Second Quarter F2022 Earnings Presentation

November 3, 2021

Forward Looking Statements & Non-IFRS Measures

This presentation and the oral statements made during this call contain certain statements that constitute forward-looking information within the meaning of applicable securities laws ("forward-looking statements"). Such forward-looking statements involve known and unknown risks, uncertainties and other factors including those related to the COVID-19 pandemic that may cause the actual results, performance or achievements of ATS, or developments in ATS' business or in its industry, to differ materially from the anticipated results, performance, achievements or developments expressed or implied by such forward-looking statements. Forward-looking statements include all disclosure regarding possible events, conditions or results of operations that is based on assumptions about future economic conditions and courses of action. Forward-looking statements may also include, without limitation, any statement relating to future events, conditions or circumstances. ATS cautions you not to place undue reliance upon any such forward-looking statements, which speak only as of the date they are made. Forward-looking statements relate to, among other things, margin expansion, ABM, sales funnel, expected timing of closing of DF acquisition, and Order Backlog to revenue conversion rate. The risks and uncertainties that may affect forward-looking statements include, among others, the duration and impact of the COVID-19 pandemic, general market performance, performance of the Canadian dollar, performance of the market sectors that ATS serves, success and impact of the initiatives that ATS is undertaking, variations in the amount of Order Backlog completed in any given quarter, that efforts to expand adjusted earnings from operations margin over long-term is unsuccessful, due to any number of reasons, including failure of ABM to impact margins, that sales funnel opportunities are not converted to revenue, that closing of the DF acquisition is delayed or prohibited as a result of the completion of regulatory filing process, and other risks and uncertainties detailed from time to time in ATS' filings with Canadian provincial securities regulators, including ATS' most recent quarterly earnings press release and MD&A and ATS' Annual Report and Annual Information Form for the fiscal year ended March 31, 2021. Forward-looking statements are based on management's current plans, estimates, projections, beliefs and opinions, and ATS does not undertake any obligation to update forward-looking statements should assumptions related to these plans, estimates, projections, beliefs and opinions change.

Non-IFRS Measures: This presentation uses the non-IFRS measures "EBITDA", "adjusted EBITDA", "adjusted earnings from operations" and "adjusted basic earnings per share". These terms do not have any standardized meanings prescribed within IFRS and therefore may not be comparable to similar measures presented by other companies. These measures should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. EBITDA is defined as earnings from operations excluding depreciation and amortization. Adjusted earnings from operations is defined as earnings from operations before items excluded from management's internal analysis of operating results, such as amortization expense of acquisition-related intangible assets, acquisition-related transaction and integration costs, restructuring charges, and certain other adjustments which would be non-recurring in nature. Adjusted EBITDA is defined as adjusted earnings from operations excluding depreciation and amortization. Adjusted basic earnings per share is defined as adjusted net income on a per share basis, where adjusted net income is defined as adjusted earnings from operations less net finance costs and income tax expense, plus tax effects of adjustment items and adjusted for other significant items of a non-recurring nature. EBITDA and adjusted EBITDA are used by the Company to evaluate the performance of its operations. Management believes that EBITDA and adjusted EBITDA are important indicators of the Company's ability to generate operating cash flows to fund continued investment in operations. Management believes that adjusted earnings from operations, adjusted EBITDA and adjusted basic earnings per share are important measures to increase comparability of performance between periods. The adjustment items used by management to arrive at these metrics are not considered to be indicative of the business' ongoing operating performance. Management believes that ATS shareholders and potential investors in ATS use these non-IFRS financial measures in making investment decisions and measuring operational results.

Quarterly Highlights

- **Strong business performance** shows ATS continues to execute well
- **Solid Order Bookings (up 27% y/y) & healthy Order Backlog** provide good revenue visibility
- **Revenues up 56% y/y** driven by recent acquisitions and strong showing from Life Sciences, Consumer Products and Energy verticals
- **Adj. Operating Margin (13.5%) up 159 bps y/y** driven by improved cost structure, strong program execution, higher revenues from after-sales services and reduced COVID-19 restrictions
- **Announced three acquisitions** BLSG in Process Automation, NCC Automated Systems in Products, and DF in Life Sciences

Q2 F2022 Financial Results

(C$ mm, except per share data)	Q2 F2022	Q2 F2021	Y/Y Change ($)	Y/Y Change (%)
Revenues	**$522.1**	$335.5	$186.6	55.6%
Earnings from operations	**55.4**	23.4	32.0	136.8%
Adjusted earnings from operations[1]	**70.7**	40.1	30.6	76.3%
EBITDA[1]	**81.2**	41.5	39.7	95.7%
Adjusted EBITDA[1]	**83.3**	49.6	33.7	67.9%
Net income	**38.4**	11.6	26.8	231.0%
Basic and diluted earnings per share	**0.41**	0.13	0.28	215.4%
Adjusted basic earnings per share[1]	**0.53**	0.26	0.27	103.8%

Revenue Growth:

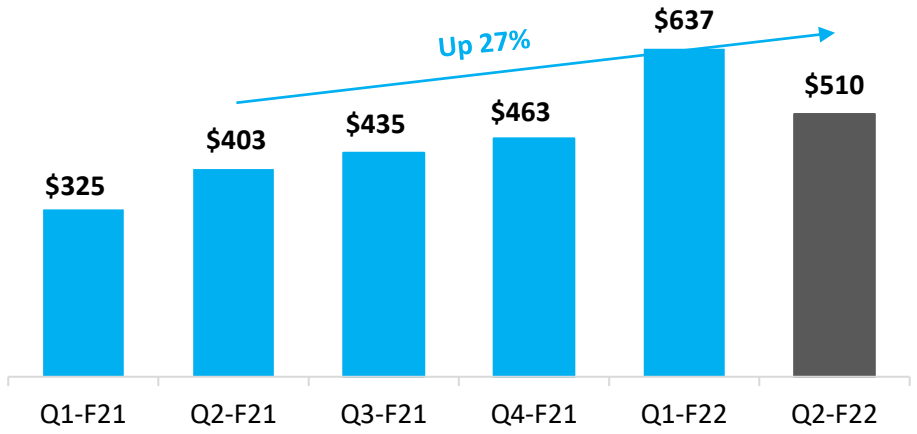
Organic	23.8%
Acquisitions	35.9%
FX.	(4.1)%
Total	55.6%

- Revenues up 55.6% y/y driven by recent acquisitions and strength in Life Sciences, Consumer Products and Energy
  - Organic revenue growth strong at 23.8%
- Adjusted operating margin was 13.5%, up 159 bps y/y driven by improved cost structure, strong program execution, and higher revenues from after-sales services

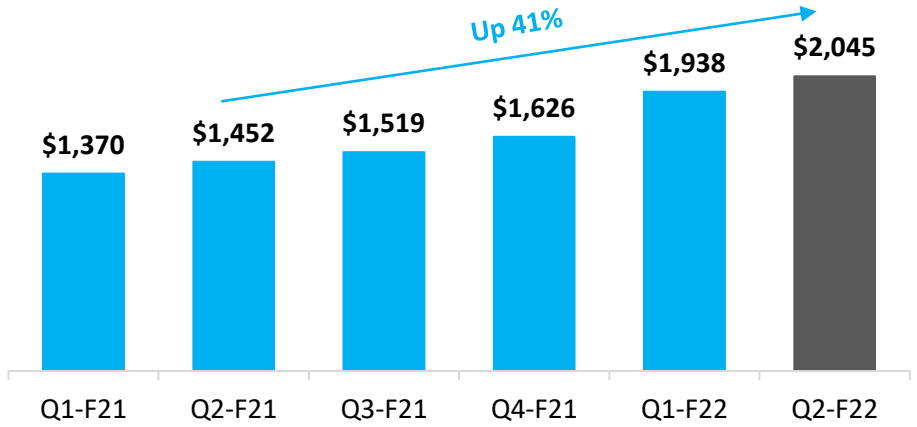
1. See "Appendix: Reconciliation of Non-IFRS Measures to IFRS Measures"

Order Bookings & Backlog

Quarterly Order Bookings[1,2]

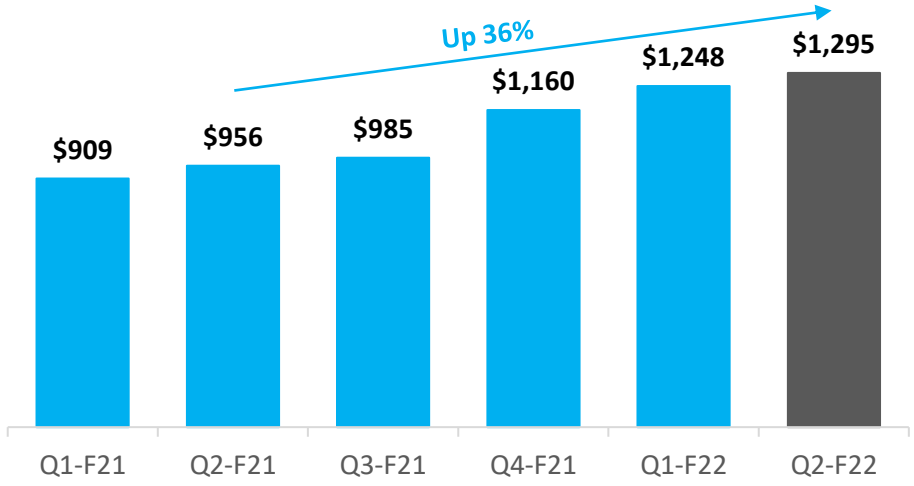


LTM Order Bookings[1,2]



- Strong quarterly bookings aided by acquisitions and robust organic contributions from Transportation and Energy
- LTM Book-to-bill of 1.13x
- Notable project wins include EV battery assembly work and nuclear refurbishment award

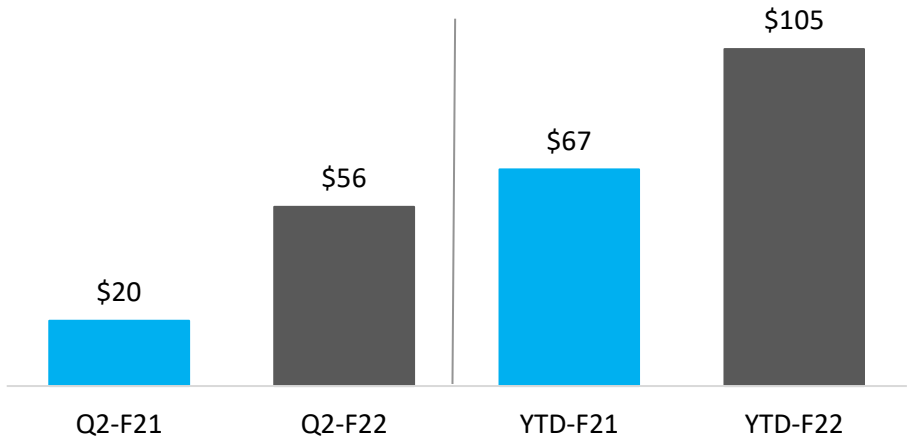
Backlog[1,2]



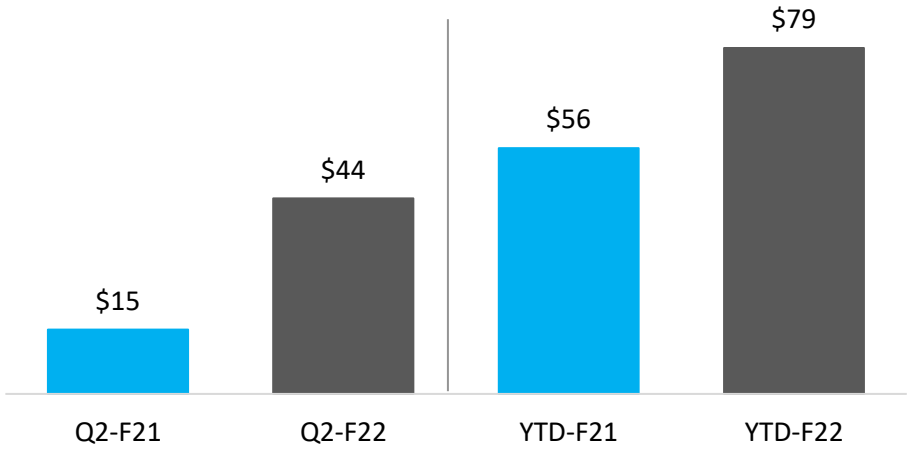
1. See "Appendix: Reconciliation of Non-IFRS Measures to IFRS Measures"; 2. Order Bookings & Backlog in C$ mm

Cash Flow Generation

Cash Flow from Operations[1,2]

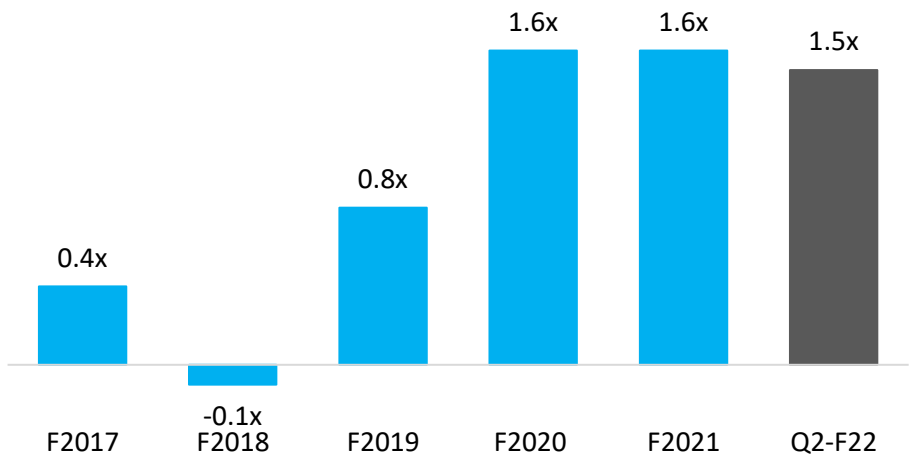


Free Cash Flow[1,2]



- Quarterly CFO benefited from higher profitability partially offset by higher WC investment
- FCF generation of $44mm higher y/y due to strong CFO somewhat offset by higher capex
- Leverage of 1.5x below target of 2.0x to 2.5x

Net Debt to Adj. EBITDA[1]



1. See "Appendix: Reconciliation of Non-IFRS Measures to IFRS Measures"; 2. Cash Flow from Operation & Free Cash Flow in C$ mm

Summary

- Solid Order Bookings and healthy Order Backlog
- Continued focus on margin expansion and deployment of ABM
- Good activity levels across end-markets
- Integration of CFT acquisition (completed in late March 2021) on track
- Three acquisitions announced in Q2 – BLSG, NCC Automated Systems, and DF
  - BLSG and NCC Automated Systems closed in Q2-F22, DF expected to close in Q3-F22
- Expect Q3-F22 Order Backlog to Revenue conversion in 35%-40% range

Appendix: Reconciliation of Non-IFRS Measures to IFRS Measures

Notice to reader: Non-IFRS measures and additional IFRS measures

Throughout this presentation management uses certain non-IFRS measures to evaluate the performance of the Company. The terms "operating margin", "EBITDA", "adjusted net income", "adjusted earnings from operations", "adjusted operating margin", "adjusted EBITDA", "adjusted basic earnings per share", "free cash flow", "net debt to adjusted EBITDA", "Order Bookings", "Order Backlog", and "book-to-bill ratio" do not have any standardized meaning prescribed within IFRS and therefore may not be comparable to similar measures presented by other companies. Such measures should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. In addition, management uses "earnings from operations", which is an additional IFRS measure, to evaluate the performance of the Company. Earnings from operations is presented on the Company's consolidated statements of income as net income excluding income tax expense and net finance costs. Operating margin is an expression of the Company's earnings from operations as a percentage of revenues. EBITDA is defined as earnings from operations excluding depreciation and amortization. Adjusted earnings from operations is defined as earnings from operations before items excluded from management's internal analysis of operating results, such as amortization expense of acquisition-related intangible assets, acquisition-related transaction and integration costs, restructuring charges, and certain other adjustments which would be non-recurring in nature ("adjustment items"). Adjusted operating margin is an expression of the Company's adjusted earnings from operations as a percentage of revenues. Adjusted EBITDA is defined as adjusted earnings from operations excluding depreciation and amortization. Adjusted basic earnings per share is defined as adjusted net income on a basic per share basis, where adjusted net income is defined as adjusted earnings from operations less net finance costs and income tax expense, plus tax effects of adjustment items and adjusted for other significant items of a non-recurring nature. Free cash flow is defined as cash provided by operating activities less property, plant and equipment and intangible asset expenditures. Net debt to adjusted EBITDA is the ratio of the net debt of the Company (cash and cash equivalents less bank indebtedness, long-term debt, and lease liabilities) to adjusted EBITDA. Order Bookings represent new orders for the supply of automation systems, services and products that management believes are firm. Order Backlog is the estimated unearned portion of revenues on customer contracts that are in process and have not been completed at the specified date. Book to bill ratio is a measure of Order Bookings compared to revenue.

Earnings from operations, operating margin, EBITDA and adjusted EBITDA are used by the Company to evaluate the performance of its operations. Management believes that earnings from operations is an important indicator in measuring the performance of the Company's operations on a pre-tax basis and without consideration as to how the Company finances its operations. Management believes that EBITDA and adjusted EBITDA are important indicators of the Company's ability to generate operating cash flows to fund continued investment in its operations. Management believes that adjusted earnings from operations, adjusted operating margin, adjusted EBITDA and adjusted basic earnings per share (including adjusted net income) are important measures to increase comparability of performance between periods. The adjustment items used by management to arrive at these metrics are not considered to be indicative of the business' ongoing operating performance. Free cash flow is used by the Company to measure cash flow from operations after investment in property, plant and equipment and intangible assets. Management uses net debt to adjusted EBITDA as a measurement of leverage of the Company. Order Bookings provide an indication of the Company's ability to secure new orders for work during a specified period, while Order Backlog provides a measure of the value of Order Bookings that have not been completed at a specified point in time. Both Order Bookings and Order Backlog are indicators of future revenues that the Company expects to generate based on contracts that management believes to be firm. Book to bill ratio is used to measure the Company's ability and timeliness to convert Order Bookings into revenues. Management believes that ATS shareholders and potential investors in ATS use these additional IFRS measures and non-IFRS financial measures in making investment decisions and measuring operational results.

A reconciliation of Order Bookings and Order Backlog to total Company revenues are contained in this presentation. A reconciliation of (i) earnings from operations, EBITDA and adjusted EBITDA to net income, (ii) adjusted earnings from operations to earnings from operations, (iii) adjusted basic earnings per share to basic earnings per share, and (iv) free cash flow and net debt to their IFRS measure components in each case is contained in this presentation.
