Viking Enterprise Solutions Wins Third Consecutive "Best of Show Innovation Award" at Flash Memory Summit 2019

8/22/2019

Honored with "Most Innovative Flash Memory Enterprise Business Application" for Demonstrating a Disaggregated Kubernetes Cluster Application based on NVMe-oF Composable Infrastructure Solution

SAN JOSE, Calif., Aug. 22, 2019 /PRNewswire/ -- Viking Enterprise Solutions, a product division of Sanmina

Corporation (Nasdaq: SANM), today announced that it has won the **Best of Show Innovation Award** at the 2019 Flash Memory Summit for the Most Innovative Flash Memory Enterprise Business Application. Viking Enterprise Solutions demonstrated an NVMe-oF Kubernetes Composable Infrastructure Solution that earned the division its first win under the new brand and its first solo win without the involvement of partners, beating out a record number of award submissions this year. It also marked the third consecutive year that Viking Enterprise Solutions has won a Best of Show Innovation Award for designing high-performing flash solutions that address critical pain points for the storage industry.

NVMe-oF-Kubernetes Composable Infrastructure Solution

While Viking Enterprise Solutions earned awards in 2017 and 2018 for its state-of-the-art **NVMe** and **NVMe-oF** platforms respectively, this year's win was earned for demonstrating a scalable, disaggregated Kubernetes cluster application that operates on its NVMe-oF platform. Kubernetes is an open source and container orchestration system for automating application deployment, scaling and management. The control plane and orchestration are completely API-driven, while coordination of NVMe-oF drives to specific nodes that run applications is intelligent

and completely reconfigurable. The overall solution allows scaling in the compute, memory and storage dimensions to optimize cost effectiveness. Automated reconfiguration of component failures also ensures the availability of applications.

"The marketplace is demanding scalable solutions that can leverage a disaggregated IT infrastructure that integrates container technology for higher levels of performance and efficiency," said Jay Kramer, chairman of the awards program and president of Network Storage Advisors, Inc. "We are proud to recognize Viking Enterprise Solutions for demonstrating the next generation of composable infrastructure that enables scaling of compute, memory and storage independently, along with a Kubernetes container environment to optimize cost and accelerate performance with an NVMe-oF storage solution."

"After having rebranded the business in November 2018, we are very pleased to have won this solo Best of Show Innovation Award for NVMe and NVMe-oF platforms," said Dan Liddle, vice president of Marketing at Viking Enterprise Solutions. "The fact that it's a three-peat is exciting for us and reinforces to the market the leading-edge nature and breadth of our solutions that are deployable today."

In addition to leading the market with ultra high capacity and high-end flash systems, Viking Enterprise Solutions has a long history of providing storage and storage serving platforms to hyperscale and enterprise data centers worldwide. The organization offers a wide range of high capacity, high density storage and storage serving systems for cold and primary storage applications, using both HDD spinning disks as well as flash storage media.

About Flash Memory Summit

Flash Memory Summit, produced by Conference ConCepts, showcases the mainstream applications, key technologies and leading vendors that are driving the multi-billion dollar nonvolatile memory and SSD markets. Now in its 13th year, FMS is the world's largest event featuring the trends, innovations and influencers driving the adoption of flash memory in embedded systems. @FlashMem, #FlashMemorySummit2019, #FlashMemorySummitBestofShowAwardWinner.

About Viking Enterprise Solutions

Viking Enterprise Solutions, a product division of Sanmina Corporation, provides advanced data center products including solid-state memory and disk-based storage server appliances, JBOD storage systems and other products for a variety of data center and storage applications. Viking Enterprise Solutions award winning products are tailored for integration into OEM, System Integrator and data center products, reducing development and operating costs while improving time-to-market. More information is available at www.vikingenterprisesolutions.com.

About Sanmina

Sanmina Corporation is a leading integrated manufacturing solutions provider serving the fastest growing segments of the global Electronics Manufacturing Services (EMS) market. Recognized as a technology leader, Sanmina provides end-to-end manufacturing solutions, delivering superior quality and support to Original Equipment Manufacturers (OEMs) primarily in the communications networks, storage, industrial, defense, medical, automotive and energy industries. Sanmina has facilities strategically located in key regions throughout the world. More information about the company is available at www.sanmina.com.

Sanmina Safe Harbor Statement

The foregoing, including the discussion regarding the Company's future prospects, contains certain forward-looking statements that involve risks and uncertainties, including uncertainties associated with economic conditions in the electronics industry, particularly in the principal industry sectors served by the Company, changes in customer requirements and in the volume of sales principal customers, the ability of Sanmina to effectively assimilate acquired businesses and achieve the anticipated benefits of its acquisitions, and competition and technological change. The Company's actual results of operations may differ significantly from those contemplated by such forward-looking statements as a result of these and other factors, including factors set forth in our Company's Annual and quarterly reports filed with the Securities Exchange Commission.
