

2020 Investor Day

December 2020

NYSE: CDE

> Cautionary Statements

This presentation contains forward-looking statements within the meaning of securities legislation in the United States and Canada, including statements involving strategic priorities, expectations regarding environmental, social and governance (“ESG”) initiatives, anticipated production, costs and expenses, cash flow, returns, net asset values, growth, trading liquidity, upside potential, capital allocation, return on capital, health and safety protocols, exploration and development efforts, COVID-19 planning and response measures, operations and initiatives at the Palmarejo, Rochester, Kensington, Wharf and Silvertip mines, including mill expansion, completion of a pre-feasibility study, exploration plans and expectations regarding Silvertip, the impact of the new crushing circuit at Rochester, post-expansion free cash flow expectations at Rochester, the impact of a new stacking plan at Rochester, and financial outlook. Such forward-looking statements involve known and unknown risks, uncertainties, and other factors which may cause Coeur's actual results, performance, or achievements to be materially different from any future results, performance, or achievements expressed or implied by the forward-looking statements. Such factors include, among others, the risk that the strategies, initiatives and expectations described in this presentation are not achieved on a timely basis or at all, the risks and hazards inherent in the mining business (including risks inherent in developing large-scale mining projects, environmental hazards, industrial accidents, weather, or geologically related conditions), changes in the market prices of gold, silver, zinc, and lead, and a sustained lower price or higher treatment and refining charge environment, the uncertainties inherent in Coeur's production, exploratory and developmental activities, including risks relating to permitting and regulatory delays (including the impact of government shutdowns), ground conditions, grade variability, any future labor disputes, or work stoppages, the uncertainties inherent in the estimation of mineral reserves and resources, changes that could result from Coeur's future acquisition of new mining properties or businesses, the loss or insolvency of any third-party smelter to which Coeur markets its production, the potential effects of the COVID-19 pandemic, including impacts to the availability of our workforce, continued access to financing sources, government orders that may require temporary suspension of operations at one or more of our sites and effects on our suppliers or the refiners and smelters to whom the Company markets its production, the effects of environmental and other governmental regulations and government shut-downs, the risks inherent in the ownership or operation of or investment in mining properties or businesses in foreign countries, Coeur's ability to raise additional financing necessary to conduct its business, make payments or refinance its debt as well as other uncertainties and risk factors set out in filings made from time to time with the United States Securities and Exchange Commission, and the Canadian securities regulators, including, without limitation, Coeur's most recent reports on Forms 10-K and 10-Q. Actual results, developments, and timetables could vary significantly from the estimates presented. Readers are cautioned not to put undue reliance on forward looking statements. Coeur disclaims any intent or obligation to update publicly such forward-looking statements, whether as a result of new information, future events, or otherwise. Additionally, Coeur undertakes no obligation to comment on analyses, expectations, or statements made by third parties in respect of Coeur, its financial or operating results or its securities.

Christopher Pascoe, Coeur's Director, Technical Services and a qualified person under Canadian National Instrument 43-101, reviewed and approved the scientific and technical information concerning Coeur's mineral projects in this presentation. Mineral resources are in addition to mineral reserves and do not have demonstrated economic viability. Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of mineral reserves, and there is no certainty that the inferred mineral resources will be realized. For a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources, as well as data verification procedures and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors, Canadian investors should see the Technical Reports for each of Coeur's properties as filed on SEDAR at www.sedar.com.

Cautionary Note to U.S. Investors - The United States Securities and Exchange Commission permits U.S. mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We may use certain terms in public disclosures, such as "measured," "indicated," "inferred" and "resources," that are recognized by Canadian regulations, but that SEC guidelines generally prohibit U.S. registered companies from including in their filings with the SEC. U.S. investors are urged to consider closely the disclosure in our Form 10-K which may be secured from us, or from the SEC's website at <http://www.sec.gov>.

Non-U.S. GAAP Measures - We supplement the reporting of our financial information determined under United States generally accepted accounting principles (U.S. GAAP) with certain non-U.S. GAAP financial measures, including adjusted net income (loss), operating cash flow excluding changes in working capital, adjusted EBITDA, adjusted EBITDA margin, total leverage, net leverage, free cash flow and adjusted costs applicable to sales per ounce/pound. We believe that these adjusted measures provide meaningful information to assist management, investors and analysts in understanding our financial results and assessing our prospects for future performance. We believe these adjusted financial measures are important indicators of our recurring operations because they exclude items that may not be indicative of, or are unrelated to our core operating results, and provide a better baseline for analyzing trends in our underlying businesses. We believe adjusted net income (loss), adjusted EBITDA, adjusted EBITDA margin, total leverage, net leverage, free cash flow and adjusted costs applicable to sales per ounce/pound are important measures in assessing the Company's overall financial performance. This presentation does not represent an offer of any securities for sale.

> Cautionary Statements (cont.)

Cautionary Statements Regarding Company Outlook

In connection with Coeur's regular planning process, Coeur's management prepared certain unaudited financial and operating projections, some portions of which are included in this presentation. These projections were not prepared with a view toward complying with published guidelines of the SEC, the guidelines established by the American Institute of Certified Public Accountants with respect to prospective financial information or GAAP, but, in the view of Coeur's management, were prepared on a reasonable basis, reflect the best then-available estimates and judgments, and present, to the best of management's knowledge and belief at the time, the expected course of action and the expected future financial and operating performance of Coeur. However, this information is not fact and should not be relied upon as necessarily indicative of actual future results, and readers of this presentation are cautioned not to place undue reliance on these projections.

These projections have been prepared by, and are the responsibility of, Coeur's management. Neither Coeur's independent auditors, nor any other independent accountants, have compiled, examined, or performed any procedures with respect to these projections, nor have they expressed any opinion or any other form of assurance on such information or its achievability, and assume no responsibility for, and disclaim any association with, such projections.

The assumptions and estimates underlying these projections are inherently uncertain and, although considered reasonable by the management of Coeur as of the date of their preparation, are subject to a wide variety of significant business, economic, and competitive risks and uncertainties that could cause actual results to differ materially from those contained in these projections, including, among others, risks and uncertainties relating to Coeur's businesses (including its ability to achieve strategic goals, objectives and targets over applicable periods), industry performance, the regulatory environment, general business and economic conditions and other factors described in the "Risk Factors" section of Coeur's most recent reports on Form 10-K and Form 10-Q and its other periodic reports filed with the SEC. Accordingly, there can be no assurance that these projections are indicative of the future performance of Coeur or that actual results will not differ materially from those presented. Inclusion of these projections in this presentation should not be regarded as a representation by any person that the results contained in these projections will be achieved.

Coeur does not intend to update or otherwise revise these projections to reflect circumstances existing since their preparation or to reflect the occurrence of unanticipated events, even in the event that any or all of the underlying assumptions are shown to be in error. Furthermore, Coeur does not intend to update or revise these projections to reflect changes in general economic or industry conditions.

> Key Messages

 Rebuilt Foundation	Coeur has established a healthy culture , developed a solid strategy , and assembled a strong, aligned team to deliver consistent results
 Industry Leader in ESG	The Company is an industry leader in environmental, social and governance practices
 Transformational Expansion at Rochester	The expansion of Rochester is technically sound , provides excellent economics , has a solid funding plan , and is expected to fundamentally reshape Coeur
 High-Impact Exploration Growth	The Company's higher-level of exploration investment is a key differentiator and is leading to new discoveries , longer mine lives and higher returns
 Silvertip Potential Restart	Recent technical work and exploration results are creating a potentially compelling path forward
 Robust Three-Year Outlook	The three-year outlook reflects strong returns from the Company's portfolio followed by an anticipated step change in cash flow post-Rochester expansion

Strategy

Mitchell J. Krebs
President & Chief Executive Officer

> Compelling Strategy Aligned with Stockholder Priorities

Coeur's strategy is to safely and responsibly discover, develop and operate a balanced portfolio of quality precious metals assets in low-risk jurisdictions to maximize cash flow, returns and net asset value

- ✓ U.S.-based and NYSE-listed, mid-tier gold and silver producer
- ✓ Balanced portfolio of assets located solely in North America
- ✓ Targeting higher returns on invested capital and strong free cash flow¹ growth via high-impact organic growth
- ✓ Industry-leading investment in exploration
- ✓ Recognized as industry leader for ESG programs and initiatives
- ✓ Approaching key inflection point driven by Rochester expansion
- ✓ Approximately \$40 million ADTV (~2.3% of market cap)²

Protecting the Environment

- Leading tailings management procedures and practices
- Published responsibility report in April 2020
- Recently entered into first-of-its kind sage-grouse habitat agreement in Nevada
- Partnership with Trout Unlimited to support abandoned mine legislation

Social and Community Impact

- 237 high-impact community partnerships³
- Innovative development and diversity initiatives
- First precious metals company to sign CEO Action for Diversity and Inclusion pledge
- 71% of employees from surrounding communities

Governance Performance

- 50% of independent directors are diverse
- Innovative incentive compensation design aligned with stockholders
- ISS "1" Quality Score for Governance
- Proactive stockholder engagement
- Winner of 2020 & 2019 Corporate Secretary Magazine's Best Proxy Statement Award (mid-/small cap)

(1) Free cash flow is defined as cash flow from operating activities less capital expenditures and gold production royalty payments.

(2) ADTV = Average Daily Trading Volume. Data observed over a 90-day trading period. FactSet as of November 30, 2020.

(3) Reflects 2019 data.

> Balanced, Low-Risk Portfolio of Precious Metals Assets

(1) Through September 30, 2020.

(2) Other refers to Coeur Capital (primarily production from the Endeavor silver stream in Australia) and the Martha Mine in Argentina. Both assets have been sold by Coeur.

(3) As of December 31, 2019.

> Multiple High-Impact Organic Growth Opportunities

Coeur has multiple high-impact exploration, expansion and optimization opportunities embedded in its portfolio, which it is prioritizing and pursuing based on the Company's capital allocation framework

- ✓ **Pursuing** a higher standard
- ✓ **Executing** largest exploration program in Company history
- ✓ **Allocating** capital according to Company's framework
- ✓ **Aligning** organizational structure and incentive compensation
- ✓ **Measuring** success based on actual results
- ✓ **Striving** to achieve higher returns, longer mine lives and margin expansion

Environmental, Social & Governance

> Governance: Goals & Highlights

Goal: Maintain Best-in-class Governance

- ✓ Proactively conduct off-season outreach to institutional stockholders of at least 0.15% of outstanding shares (~60% of shares outstanding) to solicit feedback on ESG and executive compensation programs and practices
- ✓ Governance recently recognized as the most important ESG factor among asset managers in an ISS survey¹

Highlights

Independent, Engaged and Accomplished Board	✓ 8/9 directors are independent ✓ Independent Board Chairman, separate from CEO ✓ Three new independent directors added since 1Q 2018² ✓ Two directors recognized as NACD 100 top directors in 2019 & 2020
Committed to Diversity & Inclusion	✓ 50% of independent directors are diverse in ethnicity or gender ✓ First and only precious metals miner to join CEO Action for Diversity and Inclusion
Recognized Governance Leader	✓ Maintained ISS QualityScore of “1” for Governance (highest possible) ✓ Won <i>Corporate Secretary Magazine</i> Best Proxy Statement Award in 2019 & 2020 ✓ Proactive Leadership in adopting best-in-class corporate governance reforms – Adopted proxy access and added misconduct to executive clawback policy

(1) <https://www.issgovernance.com/iss-esg-survey-results-highlight-increased-asset-manager-focus-on-social-issues-in-light-of-covid-19-pandemic/>.

(2) New independent director appointed in 2019 recently had to step down due to a new professional position that did not allow outside board service.

> 2020 Incentive Plan

- ✓ Coeur's incentive plans are highly aligned with its strategic objectives and purpose statement
- ✓ Added Return on Invested Capital and Major Project Execution measures for 2020

PROTECT		TRIFR % Reduction	AIP 20%
		% Decline in Permit Exceedances	
DEVELOP		Three-Year Growth in Reserves and Resources from Continuing Operations	PSUs ¹ 35%
		<i>Achievement of Milestones for Strategically Critical Long-Term Projects² (new)</i>	PSUs ¹ 30%
DELIVER		Costs Applicable to Sales per Ounce Adjusted EBITDA	AIP 55%
		<i>Three-Year Return on Invested Capital (new)</i>	PSUs ¹ 35%
		Production	AIP 25%

(1) The three internal performance share metrics are subject to a relative total stockholder return ("TSR") modifier that adjusts payouts +/-25% for top or bottom quartile performance compared to peers.

(2) Tied to achievement of Rochester and Silvertip expansion projects (split 20% Rochester and 10% Silvertip) and YE 2022 net asset values for Rochester and Silvertip.

> Social: Goals & Highlights – Our People

Goal: Maintain Coeur as an Employer of Choice

- ✓ **Safety:** Zero harm; 7.5% reduction in three-year trailing average total reportable injury frequency rate
- ✓ **Culture:** Strengthen culture, employee engagement and retention
- ✓ **Diversity:** Foster an inclusive workplace that supports diversity and reflects the communities where we operate

Highlights

Safety	✓ Coeur expects to spend approximately \$15 million through the end of the year in additional COVID-related costs to protect and provide for its employees and communities such as testing, contact tracing and pay and provision for quarantined employees ✓ Maintained industry-leading safety performance, including no fatalities, and reduced reportable injuries across the Company's operations by 53% over the past nine years
Culture	✓ Hired, promoted and empowered female leaders across Coeur's operations, including a new Mexico Country Manager and General Manager for the Rochester mine in Nevada ✓ Supported employees through COVID-19 with regular check-ins, surveys and resources
Diversity	✓ Hosted a Day of Understanding in early 2020 to create platform for open dialogue and meaningful conversation on diversity and inclusion ✓ Partnered with By the Hand Club, an organization focused on supporting Chicago's Black community, to expose kids to STEM and career opportunities in the mining industry

> Social: Goals & Highlights – Our Communities

Goal: Make a Positive Impact on the Communities in Which We Work

- ✓ Human rights: Develop a formal grievance process by 2021

Highlights Across Coeur's Operations

Palmarejo

- ✓ Community partner for **17+ years**
- ✓ Provides general health care to the community free of charge in onsite clinic; recorded **11,547 total visits** through 3Q 2020

Rochester

- ✓ Community partner for **34+ years**
- ✓ **Largest employer** in Pershing County
- ✓ **Supported development** of new regional workforce development initiative
 - First class graduated this fall

Kensington

- ✓ Community partner for **33+ years**
- ✓ **Established an endowed scholarship** fund at the University of Alaska Southeast in 1991 and have supported since, including a \$300K donation in 2020 to grow the fund

Wharf

- ✓ Community partner for **37+ years**
- ✓ **97%** of employees live in the Black Hills
- ✓ **\$1.5 million endowment fund** to **benefit** the Black Hills community

> Environmental: Goals & Highlights

Goals: Improve Overall Impact Coeur Has on the Environment and Reduce Costs Over Time

- ✓ Develop organization-wide **greenhouse gas (“GHG”) emissions reduction targets** by 2021
- ✓ Conducted **climate disclosures gap assessment** during 2020, and enhance climate-related disclosures in 2021
- ✓ Invest in **more efficient** power plants that reduce both emissions and operating costs
- ✓ **Reduce waste** going to the landfill by 10% across sites by 2025¹
- ✓ 15% decrease in 2020 **permit discharge exceedances**¹

2020 Highlights

Climate Change and GHG Emissions

- ✓ Designated site energy leads – identified **37 opportunities** to reduce energy use and GHG emissions through technical solutions assessments
- ✓ Recent initiatives at Rochester and Wharf are expected to **reduce GHG emissions by more than 14,500 metric tonnes** annually²
- ✓ Wharf expects to source **more than 40% of its electricity from wind power** beginning in 2021 with goal to increase to 100% subject to availability

Supporting Biodiversity

- ✓ In May 2020, Rochester participated in Nevada’s Sage Grouse Conservation Credit System, and will provide full funding to **preserve and enhance over 3,000 acres of vital greater sage-grouse habitat** in Elko and Humboldt Counties

(1) Compared to 2019 base year.

(2) Wharf greenhouse gas reduction estimate is based on 2019 electricity use.

> Enhancing Coeur's ESG Disclosures

Coeur is committed to being an ESG disclosure leader, including transparent and clear communication of performance and progress following SASB and TCFD frameworks

Sustainable Accounting Standards Board ("SASB")¹

- ✓ Focused on industry-specific financially material items; market-informed
- ✓ Preferred ESG disclosure framework for corporations backed by \$15+ trillion of investor assets
- ✓ Coeur's 2019 Responsibility Report aligned with SASB; enhanced disclosures planned for 2020 report
- ✓ Korie Hickel, Manager, ESG, named to SASB Extractives Sector Standards Advisory Group

Task Force on Climate-related Financial Disclosures ("TCFD")²

- ✓ Aims to measure the physical, liability and transition risks associated with climate change
- ✓ Climate scenario analysis and planning is an important component of this framework
- ✓ Coeur to start reporting in line with TCFD recommendations in its 2020 Responsibility Report

Spearheading ESG efforts in the mining industry: Mitchell Krebs was named Vice Chair of the National Mining Association's newly-formed ESG Task Force in November 2020. He will oversee NMA's ESG platform and facilitate sharing of best practices in the industry

(1) SASB - <https://www.sasb.org/>.

(2) Task Force on Climate-related Financial Disclosures - <https://www.fsb-tcfd.org/about/#>; <https://www.fsb-tcfd.org/wp-content/uploads/2019/06/2019-TCFD-Status-Report-FINAL-053119.pdf>.

(4) Please refer to the Finance section of this presentation for additional details on Coeur's three-year outlook.

> Operations & Projects: Strategic Alignment

Coeur has strong strategic alignment across its business given the Company's holistic approach to planning, including consistent foundational elements that drive a team-based approach to achieving near- and long-term goals

> Operational Framework and Commitment to Safety

Coeur deploys a rigorous planning process to help facilitate the methodical execution of its strategic operational objectives, while maintaining a steadfast commitment to the health and safety of its workforce

Operations Planning Framework

Management Operating System

Lost-Time Injury Frequency Rate

Total Reportable Injury Frequency Rate

(1) Source(s): U.S. Department of Labor Mine Safety and Health Administration: Metal Operators Mine Safety and Health Statistics. Injuries per 200,000 employee-hours worked.

(2) Includes both Coeur employees and contract workers.

(3) Coeur YTD 2020 information through October 31, 2020.

> Business Improvement: Project Delivery Mechanism

Coeur recently implemented a new system to advance projects, utilizing a simple stage gate process, to enhance its project execution and delivery capabilities

> Business Improvement: 2020 Project Profiles

Significant production improvements have been possible at each operation through a series of targeted process changes

	Primary Project Goals	Accomplishments ¹
Palmarejo 	✓ Increase metallurgical recoveries by 2% and 1% for gold and silver, respectively, by introducing a second tailings thickener using the Counter Current Decantation process ✓ Increase load factor of haul trucks through the introduction of payload scanners and short interval control	✓ Increased global metallurgical recovery of gold and silver by approximately 1.6% and 1.8%, respectively ✓ Improvements are expected to result in an annualized benefit of roughly \$7.0-\$7.5 million
Rochester 	✓ Increase crusher productivity from 34,000 tons per day ("tpd") to 38,000 tpd by advancing enabling projects: – D&B optimization – Belt speed increase – Motor upgrades	✓ Increased crusher throughput to approximately 38,000 tpd and "locked-in" result for 2021 ✓ Realized improvement of roughly \$6.0-\$8.0 million annually
Kensington 	✓ Increase mine output from an average of 1,807 tpd to ~1,850 tpd by tracking and managing key inputs: – Drilled inventory, broken inventory, backfill plant utilization, etc. ✓ Systematic modification of Knelson concentrator to run higher grade Jualin ore at higher rate without overloading gravity circuit	✓ Created buffer of five days on surface stockpile, 15 days in drilled inventory to generate benefit of approximately \$2.0 million annually ✓ Increased feed rate for Jualin ore from 73 tons per hour to 79 tons per hour for an annual anticipated benefit of roughly \$2.0 million
Wharf 	✓ Increase crusher productivity from 4.5 million tons to 4.6 million tons annually without the use of a third-party crusher by advancing enabling projects: – Weekly to bi-weekly crusher downs – Re-designed morning shift change	✓ On track to realize an additional 200,000 crushed tons ✓ Expected to increased crusher throughput in 2021 to 4.6 million tons without the use of third-party crusher worth an estimated \$2.0-3.0 million annually

(1) Reflects expected annualized benefits achieved during 2020.

Rochester: Expansion Overview

> Rochester: Near-Term Performance Update

Coeur is taking a diligent approach towards improving operational performance on the Stage IV leach pad, leveraging continuous feedback to strengthen short interval controls and enhance near-term production visibility

Modeling	✓ Recovery model ✓ Column data ✓ Operational data ✓ Continuous model recalibration
Blasting	✓ Powder factor vs. throughput vs. gradation vs. recovery ✓ Heap leach permeability and stability ✓ Blast optimization
Crushing	✓ Throughput vs. gradation vs. recovery ✓ Primary – Secondary – Tertiary performance ✓ Heap leach permeability and stability ✓ Minerology
Leaching	✓ Gradation vs. recovery vs. reagent vs. application rate ✓ Heap leach permeability and stability ✓ Cyanide – free, WAD, concentration, consumption, base metals ✓ Dissolved oxygen – sulphide evaluation, heap saturation ✓ Leach pad planning – cell design, flowrates, on/off schedule
Recovery	✓ Leach pad recovery and timing ✓ Solution management and grade optimization ✓ Merrill-Crowe performance

> Rochester: Near-Term Performance Update (cont.)

The Company continues to leverage the use of inter-lift liners in order to maximize the placement of HPGR-crushed ore on shallower portions of the Stage IV leach pad

- ✓ Phase 1 and 2 installed as an environmental mitigation controls in 2Q 2020
- ✓ Phase 3 installed in 3Q 2020 to reduce depth-to-liner challenges and reduce the impact of dilution on HPGR-crushed ore
- ✓ Phase 4 is in the process of being engineered/constructed with a target of leaching in early 2021
- ✓ Inter-lift liners decrease operational risk of recovery timing and dilution impacts from depth-to-liner challenges on the Stage IV leach pad
- ✓ Inter-lift liners designed to reduce overall depth-to-liner until the Stage VI leach pad is loaded in mid-2022
- ✓ Without inter-lift liner systems Rochester would likely have realized dilution and diffusion impacts on both gold and silver

> Rochester: Near-Term Performance Update (cont.)

Rochester is using the Stage IV leach pad to fully optimize HPGR technology, which is expected to simplify the crushing process, improve silver recoveries, and ultimately deliver higher production rates and improved margins

Recoverable Placed vs. Produced Silver

(K oz)

- ✓ Post HPGR install, Rochester has improved crusher throughput, removed dilution and depth to liner delays, improved understanding of mineralogy impacts, and has begun optimizing crusher product size distributions (“PSD”)
- ✓ In 2021, the operation is expected to build upon learnings from 2020 and focus heavily on crusher PSD and optimize leach kinetics on the Stage IV leach pad to fully prove out the anticipated benefits from HPGR technology
- ✓ By 2023, Rochester is anticipated to develop robust operating parameters for the new crushing system and leach pad to fully leverage and maximize the benefits of HPGR technology

> Rochester: Expansion Expected to Unlock Significant Value¹ COEUR MINING®

Coeur expects Rochester to generate over \$100 million in average annual free cash flow post-expansion^{2,3}, leading to an after-tax NAV_{5%} of \$634 million with an internal rate of return of 31% based solely on proven and probable reserves

Value Proposition

Facilitates Multiple Stockholder Priorities

- ✓ Higher overall returns on invested capital
- ✓ Sustained, strong free cash flow²
- ✓ Further de-leveraging opportunities
- ✓ Leading, low-risk exposure to precious metals prices
- ✓ Funding of other high-quality growth opportunities
- ✓ Potential to return excess capital over the long term

(1) For additional information on the expansion of Rochester, Canadian investors should refer to the latest Technical Report for Rochester on file at www.sedar.com.

(2) Free cash flow is defined as cash flow from operating activities less capital expenditures and gold production royalty payments.

(3) Reflects annual average free cash flow from 2023 to 2032.

(4) Reflects planned capital expenditures from 2021 to 2023.

> Rochester: Expansion Overview Video

> Rochester: Scope of Expansion

The expansion of Rochester includes the construction of a new leach pad, a crushing facility equipped with two HPGR units, a Merrill-Crowe process plant, and related infrastructure to support the extension of its mine life

(1) Gallons per minute.

> Rochester: Expansion Capital and Funding Summary

The expansion of Rochester is technically sound, has a solid funding plan and compelling economics, and is expected to fundamentally reshape Coeur

Rochester Expansion Capital Breakdown¹

Funding Strategy

Cash on Hand	✓ Cash on balance sheet
	✓ Opportunistic monetization of strategic investments (e.g., Metalla)
Internally Generated Cash Flow	✓ Expect strong cash flow generation during construction period
	– Operating cash flow from Rochester
	– Free cash flow ³ from other operations
Existing Debt Capacity	✓ Revolving credit facility
	✓ Equipment and finance leases
Opportunistic Hedging	✓ Utilizing zero-cost collars on gold
	– Targeting up to 50% of expected gold production through 2022

Key Factors Driving Value

Higher Expected Silver Recoveries⁴

Lower Expected Costs^{4,5}

(1) Reflects planned capital expenditures from 2021 to 2023.

(2) Includes surface infrastructure (including power), capital spares, sales tax and insurance.

(3) Free cash flow is defined as cash flow from operating activities less capital expenditures and gold production royalty payments.

(4) Silver recoveries and life of mine (LOM) cost per ton figures as presented in Rochester's latest technical report. Canadian investors should refer to the latest Technical Report for Rochester on file at www.sedar.com.

(5) Mining cost per ton mined. Crushing/Processing, G&A and Total Operating costs per ton placed. Total Operating Cost includes third-party refining charges.

> Rochester: Expansion Project Timeline

Coeur began initial construction on the expansion of Rochester in August 2020, with major construction projects scheduled to begin in 2021 and be largely completed by late 2022

(1) Includes ancillary facilities.

> Rochester: Reserve and Resource Summary

Coeur's exploration success has led to significant increases in Rochester reserves, leading to a longer mine life with opportunities for continued growth

Proven & Probable Reserves

- ✓ **~58% and ~65% increase year-over-year** in silver and gold reserves, respectively
 - Exploration success at Rochester East and at depth, and declaration of maiden Nevada Packard reserves
- ✓ Silver and gold reserves **~2.3x** and **~2.6x higher vs. 2015**, respectively
- ✓ **Significant improvement** in mine life and **upside potential** from resource conversions with continued drilling

Resources

Measured & Indicated

Inferred

- ✓ Successful conversions reflected in year-over-year decrease in silver and gold measured and indicated resources
 - Silver and gold measured and indicated resources **~9% and ~4% higher vs. 2015**, respectively
- ✓ **Continued expansion** of inferred resources represents **upside potential** for future mine life extensions
 - Silver and gold inferred resources **~2.0x and ~2.3x higher vs. 2015**, respectively
- ✓ **Significant potential** to grow **resource base** with continued drilling of property package adjacent to Rochester (acquired in 2018 for ~\$19 million)

> Rochester: Net Asset Value Sensitivities¹

			Silver Price (\$/oz)						
			(30%)	(20%)	(10%)	Base ²	+10%	+20%	+30%
			\$13.62	\$15.56	\$17.51	\$19.45	\$21.40	\$23.35	\$25.29
Gold Price (\$/oz)	(30%)	\$1,081	(\$191)	(\$29)	\$132	\$292	\$452	\$612	\$772
	(20%)	\$1,235	(\$76)	\$86	\$246	\$406	\$566	\$726	\$886
	(10%)	\$1,390	\$39	\$200	\$360	\$520	\$680	\$839	\$999
	Base ²	\$1,544	\$153	\$314	\$474	\$634	\$793	\$953	\$1,113
	+10%	\$1,698	\$267	\$428	\$588	\$747	\$907	\$1,066	\$1,226
	+20%	\$1,853	\$381	\$542	\$701	\$861	\$1,020	\$1,180	\$1,339
	+30%	\$2,007	\$495	\$655	\$815	\$974	\$1,133	\$1,293	\$1,452

(1) NAV values in \$ millions. For additional information on the expansion of Rochester, Canadian investors should refer to the latest Technical Report for Rochester on file at www.sedar.com.

(2) Represents weighted average life of mine metals price assumption.

Silvertip: Status Update

> Silvertip: Investment Thesis and Key Learnings

The key elements of Coeur's acquisition strategy for Silvertip remain intact, further supported by the Company's rigorous technical work completed in 2020 and exploration success to expand the resource

Acquisition Rationale	Investment Thesis	Key Learnings Since Acquisition
Resource 	✓ Highly-prospective deposit with large, underexplored land package with significant expansion potential ✓ Among the highest-grade operations in the sector	✓ Exploration continues to indicate growth in the high-grade resource in multiple directions – Over two miles (3.5 kilometers) of north-south strike length, more than triple the previous resource strike length ✓ Drill program continuing through the winter aimed at supporting a longer mine life
Jurisdiction 	✓ Diversification of Coeur's geographic and political risk – Exited Bolivia and entered Canada ✓ Permitted project in a great mining jurisdiction with supportive First Nations partners	✓ Developed meaningful relationships with First Nations partners as well as the BC Ministry of Energy, Mines & Petroleum Resources – Prepared to support potential restart and expansion with additional permitting
Commercial 	✓ Upgradeable mill with excess crushing / grinding capacity ✓ Capable of producing attractive concentrates into the base metal market	✓ Improved metallurgical understanding of the deposit ✓ PFS¹ work demonstrates strong recoveries and grades ✓ Mill expansion engineering continues with a targeted capacity of 1,750 tpd² ✓ Improvement in fundamentals of base metal markets

(1) Pre-feasibility study.

(2) Tonnes per day.

> Silvertip: Key Outcomes of Pre-Feasibility Study

The primary goal of the pre-feasibility study was to build a mine plan that supports a safe operation with strong environmental compliance, a high level of reliability, the ability to withstand market downturns and can be a meaningful long-term business for Coeur

- ✓ Mine planning and design expected to deliver consistent supply of ore at target feed grade
- ✓ Mill flowsheet development and expansion supporting 1,750 tpd throughput rate
 - Anticipated to help generate commercially attractive concentrates at high recoveries
- ✓ Designing an expanded mill facility that eliminates the potential for lead exposure to employees and the environment
 - Facilitating easier maintenance and more consistent operating levels
- ✓ Developing a cost-effective power generation solution
- ✓ Delivering mass and water balance solutions that supports operational requirements and environmental stewardship
- ✓ Reducing operating costs and implementing advanced mining and processing technologies

The key elements of the pre-feasibility study have undergone third-party technical reviews with no significant recommendations

> Silvertip: Proposed Flowsheet and Key Improvements

> Silvertip: Metallurgy Update

Metallurgical test work has demonstrated strong recoveries and concentrate grades. Combining improved revenues (recovery, con grade), better margins (scale and reliability) and a longer mine life (exploration, lower cut-off grade) has the potential to create a compelling investment opportunity for Silvertip

Previous Flowsheet

Resolved

- ❗ Presence of carbonaceous ores in the mill feed negatively impacted lead rougher and cleaner performance
 - Poor lead rougher performance impacted zinc concentrate grades

- ❗ Absence of lead regrind for rougher concentrates negatively impacted final concentrate grades

- ❗ Recirculation of zinc and lead cleaner scavenger tails to rougher scavenger circuits compromised the limited cleaner capacities, resulting in lower final concentrate grades

- ❗ Adequate conditioning times are necessary between streams (zinc/lead/pyrite) in order to enhance grade and recovery

		2019 Actual	PFS Ranges
Recoveries ¹	Zinc (in zinc con)	~70%	81%-90%
	Lead (in lead con)	~75%	85%-91%
	Silver (in lead con)	~68%	76%-80%

Pre-feasibility test work from the Discovery and Silver Creek zones has indicated the potential for strong recoveries and concentrate grades

(1) Figures reflect metallurgical recoveries.

> Silvertip: Next Steps

Coeur has made significant progress to advance Silvertip; however, additional steps are required for the Company to further de-risk the project and enhance the economics of a potential restart

Exploration

Hans J. Rasmussen
Senior Vice President, Exploration

> Committed to a Higher-Level of Exploration Investment¹

Coeur expects to maintain its commitment to a higher-level of exploration investment, while maintaining its results-driven focus on high-return targets

Total Exploration Investment
(\$M)

2021E–2023E Exploration Investment

(1) Please refer to the Finance section of this presentation for additional details on Coeur's three-year outlook.

(2) Midpoint of guidance as published by Coeur on October 28, 2020.

> Key Exploration Objectives

Coeur exceeded its internal expectations in 2020 while executing the largest exploration program in Company history. Recognizing the need for a multi-year commitment, each site has proposed an aggressive drilling program for 2021 with a continued focus on resource growth

> Rochester: Exploration Update

Coeur's primary focus of the exploration program at Rochester in 2020 has been expansion drilling at East Rochester as well as infill drilling beneath the open pit to further improve the economics of the upcoming expansion

Expansion Program

- ✓ 12 directional and two conventional core holes completed for a total of 19,042 feet (5,804 meters) of drilling
 - All holes were mineralized
 - East Rochester remains open to south and north
- ✓ Recent highlights include 195 feet of 2.35 oz/t silver and 0.016 oz/t gold
- ✓ A winter reverse circulation program began in mid-November to continue drilling north along the mineralized structure

Infill Program

- ✓ 46 holes for a total of 24,460 feet (7,455 meters) drilled in 2020

> Rochester: Successful Reserve and Resource Growth

Rochester East

2018

2020

Rochester Deeps/North Layback

2018

2020

Note: See slides in appendix for additional information related to mineral reserves and resources. Canadian investors should refer to the technical report on file at www.sedar.com.

> Rochester: Three-Year Drilling Outlook

Over the next three years, Coeur plans to focus on aggressive resource expansion drilling at East Rochester as well as new targets south and west of Rochester's existing open pit

Coeur expects to focus on its near- and medium-term drilling priorities over the next few years to align mine sequencing

> Rochester: Expansion Priorities for 2021 and Beyond

Rochester

- ✓ Continue directional core program to south
- ✓ Reverse circulation drilling at north East Rochester and East Packard

Lincoln Hill District

- ✓ Drill targeting with geochemistry, geology and geophysics
- ✓ Begin Lincoln Hill District drilling in mid-2021 on 2.4 acre remaining in Notice Permit
- ✓ 200-acre plan of operations is received¹, including Gold Ridge zone
- ✓ Continue to ramp up in subsequent years with the ultimate goal of first production 2024-2025

Property package adjacent to Rochester that Coeur acquired in late 2018 for ~\$19 million represents significant potential to further grow reserves and leverage existing infrastructure

(1) Expected to be received in 2H 2021.

> Rochester: Expansion Priorities for 2021 and Beyond (cont.) COEUR MINING®

Gold Ridge Example¹

(1) <https://www.prnewswire.com/news-releases/rye-patch-hits-at-gold-ridge-564369141.html>.

> Silvertip: Exploration Update

Coeur focused exclusively on expansion drilling at Silvertip through the first nine months of 2020. The Company has since transitioned its efforts to underground development to bolster exploration efforts and help facilitate follow-up drilling of encouraging results received earlier in the year

Expansion Program

- ✓ 120 core holes completed – 166,177 feet (50,651 meters) drilled so far in 2020
 - Increased full-year 2020 target of ~210,000 feet (~64,000 meters)
- ✓ Significant new discoveries at Camp Creek, Tour Ridge and Keda zones
- ✓ Strong potential for resource growth north, east and south of the Discovery zone

Infill Program

- ✓ Underground development has begun to cut a tunnel heading south from 65 Zone towards Tour Ridge
- ✓ Infill drilling from the drift is planned to help convert existing resources to reserves in order to extend mine life

> Silvertip: Exploration Update (cont.)

Combined, the Keda and Tour Ridge discoveries have demonstrated the potential for resource growth with over two miles (3.5 kilometers) of north-south strike length, more than triple the previous resource strike length

- ✓ 2020 marks the largest and most successful exploration program in the history of the property
- ✓ Coeur plans to test areas of “no historic drilling” in 2021 to confirm continuity of mineralization
- ✓ The Silvertip deposit remains open north, south and east

Silvertip Long Section (Looking East)

> Crown/Sterling: Land Position of ~35,500 Net Acres

> Crown/C-Horst: Exploration Update

For 2020, exploration has quickly shifted focus to the new C-Horst discovery, hole CH20-002 drilled in February. Due to drill disturbance limitations, all discovery holes to date have been from only two drill platforms

Note: For complete tables of all drill results published in 2020, please refer to the following links:
https://www.coeur.com/_resources/pdfs/2020-08-11_Exploration_Update_Appendix_-_Final.pdf;
https://www.coeur.com/_resources/pdfs/2020-12-17-Investor-Day-Exploration-Update-Appendix-Final.pdf.

> Crown/C-Horst: Geologic Model Underway

The first step in understanding the future resource and potential exploration upside is geologic modeling – with drill chips and core, Coeur's first geological model is currently underway

> Crown/C-Horst: Highlights of Recent Drilling

- ✓ 41 reverse circulation holes and three core holes completed for approximately 70,000 feet (21,341 meters)
- ✓ Three outcropping zones of gold mineralization identified to drill south of C-Horst: (i) Pipeline Gulch, (ii) TWA (0.03oz/t gold on surface), and (iii) Hole 4
- ✓ Six new permitted drill sites have potential double C-Horst modeled shapes

Finance

Thomas S. Whelan

Senior Vice President & Chief Financial Officer

> Coeur's Capital Allocation Framework

Mining is capital intensive and requires a disciplined approach to capital allocation with a view toward long-term reserve replacement and growth

 COEUR MINING® Capital Allocation		Illustrative Return	Key Benefits	Key Considerations
	Safety/ Environment/ Sustainability	–	✓ Reflects the Company's values ✓ Mitigates risk for stakeholders ✓ Establishes and sustains social license	
	Asset Optimization/ Enhancements	25% +	✓ Highest returns and quickest impact ✓ Low capital intensity ✓ Lowest risk	✗ Finite opportunity set
	Brownfield Exploration	20% +	✓ High success/lowest risk exploration ✓ Low average discovery cost ✓ Quick payback given existing infrastructure	✗ Returns dependent on specific deposit ✗ All deposits eventually come to an end
	Opportunistic M&A	15% +	✓ Opportunity to meaningfully impact company ✓ Scale and liquidity can be differentiators	✗ Limited number of opportunities meet criteria ✗ Requires significant organizational commitment ✗ Challenging social dynamics
	Greenfield Exploration	Can vary widely	✓ Potential to create substantial value from new discoveries	✗ Low success rate ✗ Requires long-term, sustained financial and organizational commitment
	Debt Repayment	5% - 6%	✓ Eliminates/reduces interest expense ✓ Improves balance sheet flexibility ✓ Mitigates downside metal price risk	✗ Low ROI ✗ Reduces cash liquidity levels ✗ Bond buybacks can be expensive
	Dividends/ Repurchases	–	✓ Reflects Board and management confidence in long-term outlook ✓ Provides discipline ✓ Opportunity to differentiate among peers	✗ Industry's cyclicality and capital intensity ✗ Not a key driver for most investors ✗ Limited under indenture and credit agreement

6% - 10% estimated cost of capital

> Summary Overview of Funding Strategy

Coeur plans to fund its key internal growth projects, including the expansion of Rochester, and its higher-level of exploration investment with a combination of (i) cash on hand, (ii) operating cash flow, and (iii) existing debt capacity

Organic Growth & Exploration Investments	✓ Capital for the expansion of Rochester expected to be approximately \$397 million over the next three years (2021-2023), including \$42 million in contingencies ✓ Anticipated to remain committed to a higher-level of exploration investment, highlighted by approximately \$175 million earmarked for drilling over the next three years (2021-2023)
Capital Structure	✓ Targeting minimum year-end cash balance of approximately \$70 million (2021-2023) ✓ Recently expanded revolving credit facility by \$50 million, bringing the total capacity to \$300 million – Available capacity for additional capital leases and plan to coordinate a \$50 million capital lease package related to the expansion of Rochester ✓ Approximately \$230 million of 5.875% senior notes due 2024 outstanding ✓ Near-term leverage ratios anticipated to be elevated to help support funding for the Rochester expansion – Targeting net leverage of less than ~2.0x during major construction
Outlook Assumptions	✓ 2021E: gold price of \$1,900/oz, silver price of \$23.00/oz – 158,700 gold ounces hedged (avg. ceiling of \$1,875/oz and avg. floor of \$1,600/oz) ✓ 2022E: gold price of \$1,800/oz, silver price of \$22.00/oz – 126,000 gold ounces hedged (avg. ceiling of \$2,030/oz and avg. floor of \$1,626/oz) ✓ 2023E: gold price of \$1,700/oz, silver price of \$21.00/oz – No hedges in place/anticipated to remain unhedged
Looking Ahead	✓ Expected to be well-positioned to exit 2023 with a high-quality balance sheet and poised to evaluate potential return of capital alternatives

> Three-Year Outlook: Operational and Financial Overview¹ COEUR MINING®

Coeur's operating and financial profile is expected to remain solid over the next two years, before improving in conjunction with the expected completion of the Rochester expansion by 2023

Production Summary

Operating Cash Flow (\$M)

Capital Expenditures (\$M)

Free Cash Flow^{2,3} (\$M)

(1) Please refer to the previous page for key assumptions used in Coeur's three-year outlook.

(2) Free cash flow is defined as cash flow from operating activities less capital expenditures and gold production royalty payments.

(3) See non-GAAP reconciliation tables in the appendix to this presentation.

> Three-Year Outlook: Balance Sheet and Liquidity¹

Coeur is targeting to maintain strong liquidity and manageable leverage levels during major construction at Rochester, supported by its flexible balance sheet

Liquidity Profile

(\$M)

	2021E	2022E	2023E
Revolver Capacity	\$300	\$300	\$300
Less: Borrowings	~(47)	~(157)	~(67)
Less: Letters of Credit	~(35)	~(35)	~(35)
Revolver Availability	~\$218	~\$108	~\$198
Plus: Cash and Equivalents	~70	~70	~70
Total Liquidity	~\$288	~\$178	~\$268

- ✓ Targeting minimum year-end cash balance of approximately \$70 million
- ✓ Recently expanded revolving credit facility by \$50 million, bringing the total capacity to \$300 million

Debt and Leverage Summary^{2,3}

(\$M)

- ✓ Near-term leverage ratios anticipated to be elevated to help support funding for the expansion of Rochester
- ✓ Targeting net leverage of less than ~2.0x during major construction

(1) Please refer to the previous two pages for key assumptions used in Coeur's three-year outlook.

(2) See non-GAAP reconciliation tables in the appendix to this presentation.

(3) Net debt equals total debt less cash and cash equivalents.

Conclusion

Mitchell J. Krebs
President & Chief Executive Officer

> Key Messages

 Rebuilt Foundation	Coeur has established a healthy culture , developed a solid strategy , and assembled a strong, aligned team to deliver consistent results
 Industry Leader in ESG	The Company is an industry leader in environmental, social and governance practices
 Transformational Expansion at Rochester	The expansion of Rochester is technically sound , provides excellent economics , has a solid funding plan , and is expected to fundamentally reshape Coeur
 High-Impact Exploration Growth	The Company's higher-level of exploration investment is a key differentiator and is leading to new discoveries , longer mine lives and higher returns
 Silvertip Potential Restart	Recent technical work and exploration results are creating a potentially compelling path forward
 Robust Three-Year Outlook	The three-year outlook reflects strong returns from the Company's portfolio followed by an anticipated step change in cash flow post-Rochester expansion

Appendix

Production Outlook

	Gold (oz)	Silver (K oz)
Palmarejo	100,000 – 110,000	6,000 – 7,000

	Nevada, USA					

Notes to Rochester 2020 mineral reserves and resources:

- (1) Effective December 16, 2020.
- (2) Assumed metals prices for estimated Mineral Reserves was \$1,400 per ounce of gold and \$17.00 per ounce of silver.
- (3) Assumed metals prices for estimated Mineral Resources was \$1,600 per ounce of gold and \$20.00 per ounce of silver.
- (4) Mineral Reserves based on a MMTS 2020 Ultimate Pit designs with no loss due to dilution.
- (5) Mineral Reserves are contained within MMTS 2020 Ultimate Pit designs targeting approximately 459 million tons of proven and probable reserves (in situ or in stockpiles) and are supported by a mine plan featuring variable throughput rates, stockpiling, haulage and a cut-off optimization. The mine plan designs incorporate variable open pit slope angles over the pit life approximately averaging 43°, variable metallurgical recoveries depending on deposit location and material processed, including gold oxide recovery of 92%, gold sulfide recovery of 60%, silver oxide recovery of 70% and sulfide recovery of 60% for the Rochester deposit and gold oxide recovery of 92% and silver oxide recovery of 61% with no sulfide recovery for the Nevada Packard deposit.
- (6) The NSR cut-off for Mineral Reserves equals \$2.55/ton for oxide and \$2.65/ton for sulfide for the Rochester deposit and \$3.70/ton for the Nevada Packard deposit.
- (7) Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.
- (8) Inferred Mineral Resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of Mineral Reserves.
- (9) Mineral Resources for Rochester within confining pit shell use the following parameters: oxide recovery of 92% for gold and 70% for silver, and sulfide recovery of 60% for gold and 60% for silver with an NSR cutoff grade of \$2.55/ton oxide and \$2.65/ton sulfide.
- (10) Mineral Resources for Nevada Packard within confining pit shell use the following parameters: oxide recovery of 92% for gold and 61% for silver, with an NSR cutoff grade of \$3.70/ton.
- (11) Rounding of short tons, grades, and troy ounces, as required by reporting guidelines, may result in apparent differences between tons, grades, and contained metal contents.
- (12) U.S. Investors are cautioned that the term “Mineral Resource” is not defined or recognized by the U.S. Securities and Exchange Commission.
- (13) The qualified person for the Mineral Reserve estimate is Robert Gray, P.Eng., an independent Consulting Engineer. The qualified person for the Mineral Resource estimate is Matthew Bradford, RM-SME, a Coeur Mining, Inc employee.

Notes to 2019 mineral reserves and resources:

- (1) Effective December 31, 2019.
- (2) Assumed metal prices for Mineral Reserves were \$17.00 per ounce of silver, \$1,350 per ounce of gold, \$1.15 per pound zinc, \$0.95 per pound lead.
- (3) Assumed metal prices for estimated Mineral Resources were \$20.00 per ounce of silver, \$1,500 per ounce of gold, \$1.30 per pound zinc, \$1.05 per pound lead, except Lincoln Hill and Wilco at \$1,350 per ounce gold and \$22.00 per ounce silver, and Sterling at \$1,200 per ounce of gold.
- (4) Mineral Resources are in addition to Mineral Reserves and do not have demonstrated economic viability. Inferred Mineral Resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of Mineral Reserves, and there is no certainty that the Inferred Mineral Resources will be realized.
- (5) Rounding of tons and ounces, as required by reporting guidelines, may result in apparent differences between tons, grade, and contained metal content.
- (6) For details on the estimation of mineral resources and reserves, including the key assumptions, parameters and methods used to estimate the Mineral Resources and Mineral Reserves, Canadian investors should refer to the NI 43-101 Technical Reports for Coeur's properties on file at www.sedar.com.

Total Inferred Resources		101,070,000	0.011	0.53	1,078,000	53,732,000	

Figures exclude mining properties previously divested by Coeur.

Notes to 2014 mineral reserves and resources:

- (1) Effective December 31, 2014.
- (2) Assumed metal prices for estimated mineral reserves were \$19.00 per ounce of silver and \$1,275 per ounce of gold. Assumed metal prices for mineral resources were \$22.00 per ounce of silver and \$1,350 per ounce of gold.
- (3) Palmarejo mineral reserves and resources are the addition of Palmarejo, Guadalupe, and Independencia deposits (measured, indicated, and inferred). There are no 2014 mineral reserves and resources for La Patria.
- (4) Mineral resources are in addition to mineral reserves and do not have demonstrated economic viability. Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of mineral reserves, and there is no certainty that the inferred mineral resources will be realized.
- (5) Rounding of tons and ounces, as required by reporting guidelines, may result in apparent differences between tons, grade, and contained metal content.
- (6) For details on the estimation of mineral resources and reserves, including the key assumptions, parameters and methods used to estimate the Mineral Resources and Mineral Reserves, Canadian investors should refer to the NI 43-101 Technical Reports for Coeur's properties on file at www.sedar.com.

Mitchell J. Krebs – President and Chief Executive Officer. During his twenty-year tenure with Coeur, Mr. Krebs has led nearly \$2 billion in capital raising and debt restructuring activities and has facilitated over \$2 billion of acquisitions and divestitures. Mr. Krebs was previously Coeur's Chief Financial Officer and held various positions in the corporate development department, including Senior Vice President of Corporate Development. Mr. Krebs is a Director of Kansas City Southern and the National Mining Association, is on the Board of World Business Chicago, and was formerly President of the Silver Institute.

Thomas S. Whelan – Senior Vice President and Chief Financial Officer. Prior to joining Coeur, Mr. Whelan served as CFO of Arizona Mining Inc. from September 2017 to August 2018, when the company was acquired from South32 Limited. Previously, Mr. Whelan served as CFO for Nevsun Resources Ltd. from January 2014 to August 2017. He is a chartered professional accountant and was previously a partner with the international accounting firm Ernst & Young ("EY") LLP where he was the EY Global Mining & Metals Assurance sector leader, the leader of the EY Assurance practice in Vancouver and previously EY's Canadian Mining & Metals sector leader. Mr. Whelan graduated with a Bachelor of Commerce from Queen's University.

Michael "Mick" Routledge – Senior Vice President and Chief Operating Officer. Mr. Routledge has over 20 years' experience with Rio Tinto in various roles beginning in 1987, including as the Chief Operating Officer (2011-2012) and Vice President HSE, Projects & Operational Value (2012-2014) of the Kennecott Utah Copper mine and served as the Chief Operating Officer of Asahi Refining from 2015 to 2017. As the Senior Director of Operational Excellence at Anagold Madencilik from 2017 to 2019, Mr. Routledge designed and implemented an operational excellence program for the Copler District in Turkey. Most recently, Mr. Routledge served as the Vice President of Major Projects and Studies of Alacer Gold Corp. since 2019. Mr. Routledge currently chairs the Health & Safety Division Executive Committee for the Society for Mining, Metallurgy & Exploration board. He received an undergraduate degree from the University of Sunderland, England in Electrical and Control Engineering and received his MBA with a focus on business and strategic transformation from Henley Management College in England.

Terry F.D. Smith. – Senior Vice President and Chief Development Officer. Mr. Smith joined Coeur in 2013 as the Vice President of North American Operations. Prior to joining Coeur, he served as Vice President of Project Development and Assessments of Hunter Dickenson Inc. Mr. Smith has managed projects ranging from scoping to the feasibility level, coordinated field investigations, metallurgy laboratory testing, and engineering design. He also has significant experience in strategic project planning and due diligence reviews for potential acquisitions including environmental, metallurgical, geotechnical and mining inputs. Mr. Smith has also served as Manager of Operations Support for Barrick Gold Corporation in Toronto and as Senior Mining Engineer for Teck Cominco Ltd. in Vancouver. Mr. Smith holds a Bachelor of Mining Engineering from Laurentian University in Sudbury, Ontario.

Casey M. Nault – Senior Vice President, General Counsel, and Secretary. Mr. Nault has over 20 years of experience as a corporate and securities lawyer, including prior in-house positions with Starbucks Corporation and Washington Mutual, Inc. and law firm experience with Gibson, Dunn & Crutcher. His experience includes securities compliance and SEC reporting, corporate governance and compliance, mergers and acquisitions, public and private securities offerings, other strategic transactions, general regulatory compliance, cross-border issues, land use and environmental issues, and overseeing complex litigation.

Hans J. Rasmussen – Senior Vice President, Exploration. Mr. Rasmussen has 30 years of experience in the mining business, 16 years of which were with senior producers Newmont Mining and Kennecott/Rio Tinto; as well as serving as a consultant for senior producers such as BHP, Teck-Cominco, and Quadra Mining. From 2004 to 2013, he was an officer or served on the Board of Directors of several junior public exploration companies with gold and silver projects in Quebec, Nevada, Argentina, Chile, Colombia, Peru, and Bolivia, including serving on the Board of Directors of Atex Resources Inc. (formerly known as Columbia Crest Gold Corp.) since 2006.

Emilie C. Schouten – Senior Vice President, Human Resources. Ms. Schouten has 15 years of experience in Human Resources, starting her career in General Electric, where she graduated from GE's Human Resources Leadership Program. After 6 years as an HR Manager with GE, her division was acquired by the world's largest electrical distribution company, Rexel, and Ms. Schouten went on to become the Director of Training and Development. Ms. Schouten has her B.A. in Sociology from Michigan State University and her M.S. in Industrial Labor Relations from University of Wisconsin-Madison.

Robert E. Mellor – Independent Chairman of the board of Monro Muffler/Brake, Inc. (auto service provider) since June 2017, and appointed Interim Chief Executive Officer in August 2020. Previously Mr. Mellor was lead independent director from April 2011 to June 2017 and a member of the board of directors since August 2010; Former Chairman, Chief Executive Officer and President of Building Materials Holding Corporation (distribution, manufacturing and sales of building materials and component products) from 1997 to January 2010, director from 1991 to January 2010; former member of the board of directors of CalAtlantic Group, Inc. (national residential home builder) from October 2015 to February 2018, when CalAtlantic was acquired by Lennar Corporation; former member of the board of directors of the Ryland Group (national home builder, merged with another builder to form CalAtlantic) from 1999 to October 2015; and former member of the board of directors of Stock Building Supply Holdings, Inc. (lumber and building materials distributor) from March 2010 until December 2015 when it merged with another company. He was recently named a 2020 National Association of Corporate Directors Directorship 100 honoree.

Mitchell J. Krebs – President and Chief Executive Officer. See prior slide.

Linda L. Adamany – Member of the board of directors of Jefferies Financial Group (formerly known as Leucadia National Corporation), a diversified holding company engaged in a variety of businesses, since March 2014, and a member of the board of directors of Jefferies Group Inc., a wholly-owned subsidiary of Jefferies Financial Group Inc., since November 2018; non-executive director of BlackRock Institutional Trust Company since March 2018; non-executive director of the Wood plc from October 2017 to May 2019; non-executive director of Amec Foster Wheeler plc, an engineering, project management, and consultancy company, from October 2012 until the Company was acquired by Wood plc in October 2017; member of the board of directors of National Grid plc, an electricity and gas generation, transmission, and distribution company, from November 2006 to November 2012. Served at BP plc in several capacities from July 1980 until her retirement in August 2007, most recently from April 2005 to August 2007 as a member of the five-person Refining & Marketing Executive Committee responsible for overseeing the day-to-day operations and human resource management of BP plc's Refining & Marketing segment, a \$45 billion business at the time.
