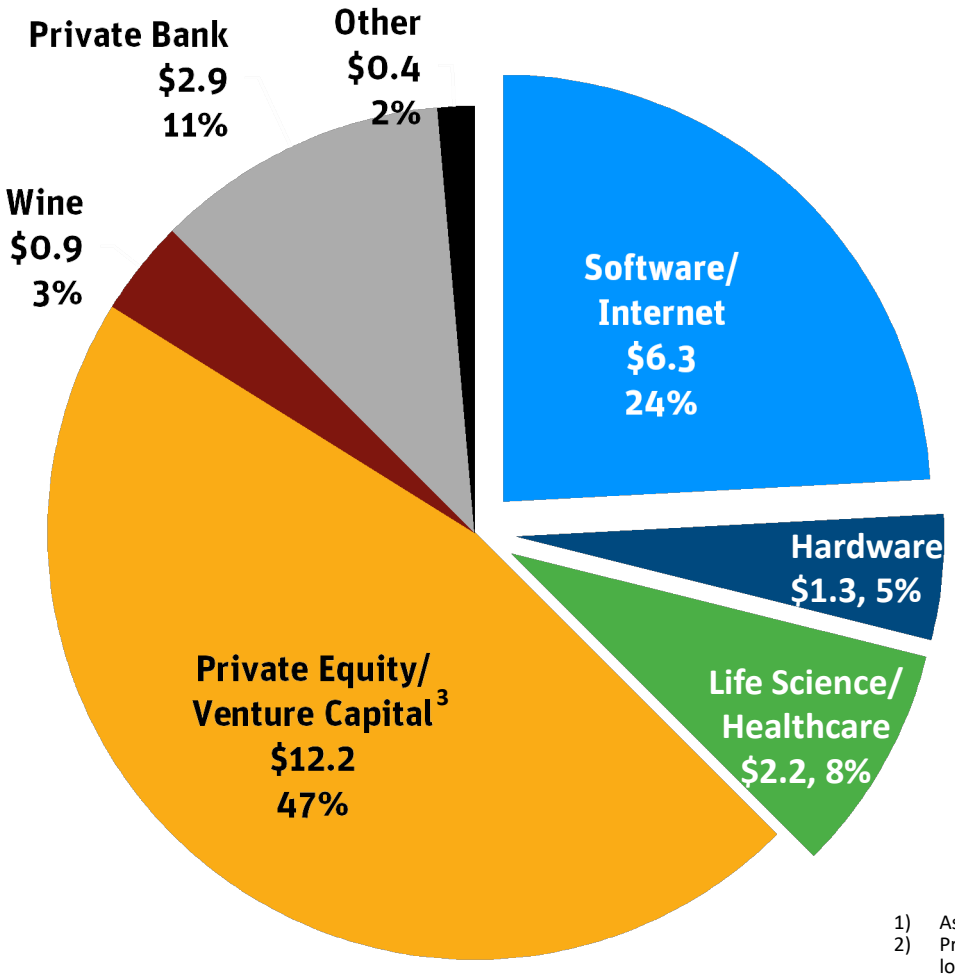
Q2'18: Average loans grew 4.4%

Growth driven primarily by Private Equity and Private Bank

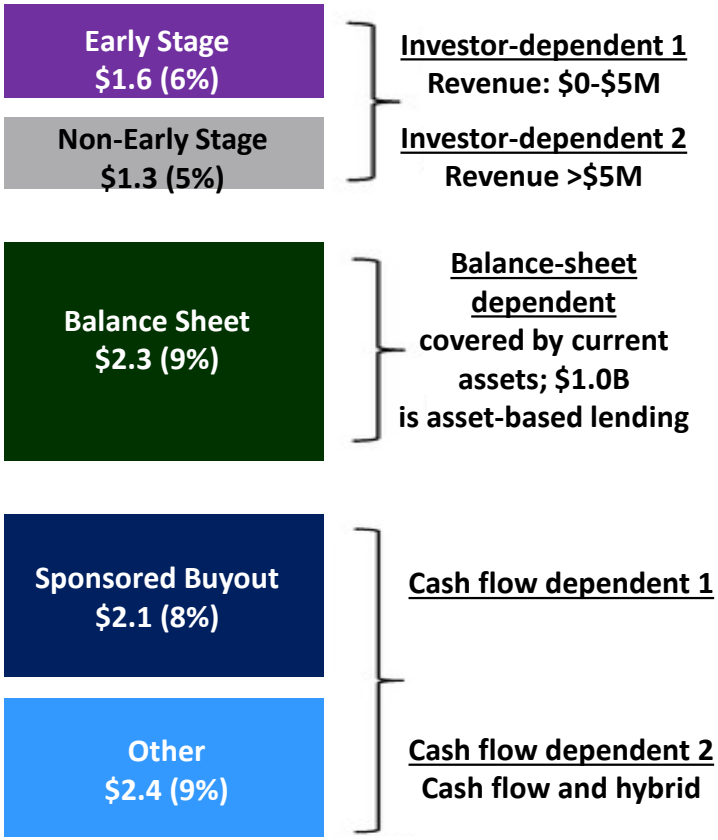


A diversified loan portfolio

Gross Loans: $26.2 billion[1,2]



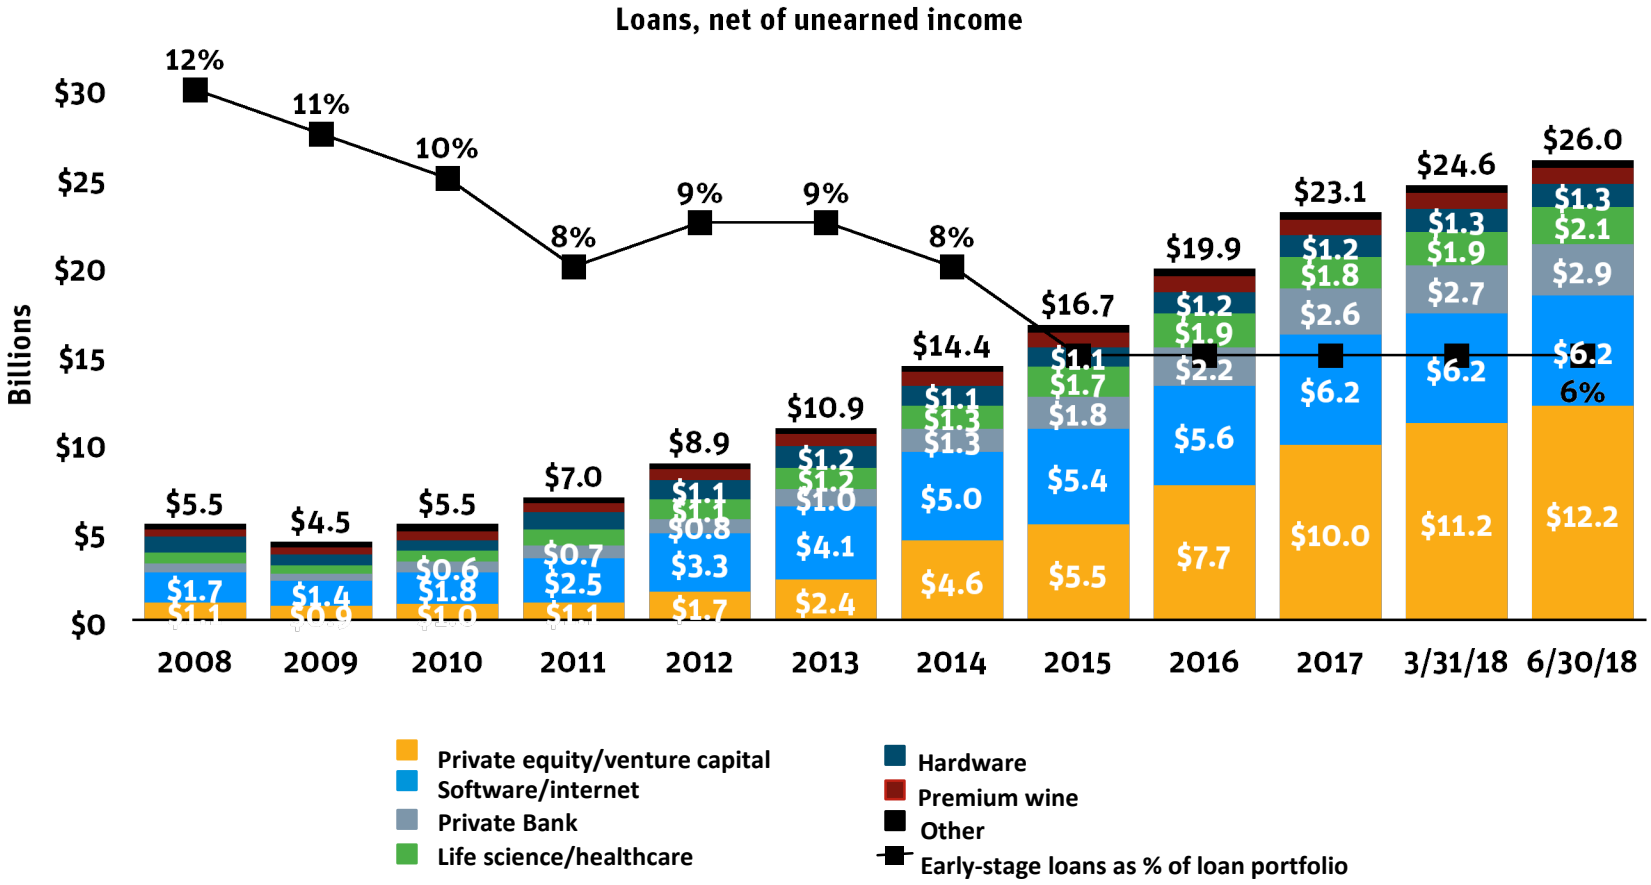
Technology and Life Science/Healthcare Only[1]
$9.8 billion (37% of Gross Loans)



1) As of 6/30/2018; gross loans do not include deferred fees and costs.
2) Private Bank includes loans designated as Consumer Loans (including real estate secured loans) in our earnings releases and our Form 10-K and 10-Q reports.
3) Primarily capital call lines of credit

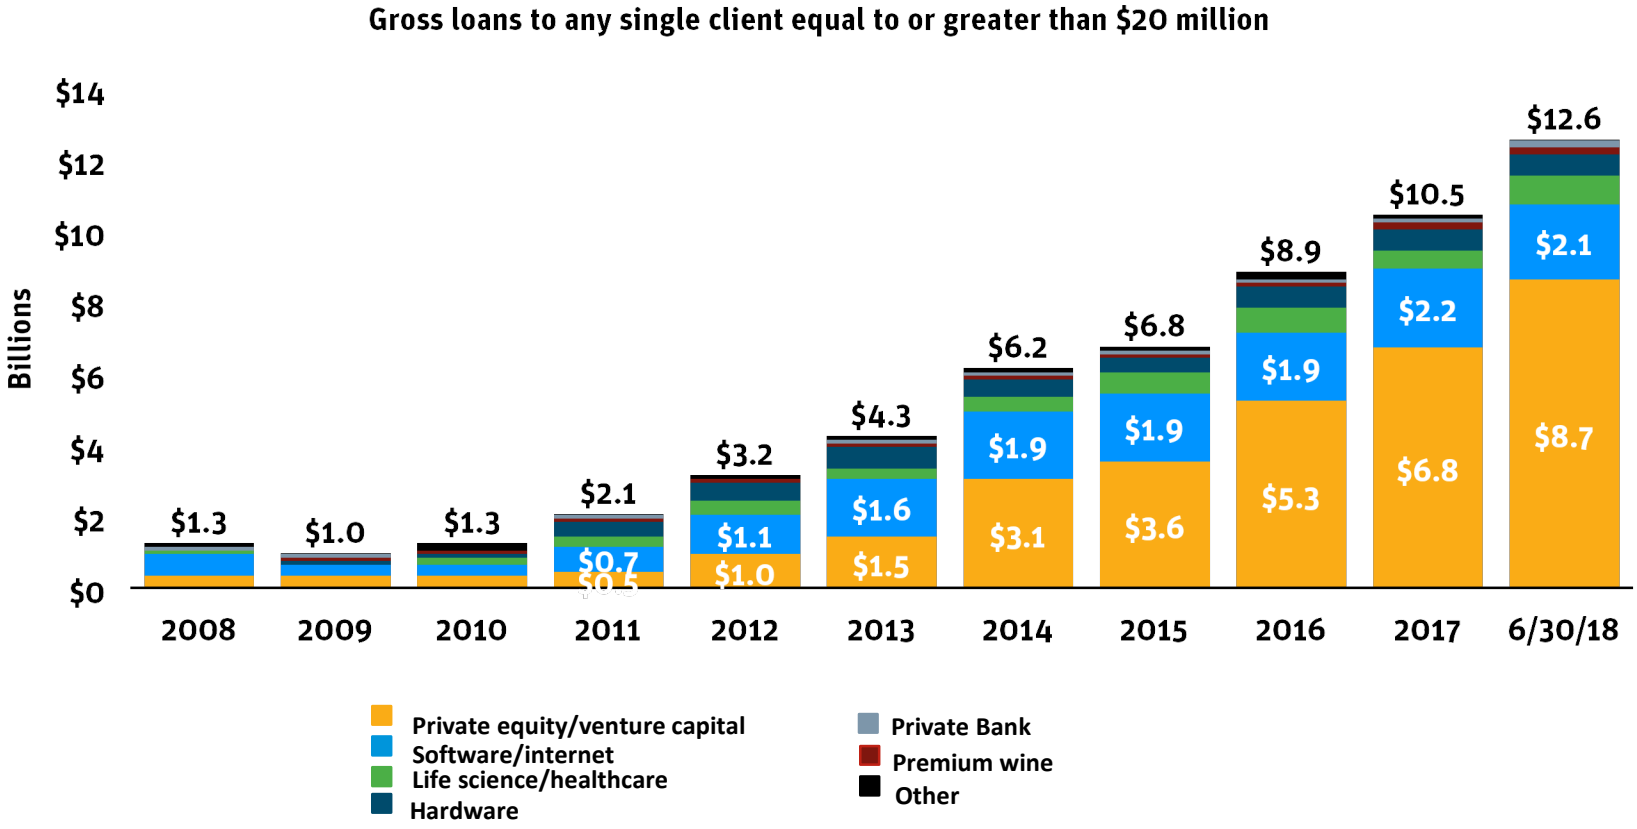
Our loan portfolio has evolved over time

- Private Equity has driven the majority of recent growth, although we have seen growth in all niches
- Our Private Equity portfolio has historically been characterized by lower yields (relative to the rest of our portfolio) and high credit quality



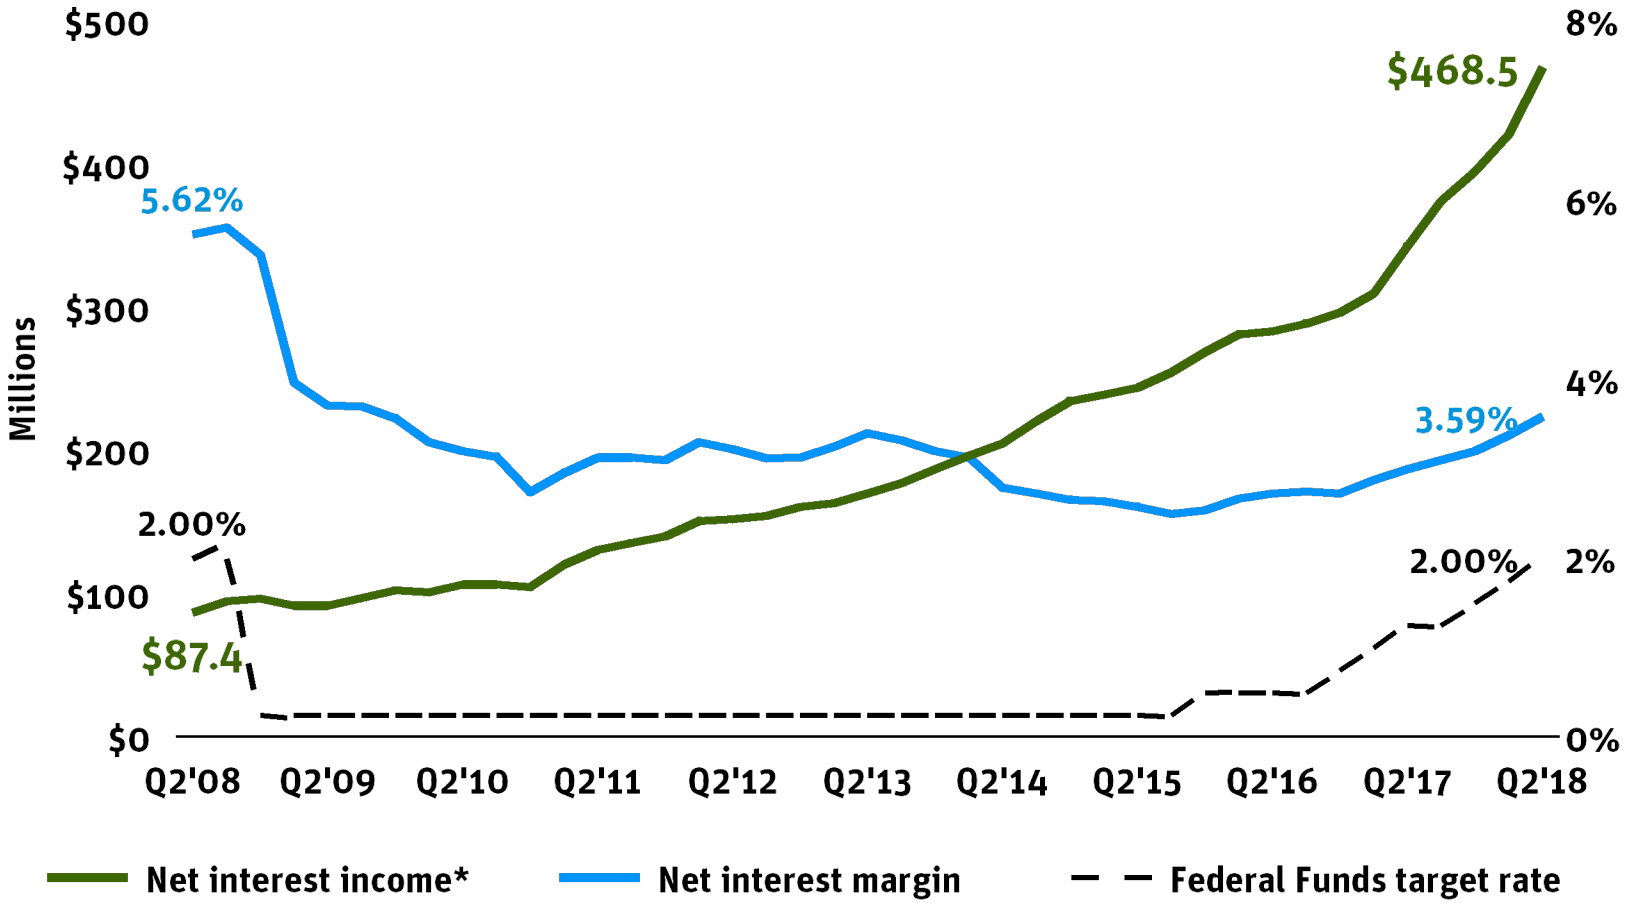
Large loan concentration in Private Equity capital call lines, which have a history of zero credit losses

Capital call lines have maturities of less than a year and are secured by contractual capital commitments and the invested assets of the fund borrowers.



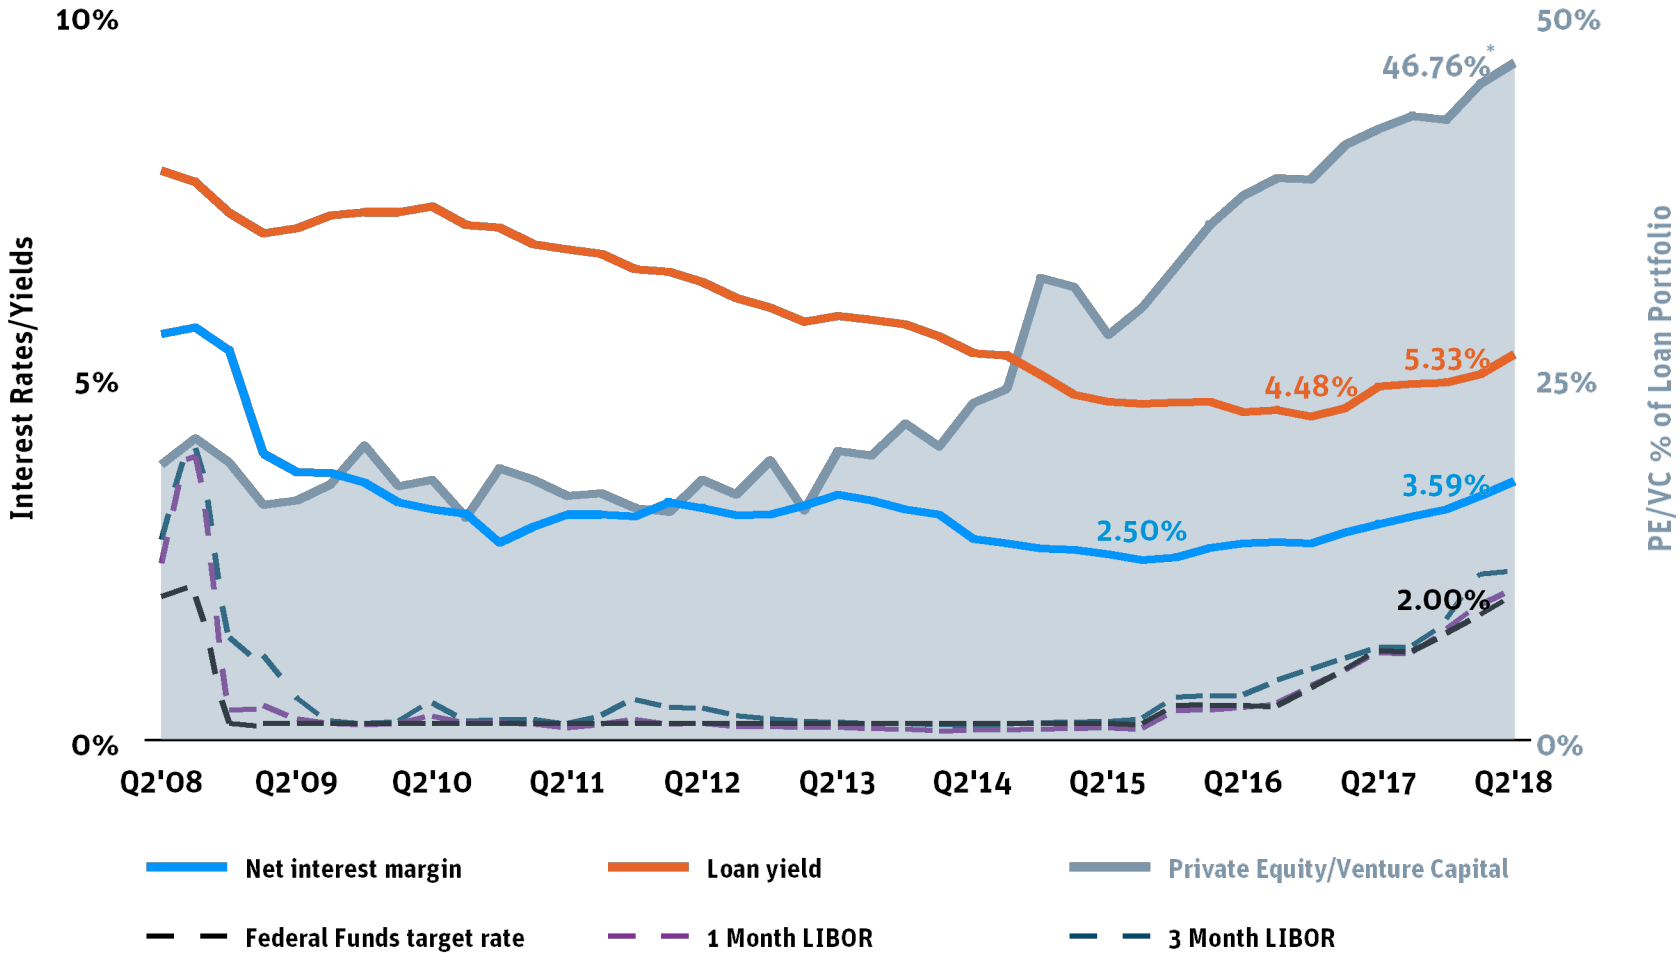
Q2'18: Net interest income grew 11.2%

Higher average loan and investment balances and higher interest rates drove net interest income increase



* Net interest income is presented on a fully taxable equivalent basis to consistently reflect income from taxable loans and securities and tax-exempt securities based on the federal statutory tax rate of 35 percent for periods prior to 2018 and 21 percent for 2018

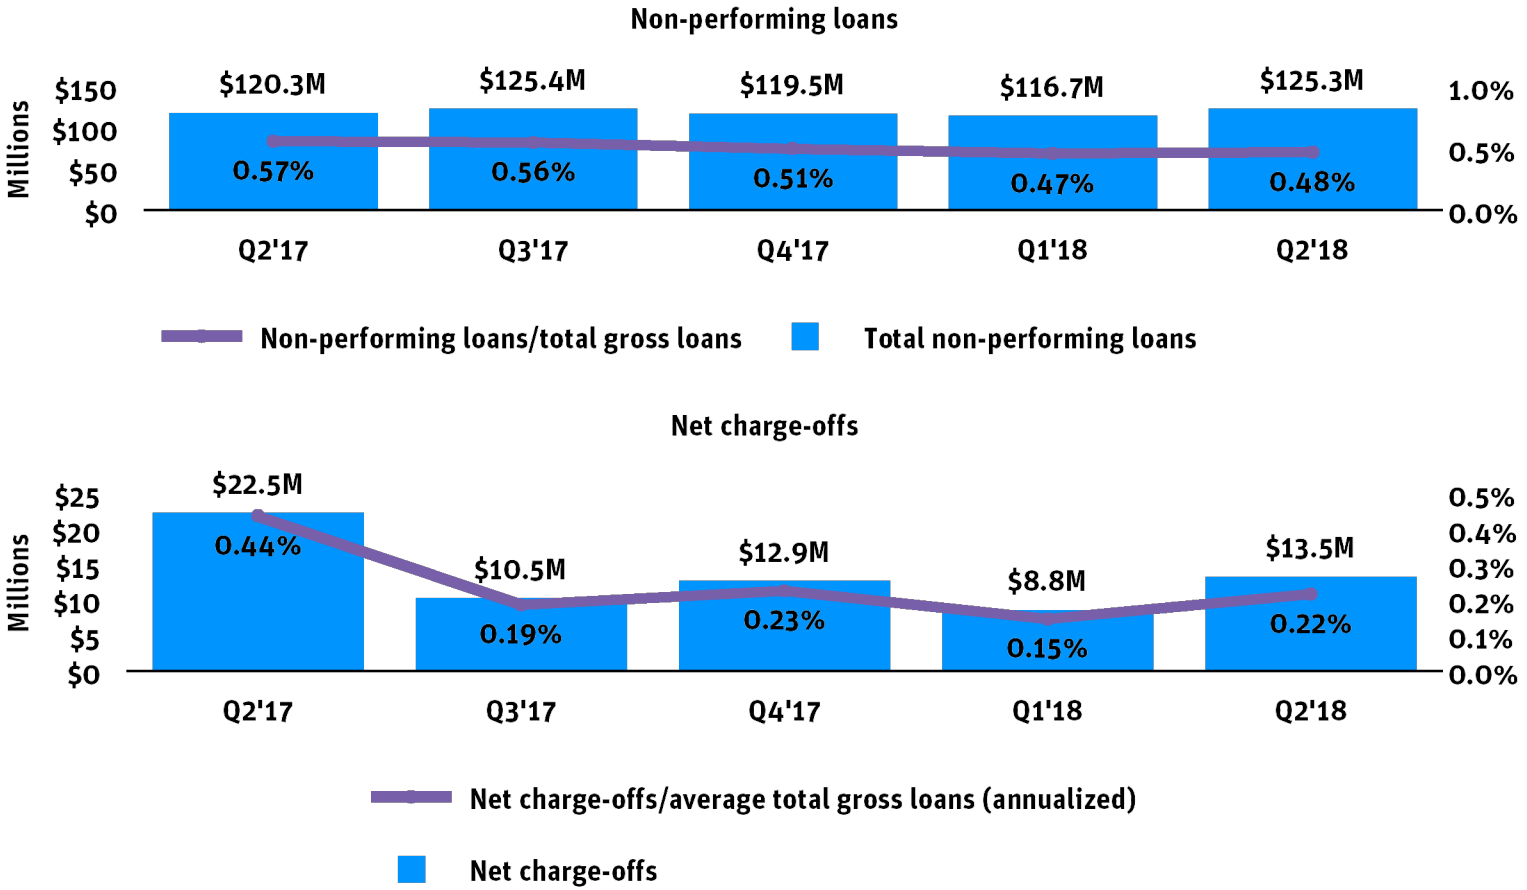
Higher rates driving continued margin improvement



* Consolidated loan yields have been impacted by the change in the mix of our loan portfolio to PE/VC loans, which have lower loan yields in comparison to Technology and Life Science lending.

Q2'18: Credit quality remained stable

- Provision for credit losses of $29.1M (vs. $28.0M in Q1)
- Allowance for loan losses/total gross loans: at 1.10% (vs. 1.11% in Q1)



History of strong, resilient credit quality

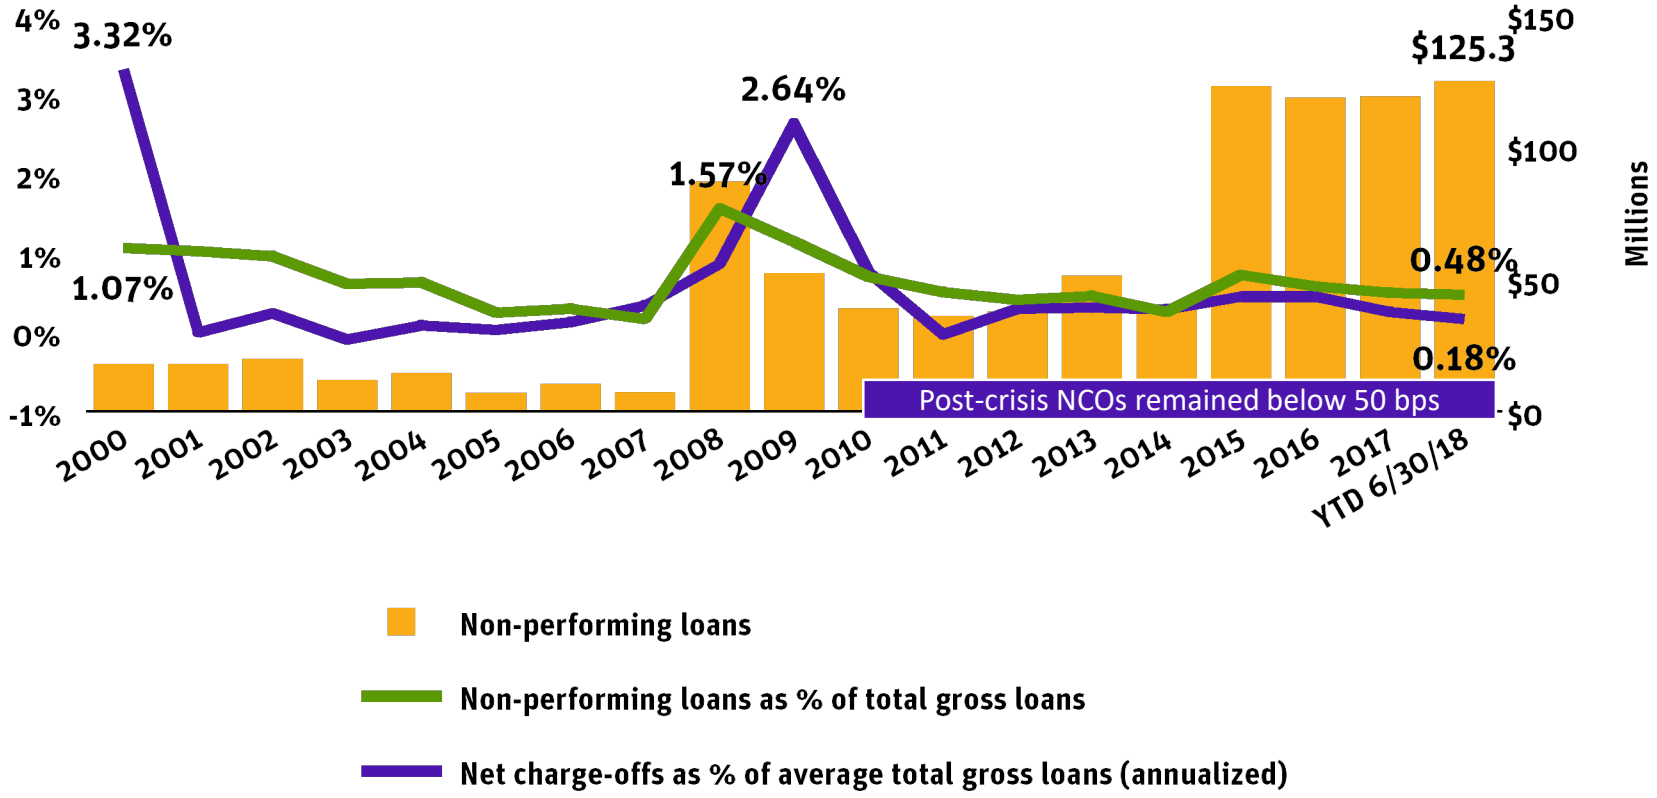
(2000: Dot-com bust)

Five non-dot-com loans drove increase in NCOs

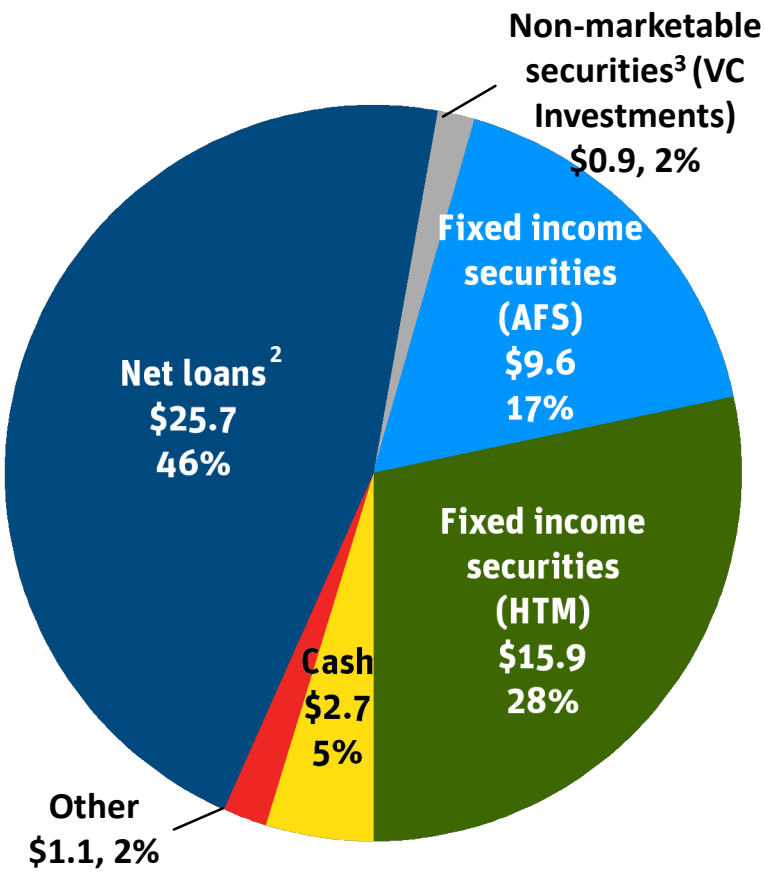
(2008-2009: Financial Crisis)

Five problem loans drove short-lived spike in NPLs and NCOs

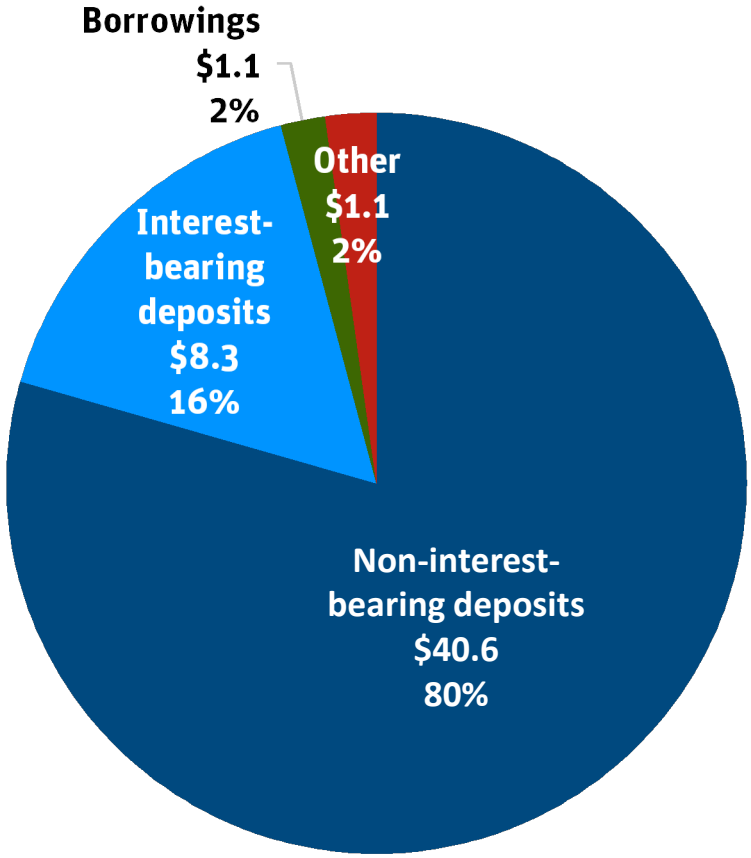
NPLs elevated since Q2'15 primarily due to four Sponsored Buyout loans (two were resolved) and one Corporate Finance loan



A high quality balance sheet [1]



Period-end assets: $55.9B

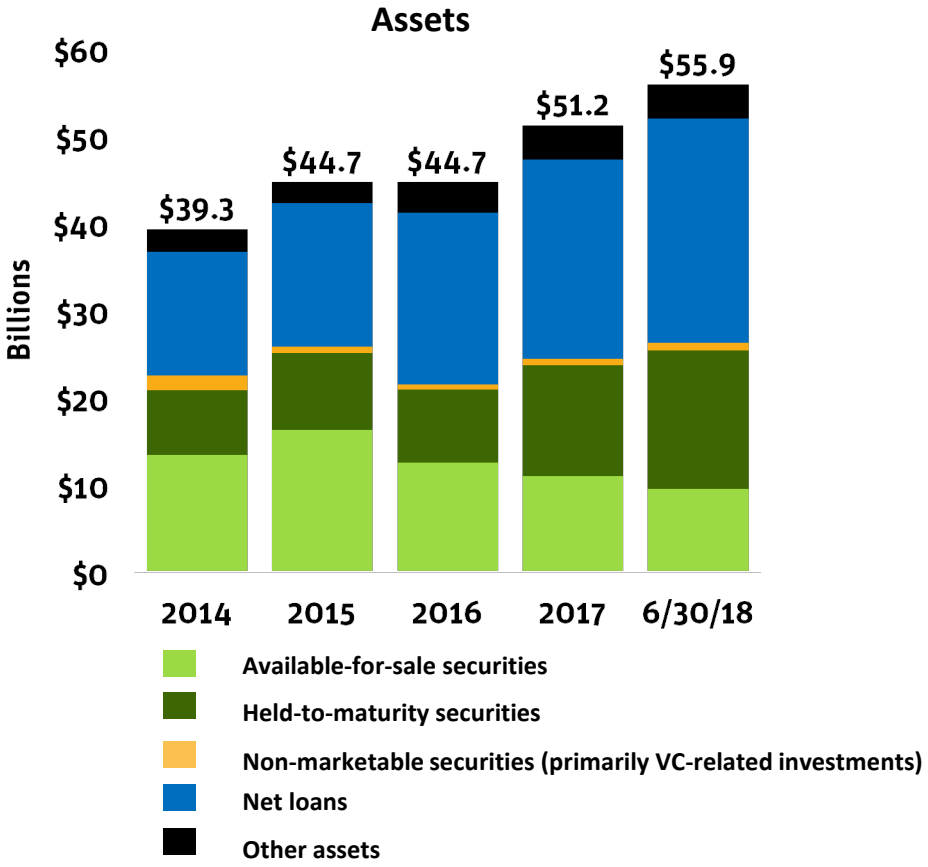


Period-end liabilities: $51.1B

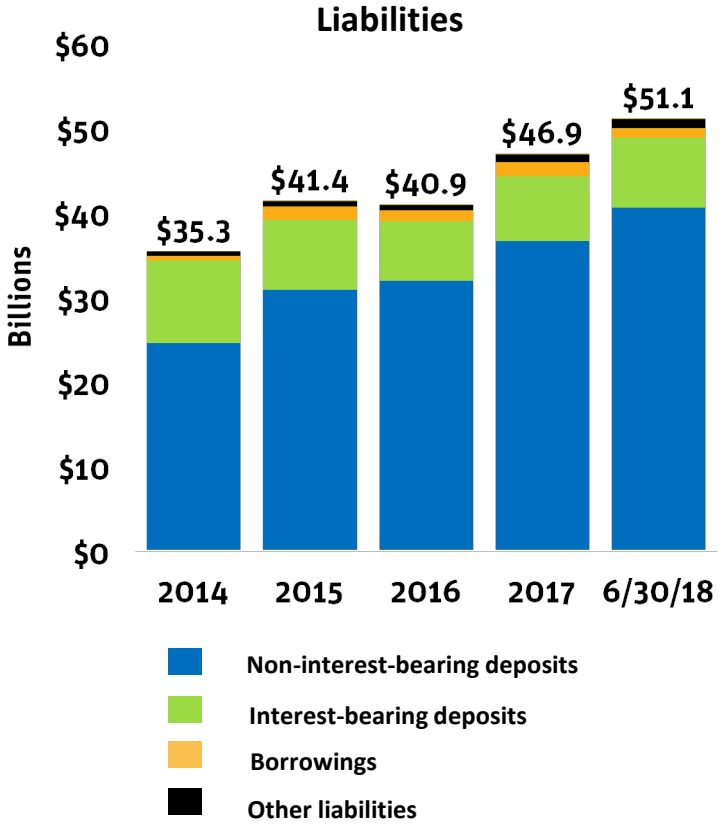
1) Balances as of 6/30/2018
2) Net loans represents gross loans net of the allowance for loan losses and unearned interest income. Gross loans at 6/30/2018 were $26B
3) Non-marketable securities net of non-controlling interests were $722 million. This is a non-GAAP measure. Please see non-GAAP reconciliations at end of presentation for more information.

Robust balance sheet growth

Strong growth in loans and securities

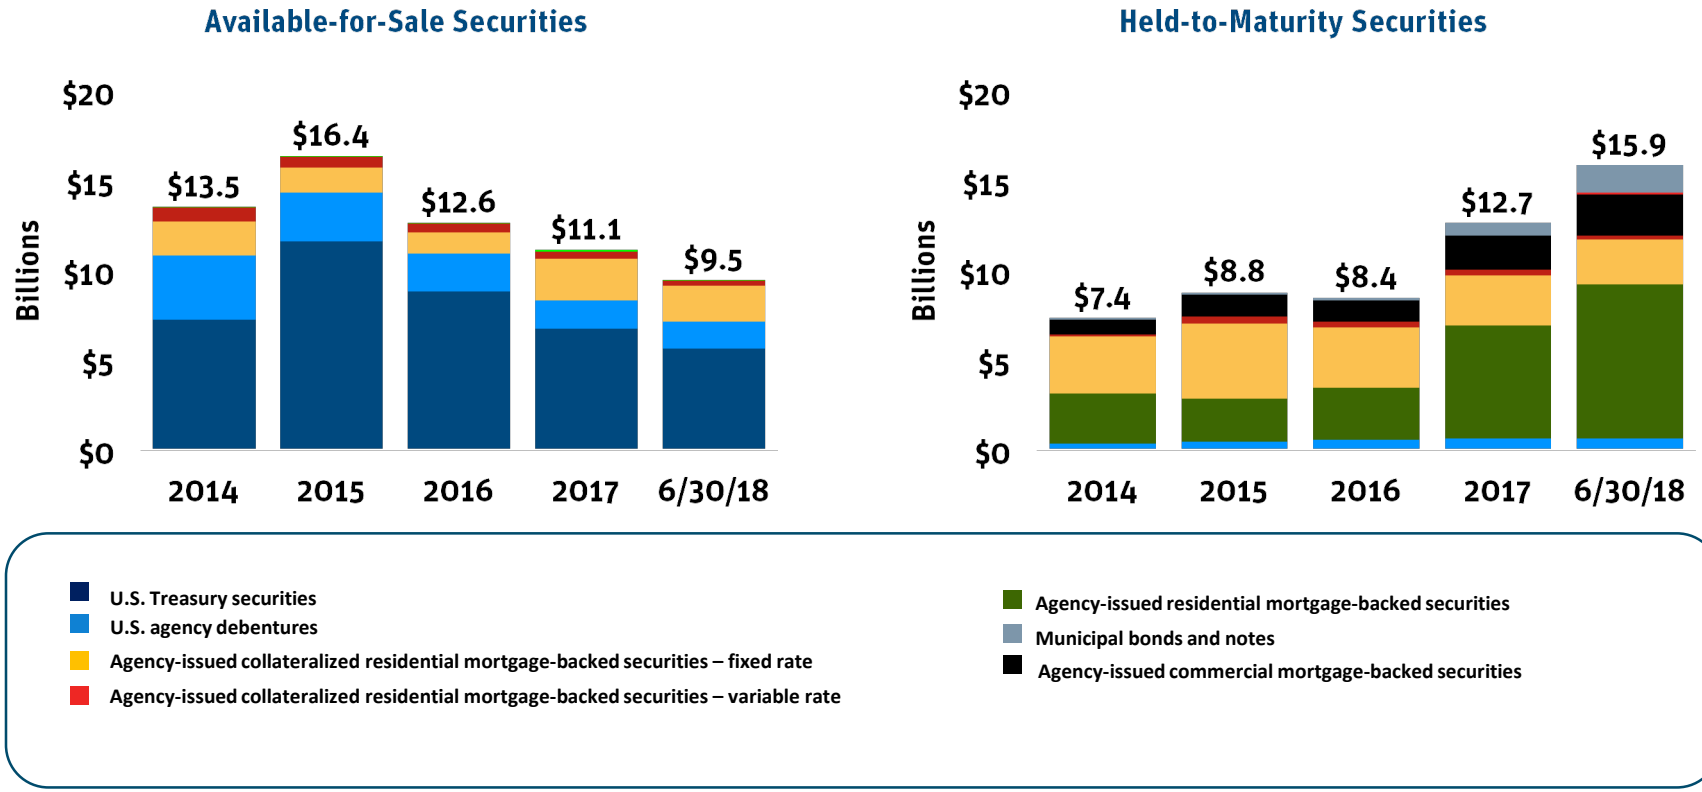


Non-interest-bearing deposits 83% of total deposits



A high quality investment portfolio

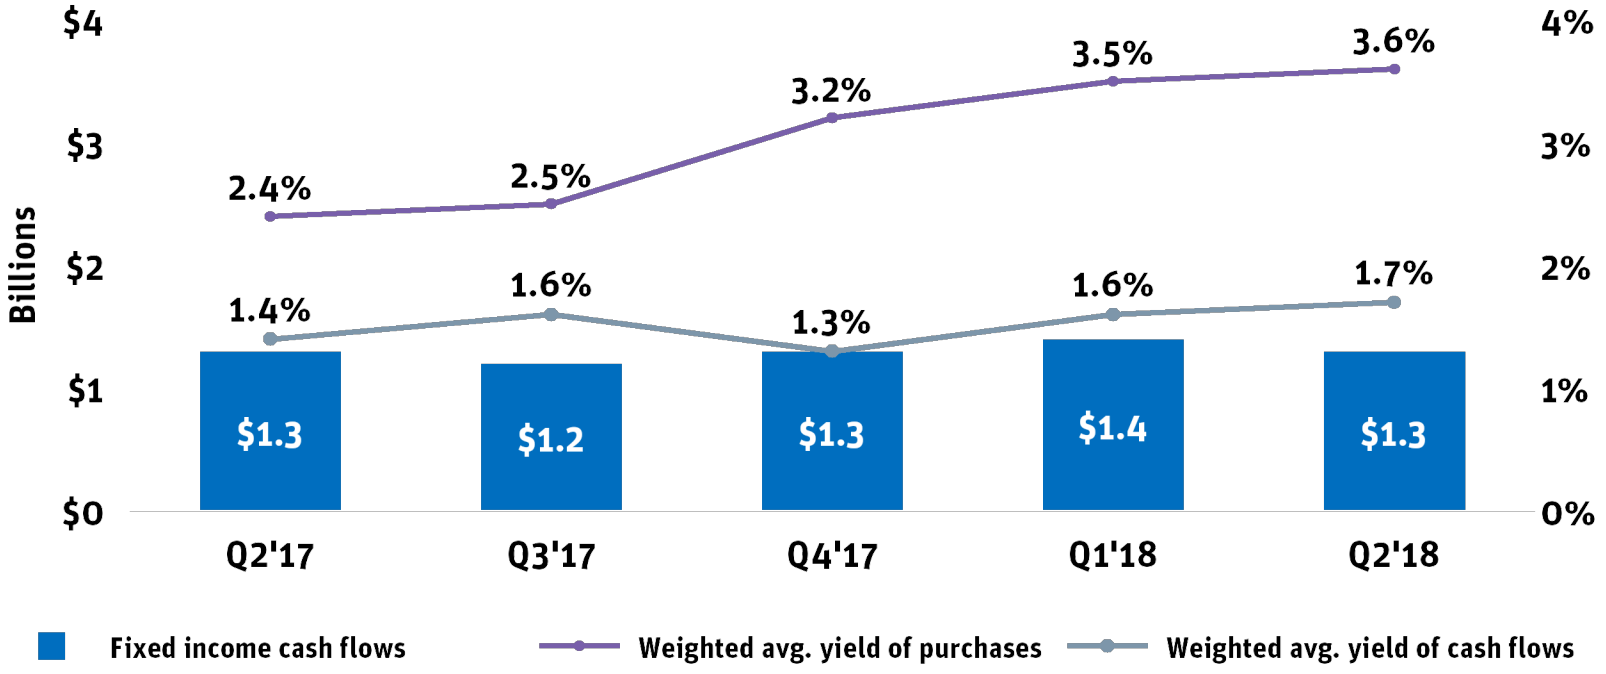
- Liquid, primarily fixed-income portfolio with a duration of 3.7 years
- U.S. Treasuries make up 22% of investment portfolio
- New purchases in Q2'18 included commercial and residential mortgage-backed securities and municipal bonds



Benefits of a liquid fixed-income portfolio during a rising rate environment

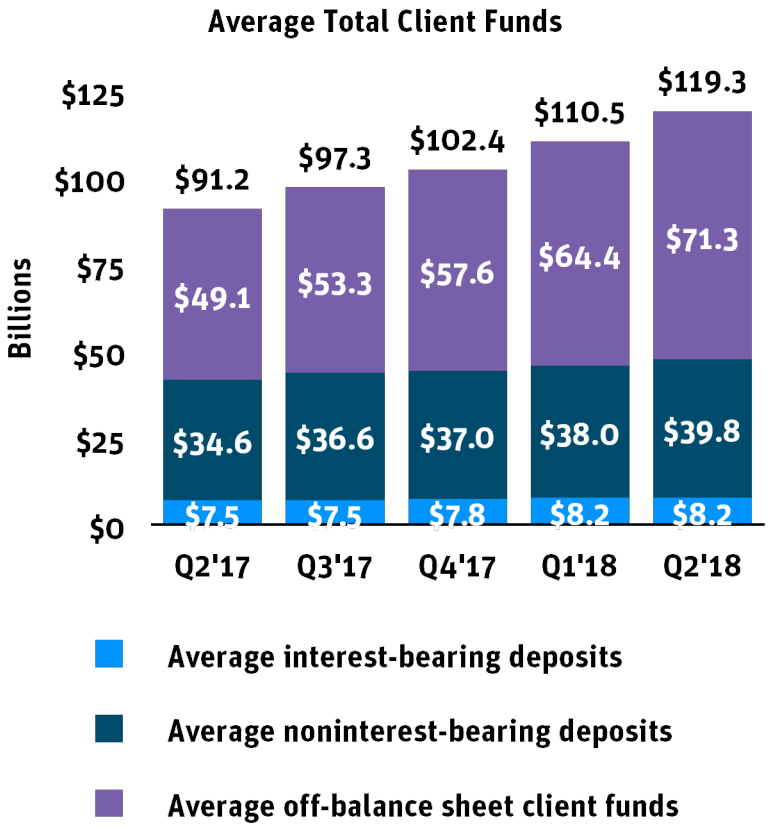
- Since Q2'17, average portfolio cash flows of $1.3B per quarter
- Reinvestment rates significantly higher than portfolio run-off rates
- Purchases primarily of mortgage-backed securities and municipal bonds

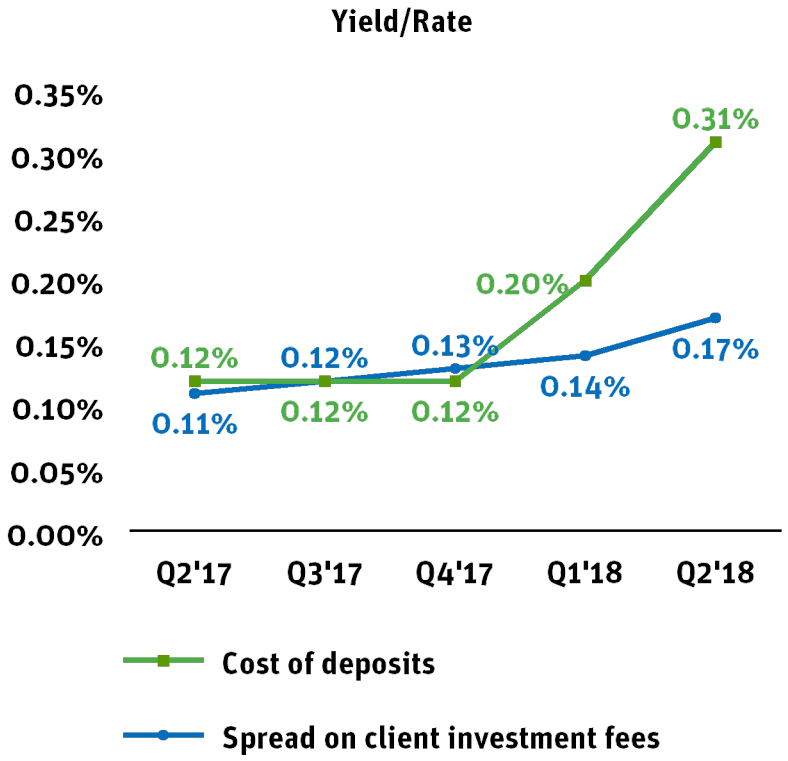
Fixed income portfolio cash flows, run-off yields and reinvestment yields by quarter



Q2'18: Average total client funds grew 8.0%

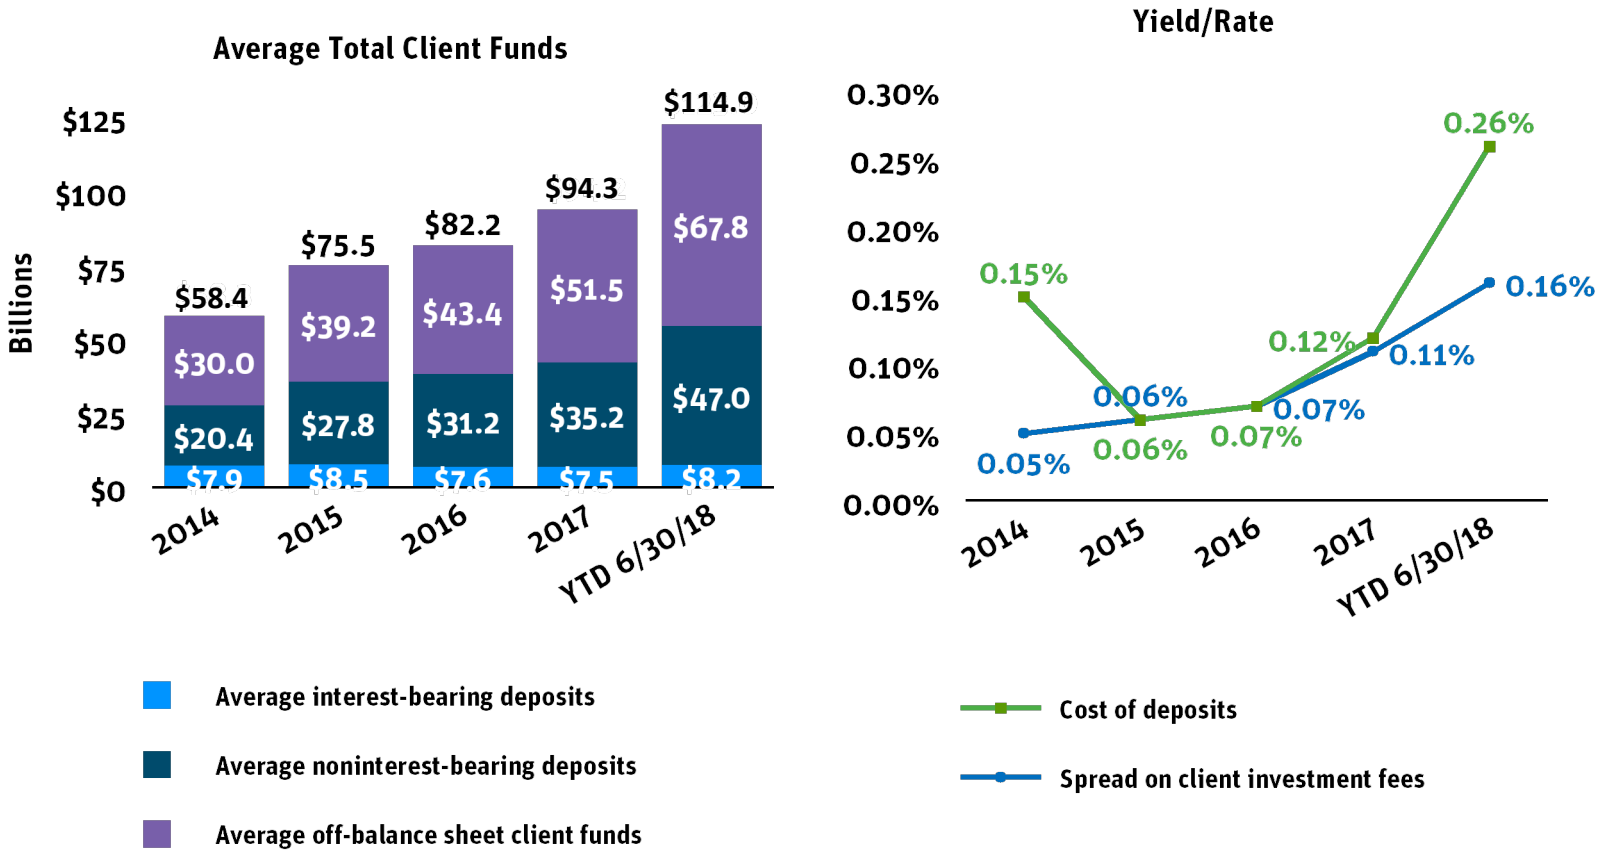
- Healthy funding and exit activity for our clients drove client funds growth
- Deposit beta remained low at 16 percent; interest-bearing deposits account for only 17% of total deposits
- Total deposit costs increased 11 bps due to deposit growth initiatives, representing only $2.2 million in additional interest expense





Robust client liquidity over past 5 years

- Strong funding and solid exit activity for our clients, plus sustained healthy new client acquisition (especially early-stage and private equity clients), have driven client funds growth



Expanding international business activity

$2.6B

international loans*

$11.1B

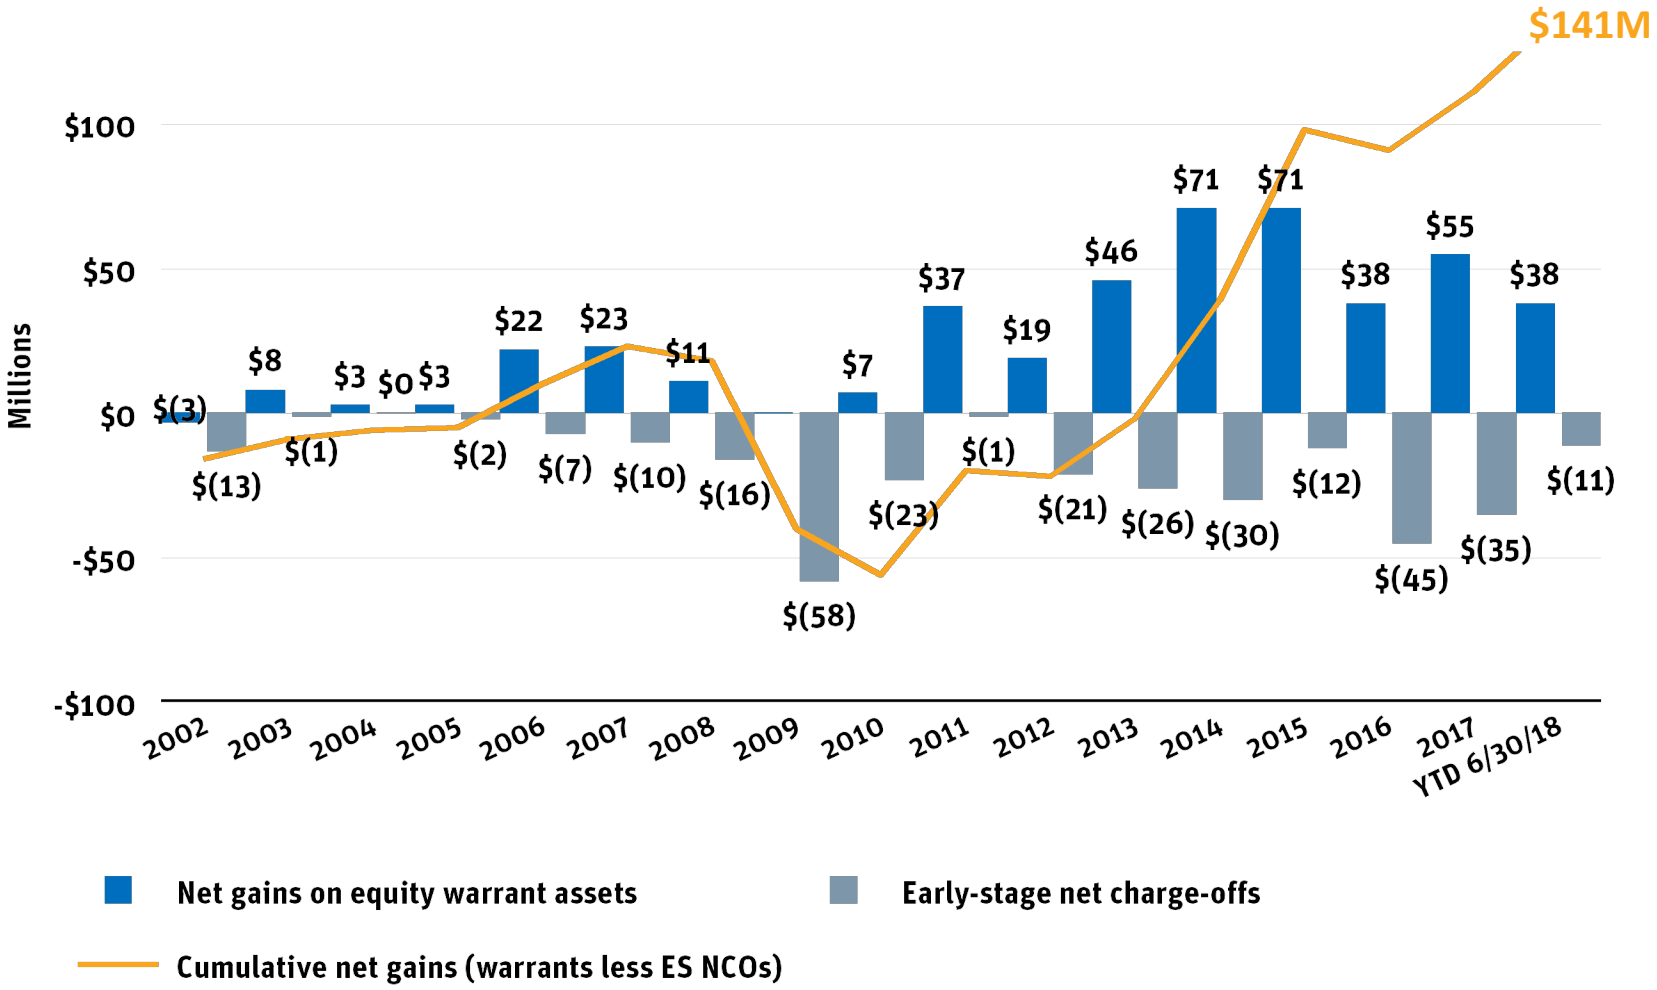
international deposits*

Location	Description	Year opened
U.K.	Full service branch	2012
Israel	Business development and representative office	2008
China	Business development office (Beijing)	2005
	SPD Silicon Valley Bank (Beijing, Shanghai, Shenzhen)	2012
Hong Kong	Representative office	2013
Germany	Business development and representative office	2018
Canada	Branch application in progress	TBD

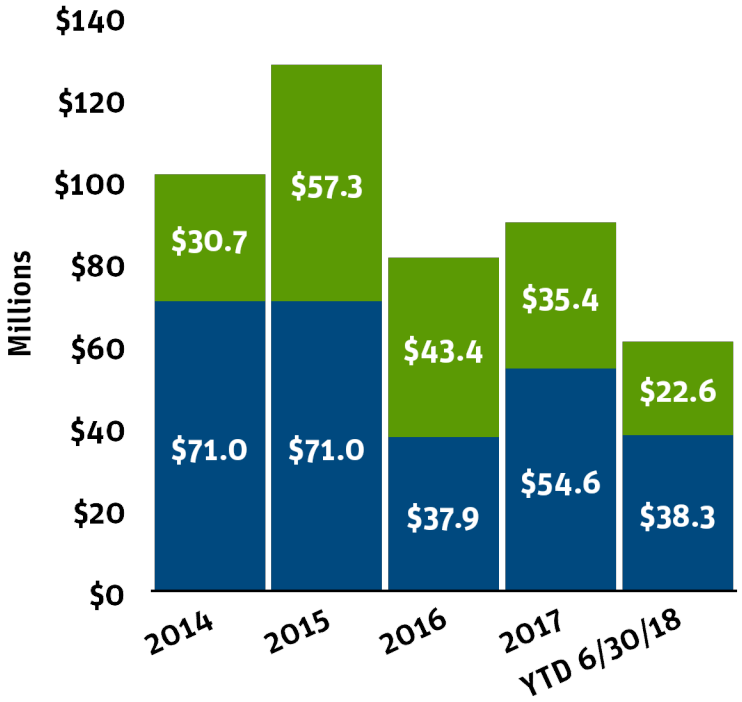
* Includes average loan and deposit balances for international operations in U.K., Israel and Asia for Q2'18; this is a management segment view and does not tie to regulatory definitions for foreign exposure

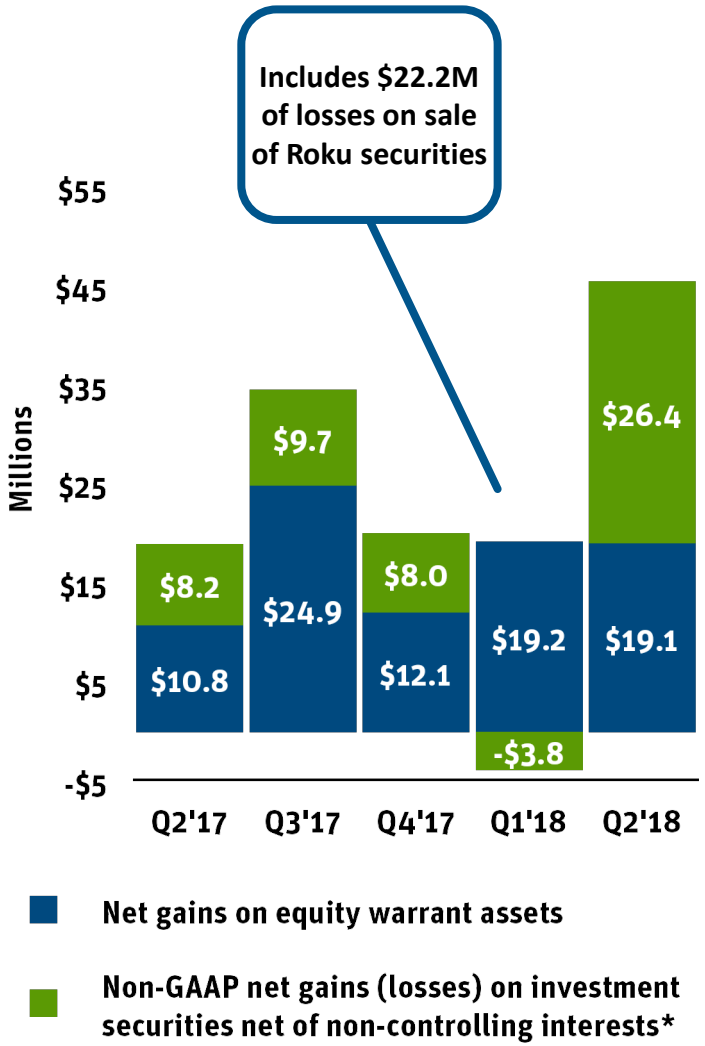
Net warrant gains have more than offset early-stage charge-offs over time

Aggregate warrant gains net of early-stage losses (2002 - 2018)



Investment securities and warrant gains

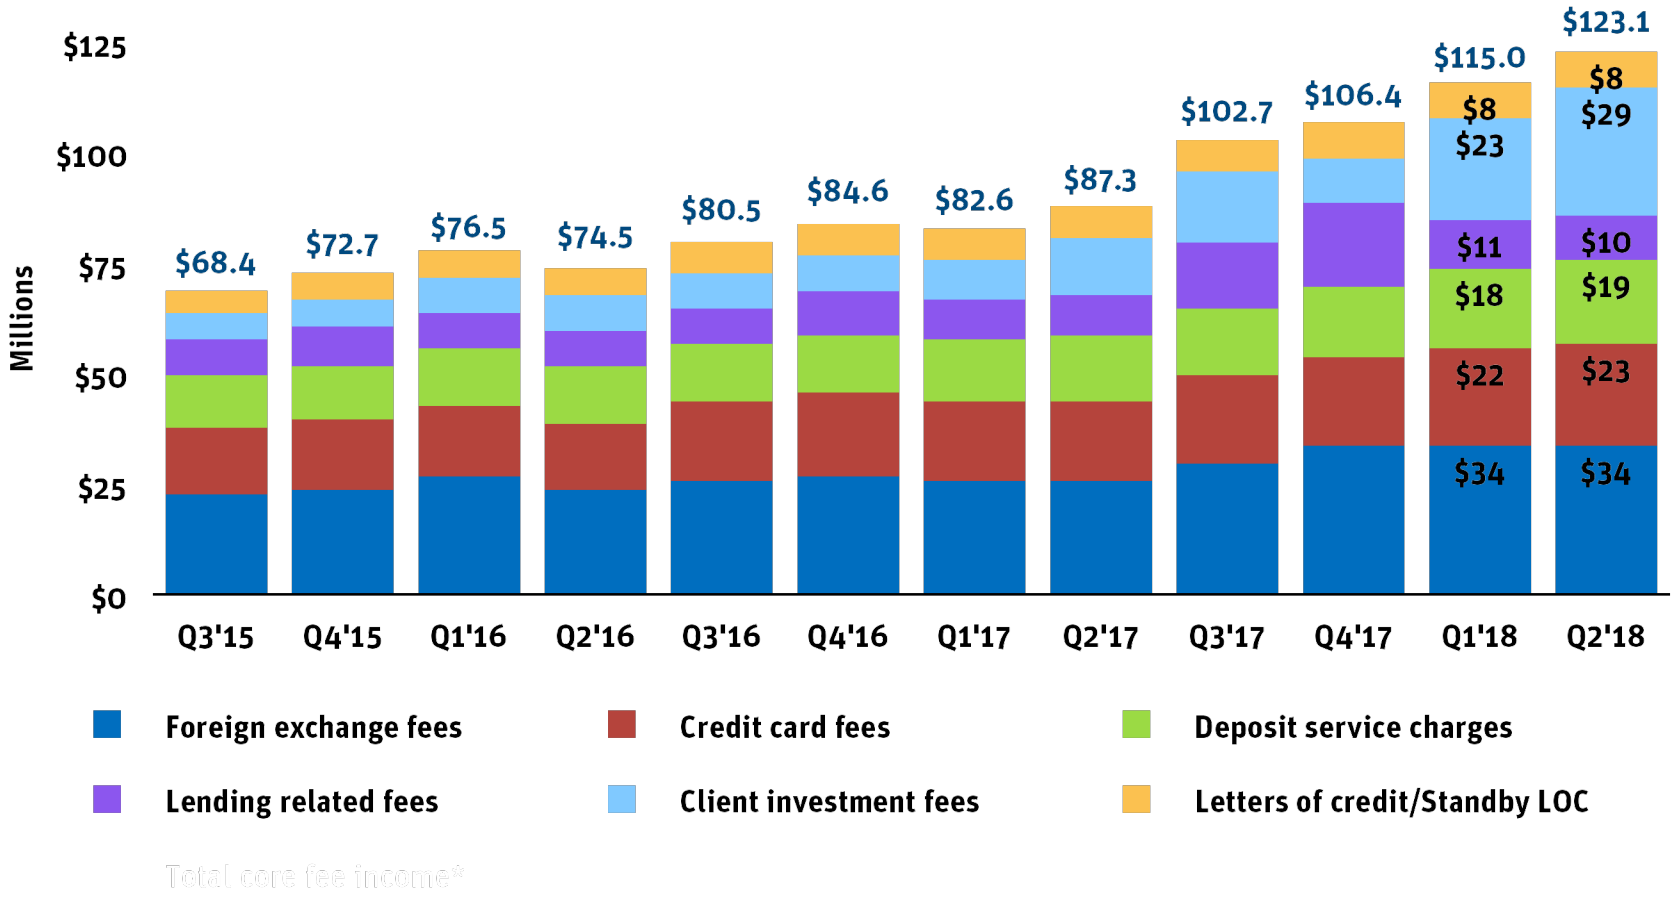




* This is a non-GAAP measure. Please see non-GAAP reconciliations at end of presentation for more information.

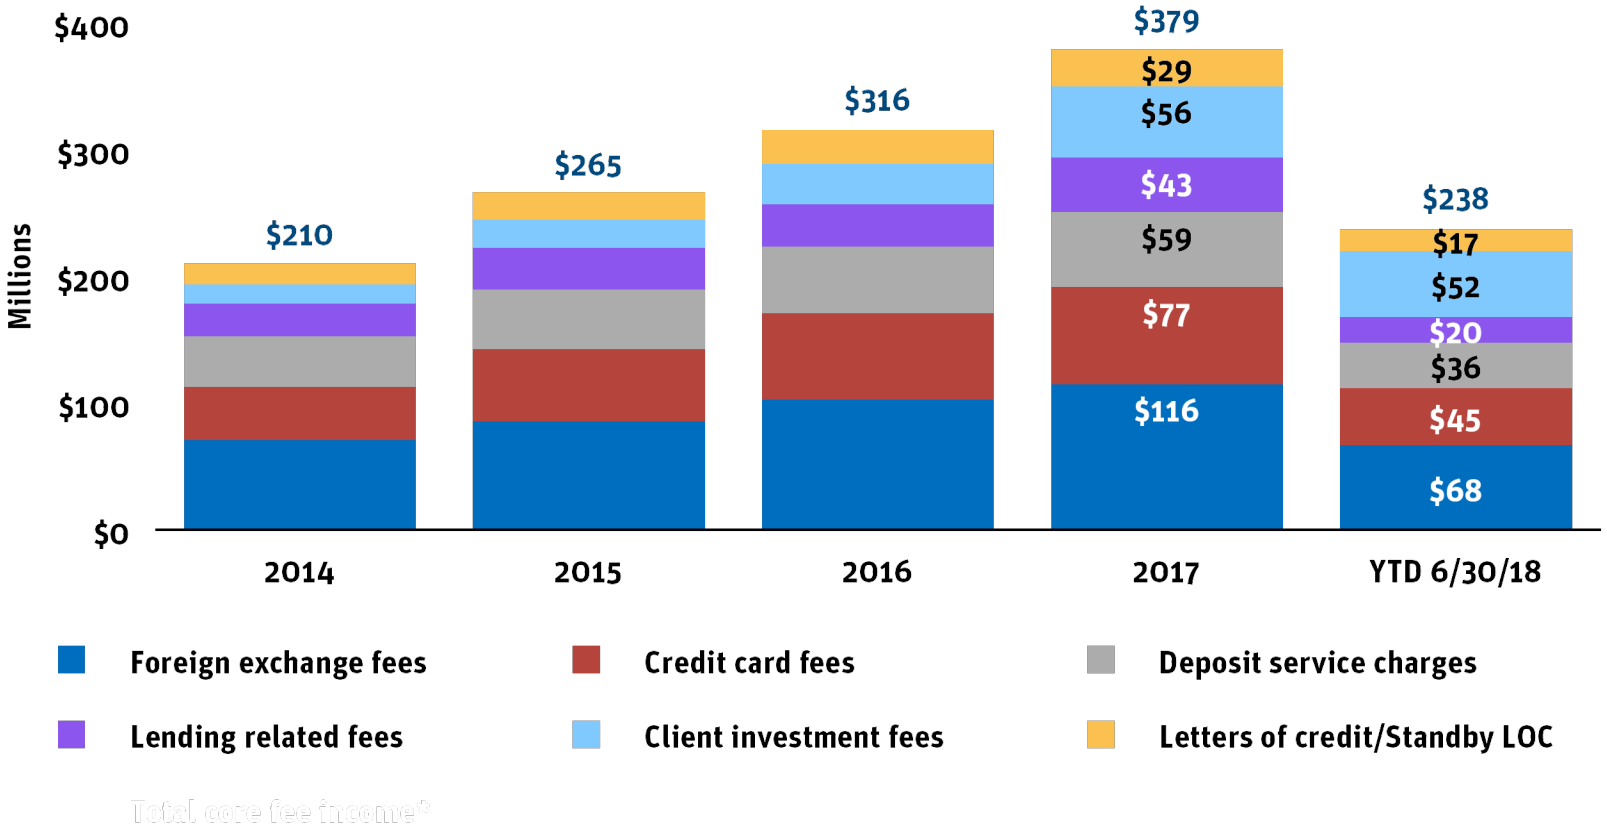
Q2'18: Core fee income grew 7.1%

Strong growth driven primarily by higher client investment fees due to higher client fund balances and rate increases



A history of strong core fee income growth

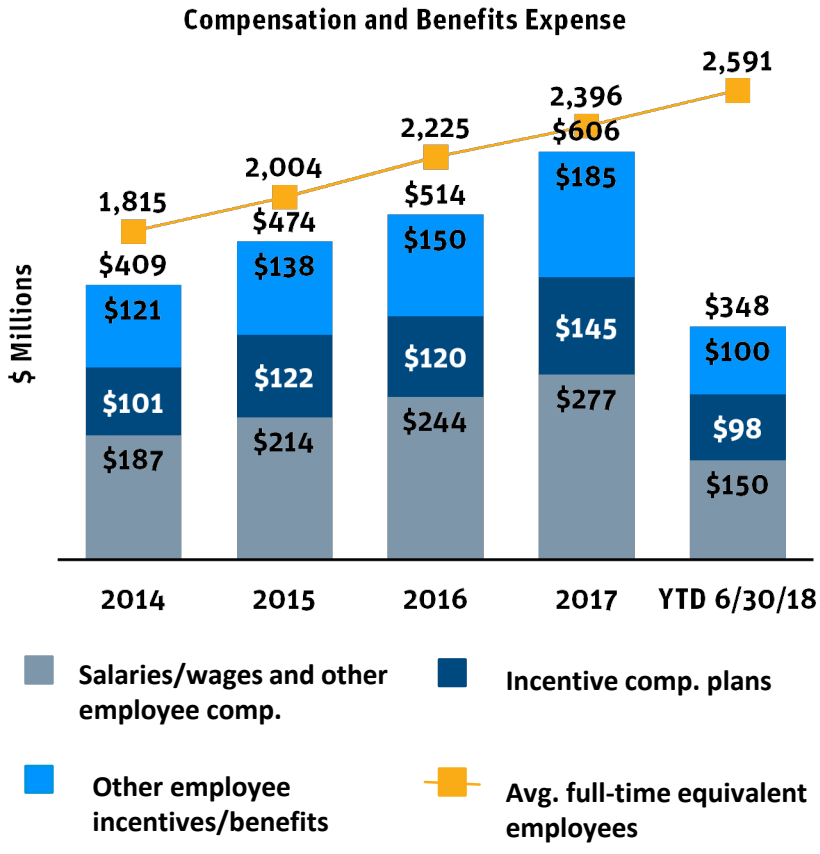
- Strong FX volume growth in 2017 partially offset by lower competitive spreads
- Higher client investment fee growth in recent quarters due to higher client investment fund balances and rate increases

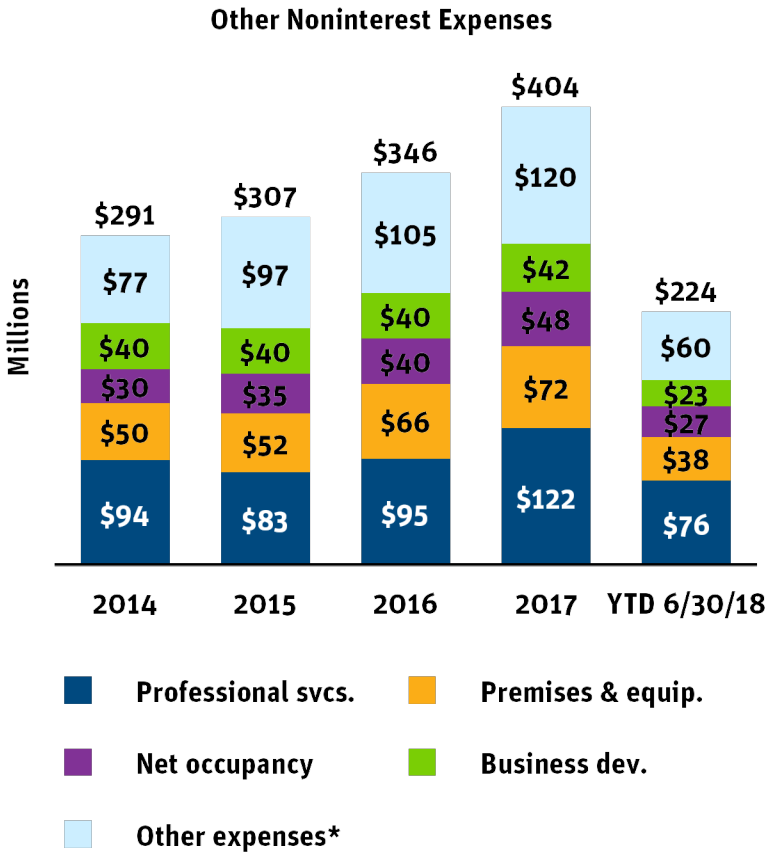


Performance and growth driving non-interest expense

Revenue and growth investment initiatives:

- Client experience
- People (staffing, enablement, performance-based incentive compensation)
- Infrastructure improvements (banking, risk & compliance)



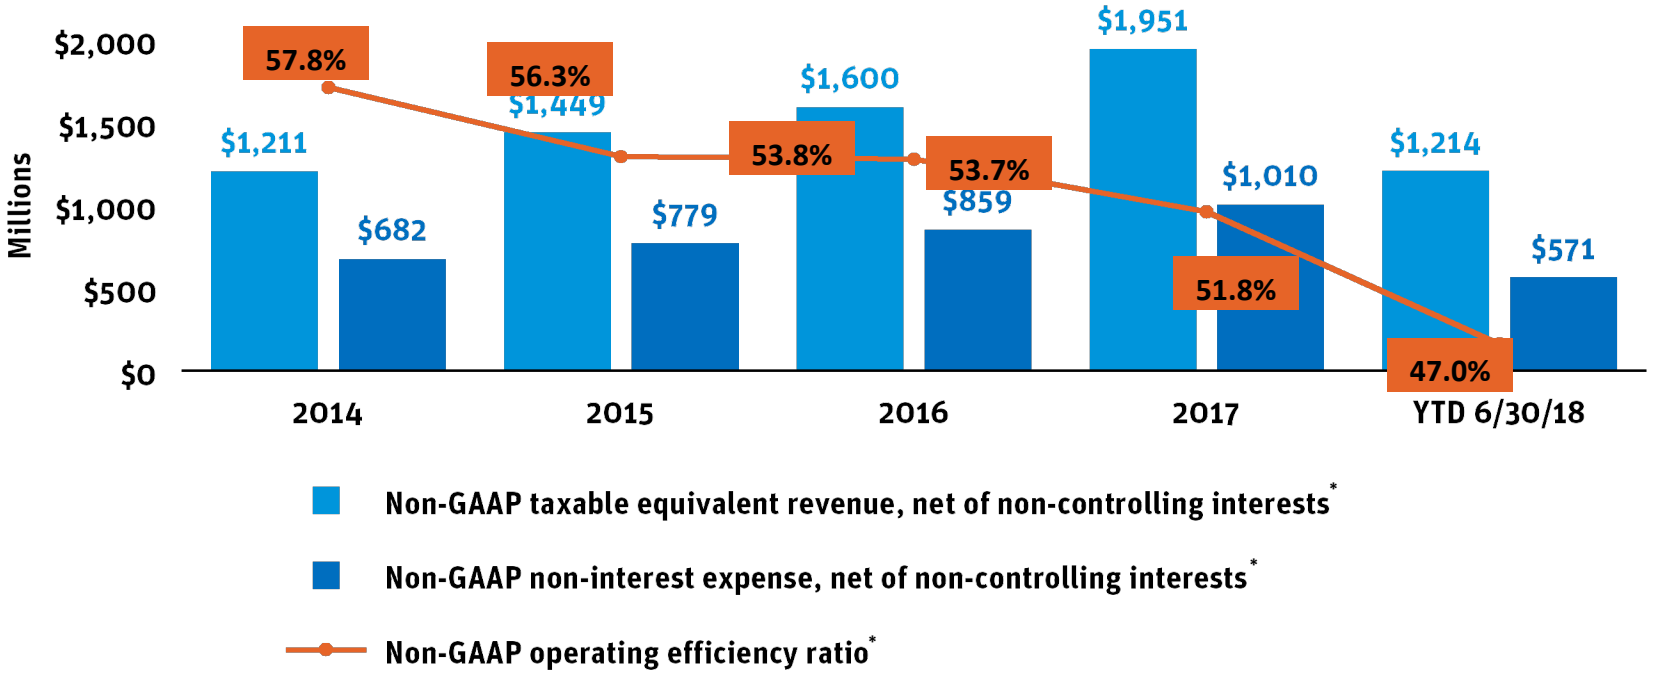


* Includes costs for FDIC and state assessments, correspondent bank fees, lending and other client-related processing, telephone, data processing and other expenses; please see our quarterly filings for more information.

Efficiency ratio has trended down over time

Drivers

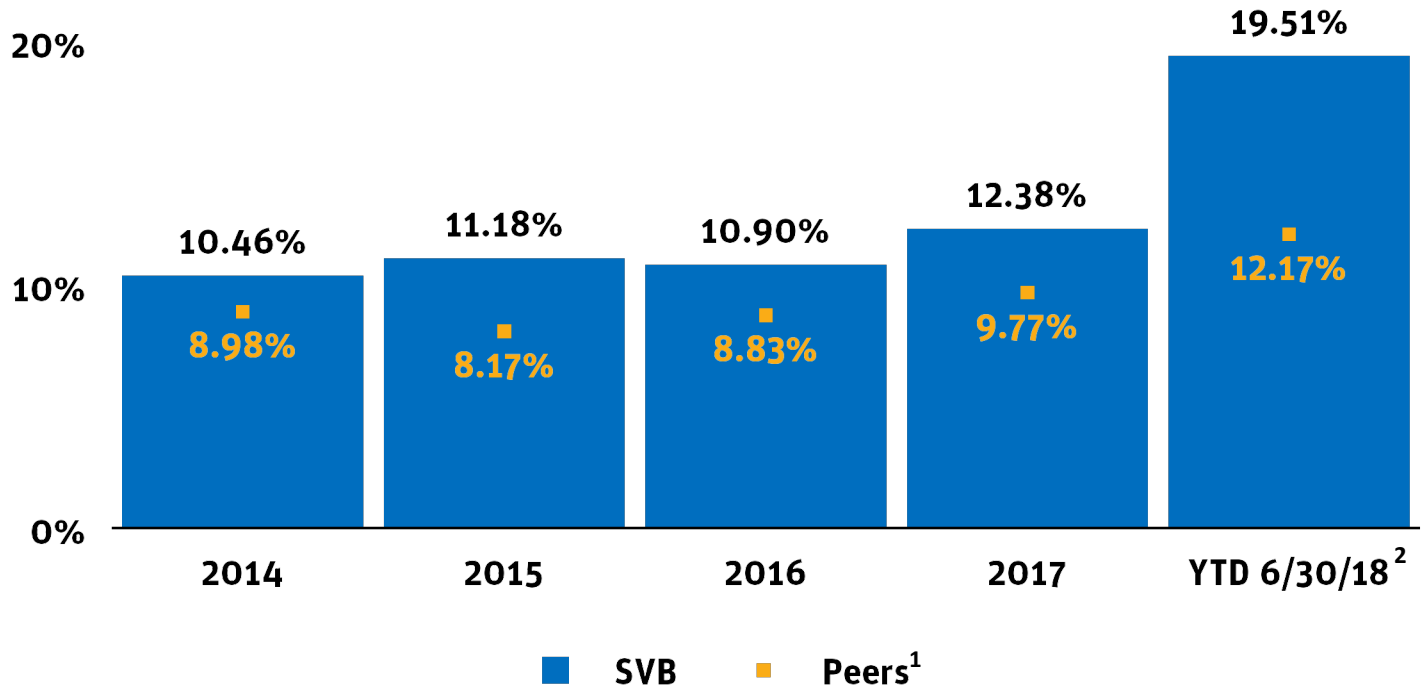
- Continued strong revenue growth
- Focus on systems, processes and infrastructure to optimize cost efficiencies and support efficient growth over the long-term



* These are non-GAAP measures. Please see non-GAAP reconciliations at end of this presentation for more information. Non-GAAP non-interest expense net of non-controlling interests and non-GAAP efficiency ratio exclude the impact of non-controlling interests.

Above-peer return on average equity

Increase in 2018 ROE YTD primarily due to higher interest rates and lower taxes



1. "Peers" refers to peer group as reported in our proxy statements specific to the years reported and are subject to change on an annual basis. Peer ROE is the average of our peer group based on the most recent data from SNL Financial.

2. Annualized

We expect rising rates to benefit us significantly

We estimate that each 25 bps increase in short-term rates to contribute approximately $49 million to Net Interest Income*

Changes in Fed Funds Rate (basis points)	Changes in Net Interest Income
+100	+$195M
+200	+$407M

Changes in short-term interest rates impact interest earned on:

- Variable rate loans
- Variable rate investment securities and reinvestment
- Cash and cash equivalents

Primary benchmark indices:

- National and SVB Prime rates
- 1-month and 3-month LIBOR
- Federal Funds target rate

* As reported in our sensitivity analysis included in our Q2 2018 Form 10-Q reports pursuant to applicable SEC requirements; these estimates are reported on a pre-tax basis and are based on a static balance sheet and assumptions as of June 30, 2018. Actual results may differ. Simulations used to analyze interest rate sensitivity may differ from actual results due to, among other things: differences in timing, frequency, and magnitude of changes in market rates; impact of competition; fluctuating business conditions and impact of strategies taken by management to mitigate these risks.

Complex regulatory environment

Despite the recent raising of the CCAR threshold, as a growing global, commercial bank with a holding company structure, we still face a complex regulatory landscape

We have ongoing investments in regulatory and compliance infrastructure -- people, processes and systems, including a focus on the following areas:

"Advanced Approaches" capital rules for banking organizations with >$10B foreign exposure

- Standardized capital floor
- More stringent capital buffer and leverage ratio requirements
- Full LCR

- **Risk Management program enhancements**
- **BSA/AML**
- **Current Expected Credit Loss (CECL) implementation**

We are well capitalized: SVBFG capital ratios[1]

	2014	2015	2016	2017	Q1'18	Q2'18
CET 1 risk-based capital	-	12.28%	12.80%	12.78%	12.87%	12.92%
Tier 1 risk-based capital	12.91%	12.83	13.26	12.97	13.06	13.10
Total risk-based capital	13.92	13.84	14.21	13.96	13.99	14.03
Tier 1 leverage	7.74	7.63	8.34	8.34	8.67	8.81
Tangible common equity to tangible assets[2]	7.15	7.16	8.15	8.16	8.25	8.34
Tangible common equity to risk-weighted assets[2]	12.93	12.34	12.89	12.77	12.65	12.68

1) All ratios, except TCE/TA and TCE/RWA, are as reported in our most recent bank holding company consolidated reports on Form FR Y-9C. TCE/TA and TCE/RWA ratios are as reported in our most recent quarterly earnings releases.
2) These are non-GAAP measures. Please see non-GAAP reconciliations at end of this presentation for more information.

We are well capitalized: bank capital ratios[1]

- Pressure on Tier 1 Leverage ratio from exceptional deposit and total asset growth in 2014 and 2015
- Down-streaming of capital from holding company (Q2'14 $435M common equity raise and Q1'15 $350M debt raise) increased bank capital ratios across the board
- Strong Bank earnings resulted in $30M of dividends from Bank to SVBFG in Q2'18, $25M in Q1'18, $90M in 2017 and $40M in 2016

	2014	2015	2016	2017	Q1'18	Q2'18
CET 1 risk-based capital[2]	-	12.52%	12.65%	12.06%	11.90%	11.76%
Tier 1 risk-based capital	11.09%	12.52	12.65	12.06	11.90	11.76
Total risk-based capital	12.12	13.60	13.66	13.04	12.88	12.72
Tier 1 leverage	6.64	7.09	7.67	7.56	7.69	7.72
Tangible common equity to tangible assets[3]	6.38	6.95	7.77	7.47	7.41	7.39
Tangible common equity to risk-weighted assets[3]	11.19	12.59	12.75	11.98	11.68	11.52

1) All ratios, except TCE/TA and TCE/RWA, are as reported in our most recent bank holding company consolidated reports on Form FR Y-9C. TCE/TA and TCE/RWA ratios are as reported in our most recent quarterly earnings releases.
2) Basel III adopted in January 2015
3) These are non-GAAP measures. Please see non-GAAP reconciliations at end of this presentation for more information.

Non-GAAP operating efficiency ratio	56.31%	53.77%	53.70%	51.76%	46.98%

1) See “Use of Non-GAAP Financial Measures” at the end of our most recent quarterly earnings release for further information regarding the calculation and limitations of this measure.
2) Our consolidated GAAP noninterest expenses were modified from prior periods’ presentation to conform to the current period's presentation, which reflects our provision for loan losses and provision for unfunded credit commitments together as our “provision for credit losses”. In prior periods, our provision for unfunded credit commitments were reported separately as a component of noninterest expense.

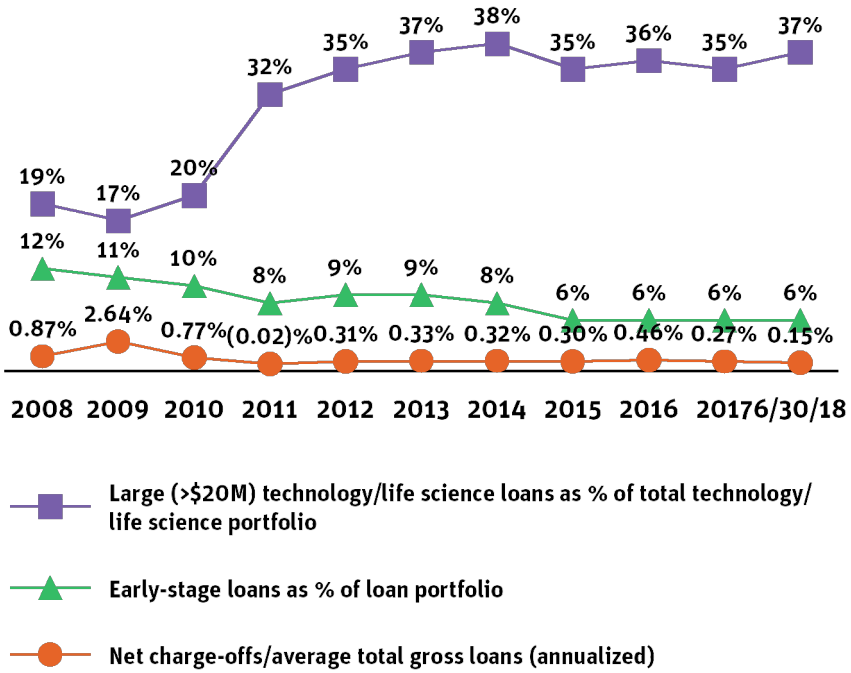
Our credit risk profile has improved over time

- Strongest growth in recent years has been in areas with the best historic credit performance (Private Equity and Private Bank)
- Early-stage loans (with greatest historic charge-off risk) have decreased as a % of our loan portfolio
- Our overall net charge-off ratio has remained stable
- As non-early stage, corporate loans >$20M increase as a percentage of our total technology/life science loan portfolio, individual charge-offs can be nominally larger



1.6%	2018 annualized early-stage net charge-off rate
3.3%	2008-2017 average early-stage net charge-off rate
3.8%	2016 annual early-stage net charge-off rate (VC market recalibration)
11.0%	2009 annual early-stage net charge-off rate (recession)

Q2'18 Takeaways (vs. Q4'17)

Themes

- **Strong liquidity**
  - $28B VC funding (highest since 2006)
  - $2.4B in client secondary offerings
  - 16 U.S, VC-backed IPOs
- **Higher interest rates**
  - Fed Funds +25 bps (March)
  - 1M Libor +36 bps
  - 3M Libor + 80 bps
  - 5Y Treasuries + 31 bps
- **Lower effective tax rate (27.5% vs. 42% for FY 2017**

Results

- **Outstanding Growth**
  - Average total client funds: +7.9%
  - Average loans: +6.1%
  - Net interest income: +6.5%
  - Core fee income: +8.1%
  - Return on equity: 18.12% (+703bps)
- **Stable credit quality**
- **Lower tax expense**
- **Improved revenue and balance sheet growth outlook**

Challenges

- **Pressure on loan growth from liquidity and M&A**
- **Competition**
- **Continued lack of established momentum in exit markets**
- **Complex regulatory environment**

Q2'18 vs. Q1'18

EPS: $4.42 (vs. $2.19) Net Income: $237.8M (vs.$117.2)

Average loans: +4.4% Period-end loans: +5.7%	Average total client funds:+8.0%	Average fixed income securities[1]: +4.9%

- Provision for credit losses of $29.1M vs. $28.0M
- Net charge-offs of 22 bps vs. #REF! bps (annualized)
- Non-performing loans of 48 bps vs. 47 bps

Net interest income[2]: +11.2% Net interest margin: +21 bps	Non-interest income: +23.9% •Core fee income[5]: +7.1% •Investment security gains[3,4]: $36.1M •Warrant gains[3]: $19.1M
Non-interest expense (NIE): +0.5%	Bank tier 1 leverage ratio: 7.72% (+3 bps)

1. Includes available-for-sale and held-to-maturity securities held on the balance sheet
2. Net interest income is presented on a fully taxable equivalent basis to consistently reflect income from taxable loans and securities and tax-exempt securities based on the federal statutory tax rate of 21 percent.
3. The value of warrant and PE/VC-related investments is subject to potential increases or decreases in future periods, depending on market conditions and other factors.
4. Non-GAAP losses on investment securities net of non-controlling interests were $3.8M.
5. Non-GAAP measure. Please see non-GAAP reconciliations at the end of this presentation for more information.
