We do not provide reconciliations of forward-looking non-U.S. GAAP adjusted EBITDA to GAAP due to the inherent difficulty in forecasting and quantifying certain amounts that are necessary for such reconciliations, including adjustments that could be made for acquisitions and divestitures, systems and business enablement expenses, business process transformation expenses, one-time and other events such as impairment charges, transaction and other costs related to acquisitions and divestitures, restructuring costs, miscellaneous capital market activities, and other charges reflected in our reconciliation of historical numbers, the amount of which, based on historical experience, could be significant.

Non-GAAP Financial Measures:

This press release contains non-U.S. GAAP financial measures within the meaning of Regulation G promulgated by the Securities and Exchange Commission. The Company uses certain non-U.S. GAAP financial measures that are included in this press release and the additional financial information both in explaining its results to shareholders and the investment community and in its internal evaluation and management of its businesses. The Company's management believes that these non-U.S. GAAP financial measures and the information they provide are useful to investors since these measures (a) permit investors to view the Company's performance using the same tools that management uses to evaluate the Company's past performance and prospects for future performance, (b) permit investors to compare the Company with its peers, (c) determine certain elements of management's incentive compensation, and (d) provide consistent period-to-period comparisons of the results. Specifically, the Company supplements the reporting of its consolidated financial information with certain non-U.S. GAAP financial measures,

including adjusted EBITDA, which is defined as earnings before interest, taxes, depreciation and amortization, excluding the impact of certain non-cash and other specifically identified items. The Company believes these measures provide meaningful information and help investors understand the Company's financial results and assess its prospects for future performance. On a consolidated basis, the Company uses adjusted EBITDA to evaluate its performance, both internally and as compared with its peers, because it excludes certain items that may not be indicative of the Company's core operating results.
