Cautionary Statements

This presentation contains forward-looking statements within the meaning of securities legislation in the United States and Canada, including statements regarding anticipated production, costs, mining rates, mine plans, grades, recovery rates, cash flow, mine life, exploration and development efforts, capital expenditures, anticipated returns, operations and development at the Palmarejo complex and Kensington, expansion projects, permitting at Rochester, ore purchases at San Bartolomé, and initiatives to transition to strong, sustainable free cash flow, maintain a flexible balance sheet, extend and upgrade future production via near-mine exploration, establish a pipeline of growth projects and continue delivering on commitments. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause Coeur's actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, the risks and hazards inherent in the mining business (including risks inherent in developing large-scale mining projects, environmental hazards, industrial accidents, weather or geologically related conditions), changes in the market prices of gold and silver and a sustained lower price environment, the uncertainties inherent in Coeur's production, exploratory and developmental activities, including risks relating to permitting and regulatory delays, ground conditions, grade variability, any future labor disputes or work stoppages, the uncertainties inherent in the estimation of gold and silver ore reserves, changes that could result from Coeur's future acquisition of new mining properties or businesses, reliance on third parties to operate certain mines where Coeur owns silver production and reserves and the absence of control over mining operations in which Coeur or its subsidiaries hold royalty or streaming interests and risks related to these mining operations including results of mining and exploration activities, environmental, economic and political risks of the jurisdiction in which the mining operations are located, the loss of any third-party smelter to which Coeur markets silver and gold, the effects of environmental and other governmental regulations, the risks inherent in the ownership or operation of or investment in mining properties or businesses in foreign countries, Coeur's ability to raise additional financing necessary to conduct its business, make payments or refinance its debt, as well as other uncertainties and risk factors set out in filings made from time to time with the United States Securities and Exchange Commission, and the Canadian securities regulators, including, without limitation, Coeur's most recent reports on Form 10-K and Form 10-Q. Actual results, developments and timetables could vary significantly from the estimates presented. Readers are cautioned not to put undue reliance on forward-looking statements. Coeur disclaims any intent or obligation to update publicly such forward-looking statements, whether as a result of new information, future events or otherwise. Additionally, Coeur undertakes no obligation to comment on analyses, expectations or statements made by third parties in respect of Coeur, its financial or operating results or its securities.

Dana Willis, Coeur's Director, Resource Geology and a qualified person under Canadian National Instrument 43-101, supervised the preparation of the scientific and technical information concerning Coeur's mineral projects in this presentation. Mineral resources are in addition to mineral reserves and do not have demonstrated economic viability. Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of mineral reserves, and there is no certainty that the inferred mineral resources will be realized. Insofar as the re-scoped mine plan at Kensington described in this presentation is at the level of a preliminary economic assessment, it includes inferred mineral resources and does not have as high a level of certainty as a plan that was based solely on proven and probable reserves. For a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources, as well as data verification procedures and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors, Canadian investors should see the Technical Reports for each of Coeur's properties as filed on SEDAR at www.sedar.com.

Cautionary Note to U.S. Investors - The United States Securities and Exchange Commission permits U.S. mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We may use certain terms in public disclosures, such as "measured," "indicated," "inferred" and "resources," that are recognized by Canadian regulations, but that SEC guidelines generally prohibit U.S. registered companies from including in their filings with the SEC. U.S. investors are urged to consider closely the disclosure in our Form 10-K which may be secured from us, or from the SEC's website at http://www.sec.gov.

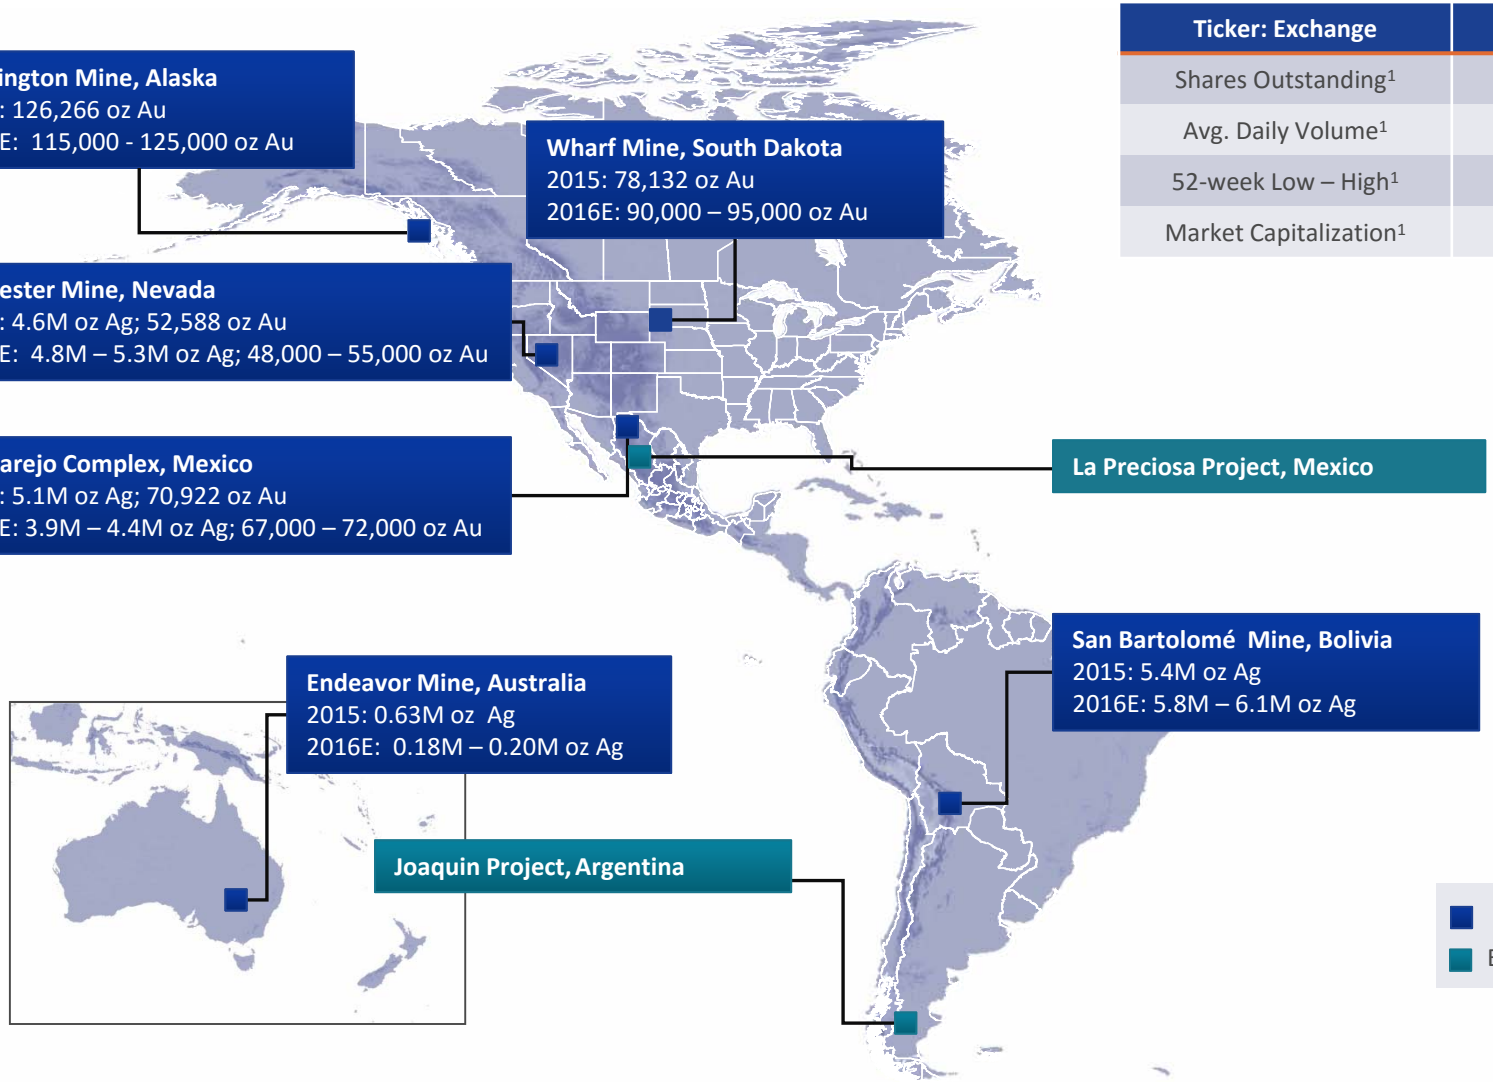

Non-U.S. GAAP Measures - We supplement the reporting of our financial information determined under United States generally accepted accounting principles (U.S. GAAP) with certain non-U.S. GAAP financial measures, adjusted EBITDA, adjusted costs applicable to sales per silver equivalent ounce, and adjusted all-in sustaining costs. We believe that these adjusted measures provide meaningful information to assist management, investors and analysts in understanding our financial results and assessing our prospects for future performance. We believe these adjusted financial measures are important indicators of our recurring operations because they exclude items that may not be indicative of, or are unrelated to our core operating results, and provide a better baseline for analyzing trends in our underlying businesses. We believe adjusted EBITDA, adjusted costs applicable to sales per silver equivalent ounce, and adjusted all-in sustaining costs are important measures in assessing the Company's overall financial performance.

Gold and silver equivalence assumes a silver to gold ratio of 60:1 unless otherwise noted. Average realized prices used for average realized costs for FY 2013, 2014, and 2015 and 1Q 2016 were $23.94, $18.87, $15.46, and 15.16 for silver, respectively, and $1,327, 1,1252, $1,143, and $1,178 for gold, respectively.

Why Coeur Mining

- Well-diversified, growing U.S. precious metals company
- Successful execution of Companywide repositioning
- Industry-leading cost reductions driving strong cash flow growth
- Recent acquisitions beginning to have significant impact
- Strong liquidity position with several near-term catalysts

Industry-Leading Cost Reductions Drive Strong Cash Flow Growth

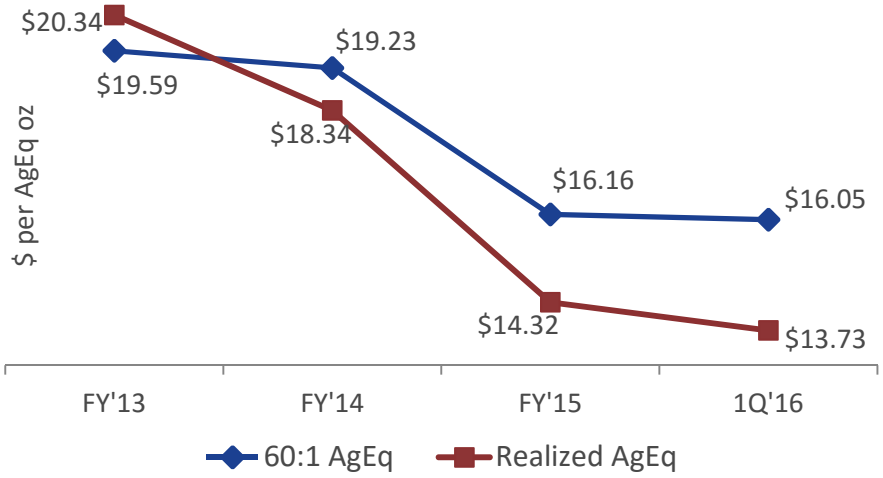

Companywide Adj. CAS / AgEq oz[1]

Companywide Adj. CAS / AuEq oz[1]

Companywide Adj. AISC / AgEq oz[1]

Cost Reduction Highlights

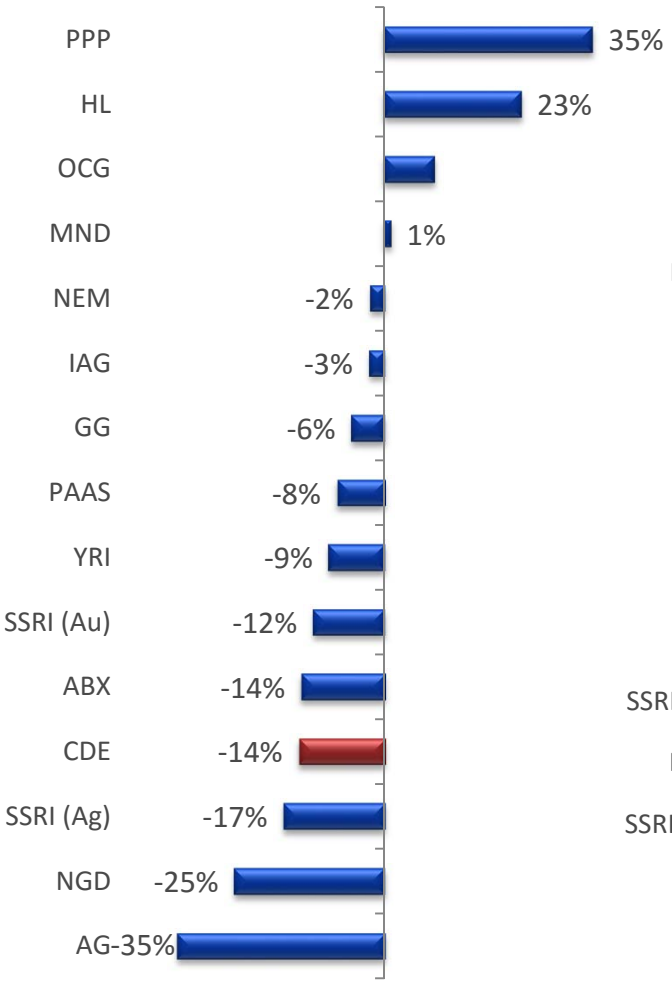

- ~65% of reductions in AISC / AgEq oz[1] between 2013 and 2015 were internally generated vs. ~35% that were a result of lower input costs (i.e., diesel and FX)
- Internally generated cost reductions include operational efficiencies, higher recovery rates and rationalization of outside services

1. See non-GAAP reconciliation tables in the appendix to this presentation. For purposes of silver and gold equivalence, a 60:1 ratio is assumed except where noted as average realized prices.

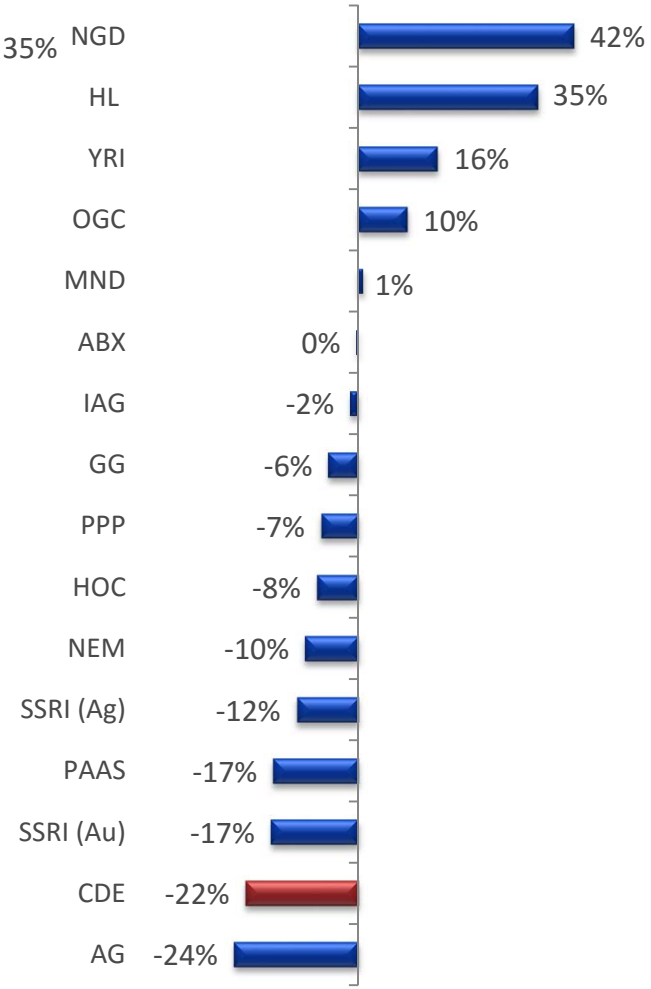

Note: Wharf excluded from 1Q 2015 costs as no sales were recorded.

Well-Capitalized with Financial Flexibility

- Debt used to fund high-return, high-impact investments
- 95% of total debt matures in 2020 or later
- Flexibility and simplicity
- "Liquidity first; de-levering second" philosophy
- Provide basis for improved credit rating over time
- Avoid long-term maintenance covenants / secured financings to the extent possible

Recent Ratings Agency Actions and Commentary

- On March 16th, S&P upgraded Coeur's corporate rating to B+ from B and deemed outlook "Stable"
  - Upgraded senior secured debt to BB from BB- and senior unsecured debt to B+ from B
  - Gold forecast was lowered from $1,150/oz to $1,100/oz
  - Recognizes recent acquisitions and cost reductions have led to improved prospects for Coeur's cash flow generation and liquidity profile, despite lower metals prices
  - Cites higher grade ore at Palmarejo and Kensington as primary contributors to increase in future cash flow

- On March 24th, Moody's confirmed Coeur's corporate rating of B3 and deemed outlook "Stable"
  - Also confirmed senior secured debt rating of Ba3 and senior unsecured debt rating of Caa1
  - Uses prices assumptions of $1,100/ oz gold and $15/ oz silver
  - Rating confirmation reflects recent improvement in company's credit metrics, despite weak precious metal prices as a result of successful cost reductions
  - Expects stable or improving company credit metrics over the next 12 to 18 months

Note: Reports published by Standard & Poor's and Moody's on March 16, 2016 and March 24, 2016, respectively. There can be no assurance that this information is indicative of the future performance of Coeur or that actual results or performance will be consistent with this information. Accordingly, you should not rely on this information. Coeur does not intent to update or otherwise revise this information to reflect circumstances existing since their preparation or to reflect the occurrence of unanticipated event, even in the event that any or all of the underlying assumptions are shown to be in error.

Sales of Non-Core Assets

Closing Date	Asset	Purchaser	Consideration

Total			**$24.8M**	

Summary

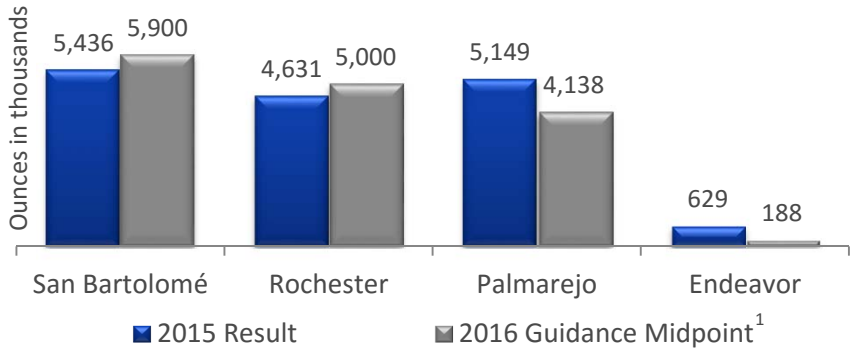

- Coeur to retain the Endeavor silver stream, Zaruma NSR royalty, and a portfolio of equity investments with a current market value of over $11M
- Proceeds to be used to bolster cash and to opportunistically reduce outstanding debt

Rationale

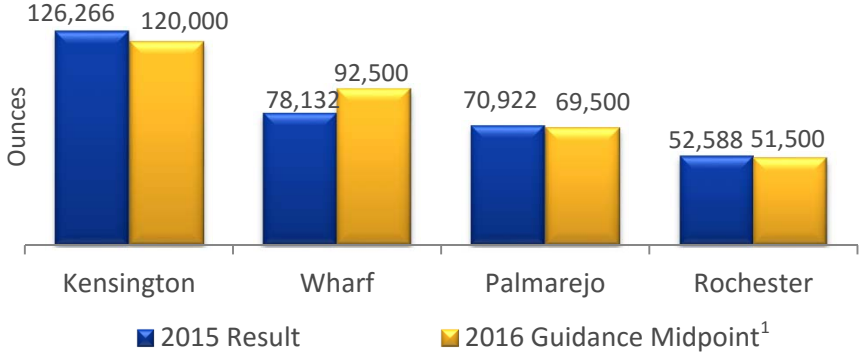

- Bolster balance sheet
- Non-core assets
- Accretive to Coeur's stockholders

Palmarejo: Rising Production Levels from High-Grade Underground

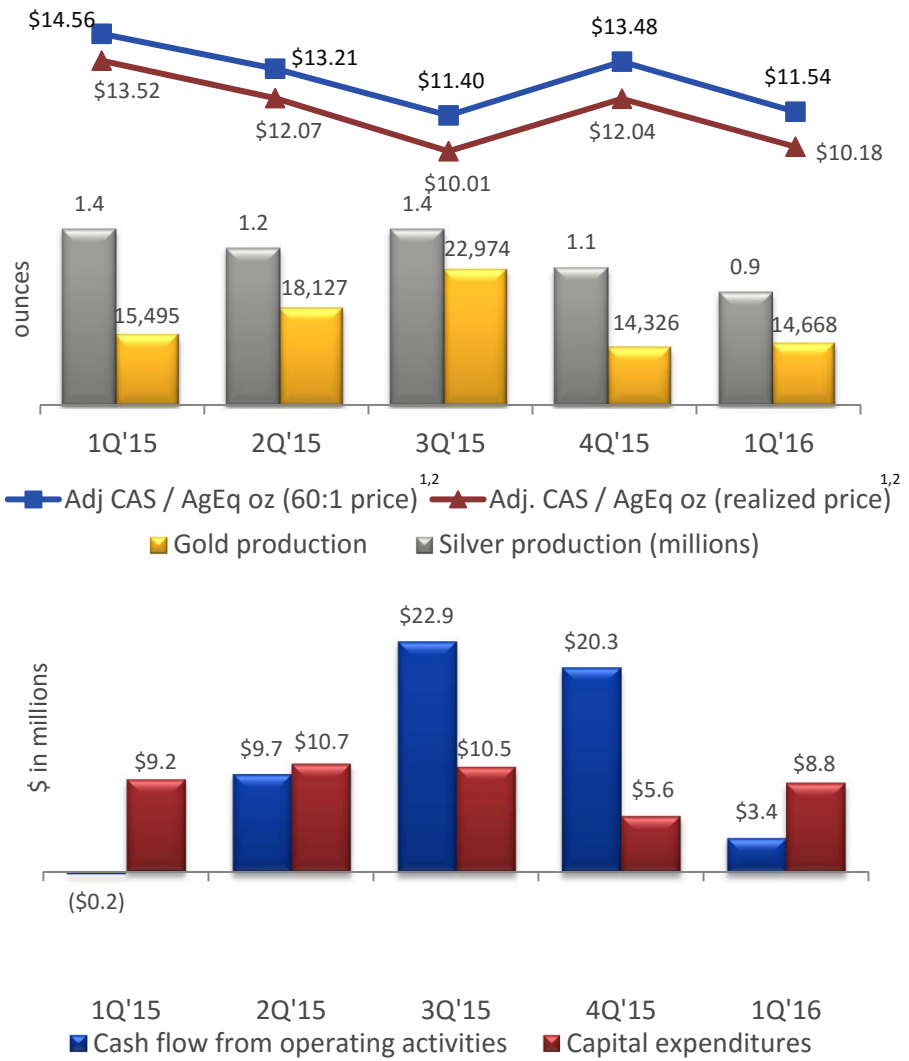

Highlights

- Transitioning to underground mining to maximize margins and cash flow
- Averaged over 1,800 tpd at Guadalupe in 1Q 2016
- Reached ore at Independencia in early January and expect to reach 1,000 tpd by year-end 2016
- Guadalupe and Independencia have potential to reach 5,000 tpd combined production
- Process optimization has increased recoveries and reduced processing costs
- Year-end 2015 reserves nearly doubled at higher gold and silver grades compared to year-end 2014 as a result of the acquisition of Paramount in 2015

2016 Guidance[3]

Production: 3.9 – 4.4 M oz Ag; 67,000 – 72,000 oz Au

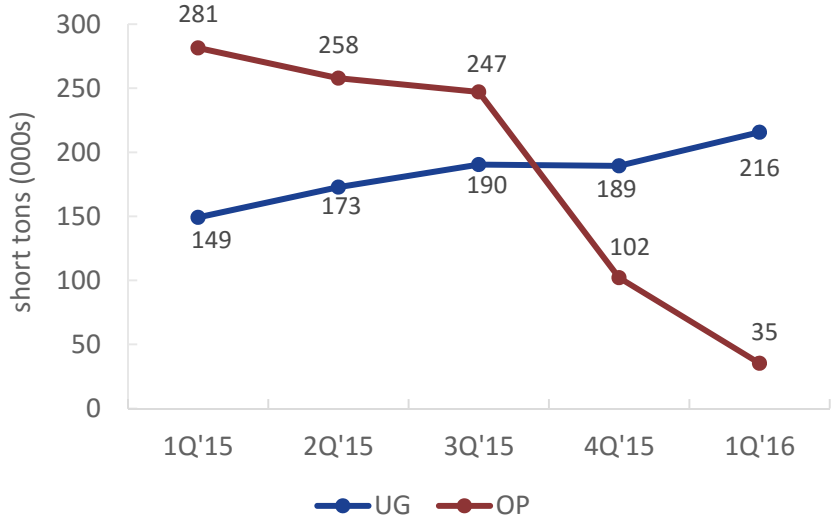

CAS: $12.50 - $13.50 per AgEq oz

Rochester: Production Rates Expected to Rise Throughout the Year

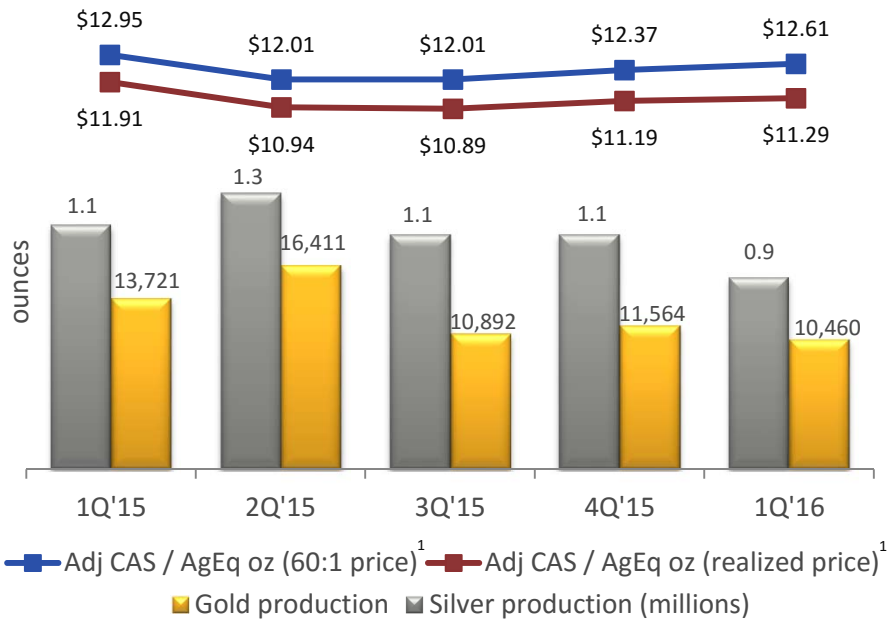

Highlights

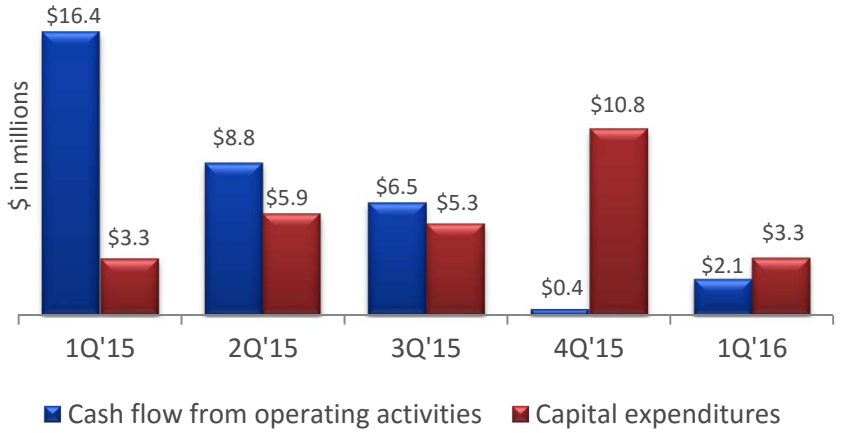

- 2015 production of 7.8M AgEq oz[1] – second year of double-digit percent production growth
- 2015 Adj. CAS / realized AgEq oz[1] of $11.27, 18% lower than 2014
- Placed 16.4M tons under leach in 2015 and expect to place 20.0M tons in 2016
- Recently expanded in-pit crusher and increased capacity of Stage III leach pad
- Regulatory approval for 120M additional tons of leach pad capacity expected in 2Q 2016
- Drilling underway to define higher-grade East Rochester zone

2016 Guidance[2]

Kensington: Higher Grade Contributes to Strong Production at Lower Costs

Highlights

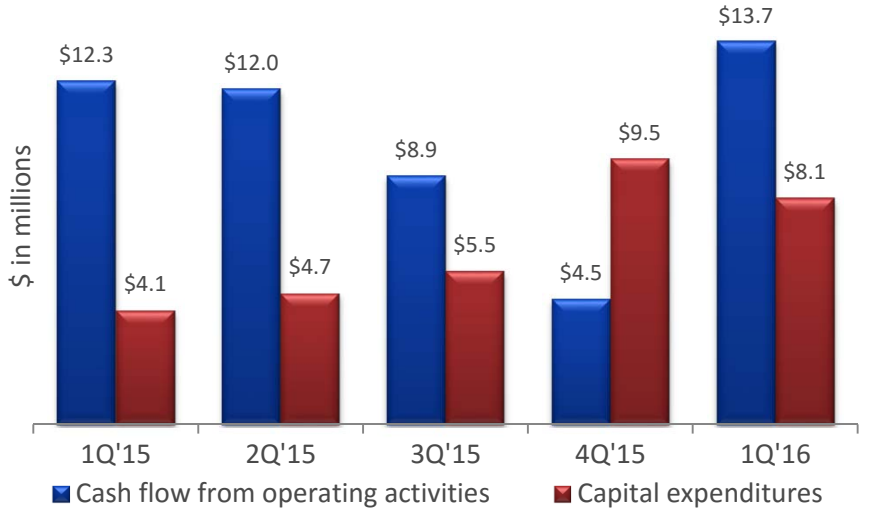

- 2015 production of 126,266 ounces – 3rd straight year of record operating results
- Re-scoped mine plan demonstrates strategy to source ore from higher-grade areas over the LOM
- High-grade Jualin deposit carries expected ~70% IRR; Development over one-third complete with initial production expected in 2017
- New ore sorting technology implemented to further improve recovery rates
- Expect to further expand and extend the mine plan through continued exploration of higher-grade areas

Wharf: Coeur's Lowest Cost Mine and Largest Contributor to FCF

Highlights

- Acquired in 2015 for $99 million from Goldcorp
- Coeur's lowest cost operation and largest source of FCF, generating $28M in the 10-months of ownership in 2015
- Improved process plant efficiencies have led to significantly higher plant recoveries
- Mine plan reflects after-tax $NPV_{10\%}$ of $138M at avg. annual gold production of ~ 90,000 oz and avg. annual OCF of ~$30M over 7 years based on reserves and $1,275 per ounce gold[3]

2016 Guidance[4]

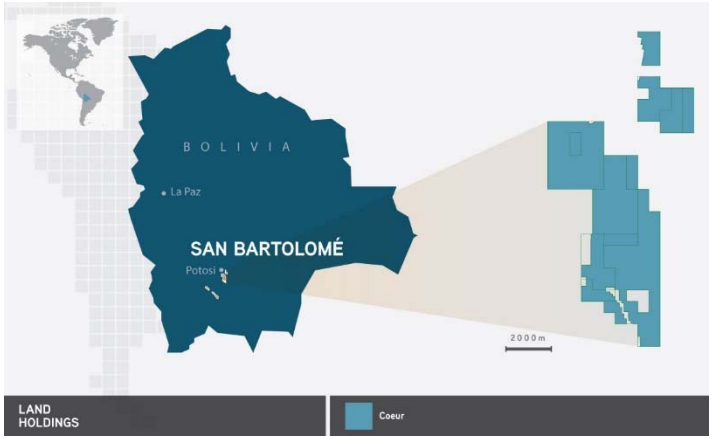

Production: 90,000 – 95,000 oz Au

San Bartolomé: Addition of Higher-Grade, Lower-Cost Ore from Local Sources

Highlights

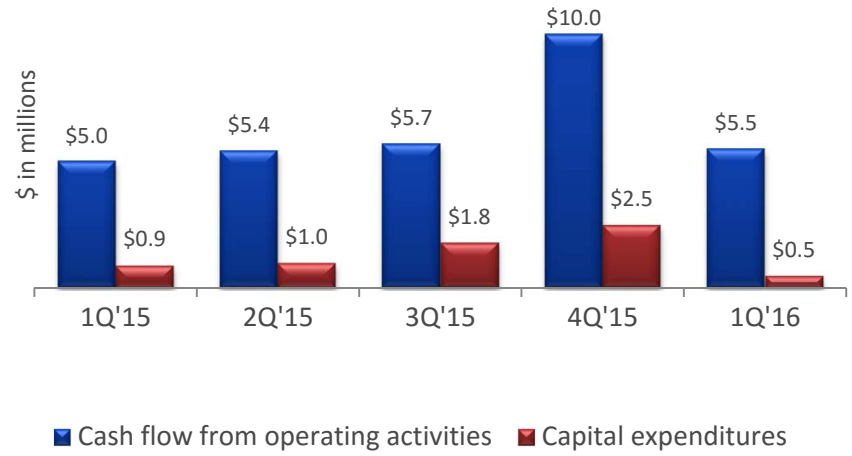

- Straightforward operation due to free-digging surface mining techniques (no drilling or blasting)
- Sourcing higher-grade, lower-cost ore from local sources in order to increase overall grade, reduce costs, and boost cash flow
- Implementing processing enhancements to improve recoveries
- No material exploration efforts or capital projects

2016 Guidance[2]

Notes to the above mineral reserves and resources:

1. Effective December 31, 2015 except Endeavor, effective June 30, 2015.
2. Assumed metal prices for estimated reserves were $17.50 per ounce silver and $1,250 per ounce gold, except for San Bartolomé, Rosario and lower 76 underground deposits at Palmarejo at $15.50 per ounce of silver and $1,150 per ounce of gold, Endeavor at $2,400 per tonne zinc, $2,200 per tonne lead and $17.00 per ounce of silver, and Wharf at $1,275 per ounce of gold. Proven and probable reserves (other than Endeavor) were also evaluated using $15.50 per ounce of silver and $1,150 per ounce of gold. It was determined that substantially all proven and probable reserves could be economically and legally extracted or produced at these lower price assumptions.
3. Mineral resources are in addition to mineral reserves and do not have demonstrated economic viability. Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of mineral reserves, and there is no certainty that the inferred mineral resources will be realized.
4. Rounding of tons and ounces, as required by reporting guidelines, may result in apparent differences between tons, grade, and contained metal content.
5. For details on the estimation of mineral resources and reserves, including the key assumptions, parameters and methods used to estimate the mineral resources and reserves, Canadian investors should refer to the NI 43-101-compliant Technical Report for Coeur's properties on file at www.sedar.com.
