Sanmina's Costa Mesa Facility Awarded AS9100C Certification For Defense And Aerospace PCB Manufacturing

2/24/2015

SAN JOSE, Calif., Feb. 24, 2015 /PRNewswire/ -- Sanmina Corporation (Nasdaq: SANM), a leading manufacturing solutions company making some of the world's most complex and innovative electronic, optical and mechanical products, today announced its Costa Mesa, California facility has been awarded the AS9100C certification for high technology PCB (printed circuit board), flex and rigid flex circuit boards used in aerospace and defense electronics equipment.

Achieving the AS9100C certification enables Sanmina to produce PCB's and flex circuits for advanced defense and aerospace equipment, including avionics and satellite electronics. The AS9100C certification is an internationally recognized standard focused on improving quality systems throughout the defense and aerospace supply chain. Compliance with this certification ensures that mission critical equipment used by the military and government meets the highest levels of quality and safety. Sanmina Costa Mesa certifications also include ITAR, MIL-PRF-31032, MIL-50884, MIL-55110 and ISO9001-2008.

"Attaining the AS9100C certification allows us to leverage the knowledge and experience we've gained from more than a decade of manufacturing complex PCBs and flexible circuits for leading companies in the aerospace industry," said Steve Bruton, Executive Vice President of Circuit Board Technology at Sanmina. "Our facility in Costa Mesa is unique, built from the ground up with advanced clean rooms for imaging and processing for some of the highest density PCBs and flex circuits in the world."

Sanmina is recognized as a leader in high speed and mission critical PCBs and backplanes, providing complete interconnect solutions to leading companies in communications networks, defense and aerospace, computing, medical, industrial and multimedia market segments. With nine state of the art PCB, backplane and cable facilities around the world, Sanmina provides an end to end solution, from design and technology development to global manufacturing.

About Sanmina Corporation

Sanmina Corporation is a leading integrated manufacturing solutions provider serving the fastest-growing segments of the global Electronics Manufacturing Services (EMS) market. Recognized as a technology leader, Sanmina provides end-to-end manufacturing solutions, delivering superior quality and support to Original Equipment Manufacturers (OEMs) primarily in the communications networks, defense and aerospace, industrial and semiconductor systems, medical, multimedia, computing and storage, automotive and clean technology sectors. Sanmina has facilities strategically located in key regions throughout the world. More information regarding the company is available at <http://www.sanmina.com>.

Sanmina Safe Harbor Statement

The foregoing, including the discussion regarding the Company's future prospects, contains certain forward-looking statements that involve risks and uncertainties, including uncertainties associated with economic conditions in the electronics industry, particularly in the principal industry sectors served by the Company, changes in customer requirements and in the volume of sales principal customers, the ability of Sanmina to effectively assimilate acquired businesses and achieve the anticipated benefits of its acquisitions, and competition and technological change. The Company's actual results of operations may differ significantly from those contemplated by such forward-looking statements as a result of these and other factors, including factors set forth in our Company's Annual and quarterly reports filed with the Securities Exchange Commission.
