Cautionary Statements

This presentation contains forward-looking statements within the meaning of securities legislation in the United States and Canada, including statements regarding, anticipated production, costs, capital expenditures, cash flow, expenses, debt levels, the impact of the new gold stream agreement at Palmarejo, initiatives to strengthen Coeur's balance sheet, ore purchases at San Bartolomé, exploration efforts and expectations regarding the completion of the at-the-market offering, debt reduction, development at Kensington, operations at Palmarejo, expansion projects at Rochester and the La Preciosa project. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause Coeur's actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, the risk that anticipated production, cost, and expense levels are not attained, the risks and hazards inherent in the mining business (including risks inherent in developing large-scale mining projects, environmental hazards, industrial accidents, weather or geologically related conditions), changes in the market prices of gold and silver and a sustained lower price environment, the uncertainties inherent in Coeur's production, exploratory and developmental activities, including risks relating to permitting and regulatory delays, ground conditions, grade variability, any future labor disputes or work stoppages, the uncertainties inherent in the estimation of gold and silver ore reserves, changes that could result from Coeur's future acquisition of new mining properties or businesses, reliance on third parties to operate certain mines where Coeur owns silver production and reserves and the absence of control over mining operations in which Coeur or its subsidiaries hold royalty or streaming interests and risks related to these mining operations including results of mining and exploration activities, environmental, economic and political risks of the jurisdiction in which the mining operations are located, the loss of any third-party smelter to which Coeur markets silver and gold, the effects of environmental and other governmental regulations, the risks inherent in the ownership or operation of or investment in mining properties or businesses in foreign countries, the political risks and uncertainties associated with recent developments in Bolivia, Coeur's ability to raise additional financing necessary to conduct its business, make payments or refinance its debt, as well as other uncertainties and risk factors set out in filings made from time to time with the United States Securities and Exchange Commission, and the Canadian securities regulators, including, without limitation, Coeur's most recent reports on Forms 10-K and 10-Q. Actual results, developments and timetables could vary significantly from the estimates presented. Readers are cautioned not to put undue reliance on forward-looking statements. Coeur disclaims any intent or obligation to update publicly such forward-looking statements, whether as a result of new information, future events or otherwise. Additionally, Coeur undertakes no obligation to comment on analyses, expectations or statements made by third parties in respect of Coeur, its financial or operating results or its securities.

Dana Willis, Coeur's Director, Resource Geology and a qualified person under Canadian National Instrument 43-101, reviewed and approved the scientific and technical information concerning Coeur's mineral projects in this presentation. Mineral resources are in addition to mineral reserves and do not have demonstrated economic viability. Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of mineral reserves, and there is no certainty that the inferred mineral resources will be realized. For a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources, as well as data verification procedures and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors, Canadian investors should see the Technical Reports for each of Coeur's properties as filed on SEDAR at www.sedar.com.

Cautionary Note to U.S. Investors - The United States Securities and Exchange Commission permits U.S. mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We may use certain terms in public disclosures, such as "measured," "indicated," "inferred" and "resources," that are recognized by Canadian regulations, but that SEC guidelines generally prohibit U.S. registered companies from including in their filings with the SEC. U.S. investors are urged to consider closely the disclosure in our Form 10-K which may be secured from us, or from the SEC's website at http://www.sec.gov.

Non-U.S. GAAP Measures - We supplement the reporting of our financial information determined under United States generally accepted accounting principles (U.S. GAAP) with certain non-U.S. GAAP financial measures, adjusted net income (loss), adjusted EBITDA, total debt to LTM adjusted EBITDA, net debt to LTM adjusted EBITDA, adjusted costs applicable to sales per silver equivalent ounce, and adjusted all-in sustaining costs per silver equivalent ounce. We believe that these adjusted measures provide meaningful information to assist management, investors and analysts in understanding our financial results and assessing our prospects for future performance. We believe these adjusted financial measures are important indicators of our recurring operations because they exclude items that may not be indicative of, or are unrelated to our core operating results, and provide a better baseline for analyzing trends in our underlying businesses. We believe adjusted net income (loss), adjusted EBITDA, total debt to LTM adjusted EBITDA, net debt to LTM adjusted EBITDA, adjusted costs applicable to sales per silver equivalent ounce, and adjusted all-in sustaining costs per silver equivalent ounce are important measures in assessing the Company's overall financial performance.

Gold and silver equivalence (AuEq and AgEq) assumes silver to gold ratio of 60:1 unless otherwise noted. Average realized prices used for average realized costs for FY 2013, 2014, and 2015 and 1Q, 2Q and 3Q 2016 were $23.94, $18.87, $15.46, 15.16, $17.38 and $19.61 for silver, respectively, and $1,327, 1,1252, $1,143, $1,178, $1,255 and $1,317 for gold, respectively.

Third Quarter Financial Highlights

- Quarterly free cash flow[1] of $14.6M, 20% higher than 2Q 2016
- LTM adj. EBITDA[2] of $201.7M, 18% higher quarter-over-quarter and more than double the same period last year
- Net income of $69.6 million ($0.42 per share) nearly a fourfold increase quarter-over-quarter; adjusted net income[2] of $38.6 million ($0.23 per share) more than double 2Q 2016
- Cash and equivalents of $222.5M at September 30, 2016
- Transitioned to more favorable Franco-Nevada gold stream at Palmarejo in August
- Total debt declined $109.3M, or 21%, during the quarter to approximately $400M
- Total debt / LTM adj. EBITDA[2] of 2.0x, down from 5.5x a year ago

1. Free cash flow is defined as cash flow from operating activities less capital expenditures and gold production royalty payments. See calculation table in the Appendix.
2. See non-GAAP reconciliation tables in the appendix to this presentation. For purposes of silver equivalence, a 60:1 ratio is assumed except where noted as average realized prices.

Third Quarter Operational Highlights

- Production of 8.6M silver equivalent ounces[1], down 10% from 2Q 2016 and 4% from 3Q 2015
- Adj. AISC of $15.37 per realized AgEqOz[1], up 16% over 2Q 2016 and 17% over 3Q 2015
- Adj. CAS of $11.69 per realized AgEqOz[1]
- Adj. CAS of $712 per realized AuEqOz[1]
- Another strong quarter of production with record cash flow generation from Wharf
- Demonstrated positive results from near-mine exploration

1. See non-GAAP reconciliation tables in the appendix to this presentation. For purposes of silver equivalence, a 60:1 ratio is assumed except where noted as average realized prices.

Drilling Begins on Greenfields Sites in USA and Mexico

Wyoming - South Dakota
Mineral Hill trenching and drilling expected in late 2017

Great Basin, Nevada and Utah
3Q 2016 drilling at Quito Project; expected drilling at Klondyke in 4Q 2016 and Arabia and Storm projects in 1Q 2017. New projects under review in USA and Canada.

North-Central Mexico
Todos Los Santos drilling expected to begin in November 2016; Mackena drilling planned for 2017. Several new projects under review.

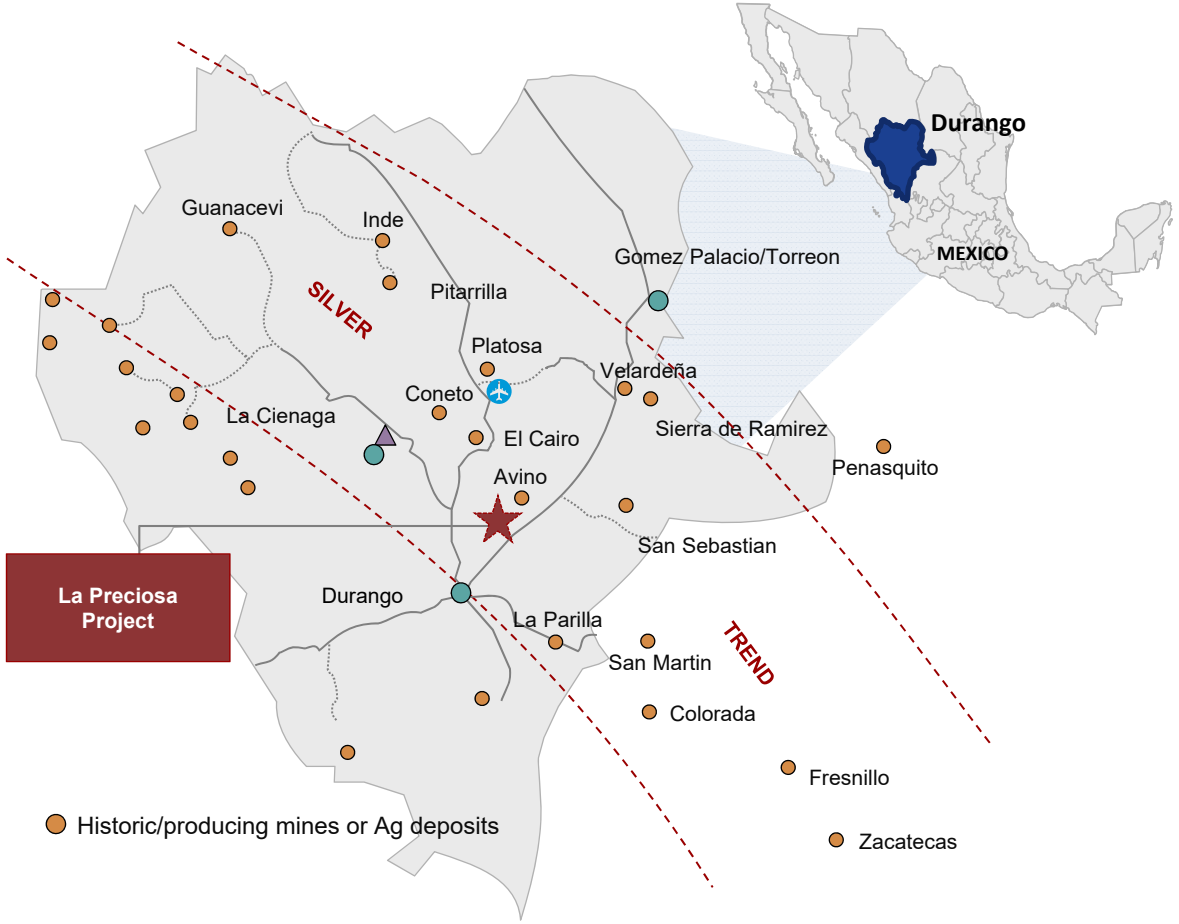

La Preciosa: Update and Next Steps

Located in the heart of Mexico's prolific Sierra Madre Mineral Belt

- Updated geologic model developed over past year
- Updated resource model underway
- $3 million confirmation drilling program expected to take place in 1H 2017
- Subject to drill results, new PEA expected to be completed in 2017

Pursuing lower capex, higher grade and lower tonnage development and operating plan

Looking ahead…

- Expected completion of $200M ATM and further debt reductions in 4Q 2016
- Continued ramp-up of Independencia during 4Q 2016 and throughout 2017
- Further development of Jualin with initial reserve included in year-end 2016 reserve statement and initial production anticipated in 2H 2017
- Construction of Rochester's Stage IV leach pad expansion expected to be complete in mid-2017
- Update on alternative development and operating plan for La Preciosa
- Expanded exploration program to prioritize near-mine exploration with high potential ROI
