COEUR MINING®
We pursue a higher standard

NYSE: **CDE**

Cautionary Statements

This presentation contains forward-looking statements within the meaning of securities legislation in the United States and Canada, including statements involving company strategies, expectations regarding environmental, social and governance ("ESG") initiatives, production, costs, exploration efforts, cash flow, margins, timing of filing of technical reports, impact of U.S. tax reform, and operations at the Palmarejo, Rochester, Kensington, Wharf and Silvertip mines. Such forward-looking statements involve known and unknown risks, uncertainties, and other factors which may cause Coeur's actual results, performance, or achievements to be materially different from any future results, performance, or achievements expressed or implied by the forward-looking statements. Such factors include, among others, the risk that the strategies and expectations described in this presentation are not achieved on a timely basis or at all, the risks and hazards inherent in the mining business (including risks inherent in developing large-scale mining projects, environmental hazards, industrial accidents, weather, or geologically related conditions), changes in the market prices of gold, silver, lead, and zinc, and a sustained lower price environment, the uncertainties inherent in Coeur's production, exploratory and developmental activities, including risks relating to permitting and regulatory delays, ground conditions, grade variability, any future labor disputes, or work stoppages, the uncertainties inherent in the estimation of gold and silver ore reserves, changes that could result from Coeur's future acquisition of new mining properties or businesses, the loss of any third-party smelter to which Coeur markets silver and gold, the effects of environmental and other governmental regulations, the risks inherent in the ownership or operation of or investment in mining properties or businesses in foreign countries, Coeur's ability to raise additional financing necessary to conduct its business, make payments or refinance its debt as well as other uncertainties and risk factors set out in filings made from time to time with the United States Securities and Exchange Commission, and the Canadian securities regulators, including, without limitation, Coeur's most recent report on Forms 10-K and Form 10-Q Actual results, developments, and timetables could vary significantly from the estimates presented. Readers are cautioned not to put undue reliance on forward looking statements. Coeur disclaims any intent or obligation to update publicly such forward-looking statements, whether as a result of new information, future events, or otherwise. Additionally, Coeur undertakes no obligation to comment on analyses, expectations, or statements made by third parties in respect of Coeur, its financial or operating results or its securities.

Christopher Pascoe, Coeur's Director, Technical Services and a qualified person under Canadian National Instrument 43-101, reviewed and approved the scientific and technical information concerning Coeur's mineral projects in this presentation. Mineral resources are in addition to mineral reserves and do not have demonstrated economic viability. Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of mineral reserves, and there is no certainty that the inferred mineral resources will be realized. For a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources, as well as data verification procedures and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors, Canadian investors should see the Technical Reports for each of Coeur's properties as filed (including the Technical Report for the Rochester mine, including the preliminary economic analysis described in this presentation (the "PEA")) on SEDAR at www.sedar.com.

The PEA for the re-scoped mine plan at the Rochester mine described in this presentation is preliminary in nature and includes inferred mineral resources, and does not have as high a level of certainty as a plan based solely on proven and probable reserves. Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of mineral reserves and there is no certainty that the results from the preliminary economic assessment will be realized.

Cautionary Note to U.S. Investors - The United States Securities and Exchange Commission permits U.S. mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We may use certain terms in public disclosures, such as "measured," "indicated," "inferred" and "resources," that are recognized by Canadian regulations, but that SEC guidelines generally prohibit U.S. registered companies from including in their filings with the SEC. U.S. investors are urged to consider closely the disclosure in our Form 10-K which may be secured from us, or from the SEC's website at http://www.sec.gov.

Non-U.S. GAAP Measures - We supplement the reporting of our financial information determined under United States generally accepted accounting principles (U.S. GAAP) with certain non-U.S. GAAP financial measures, including adjusted net income (loss), adjusted EBITDA, total debt- and net debt-to-LTM adjusted EBITDA, adjusted EBITDA margin, adjusted costs applicable to sales per silver equivalent ounce, and adjusted all-in sustaining costs. We believe that these adjusted measures provide meaningful information to assist management, investors and analysts in understanding our financial results and assessing our prospects for future performance. We believe these adjusted financial measures are important indicators of our recurring operations because they exclude items that may not be indicative of, or are unrelated to our core operating results, and provide a better baseline for analyzing trends in our underlying businesses. We believe adjusted net income (loss), adjusted EBITDA, adjusted EBITDA margin, total debt- and net debt-to-LTM adjusted EBITDA, adjusted costs applicable to sales per silver equivalent ounce, and adjusted all-in sustaining costs are important measures in assessing the Company's overall financial performance.

Silver and gold equivalence assumes a 60:1 silver-to-gold ratio, except where noted as average spot prices. Average spot prices and silver-to-gold ratios are included in the appendix to this presentation. Silver and lead equivalence assumes a 0.05:1 silver-to-lead ratio. Silver and zinc equivalence assumes a 0.06:1 silver-to-zinc ratio.

Cautionary Statements (cont.)

Cautionary Statements Regarding Company Outlook

In connection with Coeur's regular planning process, Coeur's management prepared certain unaudited financial and operating projections, some portions of which are included in this presentation. These projections were not prepared with a view toward complying with published guidelines of the SEC, the guidelines established by the American Institute of Certified Public Accountants with respect to prospective financial information or GAAP, but, in the view of Coeur's management, were prepared on a reasonable basis, reflect the best then-available estimates and judgments, and present, to the best of management's knowledge and belief at the time, the expected course of action and the expected future financial and operating performance of Coeur. However, this information is not fact and should not be relied upon as necessarily indicative of actual future results, and readers of this presentation are cautioned not to place undue reliance on these projections.

These projections have been prepared by, and are the responsibility of, Coeur's management. Neither Coeur's independent auditors, nor any other independent accountants, have compiled, examined, or performed any procedures with respect to these projections, nor have they expressed any opinion or any other form of assurance on such information or its achievability, and assume no responsibility for, and disclaim any association with, such projections.

The assumptions and estimates underlying these projections are inherently uncertain and, although considered reasonable by the management of Coeur as of the date of their preparation, are subject to a wide variety of significant business, economic, and competitive risks and uncertainties that could cause actual results to differ materially from those contained in these projections, including, among others, risks and uncertainties relating to Coeur's businesses (including its ability to achieve strategic goals, objectives and targets over applicable periods), industry performance, the regulatory environment, general business and economic conditions and other factors described in the "Risk Factors" section of Coeur's most recent reports on Form 10-K and Form 10-Q and its other periodic reports filed with the SEC. Accordingly, there can be no assurance that these projections are indicative of the future performance of Coeur or that actual results will not differ materially from those presented. Inclusion of these projections in this presentation should not be regarded as a representation by any person that the results contained in these projections will be achieved.

Coeur does not intend to update or otherwise revise these projections to reflect circumstances existing since their preparation or to reflect the occurrence of unanticipated events, even in the event that any or all of the underlying assumptions are shown to be in error. Furthermore, Coeur does not intend to update or revise these projections to reflect changes in general economic or industry conditions.

Who We Are

Based in the U.S., Coeur Mining is one of the world's largest primary silver producers, a significant producer of gold, and has repositioned its portfolio with a focus on sustainable, high-quality cash flow

$1.5B *market cap[1]*

$24M *90-day ADTV[1]*

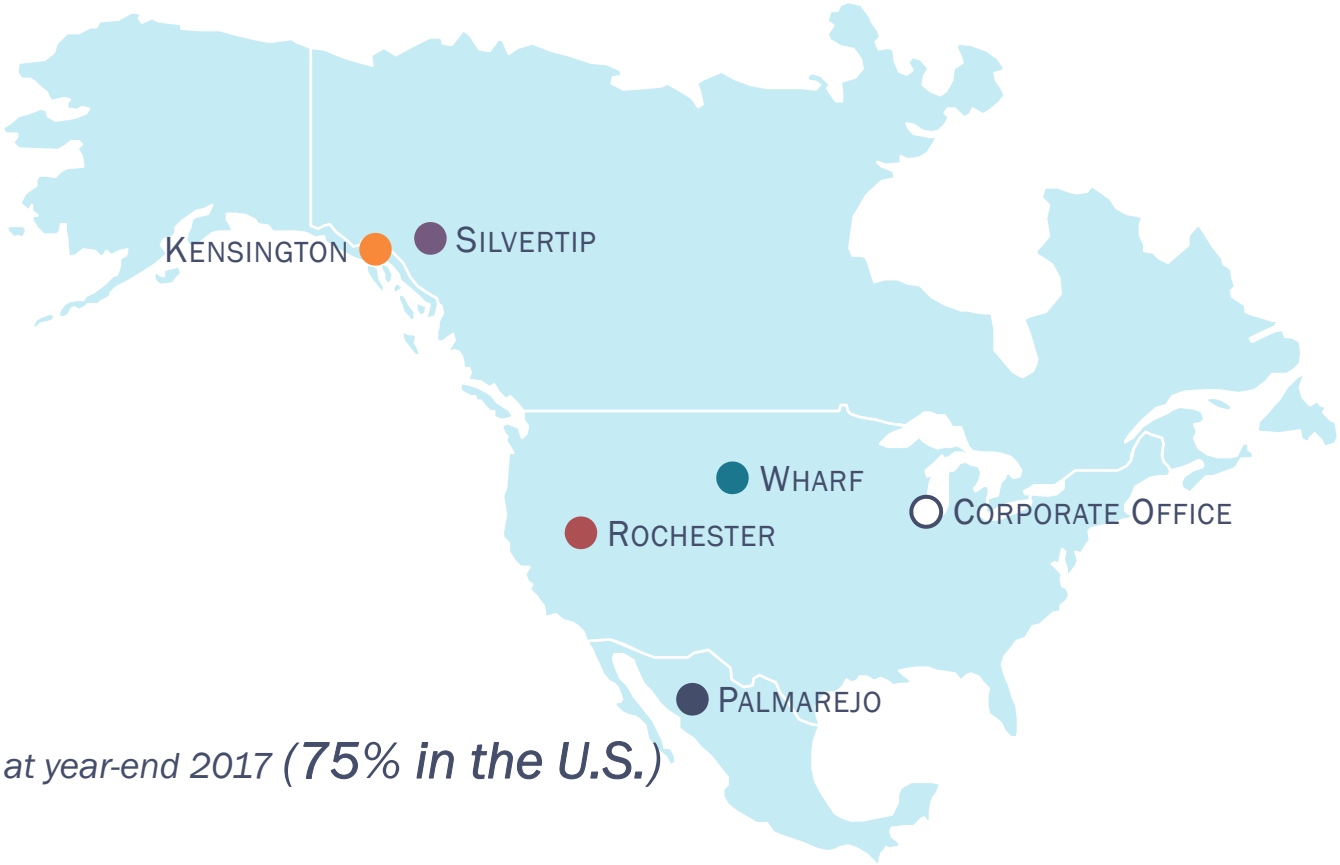

$233M *of liquidity[2]*

2,000 *employees*

5 *operating mines*

342M *AgEqOz[3] reserves at year-end 2017 (75% in the U.S.)*

36.0 - 39.4M *AgEqOz[3] 2018E[4] production*

Note: See slides in appendix for additional information related to mineral reserves and resources. Canadian investors should refer to the latest technical reports for Coeur's mines on file at www.sedar.com.
(1) Based on a closing stock price of $8.06 as of May 31, 2018.
(2) As of March 31, 2018. Includes $160M of cash and cash equivalents and $73M of available revolver.
(3) Silver equivalence assumes silver-to-gold, -lead and -zinc ratios of 60:1, 0.05:1 and 0.06:1, respectively, except where noted as average spot prices.
(4) 2018 production guidance as published by Coeur on April 25, 2018.

Our Strategic Objectives

Become "Leader of the Pack"

- Tremendous progress over the last five years has made Coeur an attractive precious metals company
- Quality growth, strong returns, operational consistency and portfolio balance will continue to elevate Coeur's competitive position

Establish Low Cost Production in Top Jurisdictions

- North America-focused, U.S.-centric portfolio
- Relentless portfolio optimization effort
- Targeting bottom two cost quartiles

Bolster Development Pipeline

- Upgrading asset quality central to returns-driven growth strategy
- Significant internal growth potential complemented by investments in external exploration and development projects

Maintain Balance Sheet Flexibility

- Strong cash balance and credit facility offset inherent metal price volatility
- Extended senior note maturity contributes to balance sheet stability
- Seek to further de-lever using expected FCF[1]

(1) Free cash flow is defined as cash flow from operating activities less capital expenditures and gold production royalty payments. See applicable reconciliation tables in the appendix to this presentation.

Transformation Driven by High-Quality Growth

Organic Initiatives

- Organizational overhaul
- Investments to increase production scale and/or grade at Palmarejo, Rochester and Kensington
- Process optimization and technology investments across portfolio
- Near-mine exploration focus
- Revamped balance sheet providing strength and flexibility

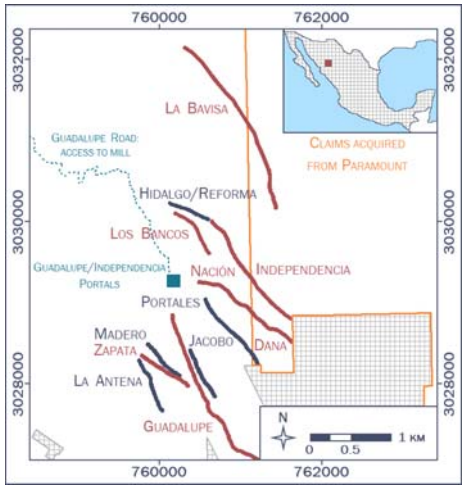

Complementary Portfolio Enhancements

- Acquired the Wharf gold mine from Goldcorp in 2015
- Acquired Paramount Gold & Silver Corp[1] in 2015
- Sold several non-core assets since 2016 for total consideration of ~$65M
- Acquired the high-grade Silvertip silver-zinc-lead mine in British Columbia in 2017
- Sold the Company's wholly-owned Bolivian subsidiary and San Bartolomé in 2018
- Investments in select exploration-stage growth opportunities

(1) Owner of land package adjacent to Palmarejo mine in Mexico.

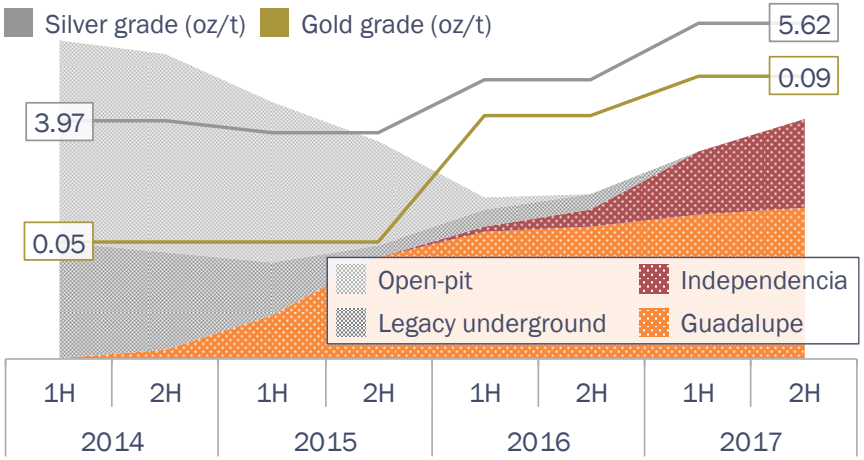

Palmarejo: A Confluence of Strategic Successes

2017 represented the culmination of synergistic M&A, development of higher-margin production, and high-return exploration

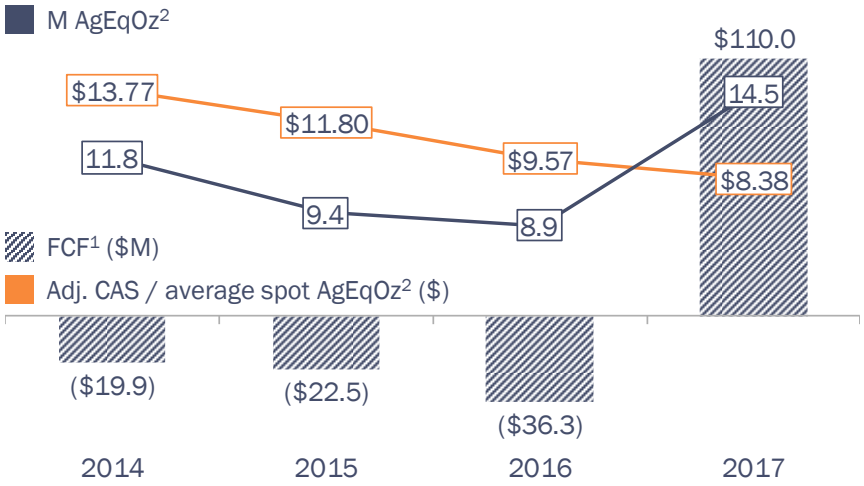

- 2014: Renegotiated FNV gold stream agreement (took effect in 2016)
- 2015: Acquired adjacent, royalty-free land package
- 2016: Transitioned to higher-grade, underground-only operations
- 2017: Achieved mining rate target; accelerated results-based drill programs

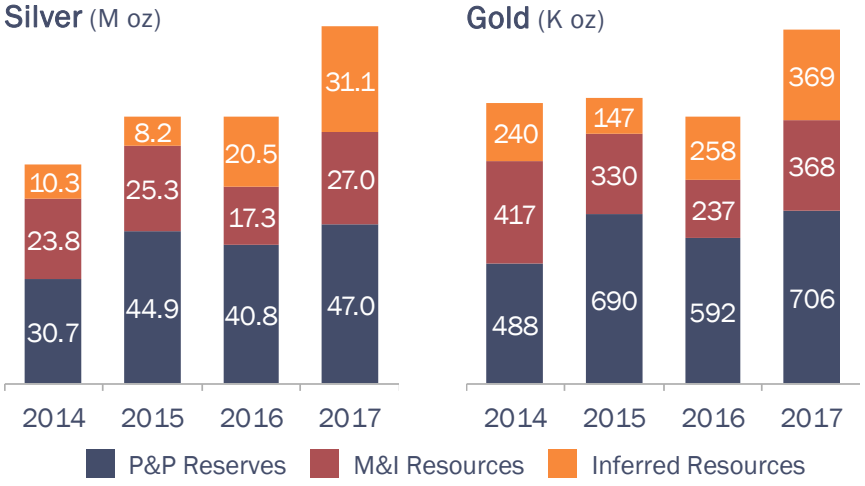

Underground Transition and Grades

Production, LTM FCF[1] and Unit Costs

Reserves and Resources

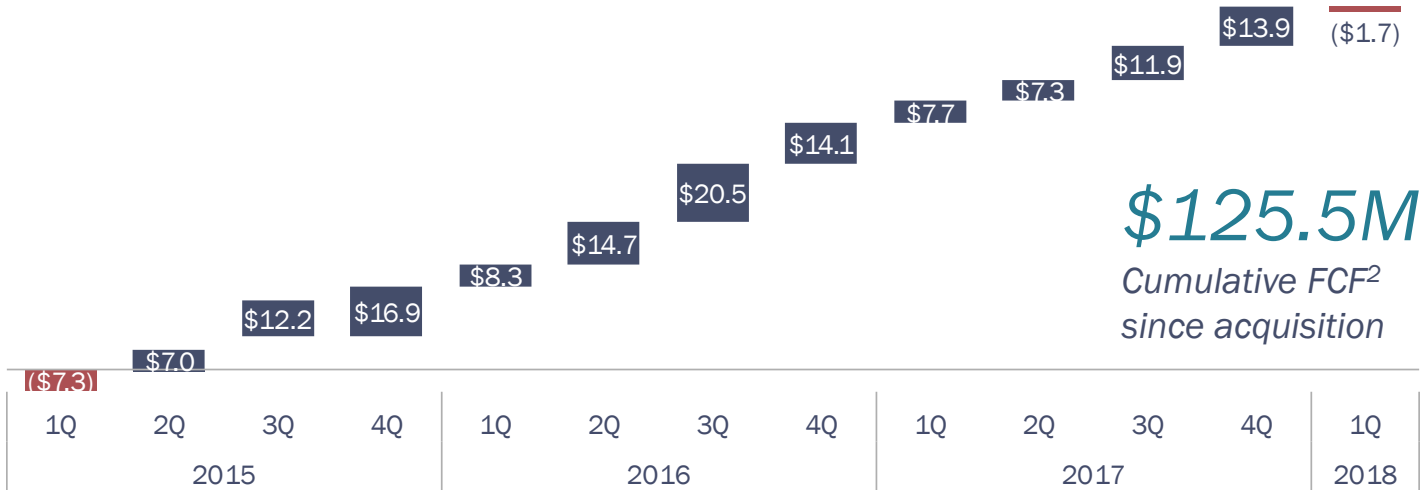

Note: See slides in appendix for additional information related to mineral reserves and resources. Canadian investors should refer to the applicable technical report on file at www.sedar.com.
(1) Free cash flow is defined as cash flow from operating activities less capital expenditures and gold production royalty payments. See reconciliation tables in the appendix to this presentation.
(2) Silver equivalence assumes silver-to-gold, -lead and -zinc ratios of 60:1, 0.05:1 and 0.06:1, respectively, except where noted as average spot prices. Historical average spot prices and equivalences are included in the appendix to this presentation. See applicable non-GAAP reconciliation tables in the appendix to this presentation.

Wharf: A Case Study for Successful M&A

Acquired in early 2015, Wharf has already generated a return on investment of approximately 20%[1], driven by operational improvements, targeted investments in exploration, and several technical and modeling enhancements

Free Cash Flow[2]

($M)

$125.5M

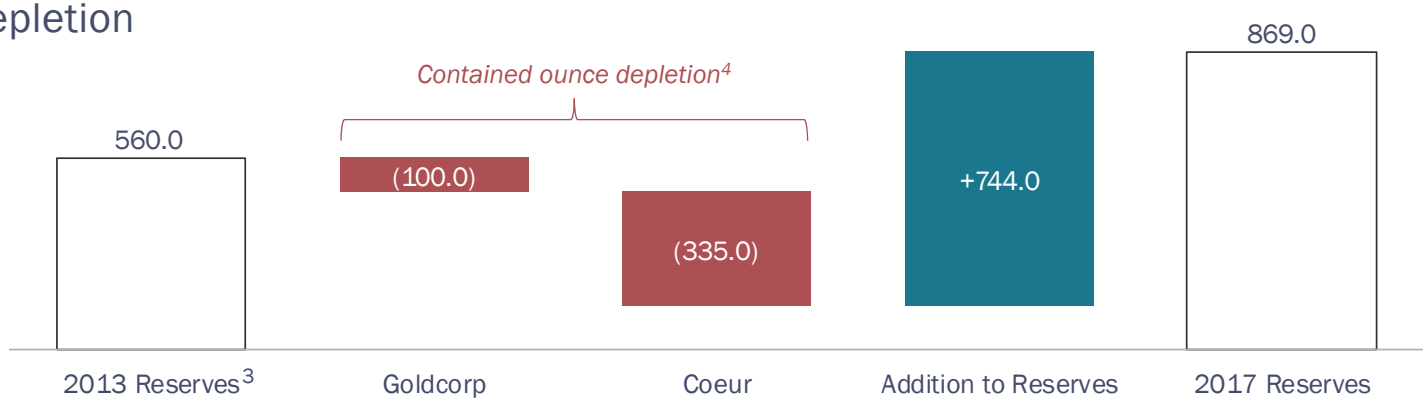

Cumulative FCF[2] since acquisition

Gold Reserves and Depletion

(K oz)

+55%

Increase in year-end reserves since last reported figure prior to Coeur's acquisition

Note: See slides in appendix for additional information related to mineral reserves and resources. Canadian investors should refer to the technical report for Wharf on file at www.sedar.com.

(1) Return on investment determined based on final acquisition cost of $99.5M in February 2015 and free cash flows of $28.8M, $57.6M and $40.8M in 2015, 2016 and 2017, respectively. Mid-period convention was used in calculating the return on investment.

(2) Free cash flow is defined as cash flow from operating activities less capital expenditures and gold production royalty payments. See applicable reconciliation tables in the appendix to this presentation.

(3) Mineral reserves estimate for the year ended December 31, 2013 as reported by Goldcorp, Inc. See relevant tables in the appendix to this presentation.

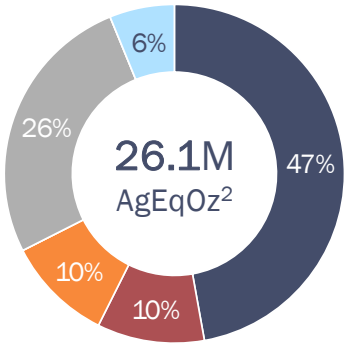

(4) Estimated depletion of contained mineral reserves based on production as reported by Goldcorp, Inc. in 2014 and 2015 and Coeur since its acquisition through 2017 and assumes an 80% metallurgical recovery rate.

Operating Cash Flow Per Share[4] and FCF[1]

(1) Free cash flow is defined as cash flow from operating activities less capital expenditures and gold production royalty payments. See applicable reconciliation tables in the appendix to this presentation.
(2) Silver equivalence assumes silver-to-gold, -lead and -zinc ratios of 60:1, 0.05:1 and 0.06:1, respectively, except where noted as average spot prices. Spot silver equivalence for 2018 guidance purposes assumes silver-to-gold, -lead and -zinc ratios of 75:1, 0.07:1 and 0.09:1, respectively. Historical average spot prices and equivalences are included in the appendix to this presentation.
(3) Midpoint of production, cost, and capital expenditures guidance as published by Coeur on April 25, 2018.
(4) See applicable non-GAAP reconciliation tables in the appendix to this presentation.
(5) Sustaining capital expenditures exclude capital leases.

Re-Scoped Mine Plan[1] Doubles Rochester's NAV

A re-scoped mine plan and PEA incorporates the positive economic impact expected from the potential addition of HPGR technology to Rochester's crushing circuit beginning in early 2019

Highlights of Expected HPGR Impact

- Increases recoveries from 61% over 20 years to 70% in just over two years
- Decrease in strip ratio by more than half from 0.8:1 to less than 0.4:1
- Lower crusher maintenance and power costs
- Marked increase in anticipated pre-tax cash flow margin from 19% to 31%

	2017 TR	2018 PEA
Mine Life	2031	2038
Silver Recovery	61%	70%
Overall Silver Recovery	20 years	2 years
Strip Ratio	0.8:1	0.4:1
Operating Cash Flow ($M)	$831	$1,306
Capital Expenditures ($M)	$387	$351
Average Annual Pre-Tax Cash Flow ($M)	$33	$48
$NAV_{5\%}$ ($M)	$280	$609

(1) For additional information regarding Rochester's re-scoped mine plan and PEA, please refer to slides 42-44. Canadian investors should refer to the applicable Technical Reports for Rochester on file at www.sedar.com.

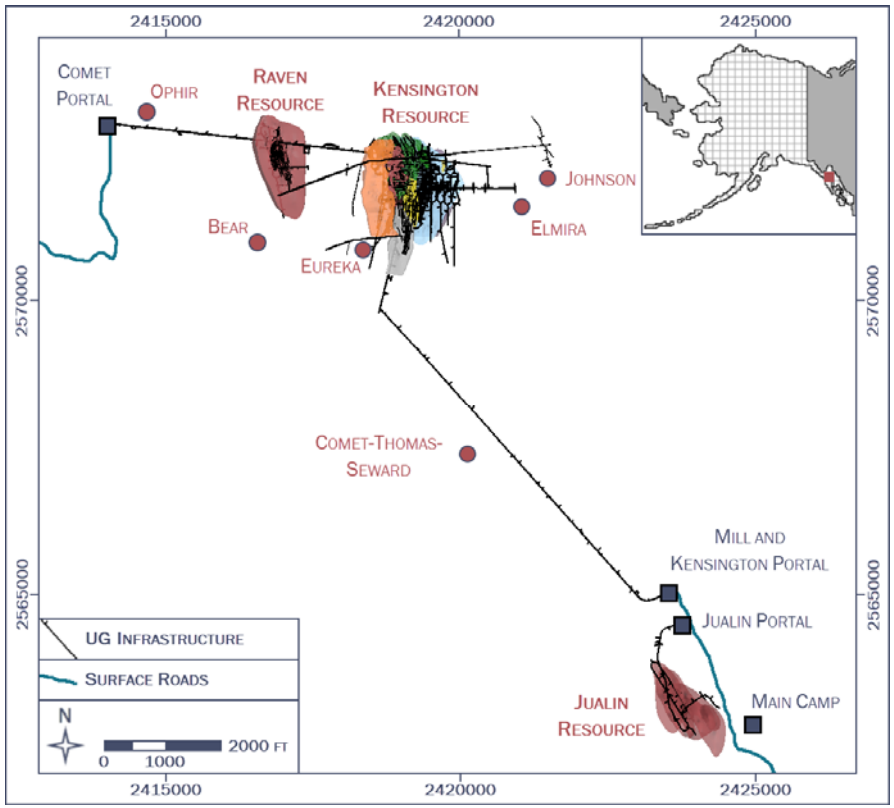

Improved Economics Expected at Kensington

Kensington's updated technical report demonstrates the strong potential impact of a relatively small amount of high-grade mill feed on overall mine economics

Highlights of Kensington Technical Report

- 13% increase in expected average annual payable production to approximately 130,000 ounces of gold from 2019 through 2021
- 17% increase in anticipated life-of-mine head grade of 0.21 oz/t compared to the 2017 average head grade of 0.18 oz/t
- An extension of mine life from 2020 to 2022 based on current reserves
- 84% increase in expected life-of-mine pre-tax cash flows to $90 million compared to $49 million in Kensington's 2014 technical report
- Additional 713,000 AuOz of Measured and Indicated resources and 305,000 AuOz of Inferred resources convey upside potential

Continued Exploration Potential

(1) See slides in appendix for additional information related to mineral reserves and resources. Canadian investors should refer to the Technical Report for Kensington dated April 25, 2018 on file at www.sedar.com.

Significant Margin and Cash Flow Growth Expected

Over the near- to medium-term, strong organic opportunities are expected to drive significant margin and cash flow growth

	2017		Target / Potential
Silvertip[1] *Ramp-up to steady-state production*	0 tpd mining rate	⇨	1,000 tpd
	0 avg. annual AgEqOz[1] production	⇨	10M AgEqOz[1]
	$0 avg. annual EBITDA	⇨	$70M
Rochester[2] *HPGR + new crushing facility*	19% pre-tax cash flow margin	⇨	31%
	61% Ag recovery (20 years)	⇨	70% (2 years)
	$280M $NAV_{5\%}$	⇨	$609M $NAV_{5\%}$
Kensington[3] *High-grade ore sources*	115K AuOz	⇨	130K AuOz
	Avg. head grade of 0.18 oz/t	⇨	0.21 oz/t
	Adj. CAS of $920 / payable AuOz[4]	⇨	$855 / payable AuOz
	Pre-tax cash flow of $1.4M	⇨	$30M
Palmarejo *Expanded exploration and operations*	4,100 tpd mining rate	⇨	6,000-6,500 tpd

(1) Target/Potential information based on Silvertip's initial mine plan disclosed on September 11, 2017. For additional information regarding Silvertip's initial mine plan, please refer to slides 36-37. For purposes of silver equivalence, metals prices of US$1,250/oz gold, US$17.50/oz silver, US$1.13/lb lead, and US$1.40/lb zinc were used.

(2) 2017 information based on Rochester's 2017 Technical Report effective December 31, 2016. Target/Potential information based on Rochester's Technical Report and Preliminary Economic Assessment ("PEA") effective December 31, 2017 and filed March 5, 2018. The PEA for the re-scoped mine plan is preliminary in nature and includes inferred mineral resources, and does not have as high a level of certainty as a plan based solely on proven and probable reserves. Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of mineral reserves and there is no certainty that the results from the preliminary economic assessment will be realized. See slides 42-44 for additional information. Canadian investors should refer to the applicable Technical Report for Rochester on file at www.sedar.com.

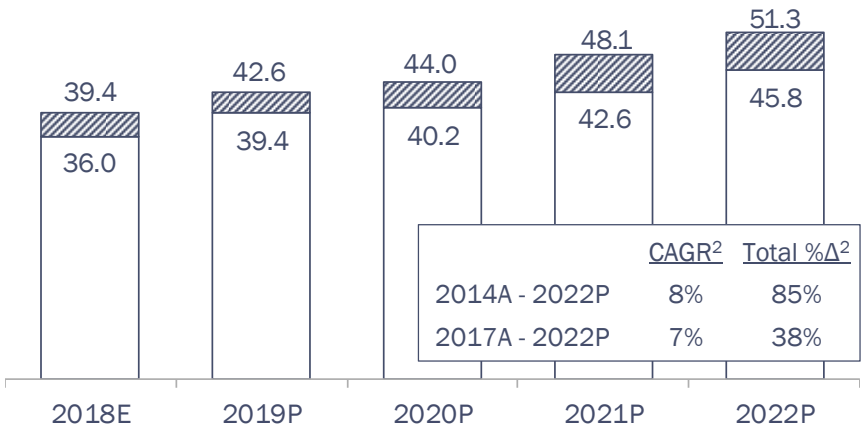

(3) 2017 information reflects actual 2017 results for Kensington. Target/Potential information based on Kensington's Technical Report effective December 31, 2017 and filed April 25, 2018. Canadian investors should refer to the Technical Report for Kensington on file at www.sedar.com.

(4) See applicable non-GAAP reconciliation tables in the appendix to this presentation.

Outlook Conveys Quality Growth

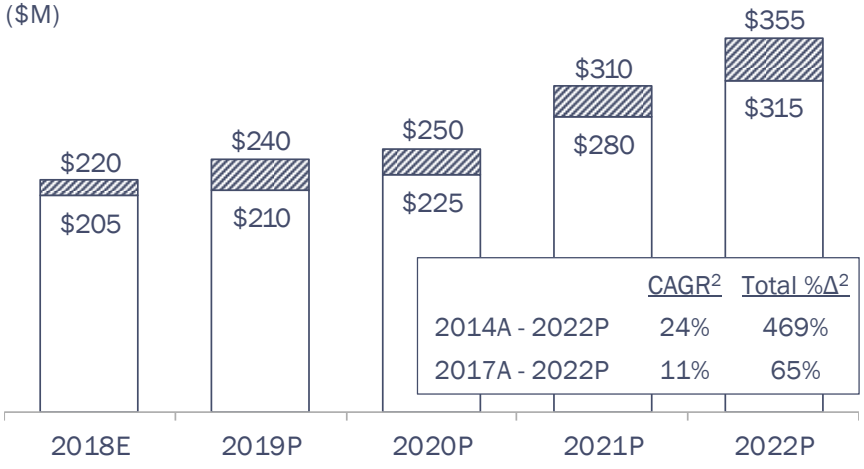

Silver Equivalent Production

(M oz)

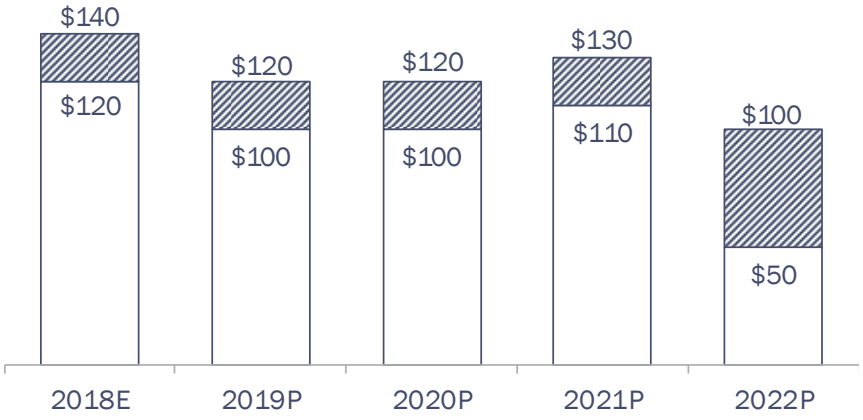

Adjusted EBITDA[1]

($M)

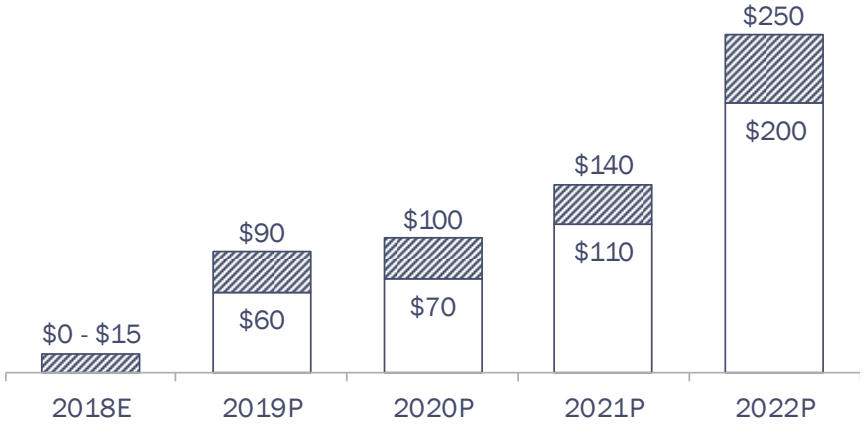

Capital Expenditures

($M)

Free Cash Flow[1]

($M)

Note: 2018 production and capital expenditure guidance as published by Coeur on April 25, 2018. Assumptions used in calculating outlook figures include metal prices of $1,350/oz Au, $17.50/oz Ag, $1.40/lb Zn and $1.13/lb Pb. Foreign exchange rate assumptions include USD:MXN of 19.00 and USD:CAD of 0.82. Assumes between 25-35% of capital expenditures are financed through capital leases depending on mine. Assumes 50% of free cash flows in 2019-2022 is used to reduce debt.

(1) Adjusted EBITDA and free cash flow are non-GAAP financial measures. Free cash flow is defined as cash flow from operating activities less capital expenditures.

(2) Based on midpoint of outlook figures.

Balance Sheet Outlook

Strong growth in EBITDA[1] and FCF[1] is expected to enable deleveraging, with total debt-to-EBITDA[1] expected to be approximately 1.0x at the end of 2022

Assumptions

- Metal prices of $1350/oz Au, $17.50/oz Ag, $1.40/lb Zn and $1.13/lb Pb
- Foreign exchange rate assumptions of 19.00 USD:MXN and 0.82 USD:CAD
- Between 25-35% of capital expenditures are financed through capital leases depending on mine
- 50% of free cash flow[1] in 2019-2022 is used to reduce debt

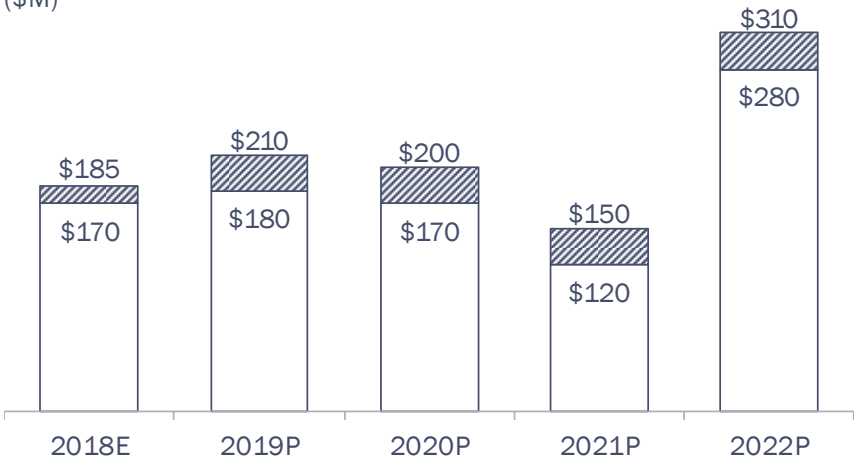

Total Debt

($M)

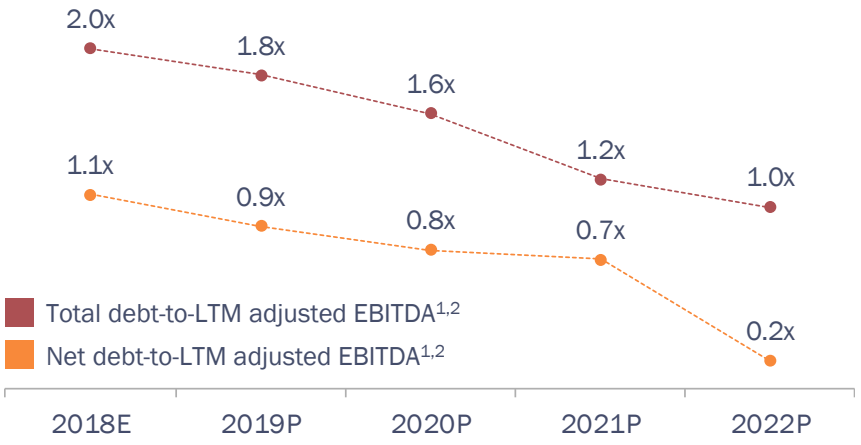

Cash and Cash Equivalents

($M)

Leverage Ratios[1,2]

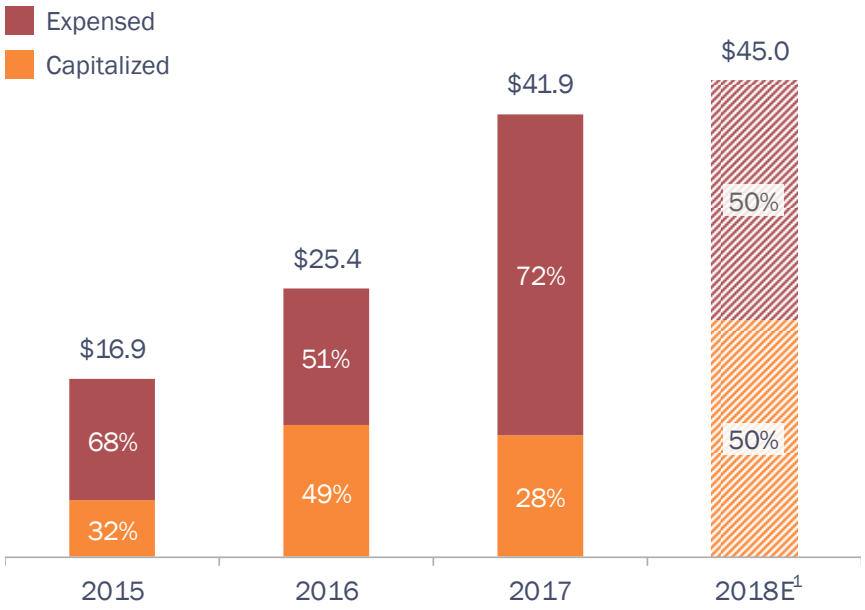

(1) Adjusted EBITDA, free cash flow, and leverage ratios are non-GAAP financial measures. Free cash flow is defined as cash flow from operating activities less capital expenditures.
(2) Based on midpoint of outlook figures.

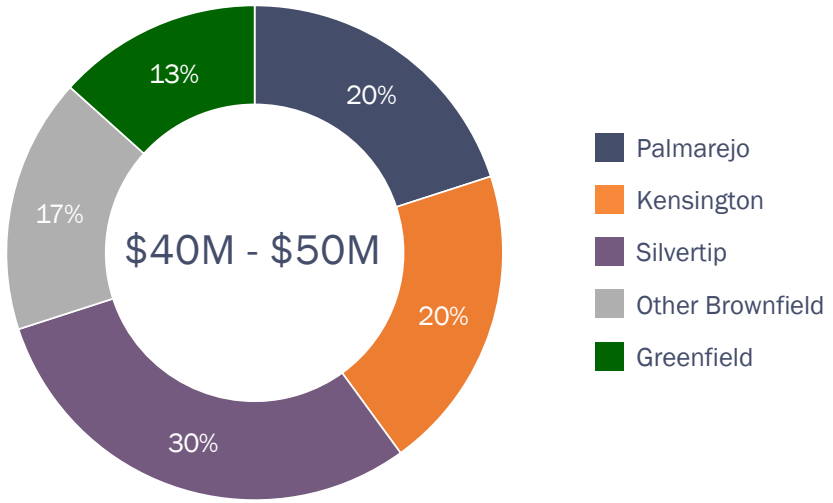

Disciplined, Near-Mine Exploration…

Coeur has accelerated its exploration activity as a result of encouraging drill results, particularly at Palmarejo and Kensington. Aggressive drilling efforts commenced at Silvertip during 4Q

Total Exploration Investment
($M)

2018E[1] Exploration Investment By Site

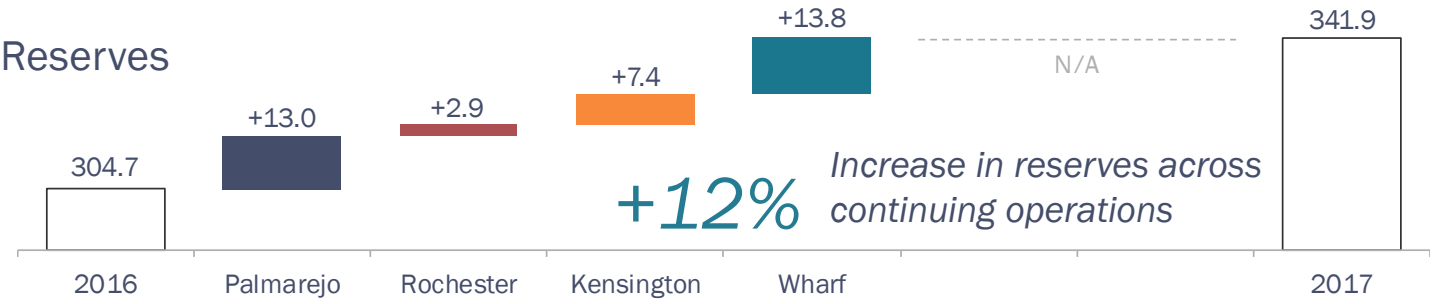

(1) Midpoint of cost guidance as published by Coeur on April 25, 2018.

...Generating Significant Reserve & Resource Additions

Each of the Company's operations has shown year-over-year growth in reserves. Companywide measured and indicated resources grew 41% and inferred resources expanded 40% year-over-year

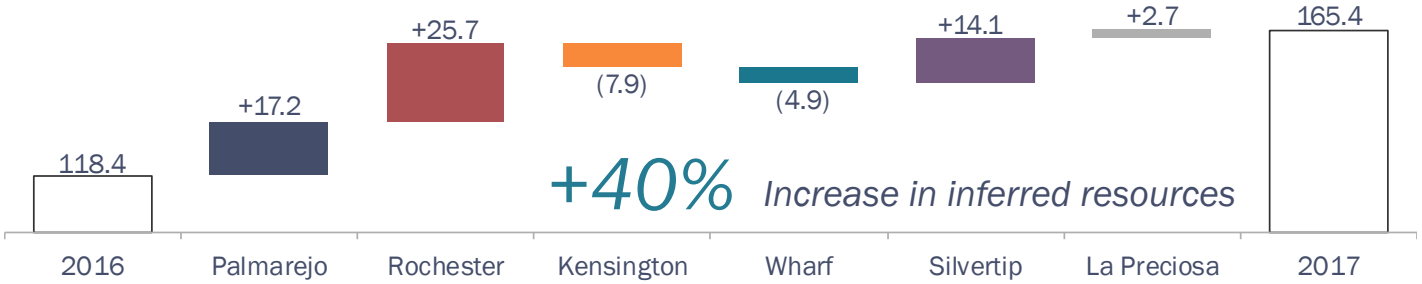

Proven and Probable Reserves
(M AgEqOz[1])

Measured & Indicated Resources
(M AgEqOz[1])

Inferred Resources
(M AgEqOz[1])

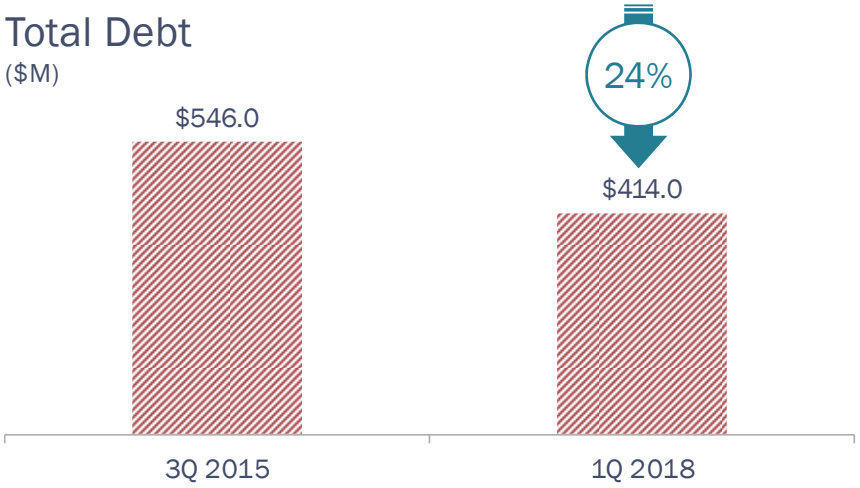

Note: See slides in appendix for additional information related to mineral reserves and resources. Canadian investors should refer to the latest technical reports on file for each of Coeur's mines available at www.sedar.com.

(1) Silver equivalence assumes silver-to-gold, -lead and -zinc ratios of 60:1, 0.05:1 and 0.06:1, respectively, except where noted as average spot prices.

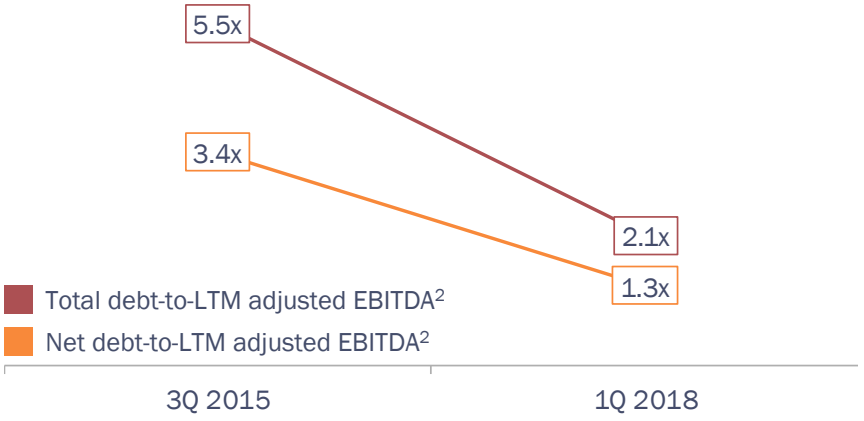

Strong and Flexible Balance Sheet

Coeur successfully refinanced its 7.875% senior notes due 2021 with 5.875% senior notes due 2024 and established a $200 million revolver

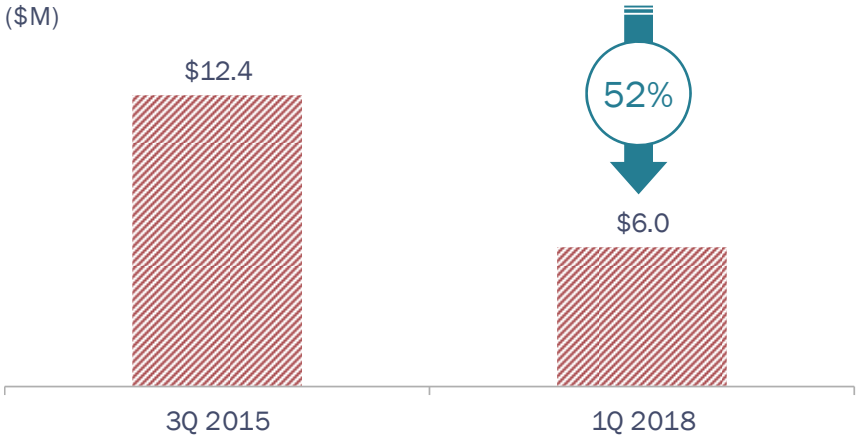

Total Debt
($M)

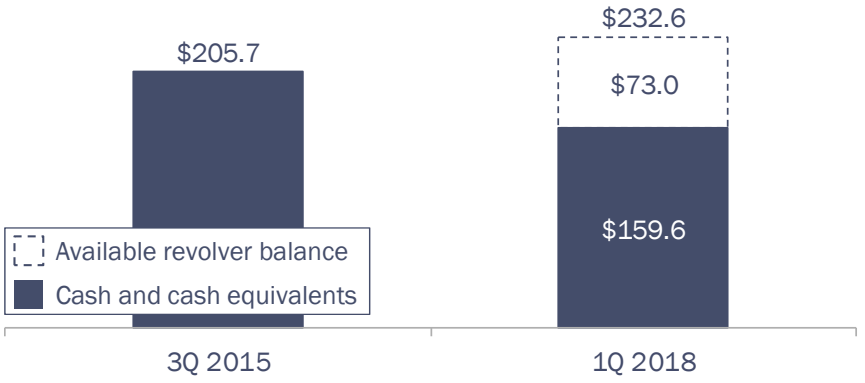

Leverage Ratios[1]

Quarterly Interest Expense[3]
($M)

Significant Liquidity
($M)

(1) Total and net leverage reflect total debt- and net debt-to-LTM adjusted EBITDA, respectively, for continuing operations in the period noted. See non-GAAP reconciliation tables in the appendix to this presentation.
(2) See non-GAAP reconciliation tables in the appendix to this presentation.
(3) Net of capitalized interest.

Continued Improvement in Credit Ratings

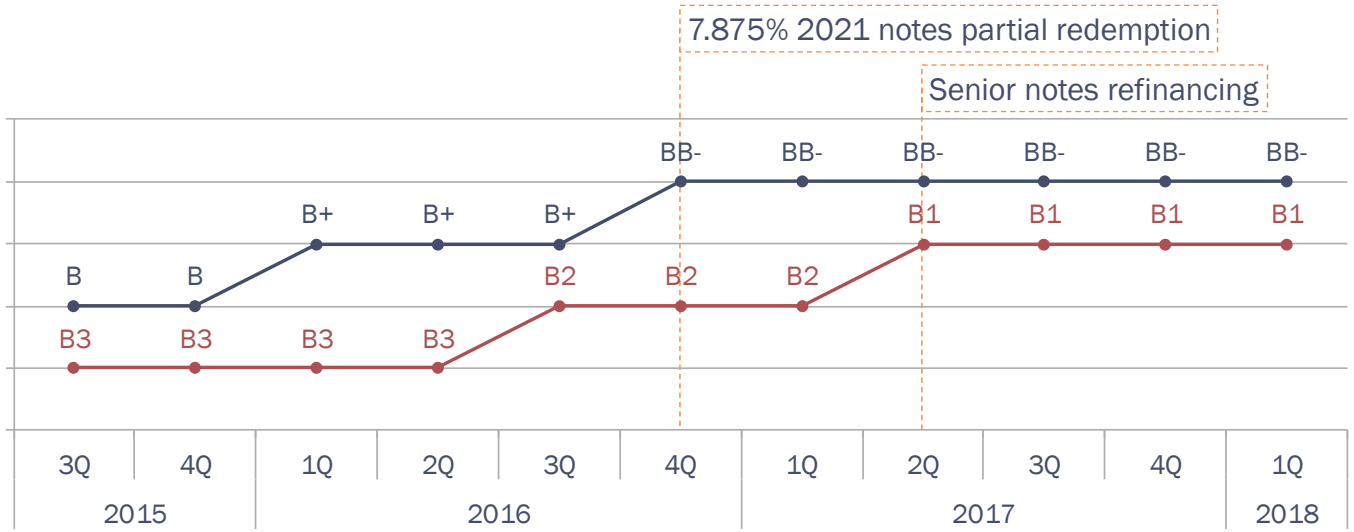

- Since 2015, Coeur's credit ratings have improved multiple notches
- The Company remains focused on preserving its peer-leading credit profile
- Key credit considerations include:
  - Company size (production)
  - Operational diversity
  - Leverage
  - Cost position (margins)
  - Geopolitical profile

$M	March 31, 2018
5.875% senior notes due 2024	245.3
Revolving credit facility	115.0
Capital lease obligations	53.7
TOTAL DEBT	**$414.0**
Cash and cash equivalents	$159.6
Available revolver balance	73.0
TOTAL LIQUIDITY	**$232.6**
LEVERAGE RATIOS[1]	
TTM adjusted EBITDA ($M)	$198.4
Total debt / TTM adjusted EBITDA	2.1x
Net debt / TTM adjusted EBITDA	1.3x

S&P Global Ratings MOODY'S

(1) Total and net leverage reflect total debt- and net debt-to-LTM adjusted EBITDA, respectively, for continuing operations in the period noted. See non-GAAP reconciliation tables in the appendix to this presentation.

A Long History of Corporate Responsibility

"We have been doing ESG long before people were talking about ESG."
– Mitchell J. Krebs

Looking Ahead

- Silvertip
  - Commercial production expected to be achieved by mid-year
  - Milling rates anticipated to climb to 1,000 tonnes (1,100 tons) per day in 1Q 2019
  - Updated NI 43-101 Technical Report anticipated during 2H
- Rochester
  - De-commissioning of one crusher and installation of first HPGR unit expected to begin in 4Q
- Kensington
  - Dewatering of Jualin expected to be completed in 3Q with production ramping-up through year-end

Coeur Mining Is Uniquely Positioned

- ✓ U.S.-listed, incorporated and based
- ✓ Stockholder-friendly corporate governance policies
- ✓ Balanced North American, U.S.-centric portfolio
- ✓ Attractive size and scale
- ✓ Platform and capabilities for quality growth
- ✓ Strong and flexible balance sheet
- ✓ Disciplined approach to capital allocation

2018 Guidance[1]

2018 Production Outlook

	Silver (K oz)	Gold (oz)	Zinc (K lbs)	Lead (K lbs)	AgEqOz[2] (K oz)
Palmarejo	6,500 – 7,100	110,000 – 115,000	-	-	13,100 – 14,000
Rochester	4,200 – 4,700	45,000 – 50,000	-	-	6,900 – 7,700

PROTECT		TRIFR[1] % Reduction (with potential modifier for top/bottom quartile performance vs. top tier U.S. metals companies)	AIP[2] 15%
		% Reduction in Significant Spills	
DEVELOP		Three-Year Growth in Reserves and Measured & Indicated Resources/Share	PSU[3] 50%
DELIVER		All-in Sustaining Costs Operating Cash Flow	AIP 60%
		Three-Year Growth in Operating Cash Flow/Share	PSU 50%
		Relative Total Stockholder Return	PSU Modifier +/- 25%
		Production	AIP 25%

(1) "TRIFR" means Total Reportable Injury Frequency Rate.
(2) "AIP" means the Company's annual incentive plan.
(3) "PSU" means performance share units.

Diverse Board Led by Independent Chair

- Nine out of ten Directors are independent (all except CEO); all four main committees comprised of independent directors only
- Two new directors appointed in February 2018 having skills and experiences that complement other directors
- Balance of newer and longer serving directors; no mandatory retirement age

Diversity of Director Experience

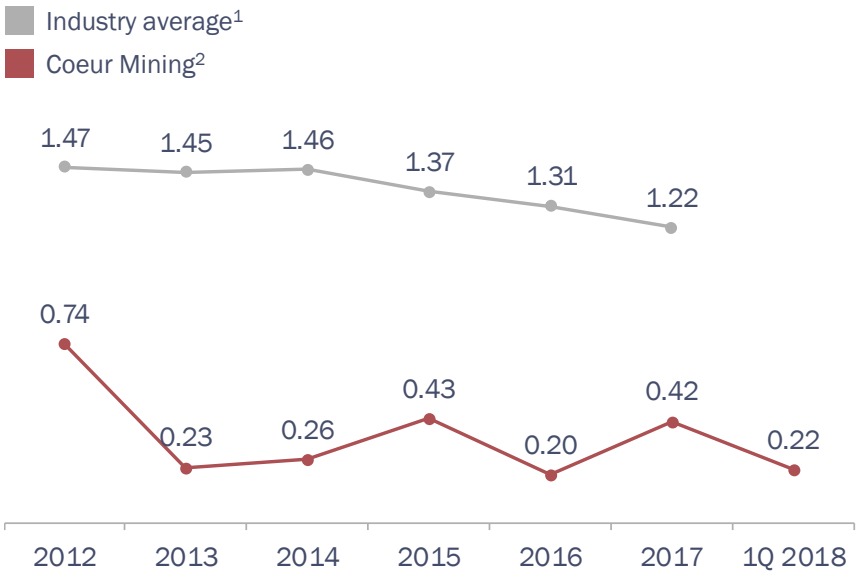

Appendix

Industry-Leading Safety Performance

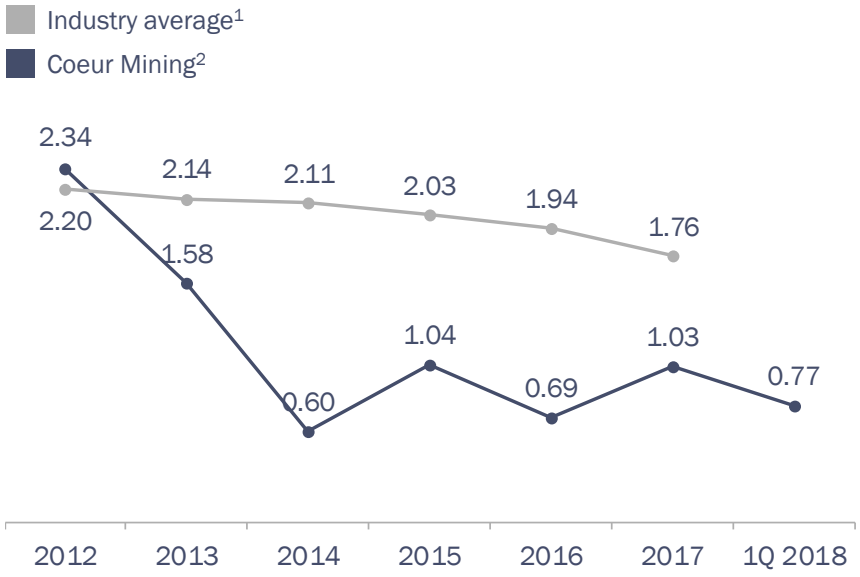

*In 2017, Coeur achieved the National Mining Association **CORE**Safety certification*

Since 2012, the Company's injury frequency rates are significantly below industry averages

Lost-Time Injury Frequency Rate

Total Reportable Injury Frequency Rate

(1) Source(s): U.S. Department of Labor Mine Safety and Health Administration: Metal and Nonmetal Mine Safety and Health. Injuries per 200,000 employee-hours worked.
(2) Includes both Coeur employees and contract workers.

Impact of Select U.S. Tax Reforms

Recent U.S. tax reform is not expected to meaningfully impact near-term cash flows. In the long-term, Coeur expects to benefit from these reforms

Lower statutory corporate tax rate	*Once U.S. NOLs are used, Coeur expects to benefit from a lower tax rate on future taxable income*
Interest deductibility cap of 30% of U.S. EBITDA (EBIT after 2021)	*Deduction limitation could result in higher taxable income and could influence future adjustments to capital structure*
NOL offset limited to 80% of net income; carryback eliminated	*Limitation on NOL offsets[1] will accelerate timing of becoming a cash tax payer*
Repeal of alternative minimum tax	*Potential monetization of approximately $1.5M of AMT credit carryforward in future years*
Transition to territorial system	*No impact to Coeur based on structure*

(1) Applies only to NOLs created after 2017.

Tax Rates by Jurisdiction

- As of year-end 2017, Coeur had U.S. NOLs of $370 million
- Statutory corporate tax rates by country
  - United States: 21%
  - Mexico: 30%
  - Canada: 27%
- Corporate income and mining taxes by jurisdiction
  - Nevada
    - Net Proceeds Tax is 5%
  - South Dakota
    - Severance Tax is 10% in addition to $8 per ounce of gold and 8% on royalty payments, which are accounted for above the line
  - Alaska
    - Mining License Tax is 7%
  - Mexico
    - “EBITDA” tax is 7.5%
    - Mining royalty on precious metals revenue of 0.5%
  - British Columbia
    - Mineral Tax is 13%

Building on 2017's Exploration Success

2017 exploration program highlights:

- $41.9M of total exploration investment
  - $30.3M of expense, $11.6M of capitalized
- **Palmarejo** ($11.9M expensed, $3.7M capitalized)
  - Delivered initial reserve estimate for Nación-Dana as well as initial inferred resource estimates for La Bavisa and Zapata
  - Discovery of additional structures including Portales, Jacobo, and Madero
- **Kensington** ($8.6M expensed, $5.7M capitalized)
  - Drilling results demonstrated potential for discovery of additional high-grade structures similar to Jualin
- **Silvertip** (~$1M capitalized[1])
  - Began surface and underground exploration drilling during the fourth quarter
  - Prepared underground access for additional drill rigs

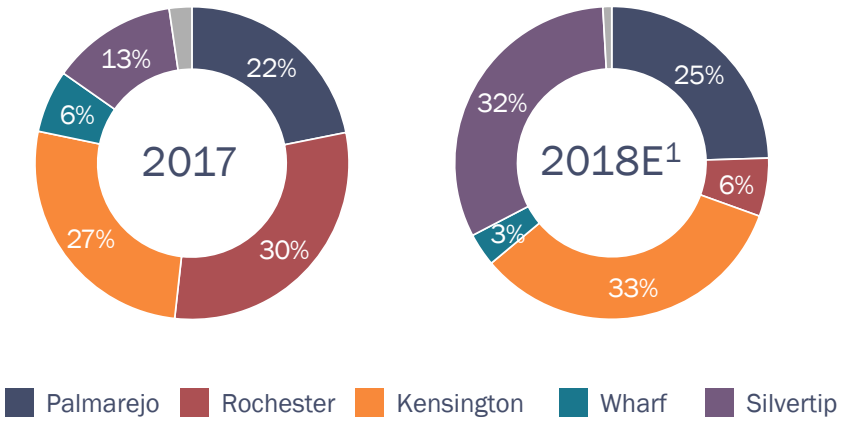

2018 expected exploration priorities include:

- Targeting $40M - $50M[2]
  - $20M - $25M of both exploration expense and capitalized exploration
- **Palmarejo** (~$10M expensed, ~$5M capitalized)
  - Continued expansion of Nación-Dana, Guadalupe and Independencia
  - Initial resource estimates at recent discoveries near existing underground infrastructure
- **Silvertip** (~$10M capitalized)
  - Focus on infill drilling to support mine planning
  - Technical report anticipated in 3Q
- **Kensington** (~$4M expensed, ~$6M capitalized)
  - Expansion of Kensington Main, both upper and lower areas, and the high-grade Raven deposit
- **Rochester** (~$0.5M expensed, ~$2M capitalized)
  - Focus on in-pit resource expansion
- **Early-stage exploration** continuing to target properties with potential synergies with existing operations

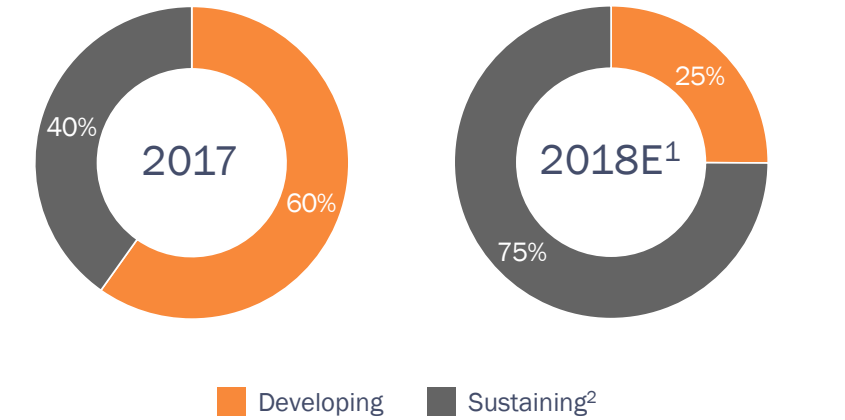

(1) Included in Silvertip pre-production capital during 4Q 2017 of $17.7M and excluded from the $11.6M companywide capitalized exploration total.
(2) Guidance as published by Coeur on April 25, 2018.

Capital Expenditures Outlook

Capital Expenditures by Mine
(% companywide total)

Capital Expenditures Composition
(% companywide total)

2018 capital expenditures are expected to total $120M - $140M[1]

- $90M - $100M of sustaining capital expenditures, including $20M - $25M of capitalized exploration
- **Palmarejo** ($30M - $35M), **Kensington** ($35M - $40M)
  - Ongoing underground development at both mines
- **Silvertip** ($37M - $42M)
  - Underground development and drilling are underway; updated technical report expected later in the year
  - Ongoing infrastructure improvements planned, including mill upgrades and equipment purchases
- **Rochester** ($7M - $15M)
  - Capital expenditures are expected to decrease following completion of the Stage IV leach pad expansion
- **Wharf** ($4M - $7M)

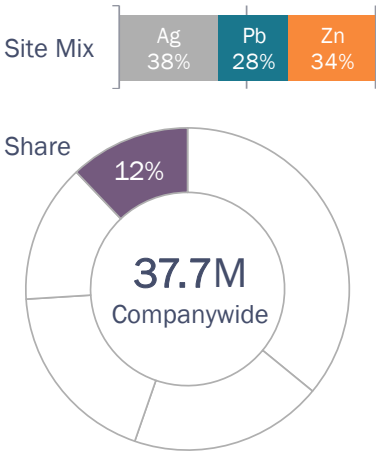

(1) Capital expenditures guidance as published by Coeur on April 25, 2018.
(2) Sustaining capital expenditures exclude capital leases.

Overview of Initial Silvertip Mine Plan[1]

Operating Parameters[2]

	Units	LOM
Total ore production	M tonnes	2.7
Initial mine life	Years	7.5
Average production rate	tpd	1,000
Average annual production		
Silver equivalent	M oz AgEq	10
Silver	M oz Ag	3
Zinc	M lbs Zn	45 - 50
Lead	M lbs Pb	40 - 45
Average head grade		
Silver equivalent	g/t AgEq	1,177
Silver	g/t Ag	364
Zinc	% Zn	9.1%
Lead	% Pb	7.1%
Average metallurgical recoveries		
Silver equivalent	%	83%
Silver	%	85%
Zinc	%	82%
Lead	%	84%

Costs Assumptions[2]

	Units	LOM
Pre-production capex	US$M	$25 - $35
Sustaining capex	US$M	$55 - $65
Operating costs		
Mining costs	US$/tonne	$95 - $100
Processing costs	US$/tonne	$35 - $40
G&A	US$/tonne	$30 - $35
Cash costs	US$/oz AgEq	$9.50 - $10.50
AISC	US$/oz AgEq	$10.50 - $11.50

Companywide production

- 10 million AgEqOz[2] of average annual production expected over initial 7.5 year LOM, contributing significantly to Coeur's production

Companywide costs

- At full capacity and over its initial LOM, Silvertip's AISC per AgEqOz[1] is expected to average approximately $10.50 - $11.50

(1) For additional information regarding Silvertip's mineral resource estimates and initial mine plan, please refer to slide 37.
(2) For purposes of silver equivalence, metals prices of US$1,250/oz gold, US$17.50/oz silver, US$1.13/lb lead, and US$1.40/lb zinc were used.

Notes to Initial Silvertip Mine Plan

Notes to the Silvertip summary mine plan:

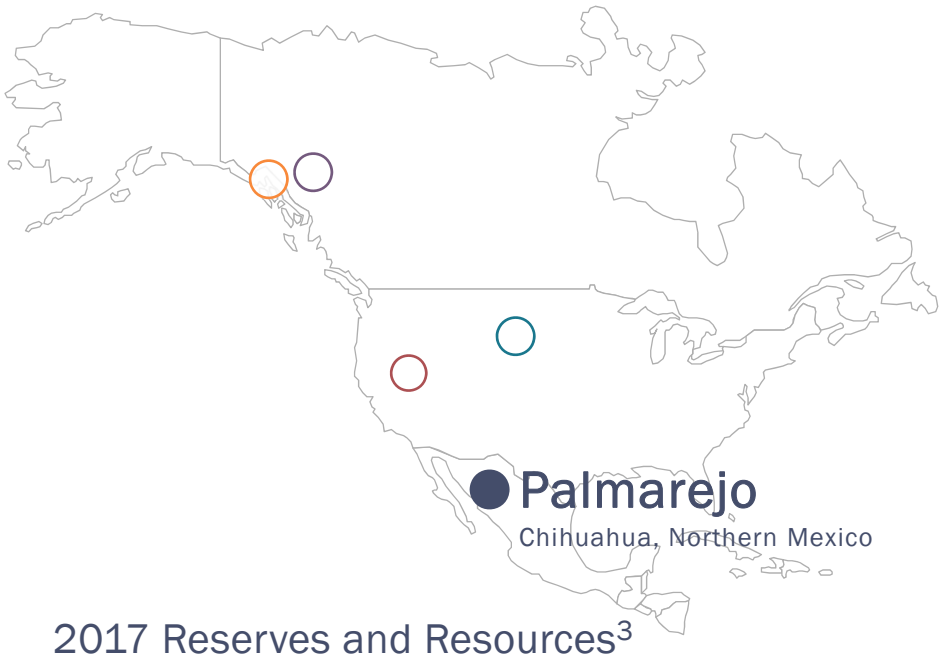

(a) This economic analysis is preliminary in nature and is based upon the current resource estimate as set out in this presentation which includes inferred mineral resources. Inferred resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves and there is no certainty that the economic assessment will be realized.

(b) The above qualifications and assumptions have been used by the qualified person in developing this economic analysis.

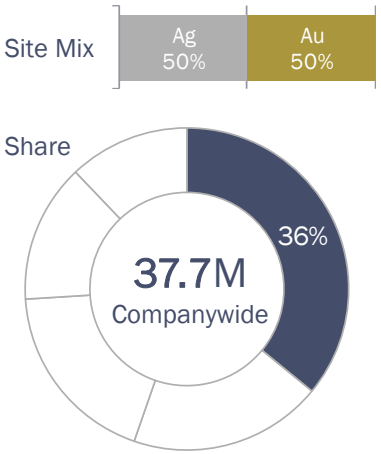

(c) The continued production of the Silvertip mine is not based on demonstrated economic viability of mineral reserves and, as a result, there may be an increased uncertainty of achieving any particular level of recovery of minerals or the cost of such recovery.

Summary of Rochester PEA[1]

Highlights

- Re-scoped mine plan and PEA incorporate the anticipated economic benefit from:
  - Potential addition of an HPGR unit in early 2019
  - Planned construction in 2020 of a new crusher, including a second HPGR, with anticipated 20 million tons per year capacity (compared to current capacity of approximately 15 million tons)
- Includes approximately 80 million tons of inferred material in addition to year-end 2017 reserves
  - Inferred material would be infill drilled to reserve confidence over several years
- Anticipated benefits from HPGR technology include:
  - Improved silver recovery and accelerated timing of ultimate recovery from 20 to two years
  - Reduction of strip ratio from 0.8:1 to under 0.04:1
  - Reduced maintenance and energy consumption

		2017 TR	2018 PEA
Proven and probable reserves			
Mineralized material tons	K tons	244,804

(1) For additional information regarding Rochester's re-scoped mine plan and PEA, please refer to slides 43-44. Canadian investors should refer to the Technical Report and Preliminary Economic Assessment for Rochester dated March 5, 2018 on file at www.sedar.com.

What is HPGR?

High pressure grinding rolls are relatively new to precious metals operations, although the technology has been proven in processing other materials

- HPGRs have been used in the aggregates sector for decades, though early challenges associated with surface wear of the rollers delayed its adoption in hard rock processing
- In an HPGR unit, feed material is subjected to high compressive force exerted by the floating roll, which is regulated by hydraulic pistons
- Key advantages include:
  - Low operational and maintenance costs due in large part to limited moving parts
  - Limited downtime for wear part replacement
  - Comparatively higher comminution efficiency
  - Accommodates greater mineral variability
- Recent installations by precious metals producers include[1]:
  - Soledad, Golden Queen Mining (California, 2014)
  - Cadia, Newcrest Mining (Australia, 2010)
  - Peñasquito, Goldcorp (Mexico, 2008)

High Pressure Grinding Roll Schematic

(1) Source(s): Thyssenkrupp Industrial Solutions POLYCOM® Installations (2018).

Notes to Rochester's Re-Scoped Mine Plan and PEA

(a) 2018 PEA is effective December 31, 2017 and filed March 5, 2018 and the 2017 Technical Report is effective December 31, 2016.

(b) Assumed metals prices for estimated Mineral Resources included in the 2018 Technical Report were $20.00 per ounce of silver and $1,400 per ounce of gold. Assumed metal prices for estimated 2016 year-end Mineral Reserves were $17.50 per ounce of silver and $1,250 per ounce of gold and for estimated 2016 year-end Mineral Resources were $19.00 per ounce of silver and $1,275 per ounce of gold.

(c) Mineral Resources are in addition to Mineral Reserves and do not have demonstrated economic viability. Inferred Mineral Resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of Mineral Reserves, and there is no certainty that the Inferred Mineral Resources will be realized.

(d) Rounding of tons and ounces, as required by reporting guidelines, may result in apparent differences between tons, grade, and contained metal content.

(e) For details on the estimation of mineral reserves, mineral resources, and inferred mineral resources, including the key assumptions, parameters and methods used to estimate the Mineral Reserves, Mineral Resources, and Inferred Mineral Resources, Canadian investors should refer to the 2017 Technical Report on file at www.sedar.com as well as the 2018 Rochester Technical Report, including the PEA, filed March 5, 2018.

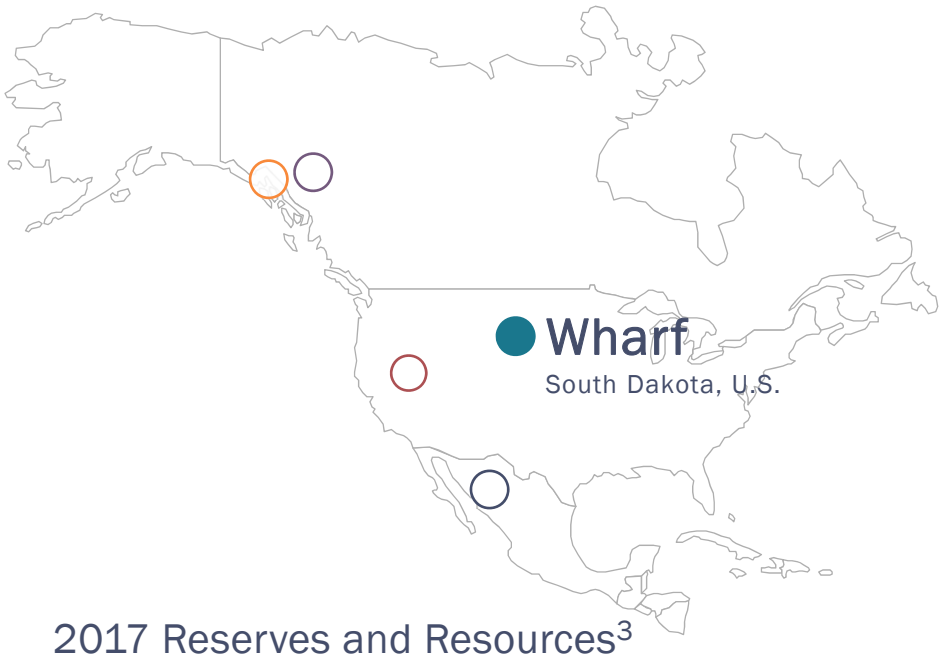

(f) The Mineral Reserves silver equivalent cut-off grade equals 0.49 oz/t and the gold multiplier equals 109. The gold multiplying factor for silver equivalent is based on: [($Price Au - $Refining Au) / ($Price Ag - $Refining Ag)] x [(%Recovery Au) / (%Recovery Ag)]. The Mineral Resources cut-off grade equals 0.40 oz/t and the gold multiplier equals 103.

(g) Rounding of short tons, grades, and troy ounces, as required by reporting guidelines, may result in apparent differences between tons, grades, and contained metal contents.

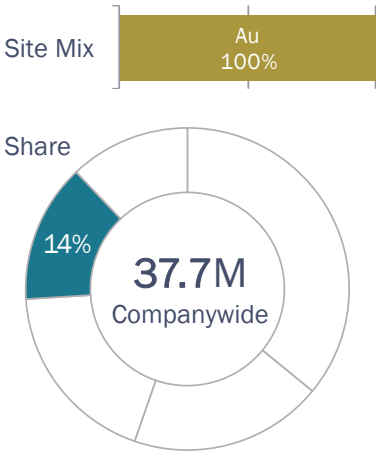

(h) Mineral Reserves are contained within the Measured and Indicated pit designs, or in stockpiles are supported by a plan featuring variable throughput rates, stockpiling and cut-off optimization. The PEA plan is contained within the Measured, Indicated and Inferred pit design and has a different mining sequence, variable production rate and an alternative cut-off grade as described in footnotes b, e, and f.

Notes to 2017 mineral reserves and resources:

(a) Effective December 31, 2017.

(b) Assumed metal prices for estimated Mineral Reserves were $17.50 per ounce of silver and $1,250 per ounce of gold.

(c) Assumed metal prices for estimated Mineral Resources were $20.00 per ounce of silver, $1,400 per ounce of gold, $1.15 per pound Zinc and $1.00 per pound Lead.

(d) Mineral Resources are in addition to Mineral Reserves and do not have demonstrated economic viability. Inferred Mineral Resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of Mineral Reserves, and there is no certainty that the Inferred Mineral Resources will be realized.

(e) Rounding of tons and ounces, as required by reporting guidelines, may result in apparent differences between tons, grade, and contained metal content.

(f) For details on the estimation of mineral resources and reserves, including the key assumptions, parameters and methods used to estimate the Mineral Resources and Mineral Reserves, Canadian investors should refer to the NI 43-101 Technical Reports for Coeur's properties on file at www.sedar.com.

Notes to 2016 mineral reserves and resources:

(a) Effective December 31, 2016.

(b) Assumed metal prices for Mineral Reserves were $17.50 per ounce of silver and $1,250 per ounce of gold.

(c) Assumed metal prices for estimated Mineral Resources were $19.00 per ounce of silver and $1,275 per ounce of gold, except Endeavor at $1,800 per metric ton of lead, $2,200 per metric ton of zinc, and $20.00 per ounce of silver.

(d) Mineral Resources are in addition to Mineral Reserves and do not have demonstrated economic viability. Inferred Mineral Resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of Mineral Reserves, and there is no certainty that the Inferred Mineral Resources will be realized.

(e) Rounding of tons and ounces, as required by reporting guidelines, may result in apparent differences between tons, grade, and contained metal content.

(f) For details on the estimation of mineral resources and reserves, including the key assumptions, parameters and methods used to estimate the Mineral Resources and Mineral Reserves, Canadian investors should refer to the NI 43-101 Technical Reports for Coeur's properties on file at www.sedar.com.

(g) Joaquin, Endeavor, and Lejano removed following their respective sales on February 10, 2017, July 31, 2017, and August 4, 2017.

Executive Leadership

Mitchell J. Krebs – President and Chief Executive Officer. During his twenty-year tenure with Coeur, Mr. Krebs has led nearly $2 billion in capital raising and debt restructuring activities and has facilitated over $2 billion of acquisitions and divestitures. Mr. Krebs was previously Coeur's Chief Financial Officer and held various positions in the corporate development department, including Senior Vice President of Corporate Development. Mr. Krebs is a Director of Kansas City Southern and the National Mining Association, is on the Board of World Business Chicago, and was formerly President of the Silver Institute.

Peter C. Mitchell – Senior Vice President and Chief Financial Officer. Mr. Mitchell came to Coeur from Taseko Mines Limited where he served as Chief Financial Officer, leading Taseko's financial operations, including sourcing strategic capital to fund the company's strategic growth plan. Previously, Mr. Mitchell was involved in leading and managing growth in private equity portfolio companies through acquisitions, integrations, and greenfield initiatives.

Frank L. Hanagarne, Jr. – Senior Vice President and Chief Operating Officer. Mr. Hanagarne was most recently Chief Operating Officer of Valcambi, SA, a precious metal refiner in Switzerland. Prior to his appointment as operations head of Valcambi in early 2011, Mr. Hanagarne was a Director of Corporate Development for Newmont Mining Corporation. Mr. Hanagarne's 17 years of service at Newmont has included positions of increasing responsibility within key areas of Newmont's operations and business functions as well as environmental, health, and safety. Mr. Hanagarne was nominated to join the board of directors of Metalla Royalty & Streaming Ltd. In March 2018.

Casey M. Nault – Senior Vice President, General Counsel, and Secretary. Mr. Nault has over 20 years of experience as a corporate and securities lawyer, including prior in-house positions with Starbucks Corporation and Washington Mutual, Inc. and law firm experience with Gibson, Dunn & Crutcher. His experience includes securities compliance and SEC reporting, corporate governance and compliance, mergers and acquisitions, public and private securities offerings, other strategic transactions, general regulatory compliance, cross-border issues, land use and environmental issues, and overseeing complex litigation.

Hans Rasmussen – Senior Vice President, Exploration. Mr. Rasmussen has 30 years of experience in the mining business, 16 years of which were with senior producers Newmont Mining and Kennecott/Rio Tinto; as well as serving as a consultant for senior producers such as BHP, Teck-Cominco, and Quadra Mining. Since 2004, he has been an officer or served on the Board of Directors of several junior public exploration companies with gold and silver projects in Quebec, Nevada, Argentina, Chile, Colombia, Peru, and Bolivia.

Emilie C. Schouten – Senior Vice President, Human Resources. Ms. Schouten has 15 years of experience in Human Resources, starting her career in General Electric, where she graduated from GE's Human Resources Leadership Program. After 6 years as an HR Manager with GE, her division was acquired by the world's largest electrical distribution company, Rexel, and Ms. Schouten went on to become the Director of Training and Development. Ms. Schouten has her B.A. in Sociology from Michigan State University and her M.S. in Industrial Labor Relations from University of Wisconsin-Madison.

Board of Directors

Robert E. Mellor – Former Chairman, Chief Executive Officer, and President of Building Materials Holding Corporation (distribution, manufacturing, and sales of building materials and component products) from 1997 to January 2010, director from 1991 to January 2010; member of the board of directors of Monro Muffler/Brake, Inc. (auto service provider) since August 2010 as independent Chairman of the board of directors since June 2017 and as lead independent director from April 2011 to June 2017; member of the board of directors of CalAtlantic Group, Inc. (national residential home builder) from October 2015 to February 2018, when CalAtlantic was acquired by Lennar Corporation; member of the board of directors of The Ryland Group, Inc. (national home builder, merged with another builder to form CalAtlantic) from 1999 until October 2015; and former member of the board of directors of Stock Building Supply Holdings, Inc. (lumber and building materials distributor) from March 2010 until December 2015, when it merged with another company.

Mitchell J. Krebs – President and Chief Executive Officer. See prior slide.

Linda L. Adamany – Member of the board of directors of Leucadia National Corporation, a diversified holding company engaged in a variety of businesses, since March 2014; non-executive director of the Wood Group plc since October 2017 following its acquisition of Amec Foster Wheeler plc, an engineering, project management, and consultancy company, where Ms. Adamany was previously a non-executive director since October 2012; non-executive director of BlackRock Institutional Trust Company since March 2018; member of the board of directors of National Grid plc, an electricity and gas generation, transmission, and distribution company, from November 2006 to November 2012. Served at BP plc in several capacities from July 1980 until her retirement in August 2007, most recently from April 2005 to August 2007 as a member of the five-person Refining & Marketing Executive Committee responsible for overseeing the day-to-day operations and human resource management of BP plc's Refining & Marketing segment, a $45 billion business at the time.

Kevin S. Crutchfield – Chief Executive Officer and member of the board of directors of Contura Energy, Inc. (coal industry); before joining Contura at its inception in July 2016, he was Chairman (from May 2012) and Chief Executive Officer (from July 2009) of Alpha Natural Resources, Inc. He was with Alpha Natural Resources since its formation in 2003, serving as Executive Vice-President, President, Director, and Chief Executive Officer. Mr. Crutchfield is a 25-year coal industry veteran with technical, operating, and executive management experience and recently served as the Chairman of the National Mining Association.

Sebastian Edwards – Henry Ford II Professor of International Business Economics at the Anderson Graduate School of Management at the University of California, Los Angeles (UCLA) from 1996 to present; Co-Director of the National Bureau of Economic Research's Africa Project from 2009 to present; taught at IAE Universidad Austral in Argentina and at the Kiel Institute from 2000 to 2004; Chief Economist for Latin America at the World Bank Group from 1993 to 1996. Currently a Member of the Board of Moneda Asset Management, an investment management firm in Chile, and Centro de Estudios Públicos, Chile.

Randolph E. Gress – Retired Chairman (November 2006 until January 2016 and director from August 2004 until January 2016) and Chief Executive Officer (from 2004 until December 2015) of Innophos Holdings, Inc., a leading international producer of performance-critical and nutritional specialty ingredients for the food, beverage, dietary supplements, pharmaceutical, and industrial end markets. Mr. Gress was with Innophos since its formation in 2004, when Bain Capital purchased Rhodia SA's North American specialty phosphate business. Prior to his time at Innophos, Mr. Gress was with Rhodia since 1997 and held various positions including Global President of Specialty Phosphates (with two years based in the U.K.) and Vice-President and General Manager of the NA Sulfuric Acid and Regeneration businesses. From 1982 to 1997, Mr. Gress served in various roles at FMC Corporation including Corporate Strategy and various manufacturing, marketing, and supply chain positions.

Eduardo Luna – Chairman of the Board of Rochester Resources Ltd., a junior natural resources company with assets in Mexico. Member of the Boards of Directors of Wheaton Precious Metals Corp. and DynaResource, Inc., Chairman of the Advisory Board of the Faculty of Mines at the University of Guanajuato, and Mexico Mining Hall of Fame inductee. Mr. Luna is the former President of the Mexican Mining Chamber and a former President of the Silver Institute and previously held senior executive and board positions at several companies including Industrial Peñoles, Goldcorp Inc., Luismin SA de CV, Wheaton River Minerals Ltd., Alamos Gold Inc., and Primero Mining Corp.

Jessica L. McDonald – Chair and Interim CEO of Canada Post Corporation and a member of the Board of Directors of Trevali Mining Corporation. Ms. McDonald is also a Mentor at the Trudeau Foundation, a visiting fellow at the Steyer-Taylor Center for Energy Policy and Finance at Stanford University, was recently appointed to the Member Council of Sustainable Development Technology Canada and was named to Canada's Top 100 Most Powerful Women Hall of Fame. Ms. McDonald previously served as the President and Chief Executive Officer of BC Hydro and Power Authority, a clean energy utility with over $5.5 billion in annual revenues and more than 5,000 employees, and has held numerous senior positions in the British Columbia provincial government, including Deputy Minister to the Premier, Cabinet Secretary and Head of the BC Public Service.

John H. Robinson – Chairman of Hamilton Ventures LLC (consulting and investment) since founding the firm in 2006; Chief Executive Officer of Nowa Technology, Inc. (development and marketing of environmentally sustainable wastewater treatment technology) from 2013 to 2014; Chairman of EPC Global, Ltd. (engineering staffing company) from 2003 to 2004; Executive Director of Amey plc (British business process outsourcing company) from 2000 to 2002; Vice Chairman of Black & Veatch Inc. (engineering and construction) from 1998 to 2000. Mr. Robinson began his career at Black & Veatch and was managing partner prior to becoming Vice Chairman. Member of the board of directors of Alliance Resource Management GP, LLC (coal mining); Federal Home Loan Bank of Des Moines (financial services) and Olsson Associates (engineering consulting).

J. Kenneth Thompson – Member of the board of directors of Alaska Air Group, Inc. (parent company of Alaska Airlines, Virgin America Airlines and Horizon Air), Pioneer Natural Resources Company (oil and gas), and Tera Tech, Inc. (engineering consulting). President and Chief Executive Officer of Pacific Star Energy LLC (private energy investment firm in Alaska) from September 2000 to present, with a principal holding in Alaska Venture Capital Group LLC (private oil and gas exploration company) from December 2004 to present; Executive Vice President of ARCO's Asia Pacific oil and gas operating companies in Alaska, California, Indonesia, China, and Singapore from 1998 to 2000.
