Cautionary Statements

This presentation contains forward-looking statements within the meaning of securities legislation in the United States and Canada, including statements regarding anticipated production, costs, capital and exploration expenditures, exploration and development efforts, Guadalupe underground mining rates, POA 10 approval at Rochester, open-pit and underground mining operations at Palmarejo, and the re-scoped mine plan at the Kensington mine. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause Coeur's actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, the risk that the anticipated benefits of the Wharf and Paramount transactions will not be realized, the risks and hazards inherent in the mining business (including risks inherent in developing large-scale mining projects, environmental hazards, industrial accidents, weather or geologically related conditions), changes in the market prices of gold and silver and a sustained lower price environment, the uncertainties inherent in Coeur's production, exploratory and developmental activities, including risks relating to permitting and regulatory delays, ground conditions, grade variability, any future labor disputes or work stoppages (including those involving third parties), the uncertainties inherent in the estimation of gold and silver ore reserves, changes that could result from Coeur's future acquisition of new mining properties or businesses, reliance on third parties to operate certain mines where Coeur owns silver production and reserves and the absence of control over mining operations in which Coeur or its subsidiaries hold royalty or streaming interests and risks related to these mining operations including results of mining and exploration activities, environmental, economic and political risks of the jurisdiction in which the mining operations are located, the loss of any third-party smelter to which Coeur markets silver and gold, the effects of environmental and other governmental regulations, the risks inherent in the ownership or operation of or investment in mining properties or businesses in foreign countries, Coeur's ability to raise additional financing necessary to conduct its business, make payments or refinance its debt, as well as other uncertainties and risk factors set out in filings made from time to time with the United States Securities and Exchange Commission, and the Canadian securities regulators, including, without limitation, Coeur's most recent reports on Form 10-K and Form 10-Q. Actual results, developments and timetables could vary significantly from the estimates presented. Readers are cautioned not to put undue reliance on forward-looking statements. Coeur disclaims any intent or obligation to update publicly such forward-looking statements, whether as a result of new information, future events or otherwise. Additionally, Coeur undertakes no obligation to comment on analyses, expectations or statements made by third parties in respect of Coeur, its financial or operating results or its securities.

W. David Tyler, Coeur's Vice President, Technical Services and a qualified person under Canadian National Instrument 43-101, supervised the preparation of the scientific and technical information concerning Coeur's mineral projects in this presentation (which, for the avoidance of doubt, excludes the Wharf mine). Mineral resources are in addition to mineral reserves and do not have demonstrated economic viability. The preliminary economic assessment for the re-scoped mine plan for Kensington is preliminary in nature and includes inferred mineral resources, and does not have as high a level of certainty as a plan that was based solely on proven and probable reserves. Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of mineral reserves, and there is no certainty that the inferred mineral resources will be realized. For a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources, as well as data verification procedures and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors, Canadian investors should see the Technical Reports for each of Coeur's properties as filed on SEDAR at www.sedar.com.

Cautionary Note to U.S. Investors - The United States Securities and Exchange Commission permits U.S. mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We may use certain terms in public disclosures, such as "measured," "indicated," "inferred" and "resources," that are recognized by Canadian regulations, but that SEC guidelines generally prohibit U.S. registered companies from including in their filings with the SEC. U.S. investors are urged to consider closely the disclosure in our Form 10-K which may be secured from us, or from the SEC's website at http://www.sec.gov.

Non-U.S. GAAP Measures - We supplement the reporting of our financial information determined under United States generally accepted accounting principles (U.S. GAAP) with certain non-U.S. GAAP financial measures, including adjsuted EBITDA, adjusted net income (loss), costs applicable to sales per silver equivalent ounce, adjusted costs applicable to sales per silver equivalent ounce, all-in sustaining costs, and adjusted all-in sustaining costs. We believe that these adjusted measures provide meaningful information to assist management, investors and analysts in understanding our financial results and assessing our prospects for future performance. We believe these adjusted financial measures are important indicators of our recurring operations because they exclude items that may not be indicative of, or are unrelated to our core operating results, and provide a better baseline for analyzing trends in our underlying businesses. We believe adjusted EBITDA, adjusted net income (loss), costs applicable to sales per silver equivalent ounce, adjusted costs applicable to sales per silver equivalent ounce (or per gold equivalent ounce), all-in sustaining costs, and adjusted all-in sustaining costs are important measures in assessing the Company's overall financial performance. Silver and gold equivalence assumes silver to gold ratio of 60:1

Reserves Nearly Doubled at Palmarejo; Increased Companywide Reserves 12%

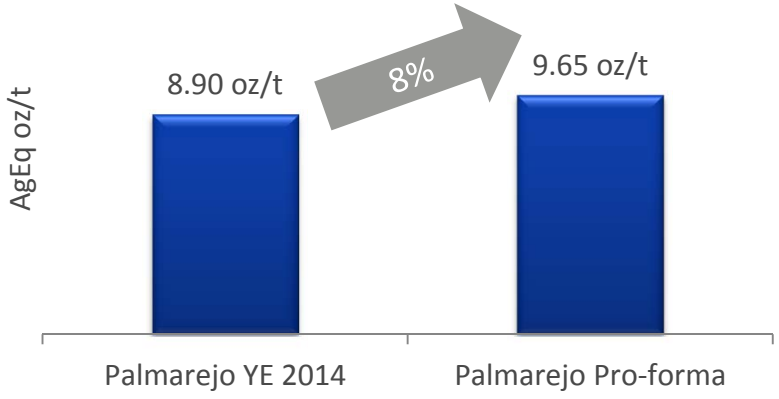

Compared to 15 months ago, Palmarejo's silver reserves have increased 30% and gold reserves have increased 54%

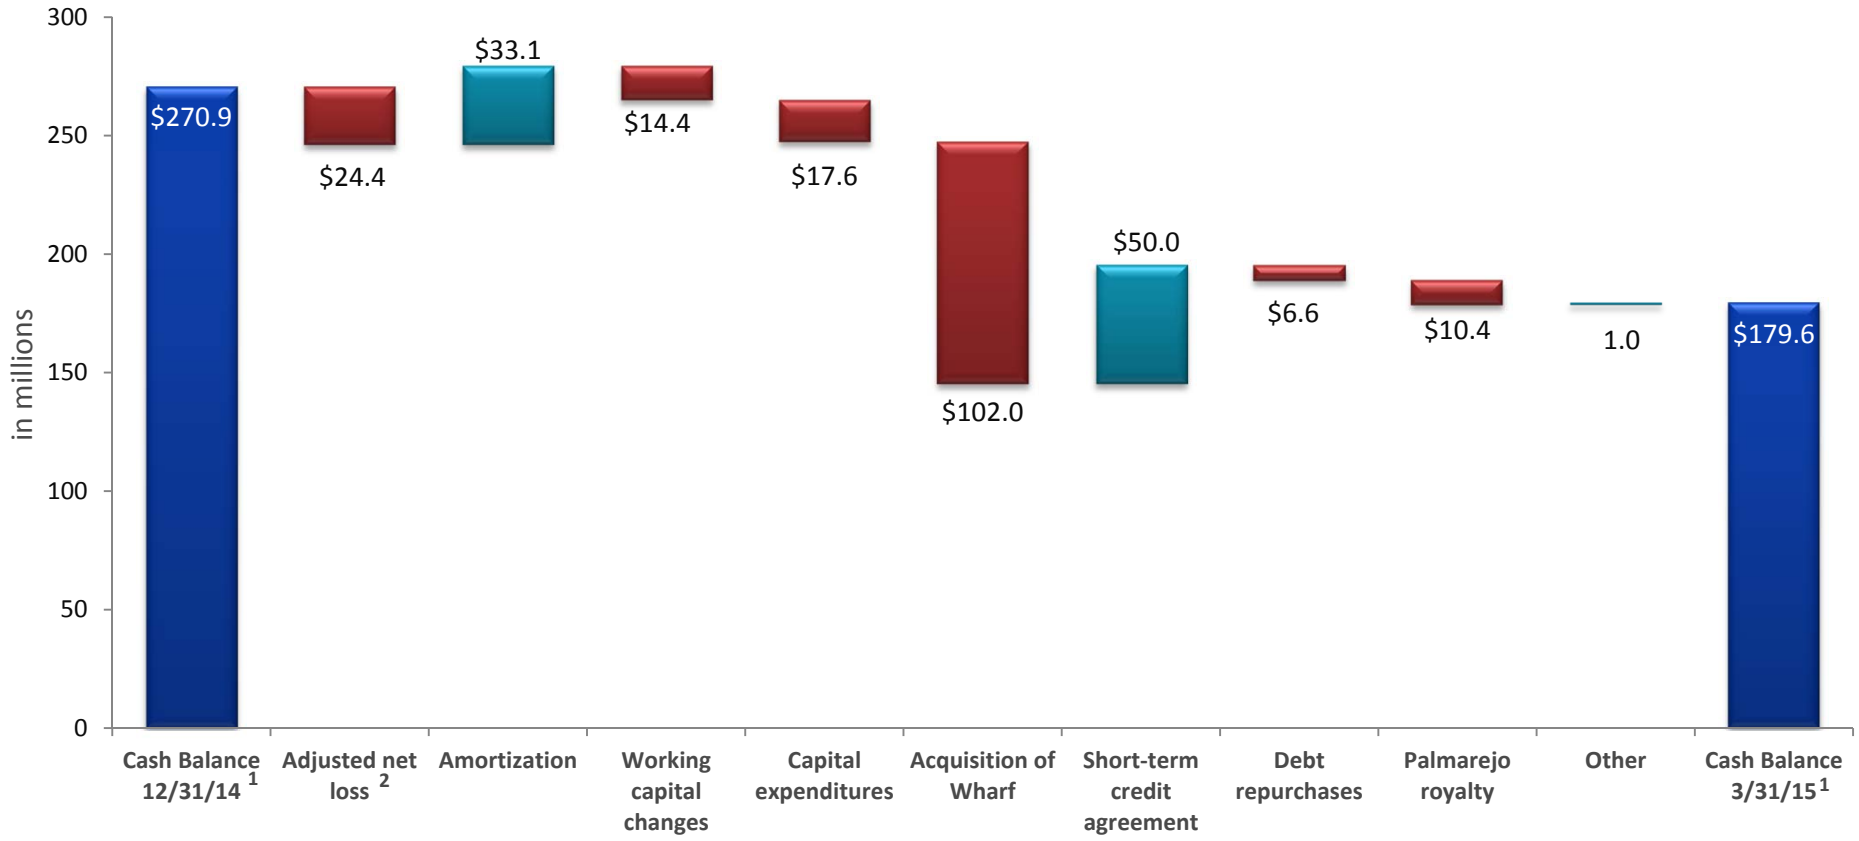

Compared to 15 months ago, Palmarejo's average silver and gold reserve grade has increased 32% and 55%, respectively

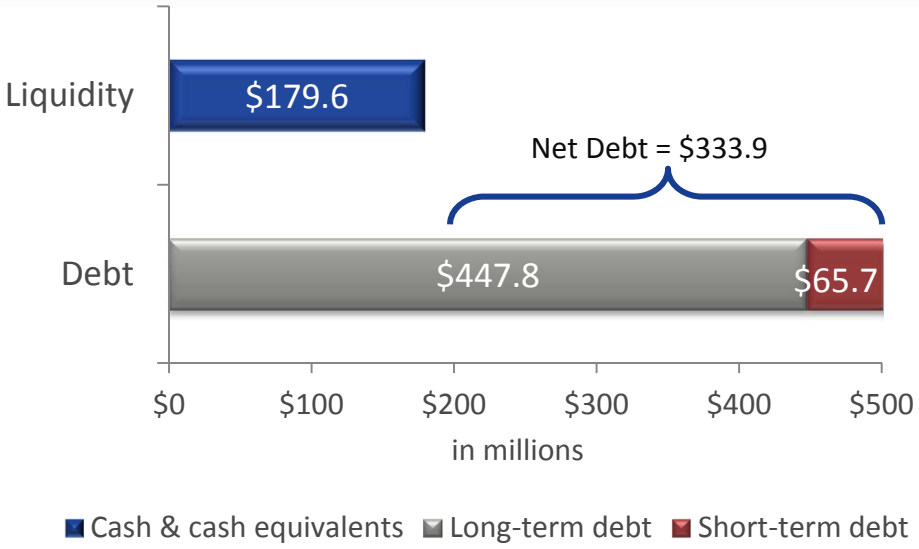

Pro-forma reserves represents reserves effective December 31, 2014 except the Independencia deposit at Palmarejo, effective April 23, 2015, and Endeavor, effective June 30, 2014. Does not include historical reserves at Wharf. See slides in the appendix for additional information related to mineral reserves and resources.

Anticipated Milestones and Upcoming News Flow

Palmarejo: Transitioning to Lower Tonnage, Higher-Grade, Higher-Margin Operation

1Q 2015 Highlights

- Adjusted CAS per Ag Eq oz[1] of $14.56 decreased 7% from 4Q 2014
- Palmarejo continues to transition to underground mining at the Guadalupe mine and the Independencia mine (beginning early 2016) while mining activities in the historic zones gradually decline
- Open-pit operations are expected to end in 3Q 2015 and underground mining at the legacy zones is expected to end by January 2016
- The acquisition of Paramount closed April 17, 2015. On April 27, 2015 Coeur announced an 89% increase in Ag reserves and 76% increase in Au reserves at Palmarejo. The increase contains an average silver reserve grade 31% higher than Palmarejo's reserves as of December 31, 2014

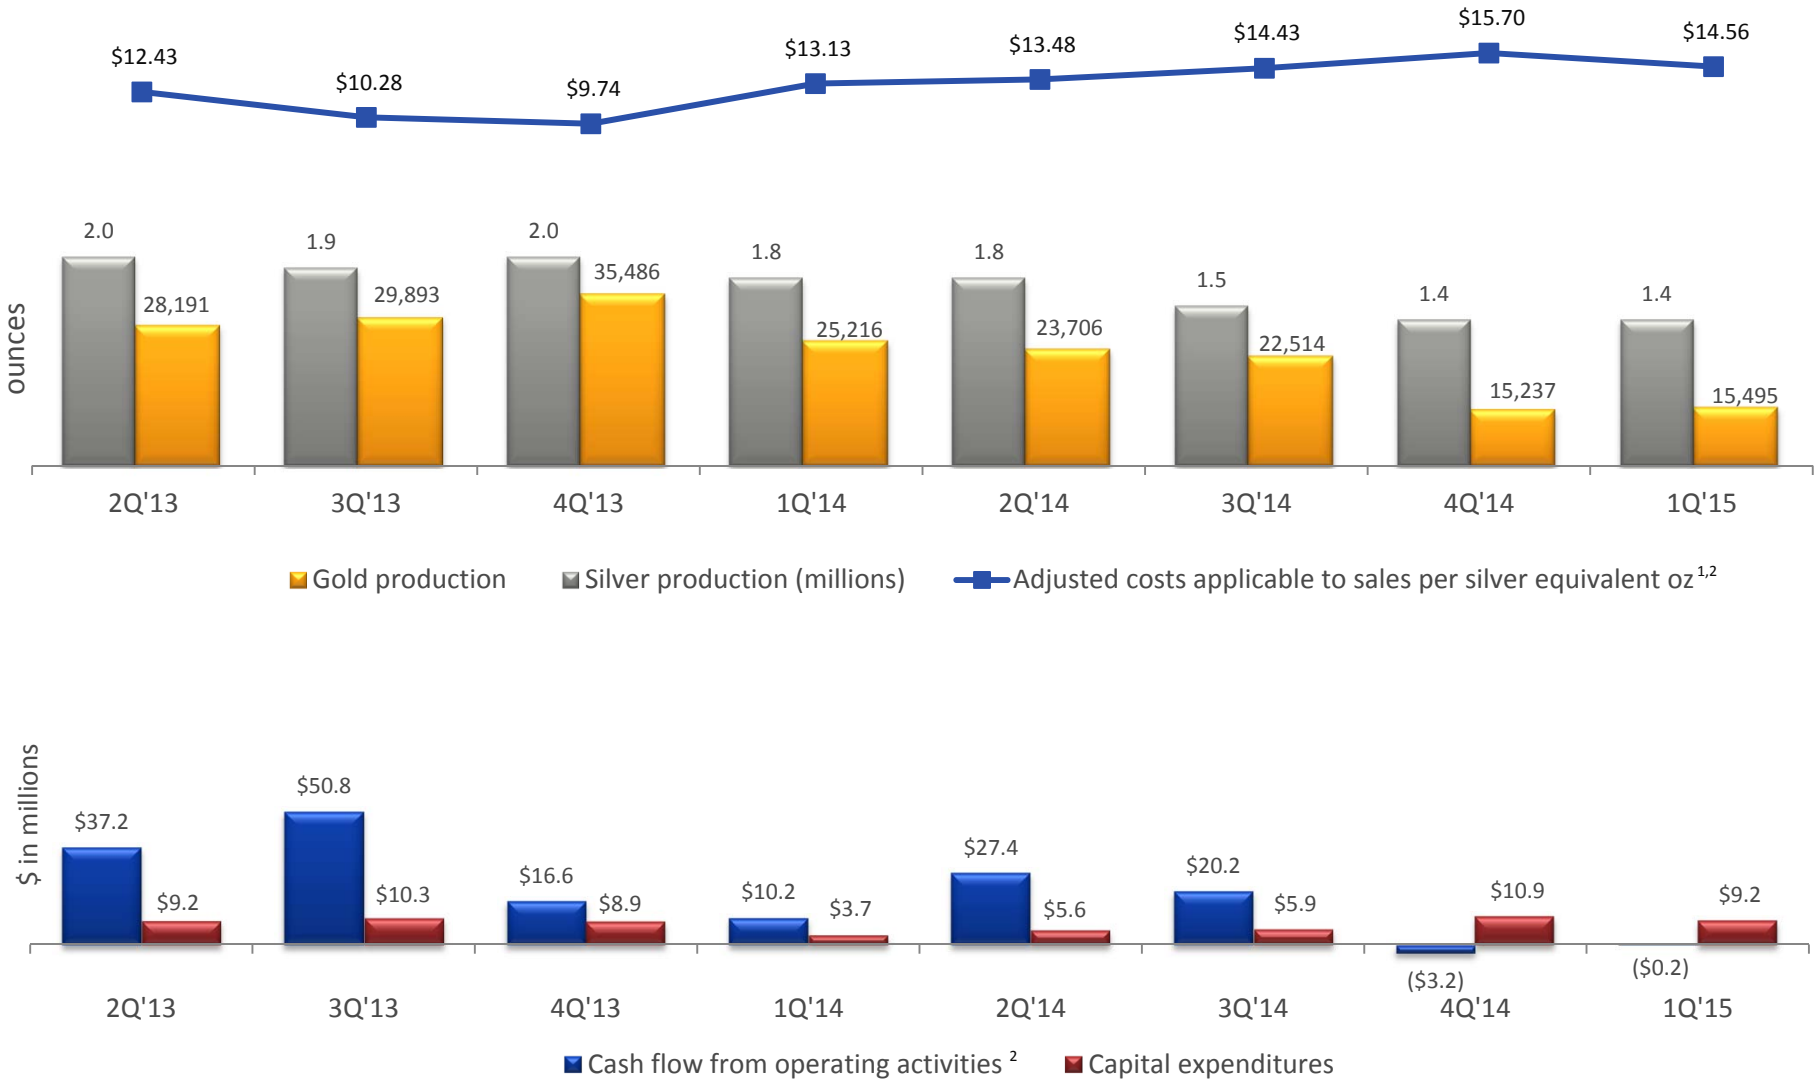

Unit Costs

Rochester: Strong Production and Lower Costs Drive Highest Free Cash Flow in Over Two Years

1Q 2015 Highlights

- Adjusted CAS per Ag Eq oz[1] were $12.95, down 6% from 4Q 2014 due to lower crushing and leaching costs
- The average silver grade increased 23% compared to 4Q 2015 and silver equivalent ounces sold increased 21%
- Free cash flow[2] of $13.1 million in 1Q 2015 was the highest since the 4Q 2012, when realized silver and gold prices averaged $32.52 per ounce and $1,709 per ounce, respectively
- Approval for POA 10 (expansion of Stage 4 leach pad and construction of new Stage 5 leach pad) is expected by early 2016

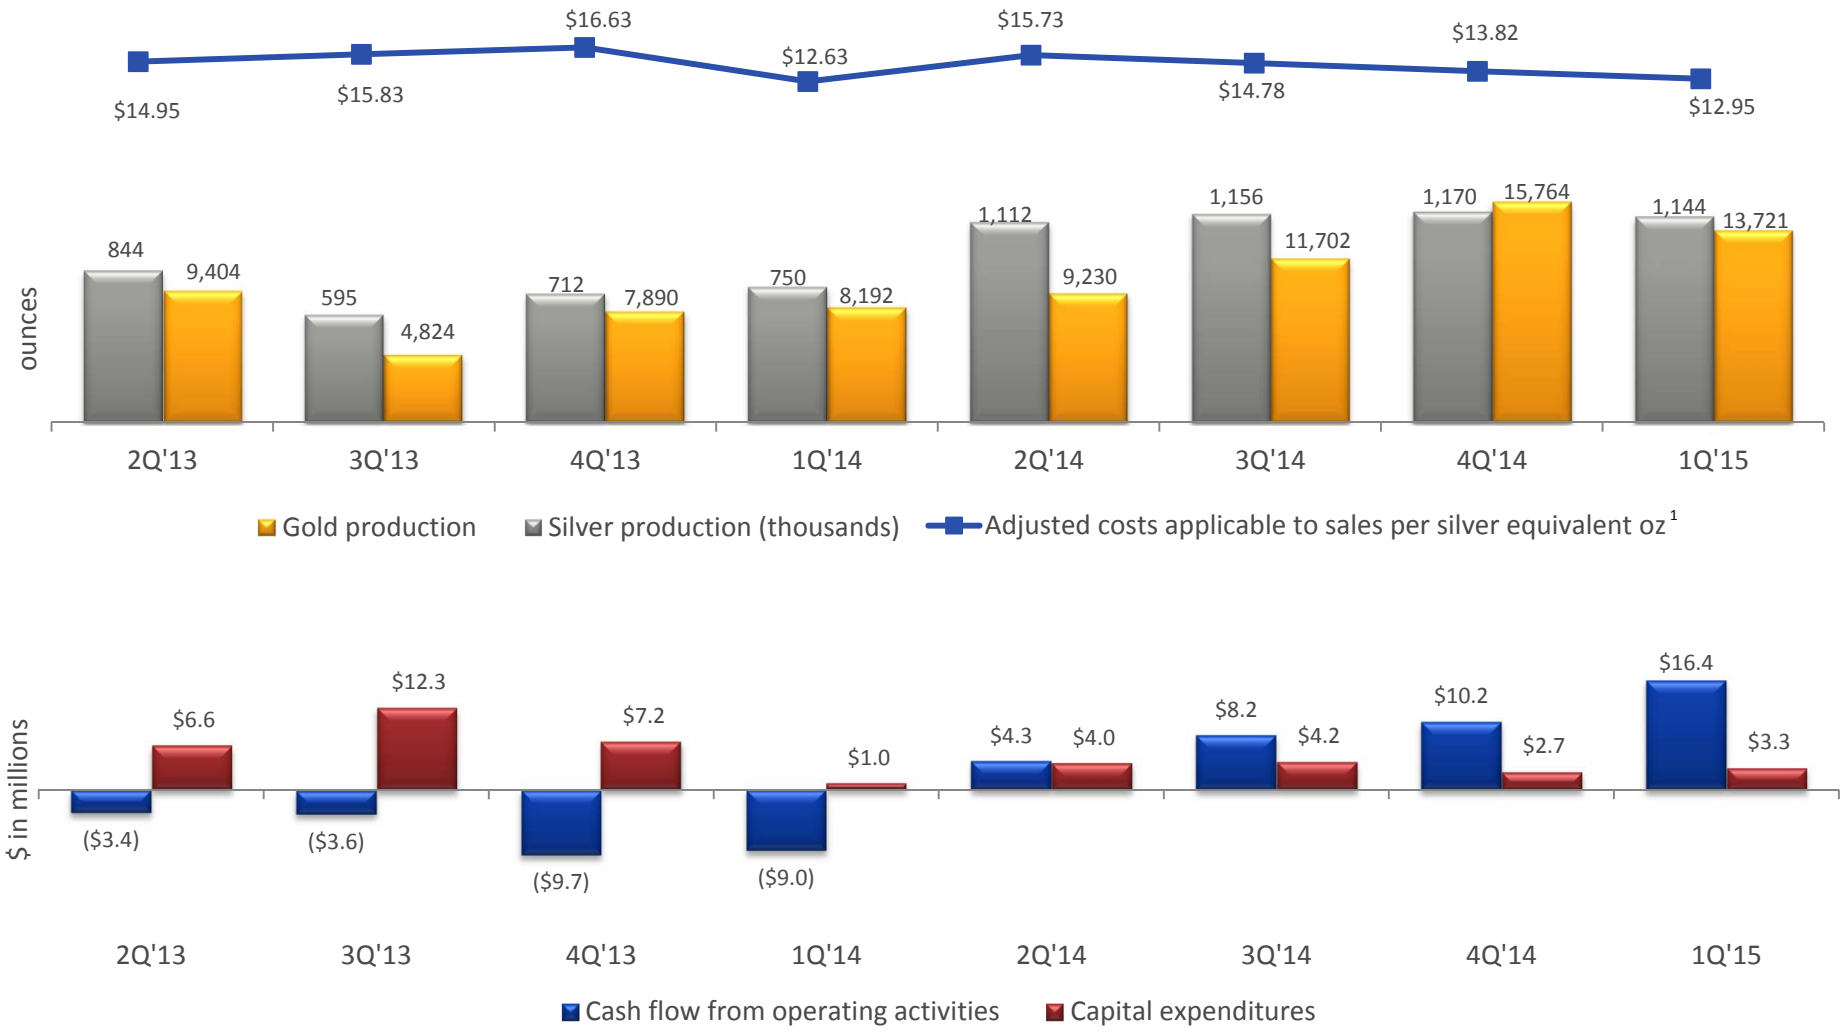

Unit Costs

1. See non-GAAP reconciliation tables in the appendix to this presentation.

Kensington: Robust Head-Grade Enables Sustained Strong Cost Performance

1Q 2015 Highlights

- A 14% increase in average gold grade with adjusted CAS per gold ounce[1] below $800 for the second consecutive quarter
- Free cash flow[2] of $8.2 million increased from $(7.6) million in 4Q 2014 due to a 65% increase in gold ounces sold
- Coeur released a re-scoped mine plan at Kensington on April 14, 2015, reflecting the impact of the recently discovered high-grade Jualin zone. Mining rates at Jualin are expected to peak in 2018-2019 when annual production at Kensington is expected to average approximately 143,000 ounces at costs applicable to sales per gold ounce of approximately $760
- Recent drilling results suggest the potential to grow the resource at Jualin and extend the 2017 -2019 production profile

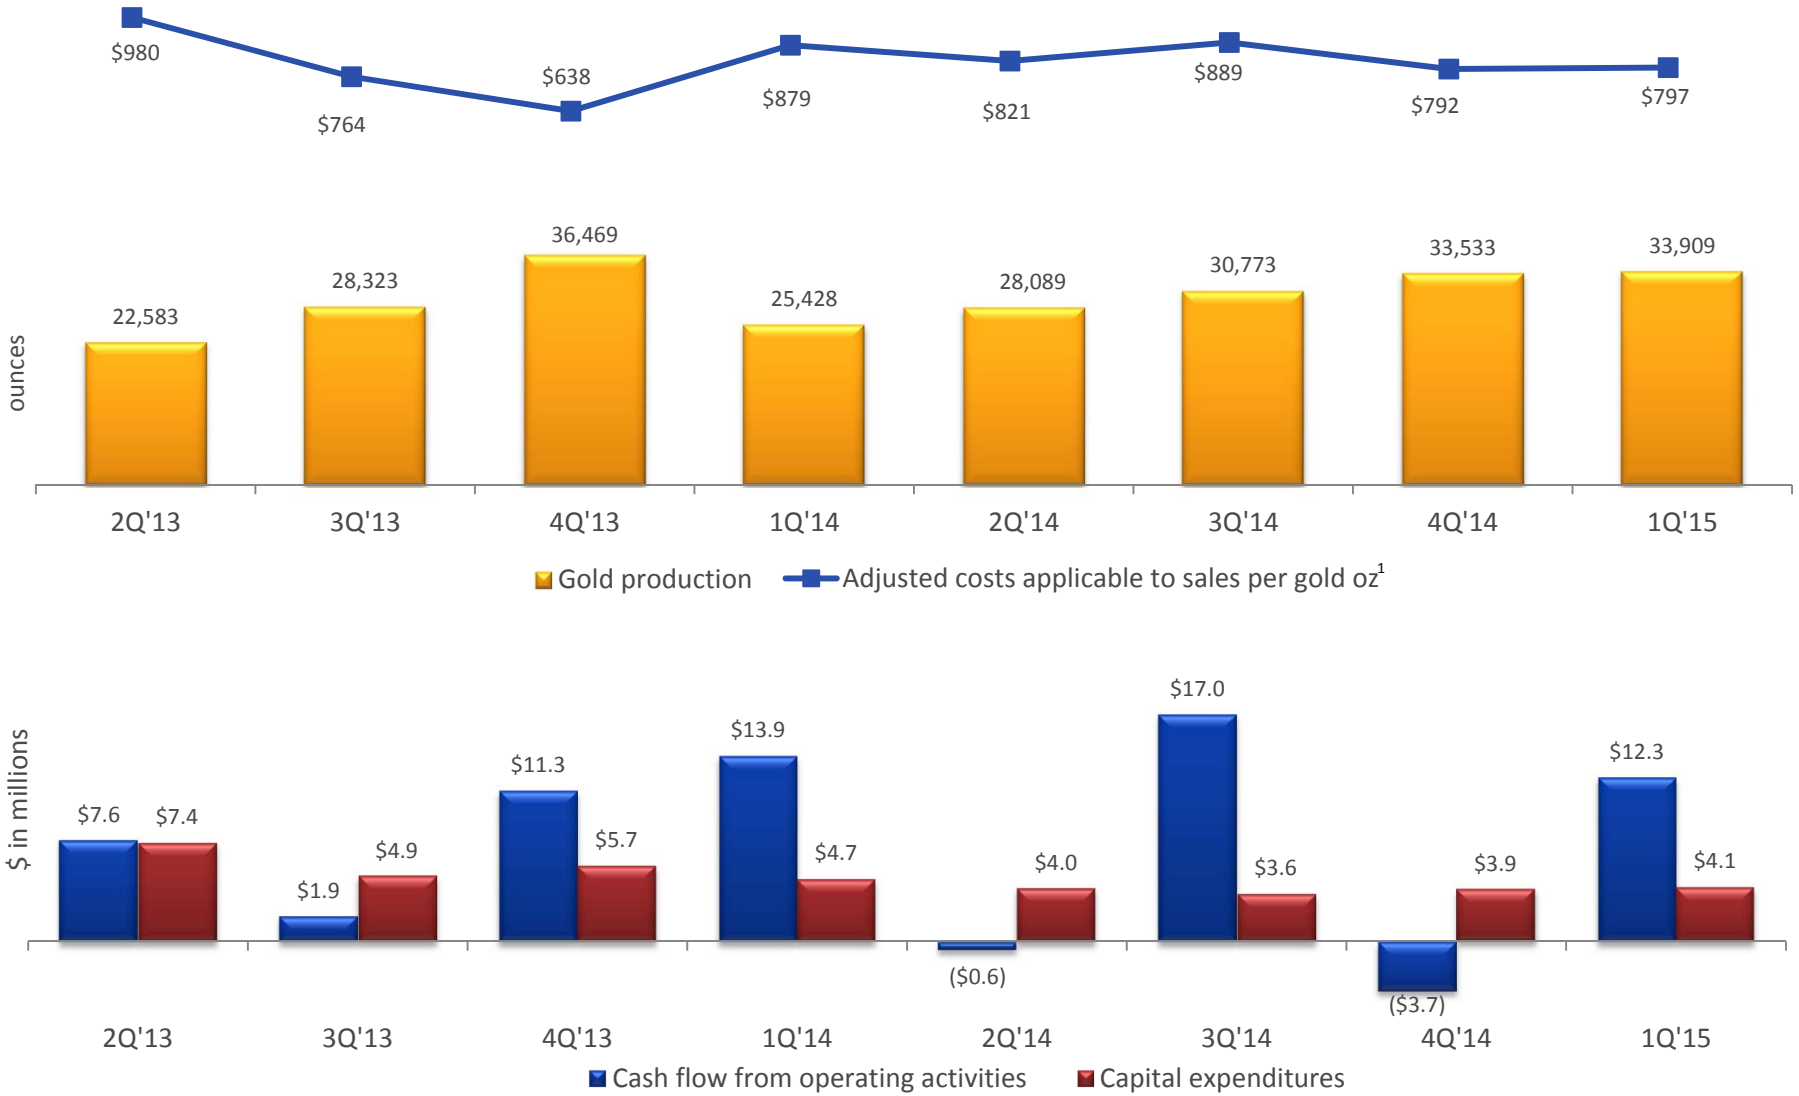

Unit Costs

Kensington: Robust Head-Grade Enables Sustained Strong Cost Performance

1. See non-GAAP reconciliation tables in the appendix to this presentation.

San Bartolomé: Continued Stable Cost Performance

1Q 2015 Highlights

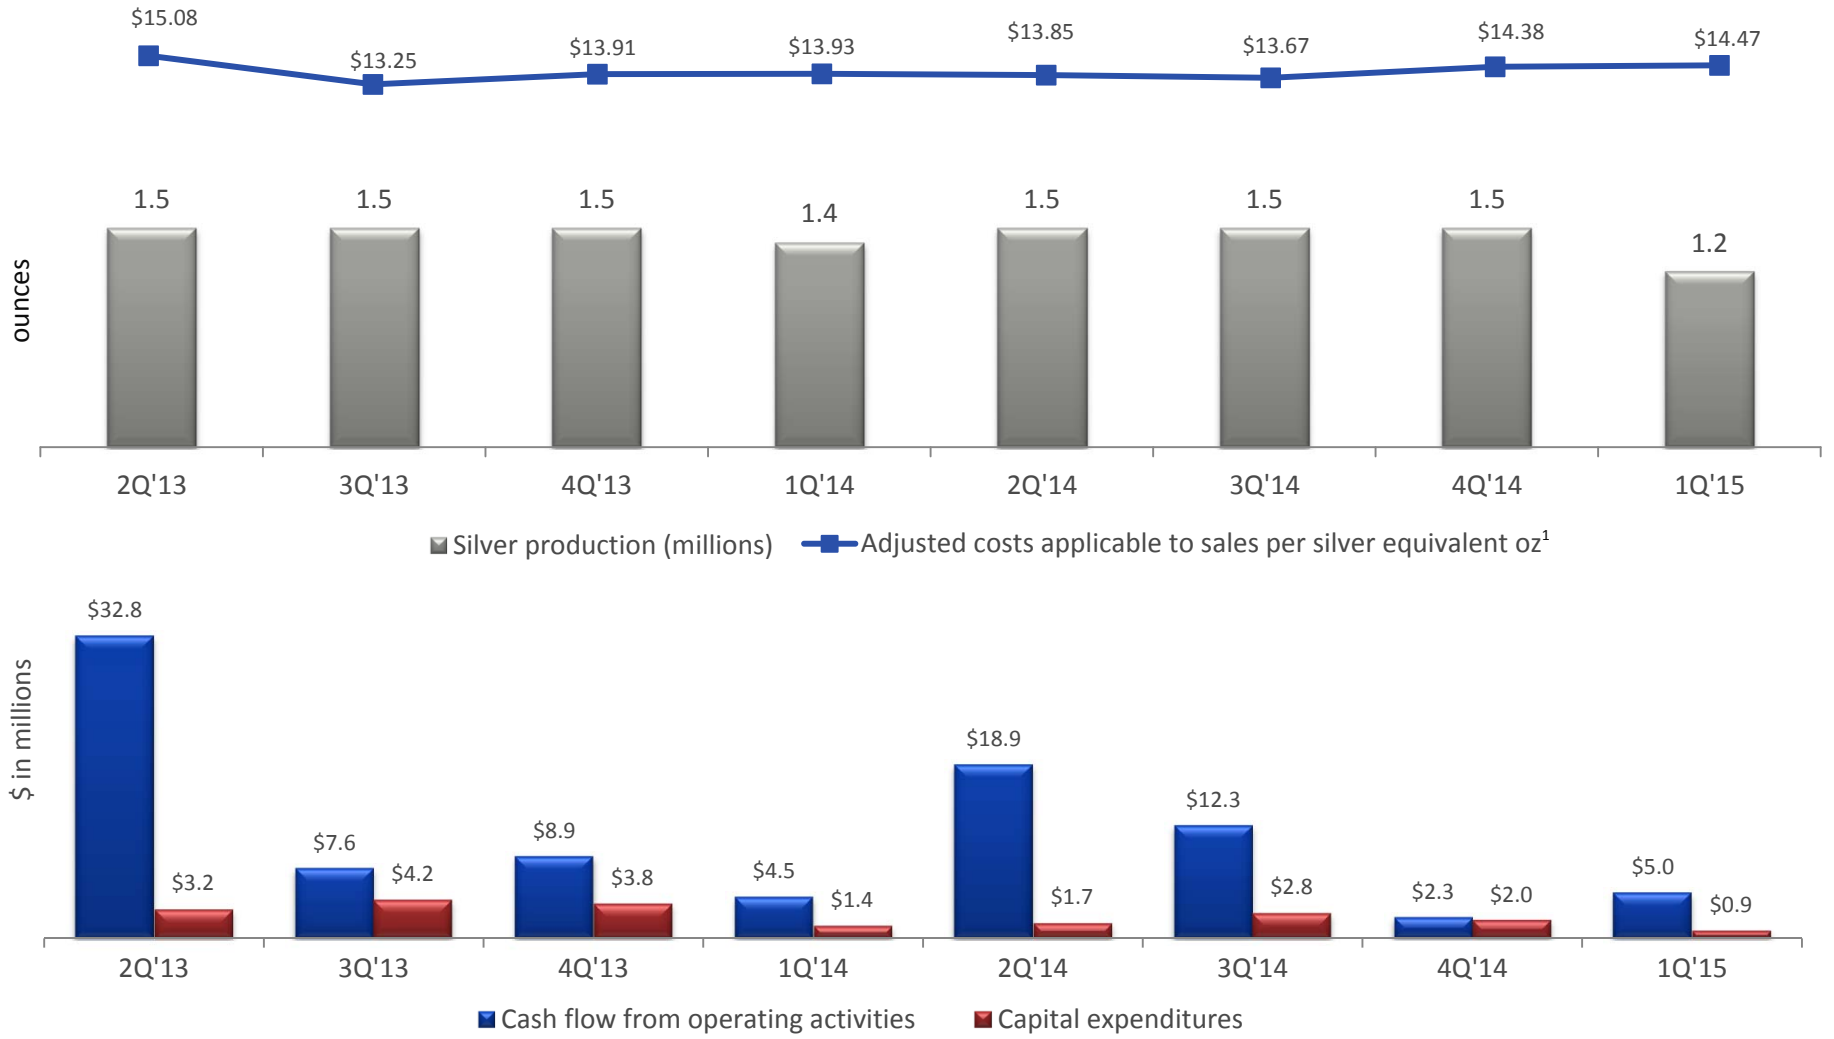

- Maintenance downtime and heavy rain resulted in processing a greater proportion of stockpiled ore in the first quarter, which negatively impacted the grade and recovery rates at San Bartolomé
- Despite this, adjusted costs applicable to sales per silver equivalent ounce[1] remained stable with the fourth quarter of 2014
- Free cash flow[1] of $4.1 million in 1Q 2015 increased from $0.3 million in the 4Q 2014 due to lower working capital

Unit Costs

Notes to the above mineral reserves and resources:

1. Effective December 31, 2014 except the Independencia deposit at Palmarejo, effective April 23, 2015, and Endeavor, effective June 30, 2014. Guadalupe reserves and resources adjusted April 23, 2015.
2. Assumed metal prices for estimated Mineral Reserves were $19.00 per ounce of silver and $1,275 per ounce of gold, except Endeavor at $2,200 per metric ton of lead, $2,400 per metric ton of zinc and $20 per ounce of silver.
3. Assumed metal prices for estimated Mineral Resources were $22.00 per ounce of silver and $1,350 per ounce of gold except Endeavor at $2,200 per metric ton of lead, $2,400 per metric ton of zinc and $20 per ounce of silver.
4. Mineral Resources are in addition to Mineral Reserves and do not have not demonstrated economic viability. Mineral Resources do not include Mineral Reserves. Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of mineral reserves, and there is no certainty that the inferred mineral resources will be realized. The preliminary economic assessment for the re-scoped mine plan at Kensington is preliminary in nature and includes inferred mineral resources, and does not have as high a level of certainty as a plan that was based solely on proven and probable reserves and there is no certainty that the results from the preliminary economic assessment will be realized.
5. Palmarejo Mineral Reserves and Resources are the addition of Palmarejo, Guadalupe, and Independencia deposits. There are no Mineral Reserves and Resources for La Patria in 2014.
6. Rounding of short tons and troy ounces, as required by reporting guidelines may result in apparent differences between tons, grade, and contained metal content.
7. For details on the estimation of Mineral Resources and Reserves for each property, Canadian investors should refer to the NI 43-101 compliant Technical Report on file at www.sedar.com and the Technical Report for Palmarejo to be filed on www.sedar.com during the second quarter of 2015.

Notes to the above mineral reserves and resources:

1. Mineral Reserves and Mineral Resources estimate as reported by Goldcorp in its Annual Information Form dated March 31, 2014 ("AIF") for the financial year ended December 31, 2013, available to Canadian investors at www.sedar.com under Goldcorp's profile. As discussed in the AIF, Mineral Reserves and Mineral Resources were prepared by Goldcorp in accordance with NI 43-101 under the supervision of a qualified person. Coeur is not treating these historical estimates as current and has not completed sufficient work to classify the historical estimate as current mineral reserves or mineral resources for Coeur's purposes. Coeur's qualified person will review and verify the scientific and technical information of Goldcorp, as well as complete the other work necessary for purposes of preparing a 43-101 technical report, including validation of data quality, resource model accuracy, and costs used in reserve and resource cutoffs.
2. As discussed in the AIF, mineral reserves were calculated by Goldcorp using metal prices of $1,300 per gold ounce and $22 per silver ounce, and mineral resources were calculated using $1,500 per gold ounce and $24 per silver ounce. Mineral resources are in addition to mineral reserves and do not have demonstrated economic viability. Rounding of tons, as required by reporting guidelines, may result in apparent differences between tons and grade.
