CSG Invotas to Participate in the 2014 Gartner Information Security & Risk Management Summit

President Paul Nguyen to Lead CISO Panel

ENGLEWOOD, Colo.--(BUSINESS WIRE)-- [CSG Invotas](#), the enterprise security business from [CSG International \(NASDAQ: CSGS\)](#), today announced its participation in [the 2014 Gartner Information Security & Risk Management Summit](#).

This year's summit will demonstrate the ways organizations can find balance between advancing company objectives while protecting the organization, customers, and employees for improved business processes and return on investment. Executives from CSG Invotas will be on hand to discuss top trends in today's security environments.

Additionally, [Paul Nguyen, president of global security solutions at CSG Invotas](#), will lead a case study presentation titled, "The Need for Speed: The Faster You Resolve Cyber Threats, the Better Your Outcome," on Monday, 23 June, from 3:45 - 4:15 p.m. in the CISO board room. The session will illustrate the ways large organizations can design automated courses of action to replace manual tasks and deliver faster security incident response times. It will explore a variety of automated and semi-automated security actions and evaluate how automation can transform reactive decisions into proactive defense strategies.

Who: [Mike Henderson, president at CSG Invotas](#)

[Paul Nguyen, president of global security solutions at CSG Invotas](#)

Peter Clay, chief architect at CSG Invotas

Monica Ricci, executive director of product marketing and research analyst relations at CSG

Where: Gartner Information Security & Risk Management Summit, booth 1104

When: June 23-25 at the Gaylord National, National Harbor, Maryland

What: Meet with CSG Invotas executives to learn:

- How automated threat response unifies, orchestrates, and automates security actions to support machine speed responses to security incidents
- The three key steps to implementing an automated threat response framework
- Ways to unify technology and data feeds to integrate enterprise-wide defenses
- The value of automating a cyber playbook to turn proven processes into active defense responses
- The ways automation can minimize repeatable manual tasks and allow analysts to focus on critical threat response strategies

"To counter threats and attacks effectively requires real-time capabilities that allow organizations to maximize their security resources," said [Mike Henderson, president at CSG Invotas](#). "Today's attacks are relentless. They change and adapt at machine speed to infiltrate sensitive environments, which requires organizations to protect their complex security environments with automated, semi-automated, and on-demand actions across the enterprise."

CSG Invotas representatives will be available to review the current security ecosystem. They will address the next evolution of defense strategies, the evolving competitive landscape, and the latest innovations in automated threat response capabilities using best-in-breed technology.

About CSG Invotas

CSG Invotas™ offers automated threat response capabilities built on proven carrier-grade activation technology. For more than 30 years, CSG has amassed a track record in building automated systems that solve business challenges, improve operations, preserve continuity and enhance profitability. CSG Invotas builds on this heritage with innovative security strategies that inspire CIOs and CISOs to think differently about secure enterprise management.
