Cautionary Statements

This presentation contains forward-looking statements within the meaning of securities legislation in the United States and Canada, including statements regarding, anticipated production, costs, mine plans, grades, returns, development and exploration efforts, expectations regarding the Palmarejo Complex, capital expenditures, and expansion projects and permitting at Rochester. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause Coeur's actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, the risk that anticipated production, cost, and expense levels are not attained, the risks and hazards inherent in the mining business (including risks inherent in developing large-scale mining projects, environmental hazards, industrial accidents, weather or geologically related conditions), changes in the market prices of gold and silver and a sustained lower price environment, the uncertainties inherent in Coeur's production, exploratory and developmental activities, including risks relating to permitting and regulatory delays, ground conditions, grade variability, any future labor disputes or work stoppages, the uncertainties inherent in the estimation of gold and silver ore reserves, changes that could result from Coeur's future acquisition of new mining properties or businesses, reliance on third parties to operate certain mines where Coeur owns silver production and reserves and the absence of control over mining operations in which Coeur or its subsidiaries hold royalty or streaming interests and risks related to these mining operations including results of mining and exploration activities, environmental, economic and political risks of the jurisdiction in which the mining operations are located, the loss of any third-party smelter to which Coeur markets silver and gold, the effects of environmental and other governmental regulations, the risks inherent in the ownership or operation of or investment in mining properties or businesses in foreign countries, Coeur's ability to raise additional financing necessary to conduct its business, make payments or refinance its debt, as well as other uncertainties and risk factors set out in filings made from time to time with the United States Securities and Exchange Commission, and the Canadian securities regulators, including, without limitation, Coeur's most recent report on Form 10-K. Actual results, developments and timetables could vary significantly from the estimates presented. Readers are cautioned not to put undue reliance on forward-looking statements. Coeur disclaims any intent or obligation to update publicly such forward-looking statements, whether as a result of new information, future events or otherwise. Additionally, Coeur undertakes no obligation to comment on analyses, expectations or statements made by third parties in respect of Coeur, its financial or operating results or its securities.

Dana Willis, Coeur's Director, Resource Geology and a qualified person under Canadian National Instrument 43-101, supervised the preparation of the scientific and technical information concerning Coeur's mineral projects in this presentation. Mineral resources are in addition to mineral reserves and do not have demonstrated economic viability. Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of mineral reserves, and there is no certainty that the inferred mineral resources will be realized. For a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources, as well as data verification procedures and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors, Canadian investors should see the Technical Reports for each of Coeur's properties as filed on SEDAR at www.sedar.com.

Cautionary Note to U.S. Investors - The United States Securities and Exchange Commission permits U.S. mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We may use certain terms in public disclosures, such as "measured," "indicated," "inferred" and "resources," that are recognized by Canadian regulations, but that SEC guidelines generally prohibit U.S. registered companies from including in their filings with the SEC. U.S. investors are urged to consider closely the disclosure in our Form 10-K which may be secured from us, or from the SEC's website at http://www.sec.gov.

Non-U.S. GAAP Measures - We supplement the reporting of our financial information determined under United States generally accepted accounting principles (U.S. GAAP) with certain non-U.S. GAAP financial measures, adjusted net income (loss), adjusted EBITDA, adjusted costs applicable to sales per silver equivalent ounce, and adjusted all-in sustaining costs per silver equivalent ounce. We believe that these adjusted measures provide meaningful information to assist management, investors and analysts in understanding our financial results and assessing our prospects for future performance. We believe these adjusted financial measures are important indicators of our recurring operations because they exclude items that may not be indicative of, or are unrelated to our core operating results, and provide a better baseline for analyzing trends in our underlying businesses. We believe adjusted net income (loss), EBITDA, adjusted costs applicable to sales per silver equivalent ounce, and adjusted all-in sustaining costs per silver equivalent ounce are important measures in assessing the Company's overall financial performance.

Gold and silver equivalence assumes silver to gold ratio of 60:1 unless otherwise noted.

2015 Highlights and Achievements

- 2015 production of 35.6 million AgEq ounces, at the high-end of guidance and a 11% increase over 2014
- Adj. AISC of $14.32 per realized AgEq oz[1], a 22% decrease from 2014
- Adj. CAS of $11.87 per realized AgEq oz[1], a 13% decrease from 2014
- Adjusted EBITDA[1] of $117.1M, a 40% increase compared to 2014 despite lower metals prices
- Kensington achieved record production of 126,266 gold ounces at all-time low Adj. CAS per gold oz[1] of $798
- Wharf generated $29M in FCF (since acquisition closed in February 2015); 4Q CAS of $556 per AuEq oz[1]
- Cash and equivalents remained constant at $200.7 million at December 31, 2015. Net debt to LTM EBITDA[1] down from 4.2x at 3/31 to 2.5x at 12/31
- Rising UG mining rates at Guadalupe deposit at Palmarejo as planned, reaching 2,000 tpd in 4Q 2015

1. See non-GAAP reconciliation tables in the appendix to this presentation. For purposes of silver equivalence, a 60:1 ratio is assumed except where noted as average realized prices.

Year-End 2015 Reserves Highlights

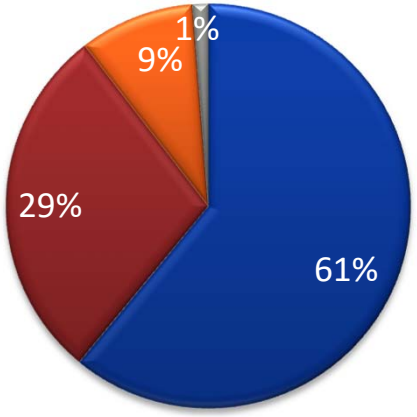

- Evaluated mineral reserves using short and long-term reserve price assumptions
  - **2016 – 2017:** $15.50 per silver oz and $1,150 per gold oz
  - **2018 and beyond:** $17.50 per silver oz and $1,250 per gold oz
- Key changes since year-end 2014:
  - Palmarejo silver and gold P&P reserves up 46% and 41%, respectively
  - Addition of Wharf resulted in 33% increase in gold reserves
  - Reclassified La Preciosa silver P&P reserves of 119 million ounces to resources
  - San Bartolome silver P&P reserves declined from 46 million ounces to 28 million ounces

Palmarejo Complex Proven & Probable Reserves
Contained Ounces Gold

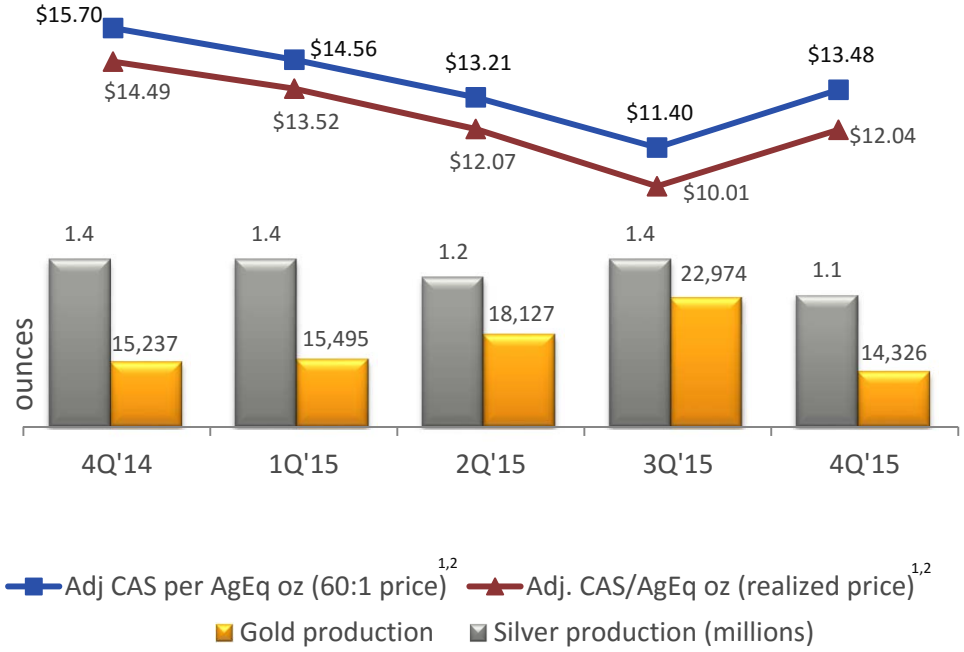

Palmarejo Complex's silver and gold P&P reserve grades have increased 33% and 49%, respectively, since year-end 2013

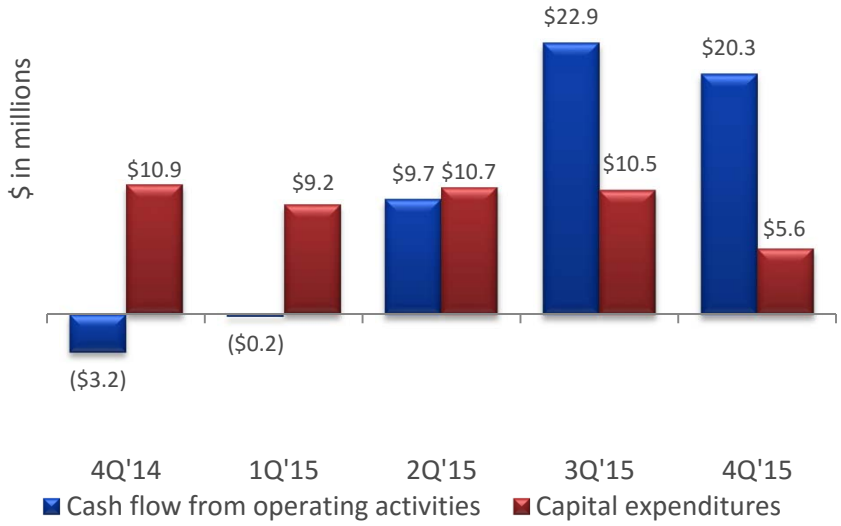

Assumed metal prices for 2015 estimated reserves were $17.50 per ounce silver and $1,250 per ounce gold, except the Rosario and lower 76 underground deposits at Palmarejo at $15.50 per ounce of silver and $1,150 per ounce of gold. See slides in the appendix for additional information related to mineral reserves and resources. Exploration: Focus on High Grade and High ROI

2015 Success

- Exploration totaled $17.6M ($11.6M expensed) and $6.0M (capitalized)
- **Palmarejo** ($4.7M expensed; $2.1M capitalized)
  - Discoveries at Los Bancos and Nación viens between Guadalupe and Independencia
  - Drilled thickest, highest-grade mineralization yet in deep zones of Guadalupe
- **Rochester** ($1.3M expensed; $1.6M capitalized)
  - High-grade silver-gold East Rochester zone identified 1,000 ft from existing mining activity
- **Kensington** ($2.6M expensed; $1.4M capitalized)
  - Initial resource estimate at Jualin deposit announced at 3x the grade of the main Kensington ore body

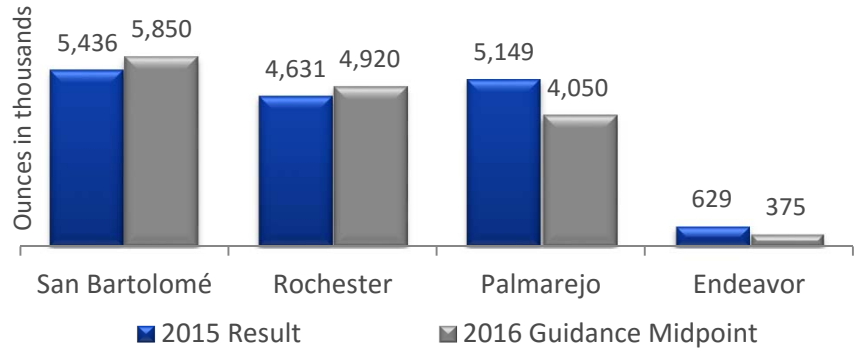

2016 Focus

- Exploration expense guidance: $11 – 13M[1], plus estimated for $11 - $13M for capitalized drilling
- **Palmarejo** ($5M expensed; $2M capitalized)
  - Converting high-grade inferred resources at Guadalupe to reserve status
  - Expanding resources in the Guadalupe-Independencia corridor, including Los Bancos and Nación veins
  - Drilling at Dana and La Bavisa veins
- **Rochester** ($1M expensed; $2M capitalized)
  - Infill drilling of high-grade East Rochester discovery and economic analysis
- **Kensington** ($3M expensed; $4M capitalized)
  - Infill and expansion of Jualin Vein #4
  - Testing of Jualin Vein #5
  - Further exploration and expansion of Raven
- Continuing success-based approach to fund programs where justified based on results

Notes to the above mineral reserves and resources:

1. Effective December 31, 2015 except Endeavor, effective June 30, 2015.
2. Assumed metal prices for estimated reserves were $17.50 per ounce silver and $1,250 per ounce gold, except for San Bartolomé, Rosario and lower 76 underground deposits at Palmarejo at $15.50 per ounce of silver and $1,150 per ounce of gold, Endeavor at $2,400 per tonne zinc, $2,200 per tonne lead and $17.00 per ounce of silver, and Wharf at $1,275 per ounce of gold. Proven and probable reserves (other than Endeavor) were also evaluated using $15.50 per ounce of silver and $1,150 per ounce of gold. It was determined that substantially all proven and probable reserves could be economically and legally extracted or produced at these lower price assumptions.
3. Mineral resources are in addition to mineral reserves and do not have demonstrated economic viability. Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of mineral reserves, and there is no certainty that the inferred mineral resources will be realized.
4. Rounding of tons and ounces, as required by reporting guidelines, may result in apparent differences between tons, grade, and contained metal content.
5. For details on the estimation of mineral resources and reserves, including the key assumptions, parameters and methods used to estimate the mineral resources and reserves, Canadian investors should refer to the NI 43-101-compliant Technical Report for Coeur's properties on file at www.sedar.com.
