Jury Finds in Favor of Synopsys in ATopTech Copyright Infringement Case

MOUNTAIN VIEW, Calif., March 10, 2016 /PRNewswire/ -- Synopsys, Inc. (Nasdaq:SNPS) today announced that a federal court jury has found that ATopTech infringed Synopsys' copyrights associated with its PrimeTime® static timing analysis suite. In addition, the jury awarded Synopsys $30.4 million in damages.

Synopsys filed its lawsuit in the U.S. District Court for the Northern District of California in 2013, alleging that ATopTech copied elements of PrimeTime's command set into its Aprisa product, thereby violating Synopsys copyrights. The court ruled that the command set elements were protected by copyright, which had been disputed by ATopTech.

About Synopsys

Synopsys, Inc. (Nasdaq:SNPS) is the Silicon to Software™ partner for innovative companies developing the electronic products and software applications we rely on every day. As the world's 16th largest software company, Synopsys has a long history of being a global leader in electronic design automation (EDA) and semiconductor IP and is also growing its leadership in software quality and security solutions. Whether you're a system-on-chip (SoC) designer creating advanced semiconductors, or a software developer writing applications that require the highest quality and security, Synopsys has the solutions needed to deliver innovative, high-quality, secure products.
