Cautionary Statements

This presentation contains forward-looking statements within the meaning of securities legislation in the United States and Canada, including statements regarding the anticipated closing of the exchange transaction, anticipated production, costs, crushing and mining rates, mine plans, grades, recovery rates, the development of the Jualin, Guadalupe, and Independencia deposits, capital expenditures, Guadalupe and Independencia mining rates, anticipated returns from Palmarejo, exploration efforts to extend mine life, and expansion projects and permitting at Rochester. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause Coeur's actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, the risk that the exchange transaction does not close on a timely basis or at all, the risk that anticipated production, cost, and expense levels are not attained, the risk that some or all of the anticipated benefits of the Wharf and Paramount acquisitions will not be realized, the risks and hazards inherent in the mining business (including risks inherent in developing large-scale mining projects, environmental hazards, industrial accidents, weather or geologically related conditions), changes in the market prices of gold and silver and a sustained lower price environment, the uncertainties inherent in Coeur's production, exploratory and developmental activities, including risks relating to permitting and regulatory delays, ground conditions, grade variability, any future labor disputes or work stoppages, the uncertainties inherent in the estimation of gold and silver ore reserves, changes that could result from Coeur's future acquisition of new mining properties or businesses, reliance on third parties to operate certain mines where Coeur owns silver production and reserves and the absence of control over mining operations in which Coeur or its subsidiaries hold royalty or streaming interests and risks related to these mining operations including results of mining and exploration activities, environmental, economic and political risks of the jurisdiction in which the mining operations are located, the loss of any third-party smelter to which Coeur markets silver and gold, the effects of environmental and other governmental regulations, the risks inherent in the ownership or operation of or investment in mining properties or businesses in foreign countries, Coeur's ability to raise additional financing necessary to conduct its business, make payments or refinance its debt, as well as other uncertainties and risk factors set out in filings made from time to time with the United States Securities and Exchange Commission, and the Canadian securities regulators, including, without limitation, Coeur's most recent reports on Form 10-K and Form 10-Q. Actual results, developments and timetables could vary significantly from the estimates presented. Readers are cautioned not to put undue reliance on forward-looking statements. Coeur disclaims any intent or obligation to update publicly such forward-looking statements, whether as a result of new information, future events or otherwise. Additionally, Coeur undertakes no obligation to comment on analyses, expectations or statements made by third parties in respect of Coeur, its financial or operating results or its securities.

Dana Willis, Coeur's Director, Resource Geology and a qualified person under Canadian National Instrument 43-101, supervised the preparation of the scientific and technical information concerning Coeur's mineral projects in this presentation. Mineral resources are in addition to mineral reserves and do not have demonstrated economic viability. Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of mineral reserves, and there is no certainty that the inferred mineral resources will be realized. For a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources, as well as data verification procedures and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors, Canadian investors should see the Technical Reports for each of Coeur's properties as filed on SEDAR at www.sedar.com.

Cautionary Note to U.S. Investors - The United States Securities and Exchange Commission permits U.S. mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We may use certain terms in public disclosures, such as "measured," "indicated," "inferred" and "resources," that are recognized by Canadian regulations, but that SEC guidelines generally prohibit U.S. registered companies from including in their filings with the SEC. U.S. investors are urged to consider closely the disclosure in our Form 10-K which may be secured from us, or from the SEC's website at http://www.sec.gov.

Non-U.S. GAAP Measures - We supplement the reporting of our financial information determined under United States generally accepted accounting principles (U.S. GAAP) with certain non-U.S. GAAP financial measures, adjusted net income (loss), adjusted EBITDA, adjusted costs applicable to sales per silver equivalent ounce, and adjusted all-in sustaining costs. We believe that these adjusted measures provide meaningful information to assist management, investors and analysts in understanding our financial results and assessing our prospects for future performance. We believe these adjusted financial measures are important indicators of our recurring operations because they exclude items that may not be indicative of, or are unrelated to our core operating results, and provide a better baseline for analyzing trends in our underlying businesses. We believe adjusted net income (loss), EBITDA, adjusted costs applicable to sales per silver equivalent ounce, and adjusted all-in sustaining costs are important measures in assessing the Company's overall financial performance.

Gold and silver equivalence assumes silver to gold ratio of 60:1 unless otherwise noted.

Third Quarter and Recent Highlights

- **Substantial cost reductions yet again**; Adj. CAS and Adj. AISC per AgEq oz[1] of $12.07 and $15.17, respectively, down 15% and 17%, respectively, Y-o-Y
- **Raising full-year production guidance**; Expect to produce 33.7 – 36.4M AgEq oz in 2015[2] (up from 33.1 – 35.9M AgEq ozs)
- **Lowering full-year cost guidance**; AISC expected to be $16.50 - $17.00 per AgEq oz[2] (down from $17.00 - $18.00)
- **Guadalupe mining rates ahead of schedule**; 3Q average of 1,700 tpd; expect to reach 2,000 tpd by year-end
- **Underground development on-track to reach Independencia deposit by year-end**
- **Development of Jualin deposit at Kensington underway**
- **G&A down 21% compared with prior quarter**
- **Level cash balance compared with June 30, 2015**; cash, equivalents, and short-term investments $205.7M as of September 30, 2015
- **Expected significant reduction in total debt**; $54 million reduction in total debt
- **New NI 43-101 Technical Report filed for Palmarejo on November 2, 2015**; reflects four-fold increase in total pre-tax cash flow, 50% increase in AgEq reserves, and 5% increase in average grade compared to last technical report despite significantly lower prices

Note: In the November 2, 2015 technical report metal prices used for the economic analysis were $15.50 per ounce of silver and $1,150 per ounce of gold through 2017 and $17.50 per ounce of silver and $1,250 per ounce of gold thereafter. In the February 12, 2015 technical report metals prices used for the economic analysis were $19.00 per ounce of silver and $1,275 per ounce of gold. For additional information, Canadian investors should refer to the applicable technical report for Palmarejo filed on www.sedar.com.

Companywide Adj. CAS / AuEq oz[1]

Companywide Adj. AISC / AgEq oz[1]

1. See non-GAAP reconciliation tables in the appendix to this presentation. For purposes of silver and gold equivalence, a 60:1 ratio is assumed except where noted as average realized prices.

Note: Wharf excluded from 1Q 2015 costs as no sales were recorded. Average realized prices for 1Q 2015 and FY 2014 were $16.23 and $18.87 for silver, respectively, and $1,116 and $1,1252 for gold, respectively.

Palmarejo LOM Plan in November Technical Report Reflects Three-Fold Increase in Projected NPV

- Reflects progressive silver and gold prices of $15.50 and $1,150, respectively, in first two years and $17.50 and $1,250, respectively, thereafter
- Independencia to make up approximately one third of the mill feed
- Compared to February 2015 technical report:
  - Fourfold increase in expected pre-tax net cash flow over 7-year mine life
  - Underground mining cost per ton 4% lower
  - Total operating costs per ton 13% lower

Notes to the above mineral reserves and resources:

1. Effective December 31, 2014, except (a) Palmarejo, effective August 31, 2015, (b) Wharf, effective June 1, 2015, and (c) Endeavor, effective June 30, 2014.
2. Assumed metal prices for Mineral Reserves were $19.00 per ounce of silver and $1,275 per ounce of gold, except (a) the open pit, Rosario, and lower 76 underground deposits at Palmarejo at $15.50 per ounce of silver and $1,150 per ounce of gold, (b) Guadalupe and Independencia deposits at Palmarejo at $17.50 per ounce of silver and $1,250 per ounce of gold, and (c) Endeavor at $2,200 per metric ton of lead, $2,400 per metric ton of zinc, and $20.00 per ounce of silver. Guadalupe and Independencia reserves also evaluated using $15.50 per ounce of silver and $1,150 per ounce of gold to determine economic viability. It was determined that substantially all current reserves are economically viable at these lower price assumptions.
3. Assumed metal prices for estimated Mineral Resources were $22.00 per ounce of silver and $1,350 per ounce of gold, except (a) the Independencia and Guadalupe deposits at Palmarejo at $19.00 per ounce of silver and $1,275 per ounce of gold, and (b) Endeavor at $2,200 per metric ton of lead, $2,400 per metric ton of zinc and $20.00 per ounce of silver.
4. Palmarejo Mineral Reserves and Mineral Resources aggregate the Mineral Reserves and Mineral Resources of the Palmarejo, Guadalupe, and Independencia deposits. There are no Mineral Reserves and Mineral Resources for La Patria. There are no Mineral Resources for the Palmarejo deposit.
5. Mineral Resources are in addition to Mineral Reserves and do not have demonstrated economic viability. Inferred Mineral Resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of Mineral Reserves, and there is no certainty that the Inferred Mineral Resources will be realized. The preliminary economic assessment for the re-scoped mine plan at Kensington is preliminary in nature and includes Inferred Mineral Resources, and does not have as high a level of certainty as a plan that was based solely on proven and probable reserves and there is no certainty that the results from the preliminary economic assessment will be realized.
6. Rounding of tons and ounces, as required by reporting guidelines, may result in apparent differences between tons, grade, and contained metal content.
7. For details on the estimation of mineral resources and reserves, including the key assumptions, parameters and methods used to estimate the Mineral Resources and Mineral Reserves, Canadian investors should refer to the NI 43-101 Technical Reports for Coeur's properties on file at www.sedar.com.
