NEWS RELEASE

## Nokia Networks Recognizes Sanmina for Outstanding Achievements in Quality

12/4/2014

SAN JOSE, Calif., Dec. 4, 2014 /PRNewswire/ -- Sanmina Corporation (Nasdaq: SANM), a leading integrated manufacturing solutions company making some of the world's most complex and innovative optical, electronic and mechanical products, today announced that **Nokia Networks**, the world's specialist in mobile broadband, recently recognized Sanmina for outstanding quality with a 2014 Quality Award for Supplier Excellence.

With more than 6000 suppliers worldwide, managing quality is crucial to Nokia Networks' success and growth. The Nokia Networks Quality Awards program was established to encourage and reward superior quality throughout their global supply chain. The assessment process for these awards included asking Nokia Networks' executives to nominate companies with the strongest track record for quality, along with extensive interviews and inspections. Sanmina was one of three companies to be recognized.

"We have been working with Nokia Networks for 15 years and are honored to be recognized for our ongoing efforts to produce the highest quality products," said Dave Dutkowsky, Executive Vice President of Communications Networks at Sanmina. "We are proud of our teams and the quality systems employed in all of our facilities including **Kunshan**, China where Sanmina produces high technology products for Nokia Networks. Sanmina has worked for many years to refine and improve our quality systems, including advanced methods in Lean, Six Sigma, product design and risk assessment in order to produce the highest quality products for our customers."

"We are very pleased with Sanmina's long term commitment to quality," said Johannes Giloth, Senior Vice President

of Operations at Nokia Networks. "Superior quality is a key differentiator for us in the telecommunications market. Sanmina's expertise has enabled us to drive business results including improved costs of quality and increased yields, resulting in high customer satisfaction."

For over 20 years, Sanmina has helped leading telecommunications companies design, launch and produce advanced network infrastructure equipment including access, backhaul, routing and transport products. Sanmina develops and provides high speed technology, including printed circuit boards, backplanes, RF and optical components that help these companies meet increasing demands for bandwidth and performance.

## About Sanmina

Sanmina Corporation is a leading integrated manufacturing solutions provider serving the fastest-growing segments of the global Electronics Manufacturing Services (EMS) market. Recognized as a technology leader, Sanmina provides end-to-end manufacturing solutions, delivering superior quality and support to Original Equipment Manufacturers (OEMs) primarily in the medical, communications networks, defense and aerospace, industrial and semiconductor systems, multimedia, computing and storage, automotive and clean technology sectors. Sanmina has facilities strategically located in key regions throughout the world. To learn more, visit [www.sanmina.com](http://www.sanmina.com).

## Sanmina Safe Harbor Statement

The foregoing, including the discussion regarding the Company's future prospects, contains certain forward-looking statements that involve risks and uncertainties, including uncertainties associated with economic conditions in the electronics industry, particularly in the principal industry sectors served by the Company, changes in customer requirements and in the volume of sales principal customers, the ability of Sanmina to effectively assimilate acquired businesses and achieve the anticipated benefits of its acquisitions, and competition and technological change. The Company's actual results of operations may differ significantly from those contemplated by such forward-looking statements as a result of these and other factors, including factors set forth in our Company's Annual and quarterly reports filed with the Securities Exchange Commission.
