Second Price Monitoring Extn

Released : 10 Apr 2008

Acal PLC
10 April 2008

A second Price Monitoring Extension has been activated in this security.

A second Price Monitoring Extension is activated when the auction matching process would still result in an auction
price that is a pre-determined percentage above or below the base price. The auction call period is extended for a
further 5 minutes.

For details of how base prices are set for each market, please refer to the Guide to Trading Service at www.londonstockexchange.com
