Cautionary Statements

This presentation contains forward-looking statements within the meaning of securities legislation in the United States and Canada, including statements regarding anticipated production, costs, capital and exploration expenditures, amortization, exploration and development efforts including the impact of discovery of new mineralization, the new mine plan at Kensington, the re-scoped mine plan for Palmarejo, including Guadalupe development, grades, throughput, recovery rates, cash flow, the impact of the current metals price environment on resource and reserve calculations, carrying values, mine planning, and costs, and initiatives to minimize exposure to declining metal prices. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause Coeur's actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, the risks and hazards inherent in the mining business (including risks inherent in developing large-scale mining projects, environmental hazards, industrial accidents, weather or geologically related conditions), changes in the market prices of gold and silver and a sustained lower price environment, the uncertainties inherent in Coeur's production, exploratory and developmental activities, including risks relating to permitting and regulatory delays, ground conditions, grade variability, any future labor disputes or work stoppages, the uncertainties inherent in the estimation of gold and silver ore reserves, changes that could result from Coeur's future acquisition of new mining properties or businesses, reliance on third parties to operate certain mines where Coeur owns silver production and reserves and the absence of control over mining operations in which Coeur or its subsidiaries hold royalty or streaming interests and risks related to these mining operations including results of mining and exploration activities, environmental, economic and political risks of the jurisdiction in which the mining operations are located, the loss of any third-party smelter to which Coeur markets silver and gold, the effects of environmental and other governmental regulations, the risks inherent in the ownership or operation of or investment in mining properties or businesses in foreign countries, Coeur's ability to raise additional financing necessary to conduct its business, make payments or refinance its debt, as well as other uncertainties and risk factors set out in filings made from time to time with the United States Securities and Exchange Commission, and the Canadian securities regulators, including, without limitation, Coeur's most recent reports on Form 10-K and Form 10-Q. Actual results, developments and timetables could vary significantly from the estimates presented. Readers are cautioned not to put undue reliance on forward-looking statements. Coeur disclaims any intent or obligation to update publicly such forward-looking statements, whether as a result of new information, future events or otherwise. Additionally, Coeur undertakes no obligation to comment on analyses, expectations or statements made by third parties in respect of Coeur, its financial or operating results or its securities.

W. David Tyler, Coeur's Vice President, Technical Services and a qualified person under Canadian National Instrument 43-101, supervised the preparation of the scientific and technical information concerning Coeur's mineral projects in this presentation. Mineral resources are in addition to mineral reserves and do not have demonstrated economic viability. Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of mineral reserves, and there is no certainty that the inferred mineral resources will be realized. Insofar as the re-scoped Palmarejo mine plan referenced herein is a preliminary economic assessment that is based, in part, on inferred mineral resources, the re-scoped mine plan does not have as high a level of certainty as would a plan that was based solely on proven and probable reserves. For a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources, as well as data verification procedures and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors, please see the Technical Reports for each of Coeur's properties as filed on SEDAR at www.sedar.com.

Cautionary Note to U.S. Investors - The United States Securities and Exchange Commission permits U.S. mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We may use certain terms in public disclosures, such as "measured," "indicated," "inferred" and "resources," that are recognized by Canadian regulations, but that SEC guidelines generally prohibit U.S. registered companies from including in their filings with the SEC. U.S. investors are urged to consider closely the disclosure in our Form 10-K which may be secured from us, or from the SEC's website at http://www.sec.gov.

Non-U.S. GAAP Measures - We supplement the reporting of our financial information determined under United States generally accepted accounting principles (U.S. GAAP) with certain non-U.S. GAAP financial measures, including EBITDA, adjusted net income (loss), all-in sustaining costs, and cost applicable to sales per silver equivalent ounce. We believe that these adjusted measures provide meaningful information to assist management, investors and analysts in understanding our financial results and assessing our prospects for future performance. We believe these adjusted financial measures are important indicators of our recurring operations because they exclude items that may not be indicative of, or are unrelated to our core operating results, and provide a better baseline for analyzing trends in our underlying businesses. We believe EBITDA, adjusted net income (loss), all-in sustaining costs, and costs applicable to sales per silver equivalent ounce are important measures in assessing the Company's overall financial performance. Silver equivalence assumes silver to gold ratio of 60:1

Update on Current Themes

Third Quarter 2014 Highlights

- Strong operating quarter
- Cost reductions; cost guidance lowered again
- Rochester on-track for double digit percentage production increase and a meaningful decline in CAS per AgEq ounce versus 2013
- Impact of higher grades at Kensington demonstrated
- Palmarejo transition on-track and Guadalupe development ahead of schedule

Investor Day – Key Takeaways

- High-return, value-creating expansions at 3 of 4 operations
- Declining cost profile
- Adequate liquidity and sufficient flexibility
- Impact of organizational overhaul
- Industry-leading disclosure and corporate governance

Strategic Implications of Lower Price Environment

- Year-end reserve and resource prices/reductions
- Year-end carrying values
- “Quality versus quantity” priority underpinning mine plans
- Further cost reductions, including operating and non-operating costs and capital expenditures
- Liquidity and sustainability are key

Third Quarter 2014 Highlights

- Silver equivalent production of 8.2 million ounces
- Silver production of 4.3 million ounces and gold production of 64,989 ounces
- 5% decrease in all-in sustaining costs per silver equivalent ounce[1] from 2Q 2014 to $18.86
- Costs applicable to sales increased 3% from 2Q 2014 to $14.71 per silver equivalent ounce[1] partially due to a $1.6 million inventory adjustment at Palmarejo ($0.26 per silver equivalent ounce on a consolidated basis)
- Kensington's costs applicable to sales declined 7% to $937 per ounce compared with 2Q 2014
- G&A declined 9% from 2Q 2014 to $8.5 million
- Cash flow from operating activities of $31.3 million, compared to $30.5 million in 2Q 2014
- Net income of $3.5 million, or $0.03 per share; adjusted net loss[1] of $23.5 million, or $0.23 per share
- Repurchased $12.6 million of Coeur's 7.875% Senior Notes due 2021 (cash outlay of $12.4 million) and acquired two royalties totaling $13.8 million
- Cash, equivalents, and short-term investments totaled $295.4 million at the end of 3Q 2014

On-Track to Achieve Significant Cost Savings in 2014

$86 million of total expected cost reductions for 2014

1. Midpoint of guidance published by Coeur on November 5, 2014.

Palmarejo: Transitioning to Lower-Tonnage, Higher-Grade, Higher-Margin Operation

3Q 2014 Highlights

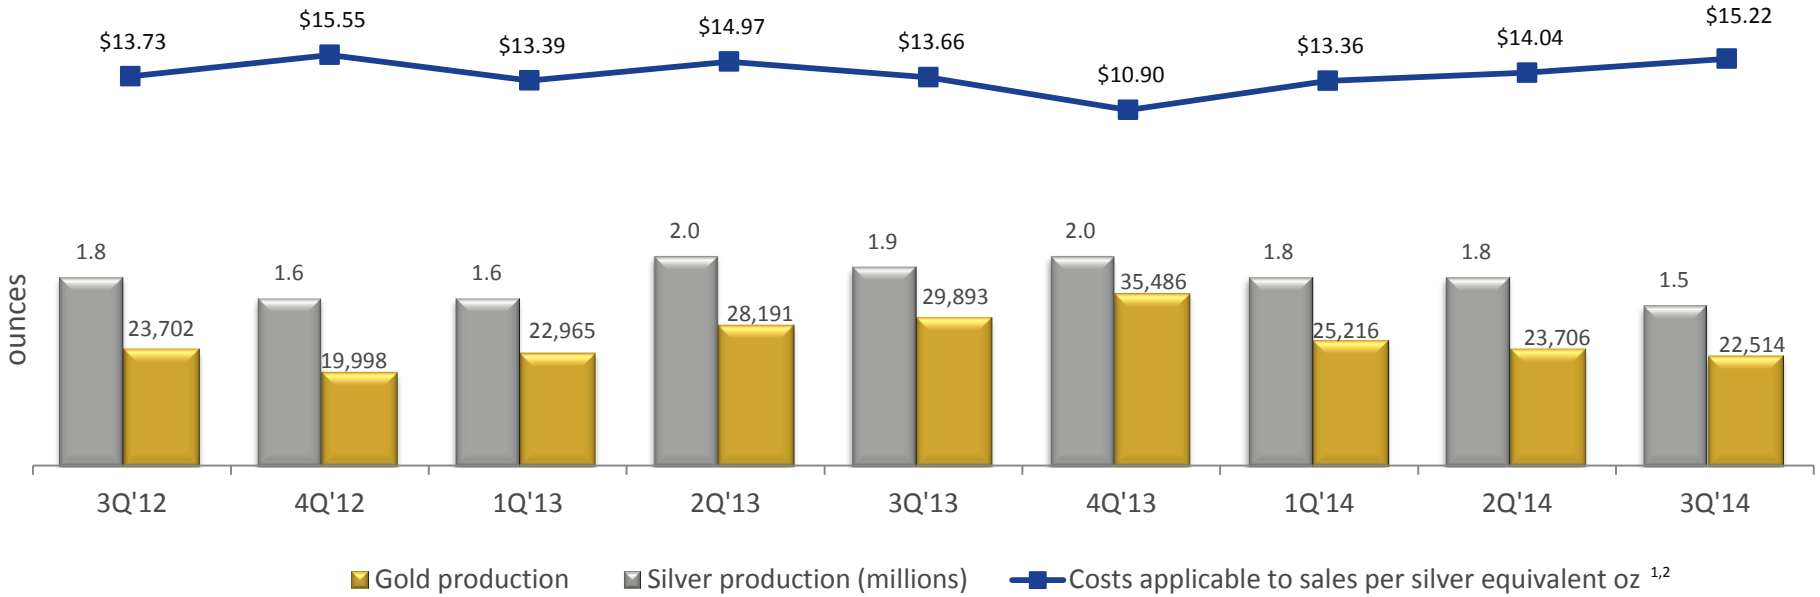

- Gold and silver recovery rates improved by ~10%
- YTD headcount reduction of 75 (8%)
- Re-scoped mine plan forecasts lower throughput offset by higher grades and recovery rates and lower unit costs
- Guadalupe development progressing well, with approximately 1,450 meters of development completed as of October 31, 2014 (~50% ahead of plan)
- On-track to achieve full-year production guidance

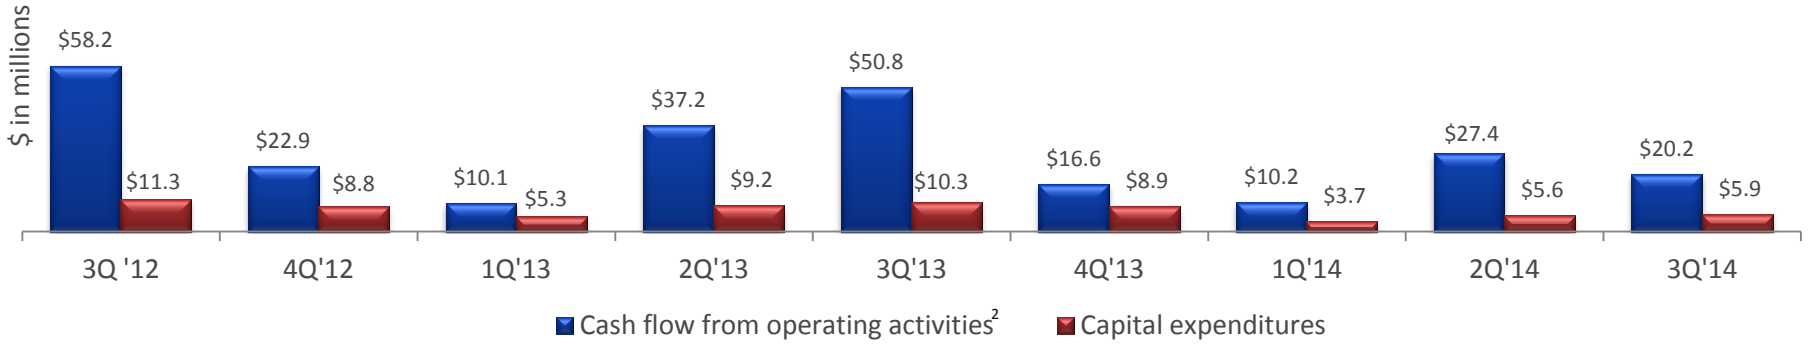

Unit Costs

Rochester: Higher Silver and Gold Production Drove Highest Cash Flow in Almost Two Years

3Q 2014 Highlights

- Silver and gold production 4% and 27% higher, respectively, than 2Q 2014
- Costs applicable to sales per AgEq oz[1] were $14.80, 6% lower than 2Q 2014
- Cash flow from operating activities of $8.2 million, the highest level in nearly 2 years
- On-track to achieve full-year production guidance

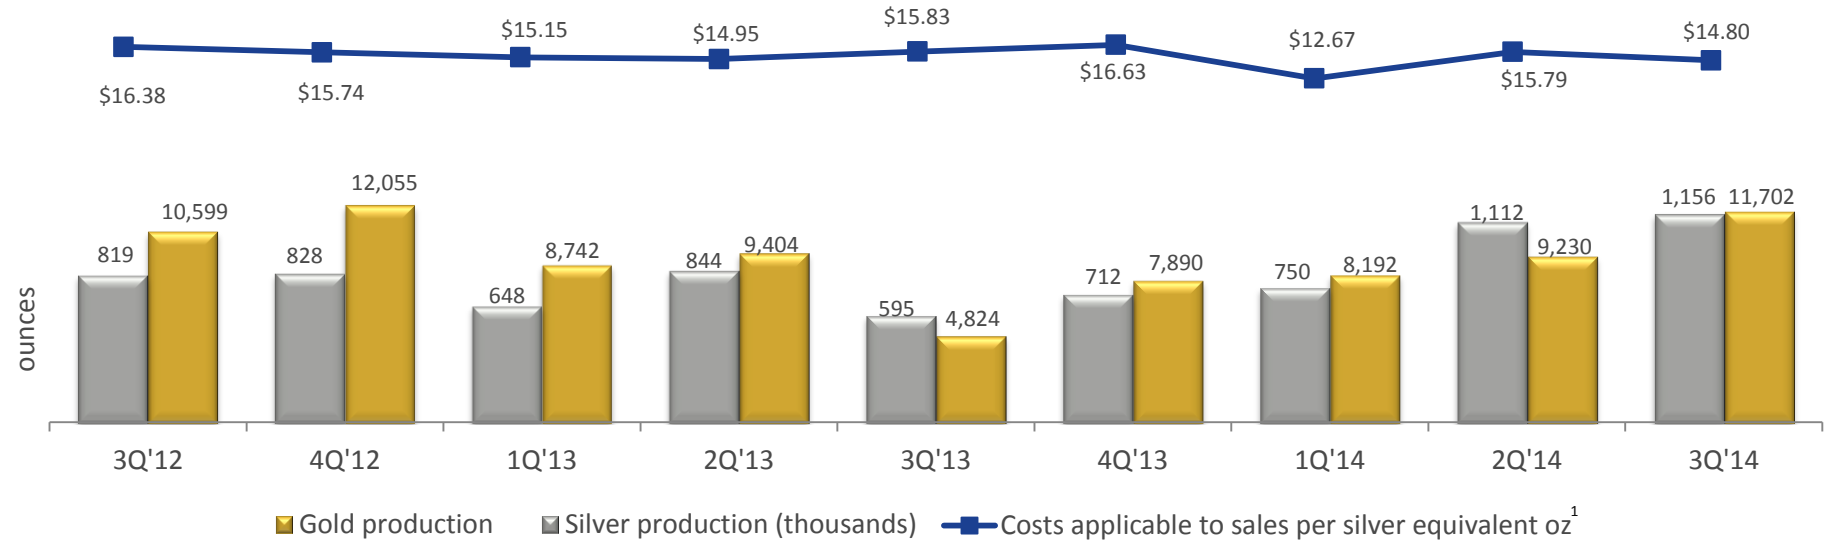

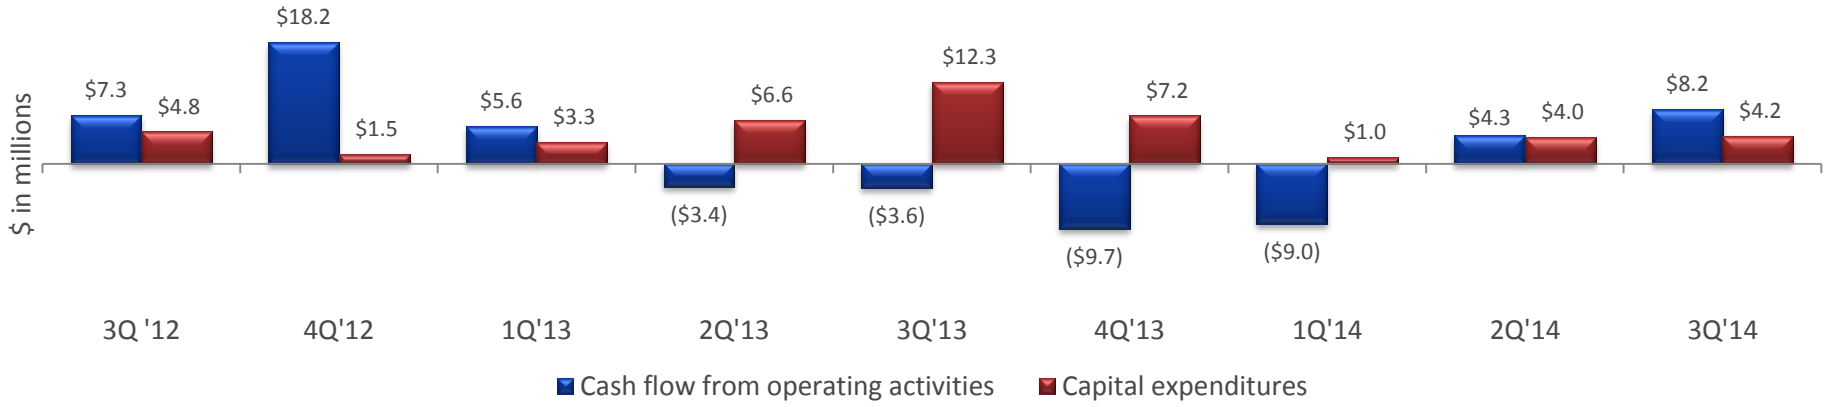

Unit Costs

1. See non-GAAP reconciliation tables in the appendix to this presentation.

Kensington: Higher Head-Grade Propels Improved Cost Performance

3Q 2014 Highlights

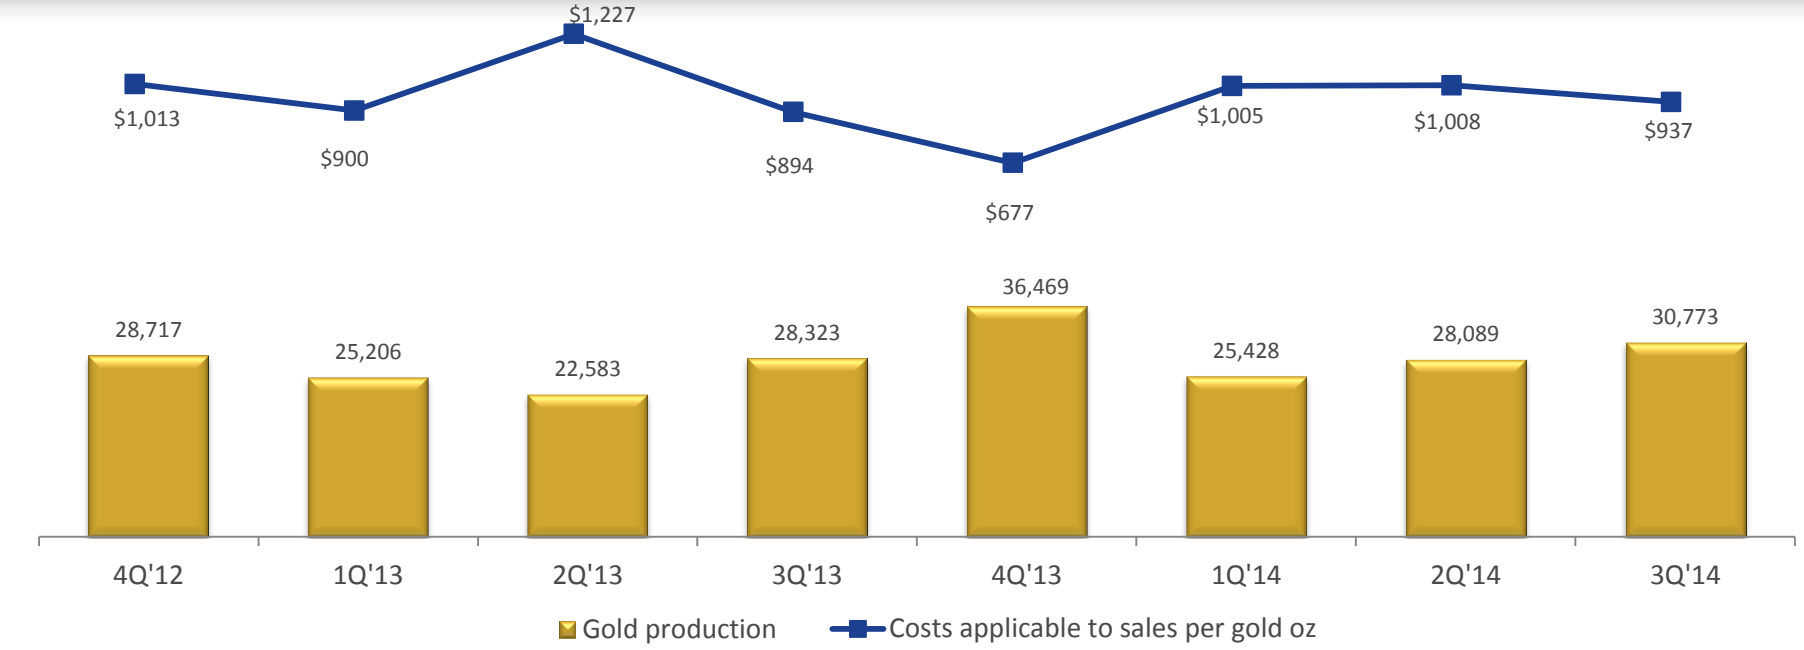

- Gold production 10% higher than 2Q 2014
- Costs applicable to sales per gold ounce down 7% from prior quarter
- Higher head-grade of 0.23 gold oz/t drove strong cost and cash flow performance
- Highest cash flow from operations since Coeur began operating the mine
- Announced high-grade drill results; new mine plan in early 2015 expected to reflect higher-grade production, lower unit costs, and higher cash flow
- On track to achieve full-year production guidance

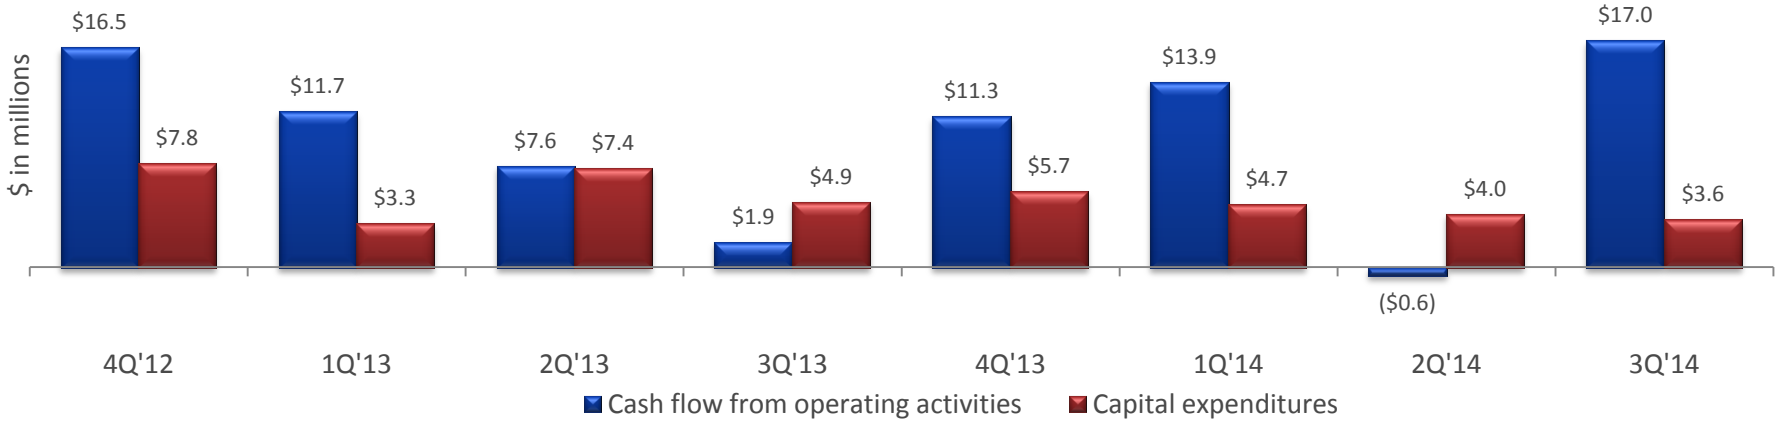

Unit Costs

	1Q 2014	2Q 2014	3Q 2014
Ore tons mined	166,078	163,625	154,122

Processing costs per ton processed	$39	$41	$44
G&A per ton processed	$31	$33	$35

Kensington: Higher Head-Grade Propels Improved Cost Performance

San Bartolomé: Stable Production and Cost Performance

3Q 2014 Highlights

- Silver production 2% higher than 2Q 2014
- Costs applicable to sales per AgEq ounce[1] slightly higher than 2Q 2014
- Grades and recovery rates remain relatively stable
- On-track to achieve full-year production guidance

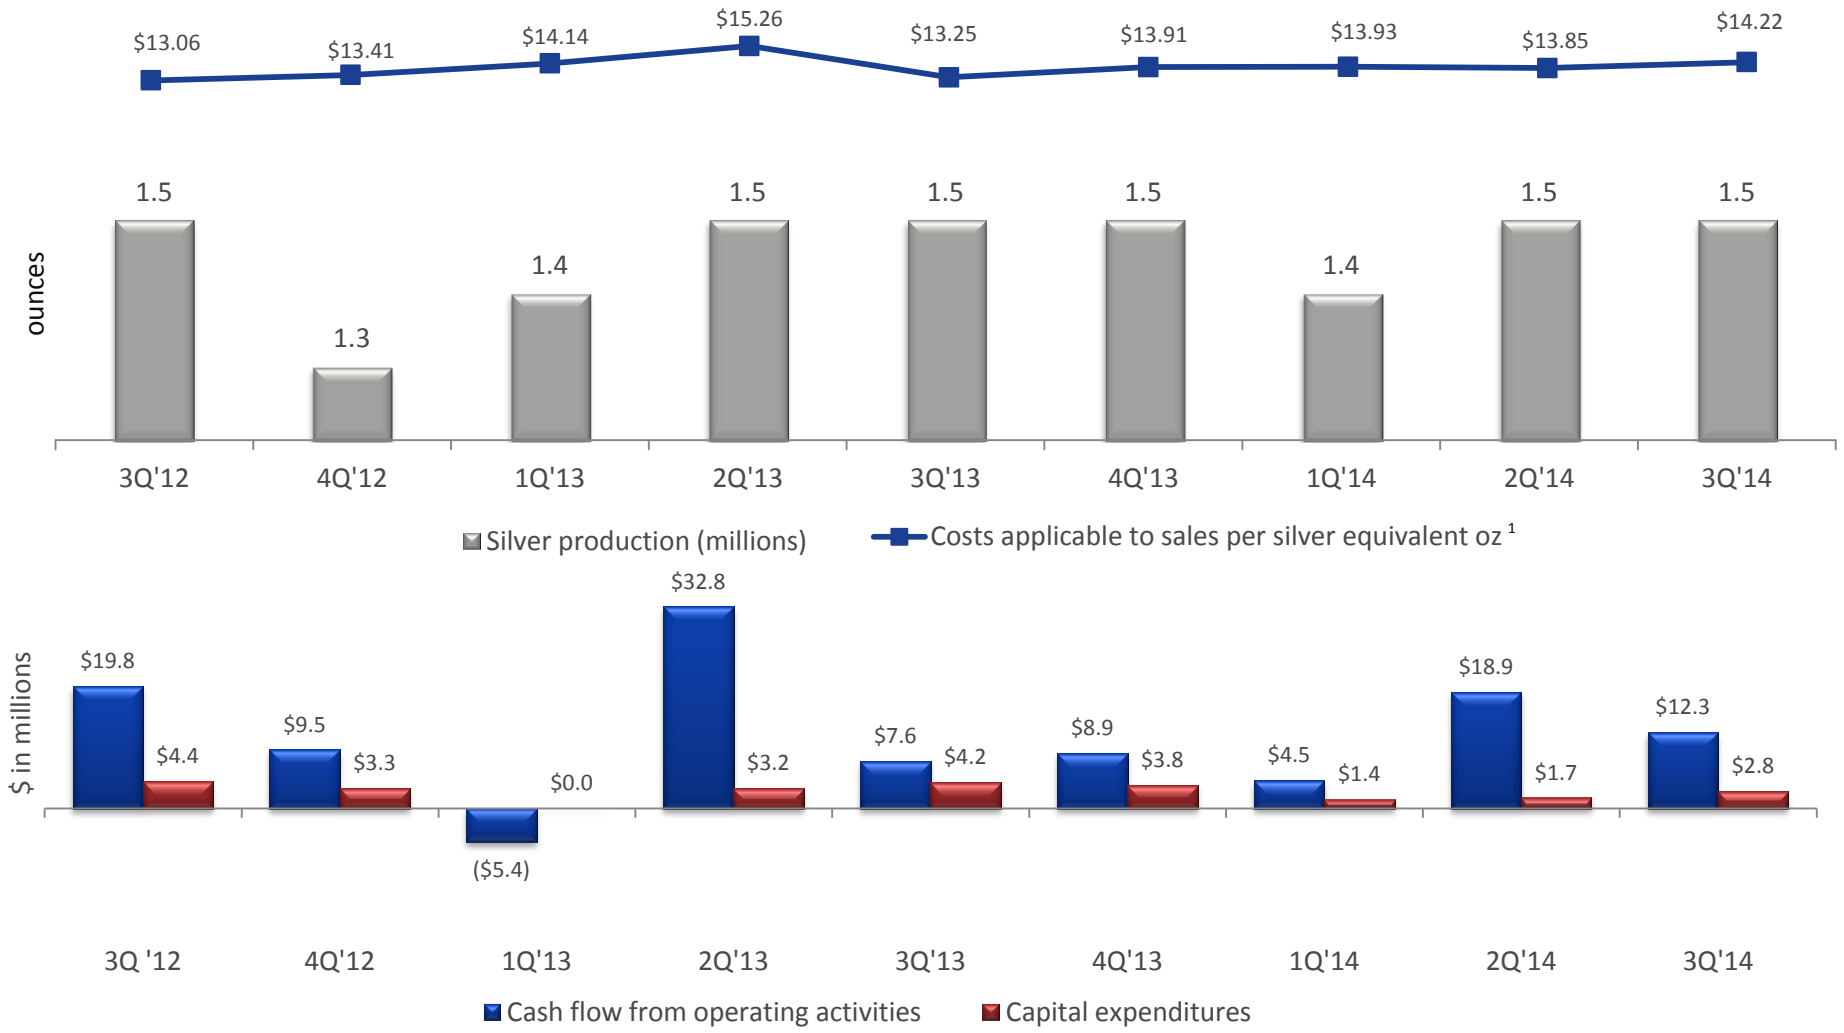

Unit Costs

Appendix

Cash Flow Protection Strategy

- Coeur continues to maintain a targeted cash flow protection program with the following objectives:
  - Maintain simplicity
  - Protect downside metal price exposure while retaining the upside potential
  - Purchase put options to protect some of expected production against a sharp drop in metal prices
  - Sell intra-quarter out-of-the money call options when appropriate to offset the cost of puts
  - Avoid margin agreements
- Hedges in place for 4Q 2014 and 1Q 2015 production:
  - Put spreads covering 1.25 million ounces of silver each quarter
    - Buyer of put options with $18/oz strike price
    - Seller of put options with $16/oz strike price
  - Put spreads covering 25,000 ounces of gold for 4Q 2014 and 24,000 ounces for 1Q 2015
    - Buyer of put options with $1,200/oz strike price
    - Seller of put options with $1,050/oz strike price

Notes to the above mineral reserves and resources:

1. Effective December 31, 2013 except Endeavor, effective June 30, 2013, and La Preciosa effective July 29, 2014.
2. Metal prices used for mineral reserves were $25.00 per ounce of silver and $1,450 per ounce of gold, except Endeavor, at $2,300 per metric ton of lead, $2,300 per metric ton of zinc, and $34.00 per ounce of silver, and La Preciosa at $22.00 per ounce of silver and $1,350 per ounce of gold. Metal prices used for mineral resources were $29.00 per ounce of silver and $1,600 per ounce of gold, except for Endeavor, at $2,300 per metric ton of lead, $2,300 per metric ton of zinc and $34.00 per ounce of silver, and La Preciosa at $25.00 per ounce of silver and $1,400 per ounce of gold.
3. Palmarejo mineral resources (measured, indicated, and inferred) reported above represent the sum of Palmarejo, Guadalupe, and La Patria resources.
4. Kensington proven and probable reserves adjusted April 2014 to reduce the grade of internal dilution to zero.
5. Mineral resources are in addition to mineral reserves and do not have demonstrated economic viability. Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of mineral reserves, and there is no certainty that the inferred mineral resources will be realized.
6. Rounding of tons and ounces, as required by reporting guidelines, may result in apparent differences between tons, grade, and contained metal content.
7. For details on the estimation of mineral resources and reserves for each property, please refer to the relevant NI 43-101-compliant Technical Report on file at www.sedar.com.

Executive Leadership

Mitchell J. Krebs – President and Chief Executive Officer. Mr. Krebs joined Coeur in 1995 after spending several years in the investment banking industry in New York.
