COEUR MINING®
We pursue a higher standard

NYSE: **CDE**

Cautionary Statements

This presentation contains forward-looking statements within the meaning of securities legislation in the United States and Canada, including statements regarding the Silvertip mine, including operations, exploration and development activities, permitting matters, expected financial performance and costs, among others. Such forward-looking statements involve known and unknown risks, uncertainties, and other factors which may cause Coeur's actual results, performance, or achievements to be materially different from any future results, performance, or achievements expressed or implied by the forward-looking statements. Such factors include, among others, the risk that the strategies and expectations described in this presentation are not achieved on a timely basis or at all, the risks and hazards inherent in the mining business (including risks inherent in developing large-scale mining projects, environmental hazards, industrial accidents, weather, or geologically related conditions), changes in the market prices of gold, silver, zinc, and lead, and a sustained lower price environment, the uncertainties inherent in Coeur's production, exploratory and developmental activities, including risks relating to permitting and regulatory delays (including the impact of government shutdowns), ground conditions, grade variability, any future labor disputes, or work stoppages, the uncertainties inherent in the estimation of mineral reserves and resources, changes that could result from Coeur's future acquisition of new mining properties or businesses, the loss of any third-party smelter or refiner to which Coeur markets its production, the effects of environmental and other governmental regulations and government shut-downs, the risks inherent in the ownership or operation of or investment in mining properties or businesses in foreign countries, Coeur's ability to raise additional financing necessary to conduct its business, make payments or refinance its debt as well as other uncertainties and risk factors set out in filings made from time to time with the United States Securities and Exchange Commission, and the Canadian securities regulators, including, without limitation, Coeur's most recent reports on Forms 10-K and 10-Q. Actual results, developments, and timetables could vary significantly from the estimates presented. Readers are cautioned not to put undue reliance on forward looking statements. Coeur disclaims any intent or obligation to update publicly such forward-looking statements, whether as a result of new information, future events, or otherwise. Additionally, Coeur undertakes no obligation to comment on analyses, expectations, or statements made by third parties in respect of Coeur, its financial or operating results or its securities.

Christopher Pascoe, Coeur's Director, Technical Services and a qualified person under Canadian National Instrument 43-101, reviewed and approved the scientific and technical information concerning Coeur's mineral projects in this presentation. Mineral resources are in addition to mineral reserves and do not have demonstrated economic viability. Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of mineral reserves, and there is no certainty that the inferred mineral resources will be realized. For a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources, as well as data verification procedures and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors, Canadian investors should see the Technical Reports for Silvertip as filed on SEDAR at www.sedar.com. The potential quantity and grade for the deposits and exploration targets described herein are conceptual in nature. There is insufficient exploratory work to define a mineral resource and it is uncertain if further exploration will result in the applicable target being delineated as a mineral resource.

Cautionary Note to U.S. Investors - The United States Securities and Exchange Commission permits U.S. mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We may use certain terms in public disclosures, such as "measured," "indicated," "inferred" and "resources," that are recognized by Canadian regulations, but that SEC guidelines generally prohibit U.S. registered companies from including in their filings with the SEC. U.S. investors are urged to consider closely the disclosure in our Form 10-K which may be secured from us, or from the SEC's website at http://www.sec.gov.

Non-U.S. GAAP Measures - We supplement the reporting of our financial information determined under United States generally accepted accounting principles (U.S. GAAP) with certain non-U.S. GAAP financial measures, including adjusted costs applicable to sales per ounce/pound. We believe that these adjusted measures provide meaningful information to assist management, investors and analysts in understanding our financial results and assessing our prospects for future performance. We believe these adjusted financial measures are important indicators of our recurring operations because they exclude items that may not be indicative of, or are unrelated to our core operating results, and provide a better baseline for analyzing trends in our underlying businesses. We believe adjusted costs applicable to sales per ounce/pound are important measures in assessing the Company's overall financial performance.

Agenda

Time		Event
7:00 a.m.	8:45 a.m.	Flight: Vancouver to Watson Lake
8:45 a.m.	10:30 a.m.	Drive: Watson Lake to Silvertip
10:30 a.m.	11:45 a.m.	Safety briefing and site orientation
11:45 a.m.	12:30 p.m.	Lunch General discussion and Q&A
12:30 p.m.	2:00 p.m.	Safety gear-up Core shack Mine tour
2:00 p.m.	3:00 p.m.	Safety gear-up Mill tour
3:00 p.m.	3:30 p.m.	Site tour debrief
3:30 p.m.	5:15 p.m.	Drive: Silvertip to Watson Lake
5:15 p.m.	7:00 p.m.	Flight: Watson Lake to Vancouver

Management Participants

Tim Fisch – *Co-General Manager*

Who We Are

Based in the U.S., Coeur Mining (NYSE: CDE) is a significant producer of gold and silver, and has repositioned its portfolio with a focus on sustainable, high-quality growth and cash flow from a North American asset base

Key Highlights

5 *operating mines*

3 *top jurisdictions*

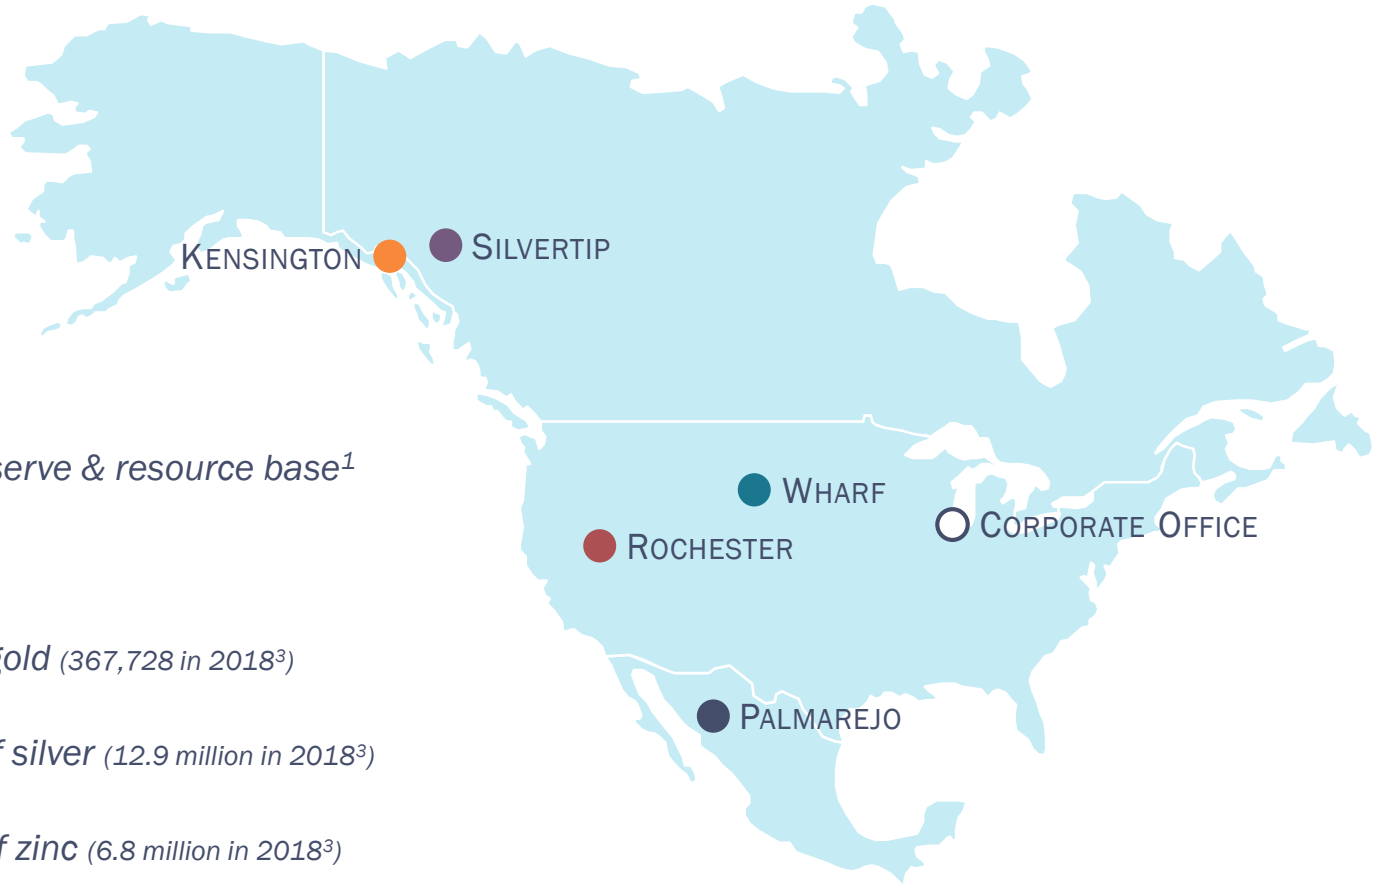

Cash flow *focused*

Leading *trading liquidity*

Large and growing *reserve & resource base[1]*

2019E[2] production:

- ***353,000*** *ounces of gold (367,728 in 2018[3])*
- ***13.5*** *million ounces of silver (12.9 million in 2018[3])*
- ***32.5*** *million pounds of zinc (6.8 million in 2018[3])*
- ***27.5*** *million pounds of lead (3.9 million in 2018[3])*

Note: See slides in appendix for additional information related to mineral reserves and resources. Canadian investors should refer to the latest technical reports for Coeur's mines on file at www.sedar.com.
(1) Based on year-end 2018 reserves and resources.
(2) Based on midpoint of production guidance as published by Coeur on July 11, 2019.
(3) 2018 production figures include pre-commercial production from Kensington (Jualin) and Silvertip.

Why Invest in Coeur?

90 year-old, U.S.-based, NYSE-listed precious metals company seeking to differentiate itself though a unique mix of size, growth and quality

PROTECT

Our People, Places, Planet

DEVELOP

Quality Resources, Growth, Plans

DELIVER

Impactful Results Through Teamwork

- **Balanced, Safe and Unique Asset Base**
  - By Asset
  - By Jurisdiction
  - By Metal
- **Repositioned Portfolio**
  - Asset Optimizations
  - Opportunistic M&A & Divestitures
- **Disciplined Capital Allocation**
  - Cyclical and Capital Intensive Industry
  - ROI–Driven Prioritization
  - Asset Optimizations
- **Creating Value Through Exploration**
  - Growing Reserves and Resources
  - Near-Mine Focus
- **Leading ESG Initiatives**
  - Proactive Air and Water Stewardship
  - 220+ Community Groups Benefitted[1]
  - Best-in-Class Corporate Governance

(1) Based on full-year 2018 data.

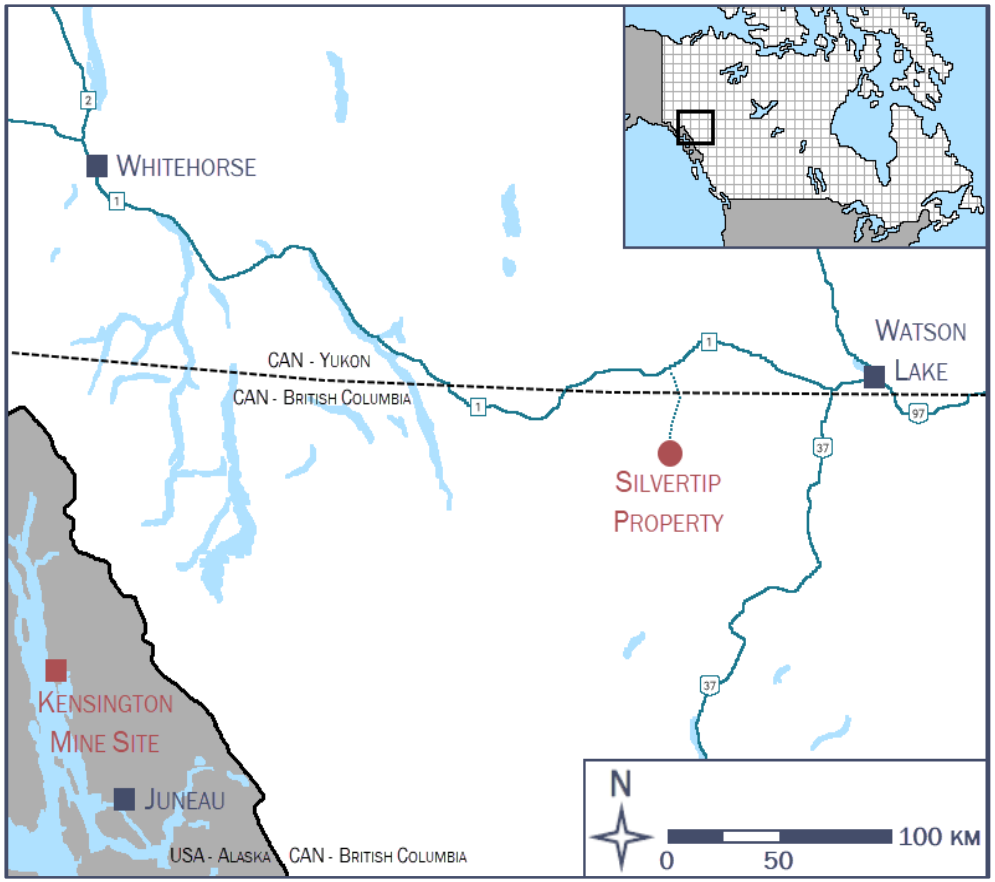

Silvertip Summary Highlights

- Large, prospective land position containing one of the world's highest-grade silver-zinc-lead deposits
- Opportunity to cost-efficiently expand reserves and resources over time
- Reasons for slower than anticipated ramp-up being addressed
- Strong, experienced management team dedicated to improving performance
  - Significant progress on top-line stabilization efforts
  - Transitioning to optimized cost structure
- Improving zinc concentrate grades critical to deliver into offtake agreement
- Potential to increase mining and processing activities to 1,250 tonnes per day ("mtpd")
- Continued focus on achieving positive operating cash flow during 2019
  - Commodity prices and treatment charges remain headwinds
- Ultimate goal of becoming a long-term source of sustainable, high-margin free cash flow

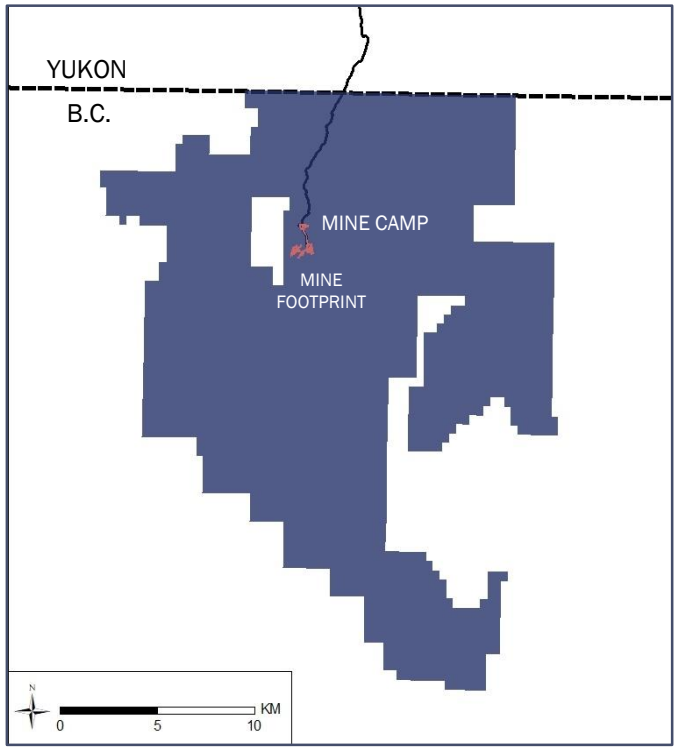

Geographic Location of Silvertip

Located in British Columbia, just below the Yukon border, Silvertip sits within a highly prospective 93,000-acre land package. The operation is accessible via a 25 kilometer mine access road off the Alaska Highway, which connects Whitehorse and Watson Lake

Regional Map

Claims Boundary

Less than ~5% of Silvertip's land position has been explored and drilled to date

Silvertip Background and History

Silvertip is one of the industry's newest and highest grade silver-zinc-lead mines. The underground operation produces both zinc and lead concentrates that are sold to third-party smelters

Project Timeline

1955 – 1960
Outcropping discovery, drilling, underground development

1960 – 2013
Numerous owners and exploration campaigns

2013 – 2017
JDS Silver: Permitting and construction

Oct 2017 – Present
Coeur Mining: Acquisition, development

Aerial View

Facts & Figures

Ownership	• Coeur Mining, Inc.[1] / 100%
Mine Type	• Underground
Metals	• Silver, zinc and lead
Product	• Zinc and lead concentrate
Land Position	• 93,000 acres (37,650 hectares)
Employees	• 293[2]
2019E Production[3]	• **Silver:** 1.5 – 2.5 million ounces • **Zinc:** 25 – 40 million pounds • **Lead:** 20 – 35 million pounds

(1) Coeur Mining, Inc. holds 100% of Silvertip through its wholly-owned subsidiary, Coeur Silvertip Holdings Ltd.
(2) Full-time employees as of June 14, 2019.
(3) Production guidance as published by Coeur on July 11, 2019.

Silvertip Workforce Snapshot

Coeur aims to be the employer of choice and develop a robust pipeline of future leaders from the surrounding communities

Overview

- **293** employees as of June 14, 2019
- **21%** of employees identify as First Nations
- **8** leadership transfers from other Coeur operations
- **15** corporate resources deployed for special projects

Division of Labor

- **34%** Salaried
  - Manager, Superintendent, Supervisor, Technical and Support staff
- **66%** Hourly
  - Frontline workers

Workforce Origin

- **~100%** Canadian
  - **65%** British Columbia
  - **17%** Yukon
  - **14%** Alberta, Saskatchewan and Manitoba
  - **4%** Eastern Provinces

Commitment to Environmental, Social & Governance Practices

Coeur's purpose statement, We Pursue a Higher Standard, is underscored by the Company's dedication to protect its people, places and planet. Initiatives taken at Silvertip demonstrate the Company's commitment to these principles

People

- ~9,470 hours of Health and Safety and Emergency Response training during January - May 2019 (contractors & employees)
- Goal to remain union-free
- 15 participants in IMPACT Training program
  - Year-long leadership development program created by Coeur for its frontline supervisors[1]
- Silvertip compensation is 25% above British Columbia average[2]

Places

- Advisory Committee includes Kaska members
  - Creating technical advisory group with Kaska, Tahltan and Coeur
  - Full-time Kaska Liaison Officer
- Worked with 19 First Nation-partnered businesses in 2018
- Contributed over $38,500 to 13 community organizations in 2018
- Provided relief to community during and after Telegraph Creek Wildfire

Planet

- 279 people received environmental training in 1Q 2019
- ~C$16 million in reclamation security set aside[3]
  - Cost estimates reviewed annually
- Focus on continuous improvement and risk reduction
  - Implemented 32 environmental management plans during January - May 2019

(1) 4 have graduated and 11 are current participants as of June 13, 2019.
(2) As of March 27, 2019; according to StatsCan, https://www.statcan.gc.ca/eng/start.
(3) Reclamation security held via surety bonds.

Newly Commissioned Camp Facility

As part of Coeur's continued investment in its people, the Company opened a new 220-person camp facility at Silvertip in 2Q 2019

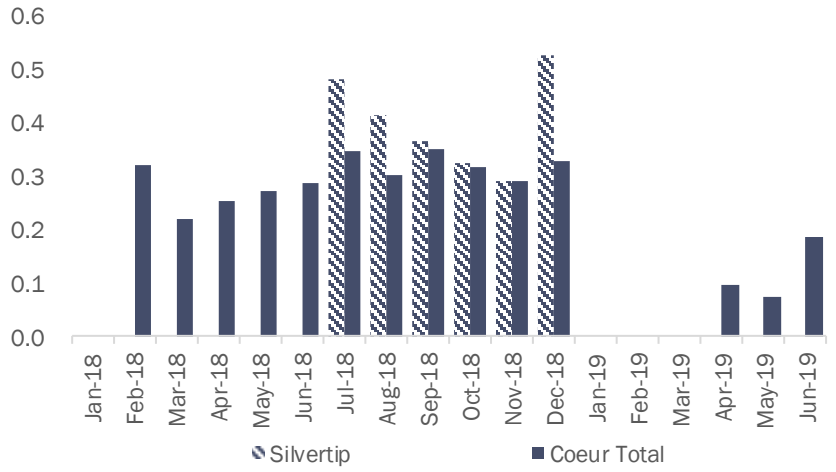

Strong Commitment to Safety Reflected in Performance

Silvertip's injury frequency rate has improved significantly since Coeur implemented its health and safety standards

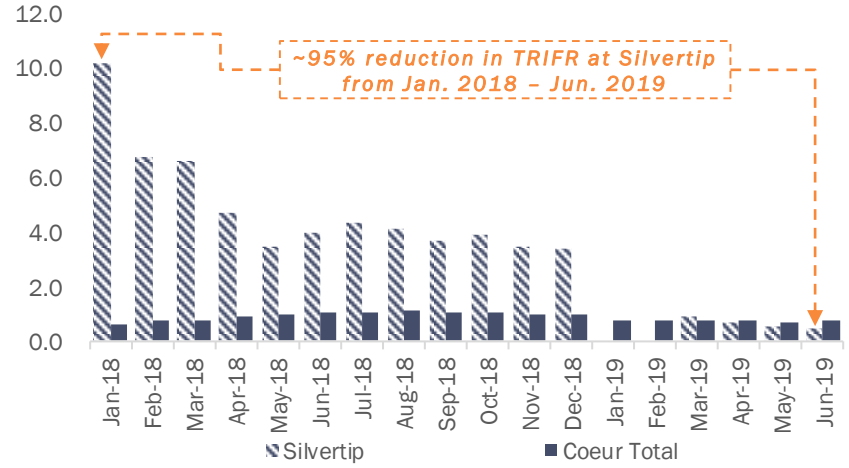

Overview of Safety Culture

- Foster and enhance strong safety culture and values
- Identify, mitigate and eliminate workplace hazards and exposures
- Enhance the use of leading and lagging indicators, working proactively to prevent incidents
- Empower employees to stop, prevent and report any unsafe acts or conditions

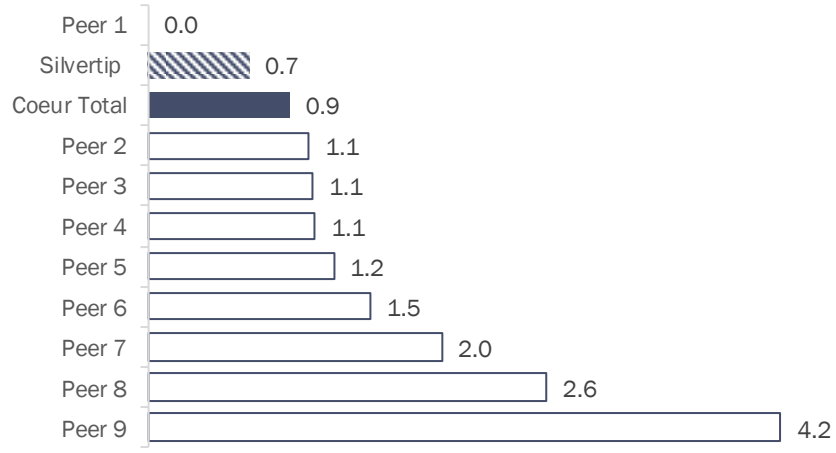

Lost-Time Injury Frequency Rate

Total Reportable Injury Frequency Rate ("TRIFR")

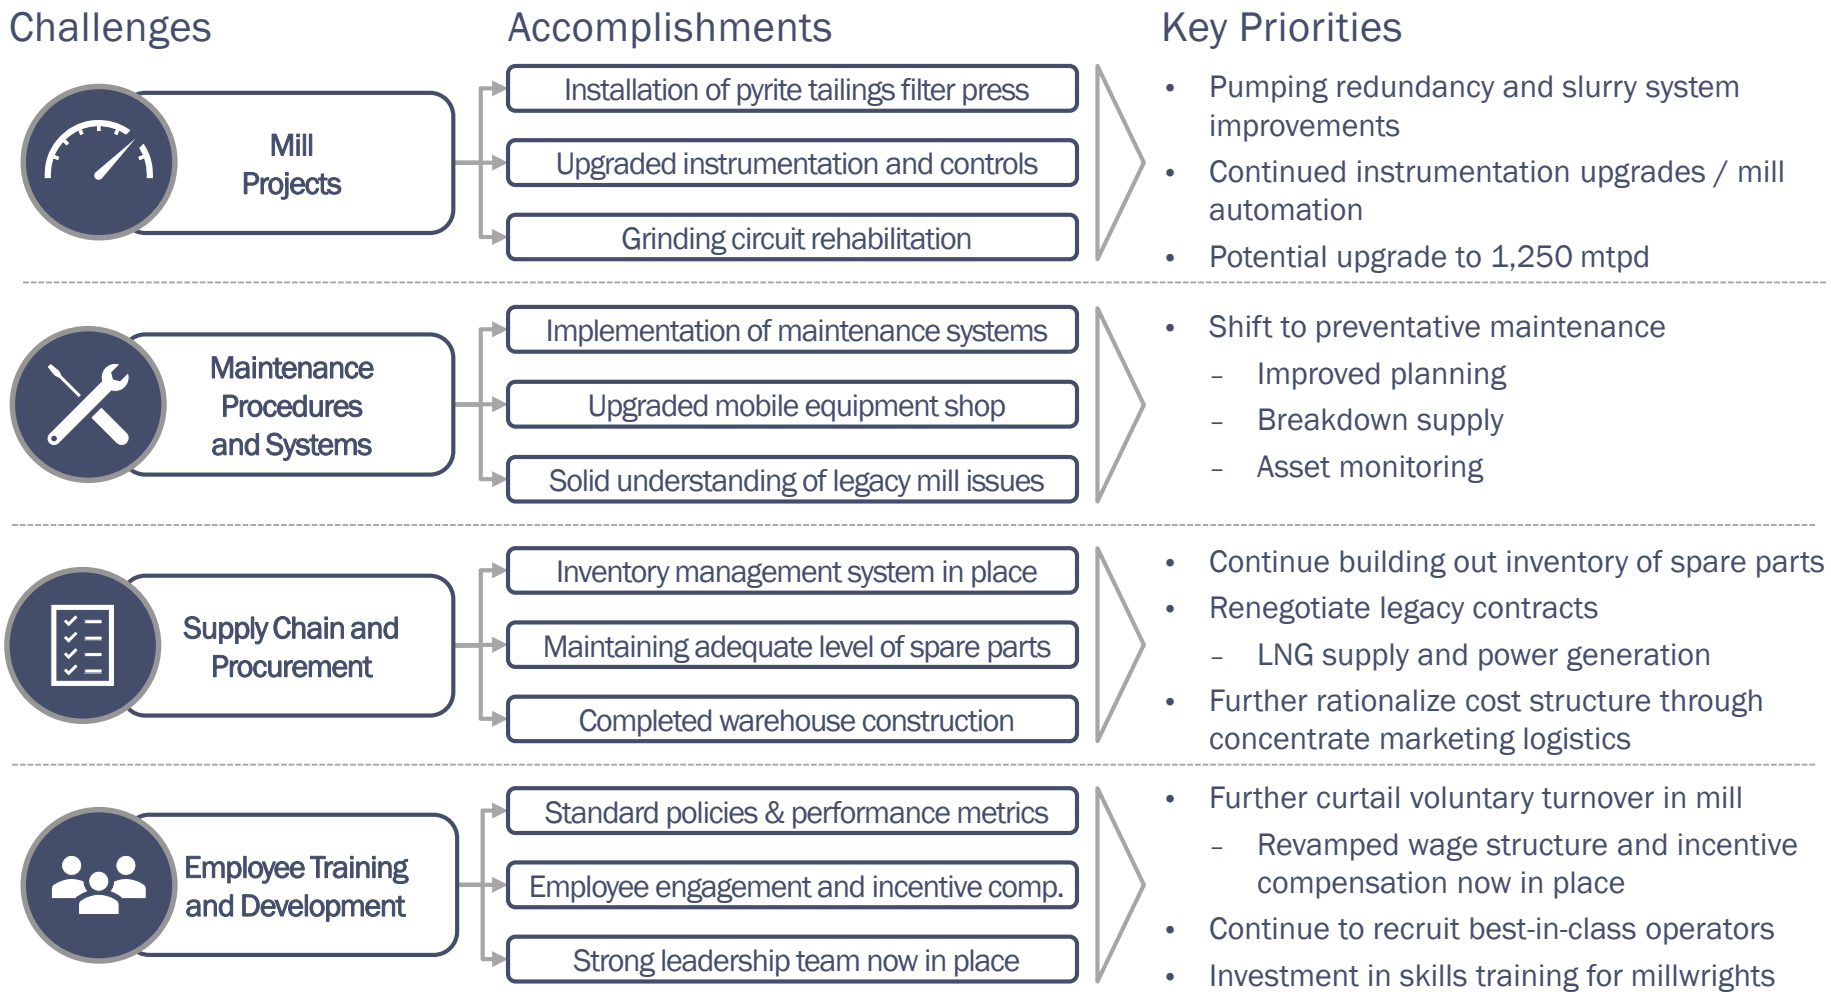

2019 TRIFR Industry Comparison[1]

Note: Data includes Coeur employees and contract workers. Injuries per 200,000 employee-hours worked.
(1) Coeur data through June 30, 2019. Peer data through March 31, 2019 as per U.S. Department of Labor Mine Safety and Health Administration.

Challenges, Accomplishments & Key Priorities

Although the ramp-up of Silvertip has been slower than originally anticipated, Coeur has made significant progress in positioning the operation for success. Key initiatives that are currently underway are expected to further enhance both operational and financial performance

Key Areas of Downtime and Key Projects Being Addressed

Highlighted below are the key sources of mill downtime and the necessary steps to address each item. As these projects are completed, Coeur anticipates more consistent mill performance, higher grades and recoveries as well as higher-quality concentrate

Summary of Key Areas of Downtime

Type	Selected Commentary	Expected Completion
Paste System	• Install redundant paste pump • Install redundant paste line • Reclaim pyrite stockpile for operational flexibility	4Q 2019
Grinding	• Replaced ball mill liners ✓ • Replaced lifters and discharge grates on SAG mill ✓ • Upgrade lubrication system for SAG mill	4Q 2019
Flotation	• Upgrade flocculant control system ✓ • Update flotation and dewatering cell components and controls to improve reliability/control	3Q 2019
Water	• Upgrade shore pump set-up for process water ✓ • Install system to improve pH control • Dredge pond to add capacity • Complete mill sumps and containment project	3Q 2019
Pump Failures	• Install redundant pumps in critical locations to increase mill reliability	3Q 2019

Silvertip Leadership Profiles

James Clark
Vice President, Co-General Manager

- Joined Coeur in 2017
- Prior to joining Coeur, worked with De Beers Group of Companies
  - Managerial roles in Supply Chain, Business Improvement
  - Senior Operations Manager of Snap Lake Mine
- Early part of career working in contract mining
  - Valuable operational experience in mine development, construction and shaft sinking
- Bachelor of Arts degree in Economics and Bachelor of Engineer in Mining from Laurentian University
- Masters of Business Administration from the University of Western Ontario's Richard Ivey School of Business
- Resides in Calgary, Alberta (Canada)

Tim Fisch
Co-General Manager

- Joined Coeur in 2019
- Prior to joining Coeur, worked with Imperial Metals Corporation
- 12 years of General Manager experience, including five years at Red Chris Project
- Early part of career working in design, commissioning and operations of several base metal projects
  - Emphasis on mineral processing and metallurgical optimization
    - Unimin Corporation: Blue Mountain Operation
    - BHP: Robinson Mine
    - Imperial Metals: Goldstream Mine
    - Highland Valley Copper: Bethlehem Mine
- Resides in Williams Lake, British Columbia (Canada)

First Nations Overview

Silvertip is in an area where the Kaska and the Tahltan First Nations have overlapping claims. Coeur is committed to maintaining respectful and collaborative relationships and will continue to work to ensure that their communities and members support and share in the benefits of Silvertip

Agreement with Kaska First Nations

- Socio-Economic Participation Agreement ("SEPA") established in 2013
- The Kaska have provided support for Silvertip in consideration for financial, environmental, employment, business and contracting, and education and training commitments
- Coeur currently partners with the Kaska on several major commercial agreements

Agreement with Tahltan First Nations

- Coeur entered into Impact Benefit Agreement discussions in late 2018
- The Company also signed a Communications Agreement with Tahltan June 2019
- Province of British Columbia announced Mineral Tax revenue sharing between the Tahltan and the Kaska
- The Tahltan are currently contractually engaged to provide mine-related services

Both First Nations groups are involved in Coeur's permitting process and are supportive of the Company's continued responsible development

Regulatory Environment and Permitting

Coeur anticipates receiving permit amendments during 3Q 2019 to allow for continued production at Silvertip; otherwise, Silvertip is suitably permitted to support its current operations

- Permits issued under the Mines Act and the Environmental Management Act ("EMA") are the primary authorizations for major mine projects in British Columbia
- Silvertip holds Mines Act Permit 242 (allows ore production) and EMA Permit 7337 (allows effluent discharge), and has been pursuing amendments to allow increased ore production, permanent year-round operation and corresponding increases to effluent discharge allowances:

Upon Acquisition *(October 2017)*	***Temporary Amendment*** *(Currently Applicable)*	***Amendment Application*** *(Submitted March 2018)*
• *Seasonal summer operations*	• *No seasonal restrictions*	• *No seasonal restrictions*
• *74,000 tonnes allowed over operating season*[1]	• *270,000 tonnes allowed from Oct. 1, 2018–Dec. 31, 2019*	• *365,000 tonnes allowed per calendar year*[2]

Amendment Status Update

- Previously anticipated receiving the amendments at the end of 1Q 2019
  - Based on guidance from British Columbia Major Mines Office ("MMO")
- Coeur has supplied all necessary information and satisfied all inquiries by the MMO and First Nations to date
- Delay has been due to the need by MMO to engage directly with the Liard First Nation ("LFN") in its consultations with First Nations[3]
- MMO extended its review period to facilitate engagement with LFN
  - Scheduled to conclude at the end of July
- Coeur supports MMO taking additional time for engagement with LFN
  - LFN is a signatory to Coeur's SEPA and has been a strong supporter of Silvertip

The delay has not, and is not expected to, impact operations

(1) Average of 500 tonnes per day.
(2) Average of 1,000 tonnes per day.
(3) LFN is one of the five Kaska Nations. Some of the Kaska Nations are represented for government consultation purposes by the Kaska Dena Council, but LFN represents itself in this regard.

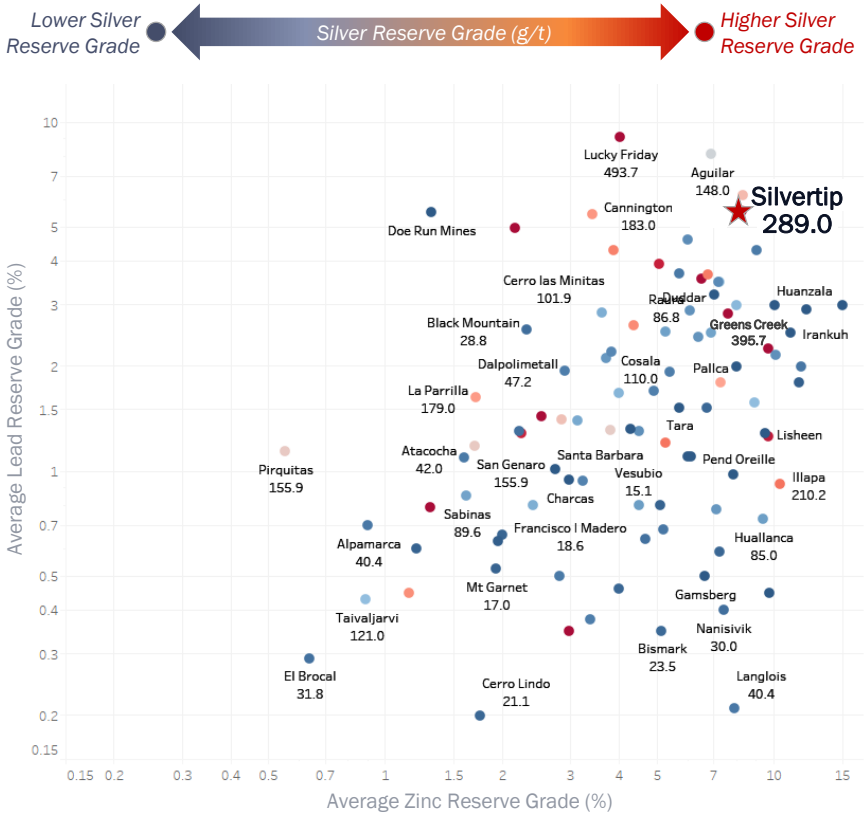

Silvertip Investment Thesis

Coeur acquired Silvertip in October 2017 as part of its long-term strategy of discovering, developing and operating a balanced portfolio of high-quality North American precious metals assets

Investment Rationale

- Highly-prospective deposit with large, underexplored land package with significant expansion potential
- Among the highest-grade operations in the sector
- Diversification of Coeur's geographic and political risk
  - Exited Bolivia and entered Canada
- Diversification of metals mix
  - Zinc and lead introduced to Coeur's portfolio
- Expected to become a long-term source of high-margin production and cash flow

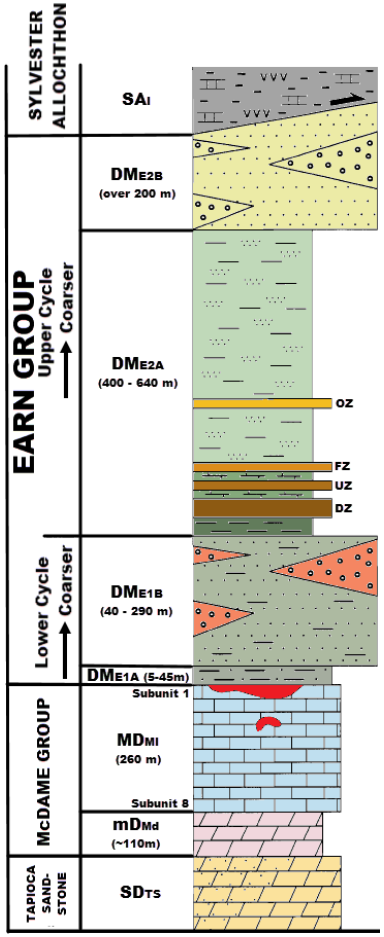

Reserve Benchmarking[1]

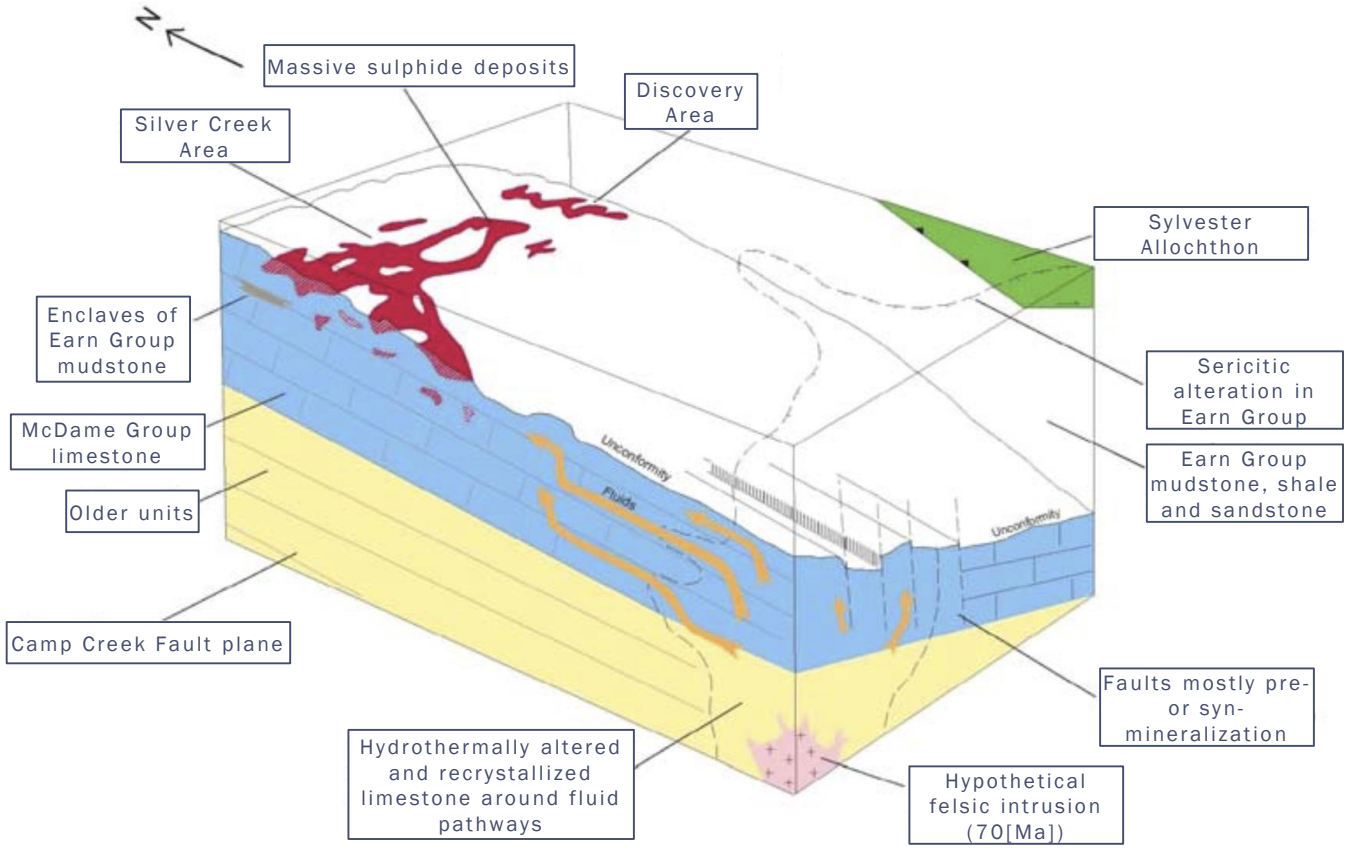

(1) Source: S&P Global Market Intelligence Data as of June 30, 2019. Numerical values represent average silver reserve grade (g/t).

Overview of Silvertip Geologic Model

Silvertip ore fluid, driven by a felsic intrusive source, was deposited as mantos at or near the contact between the McDame and Earn groups. These two geology packages outcrop in numerous locations on the claim block. Ore fluid feeder structures are also the target of exploration drilling

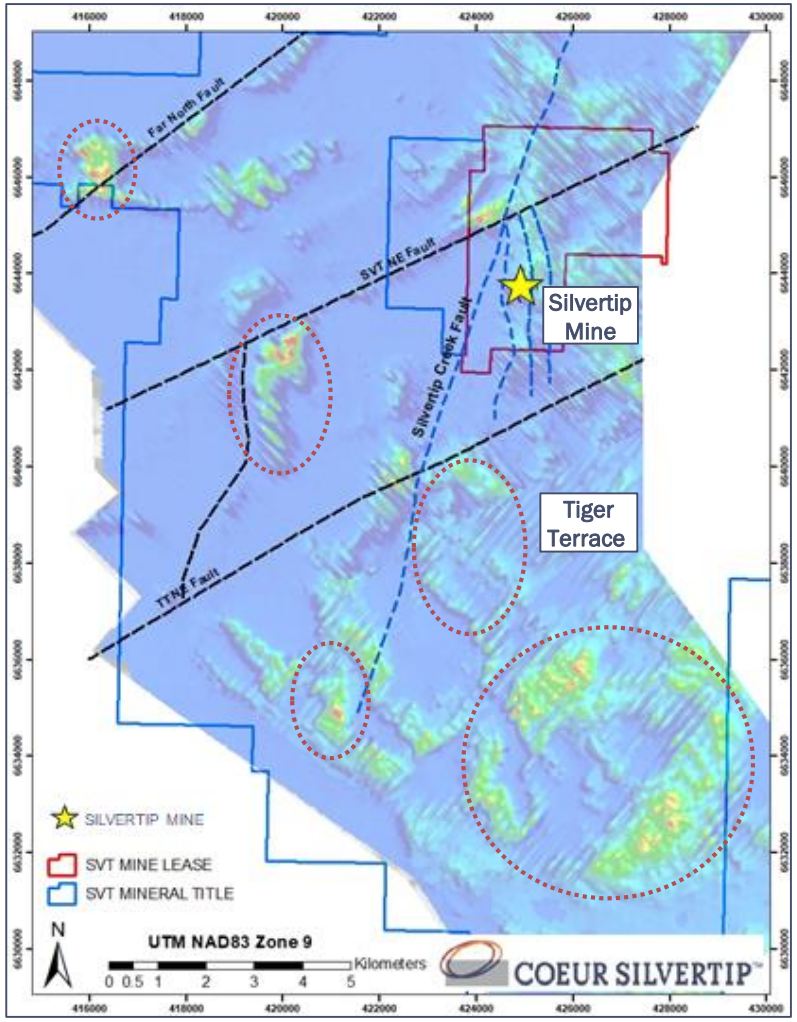

Near-Mine Priority Targets at Silvertip

Employing an integrated exploration program, five near-mine targets have been prioritized for future drilling

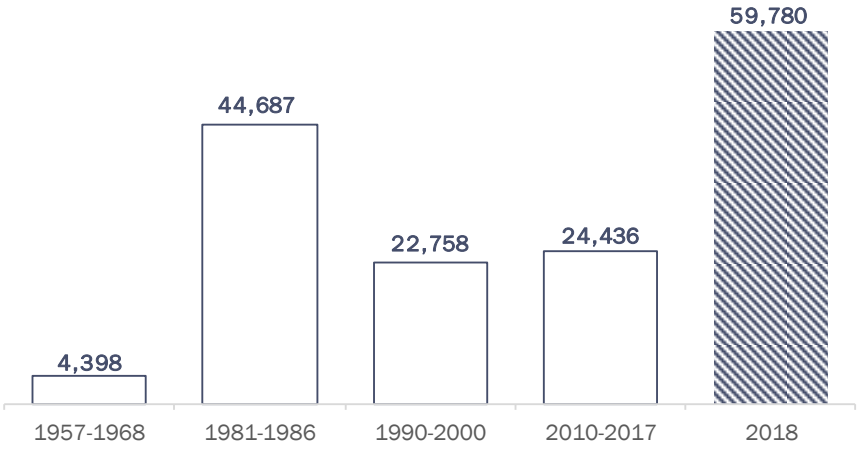

Regional Targets on Geophysical Data

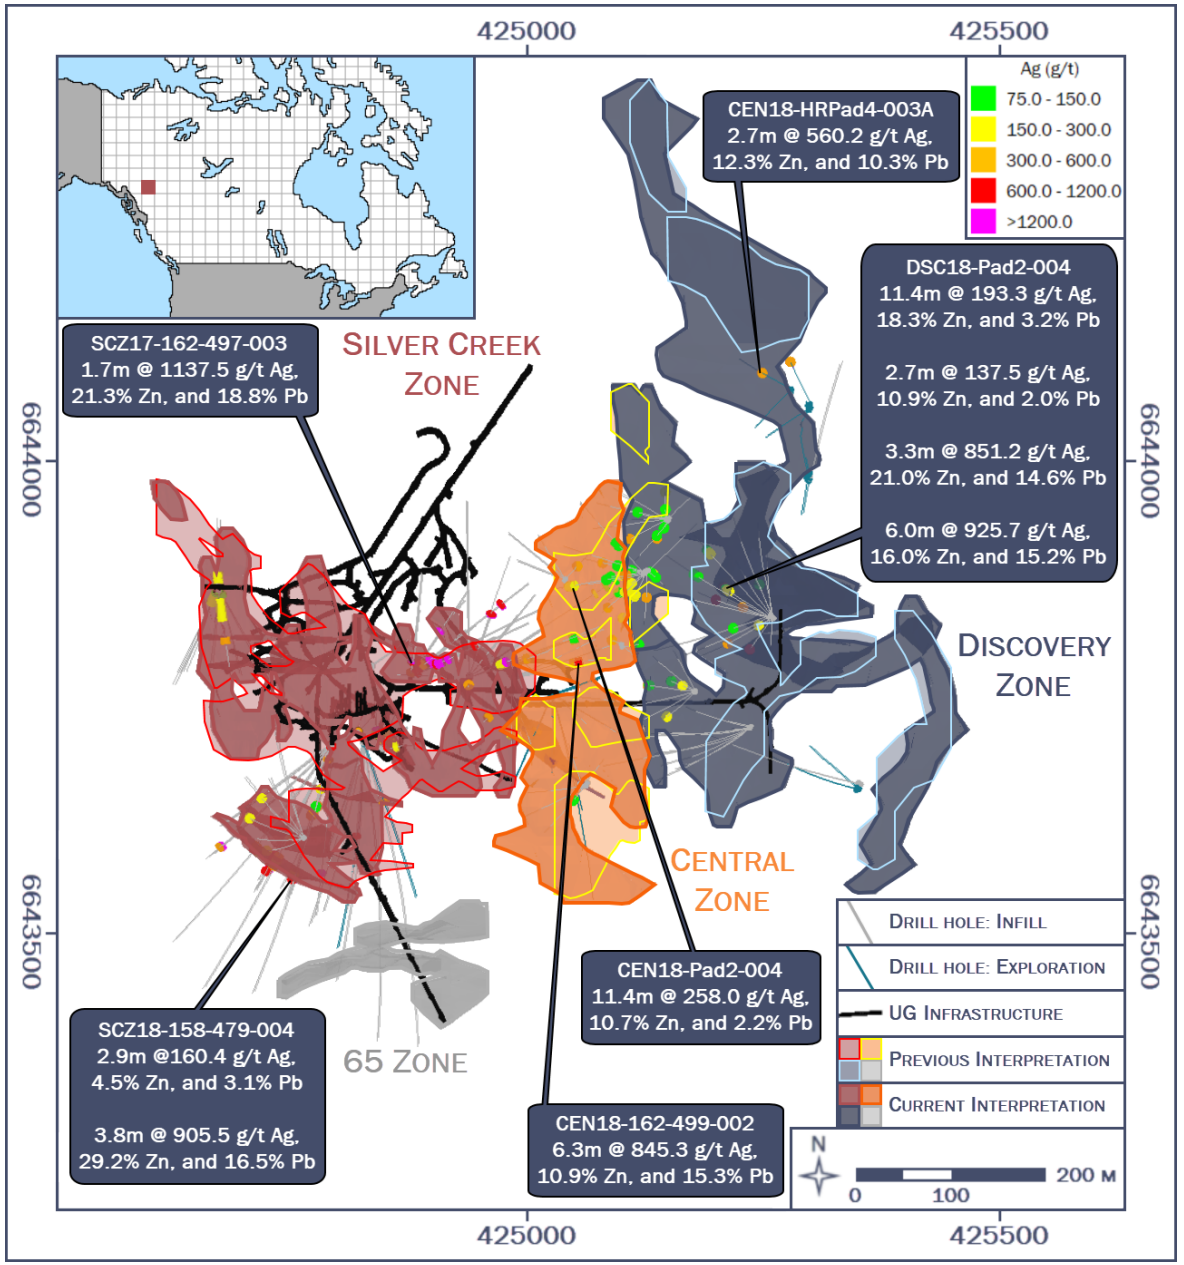

Near-Term "Silvertip-Style" Targets

- Identified through a combination of geology, geochemistry and geophysics interpretation
- Near-mill targets given highest priority
- Multiple overlapping indicators of "Silvertip-style" silver-zinc-lead manto mineralization
  - Same geologic setting as Silvertip

Drill History
(meters)

Plan View With All Significant Intercepts (1H 2018)

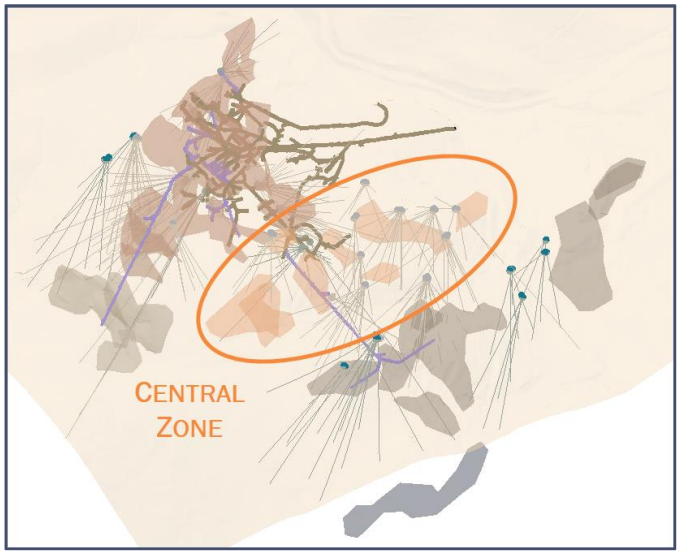

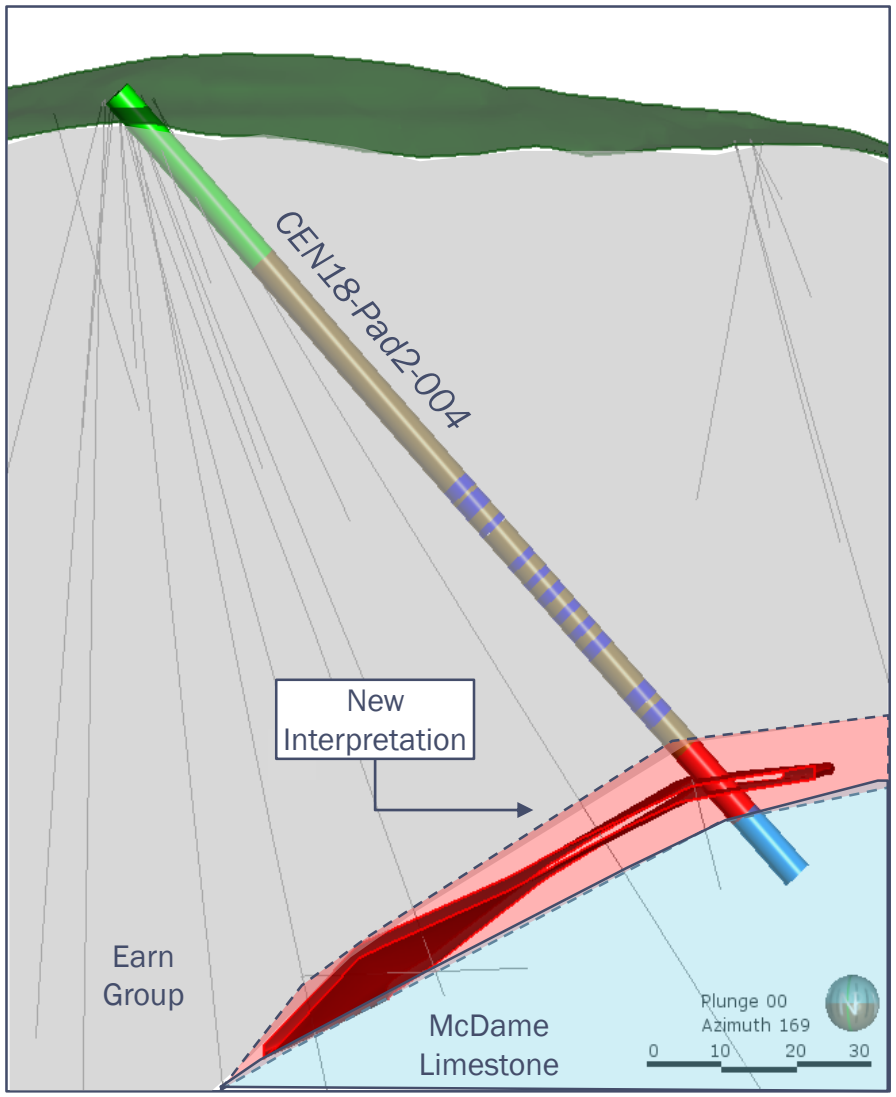

Note: For complete tables of all drill results, please refer to the following links: https://www.coeur.com/_resources/pdfs/180725_SILVERTIP_Exploration_PR_Appendix_v2.pdf; https://www.coeur.com/_resources/pdfs/181212_COEUR_Exploration_PR_Appendix_vFinal.pdf.

2018 Central Zone Drilling Highlights

Surface Drilling Summary

- Central Zone was main focus of the 2018 surface infill drilling campaign
- Preliminary modeling portrayed the zone as discontinuous, discrete pods as a result of limited drilling data from prior exploration
- 2018 drilling confirmed the continuity between discrete pods, in some places thicker mineralization than previously expected

Hole ID	From (m)	To (m)	Length (m)	Silver (g/t)	Zinc (%)	Lead (%)
CEN18-Pad2-004	113.1	124.5	11.4	258.0	10.7	2.2

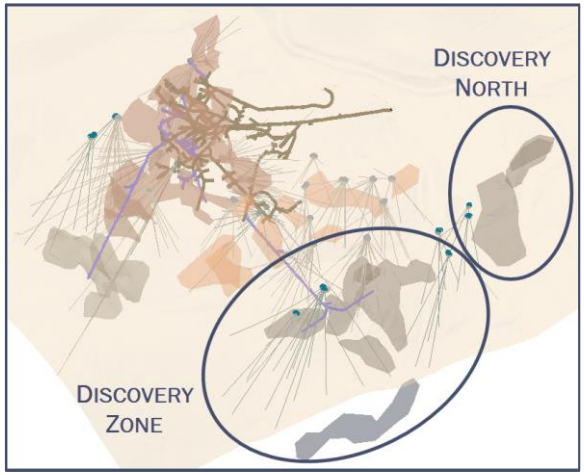

Note: For complete tables of all drill results, please refer to the following links: https://www.coeur.com/_resources/pdfs/180725_SILVERTIP_Exploration_PR_Appendix_v2.pdf; https://www.coeur.com/_resources/pdfs/181212_COEUR_Exploration_PR_Appendix_vFinal.pdf.

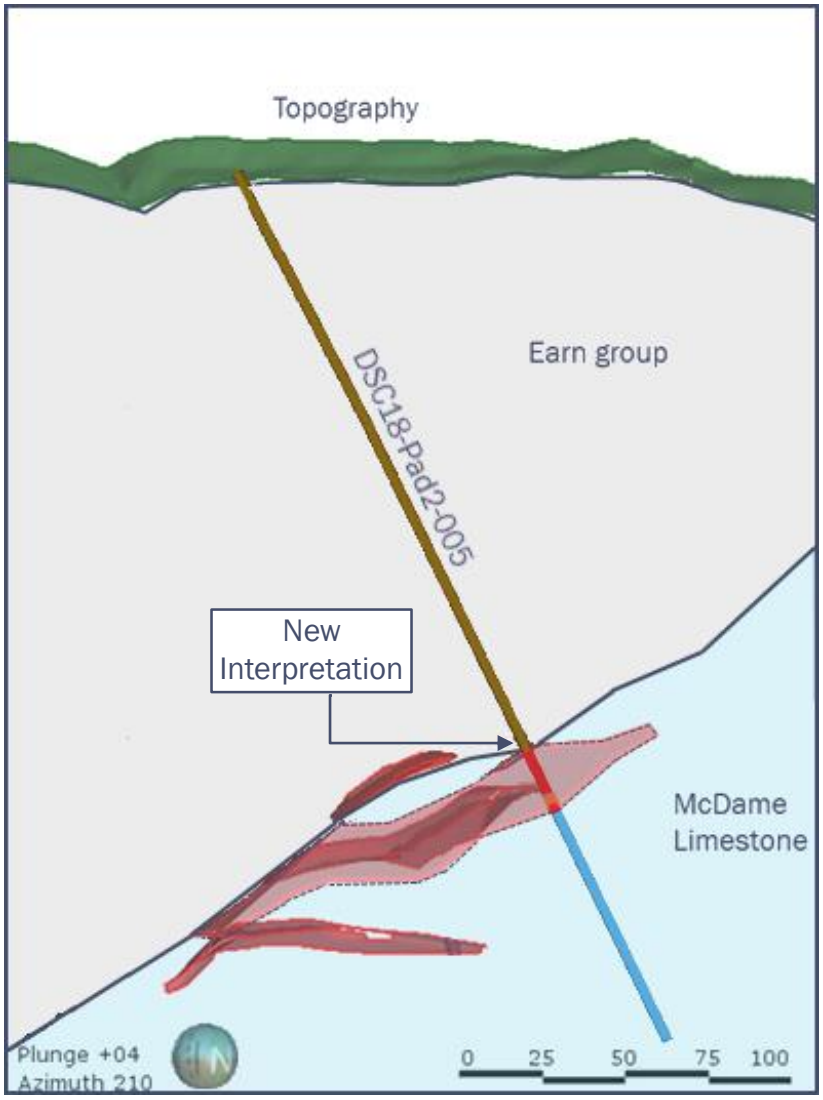

2018 Discovery Zone Drilling Highlights

COEUR MINING

Surface Drilling Summary

- Thick zones (≥ 30 meter) of mineralization, previously unrecognized, were intercepted at Discovery Zone in early-2018
- This area has demonstrated potential for multiple stacked horizons of manto mineralization at and below the Earn contact
- 2019 drilling on Discovery will focus on expanding this resource down-dip (east), as well as south and north, testing a new zone called Discovery North

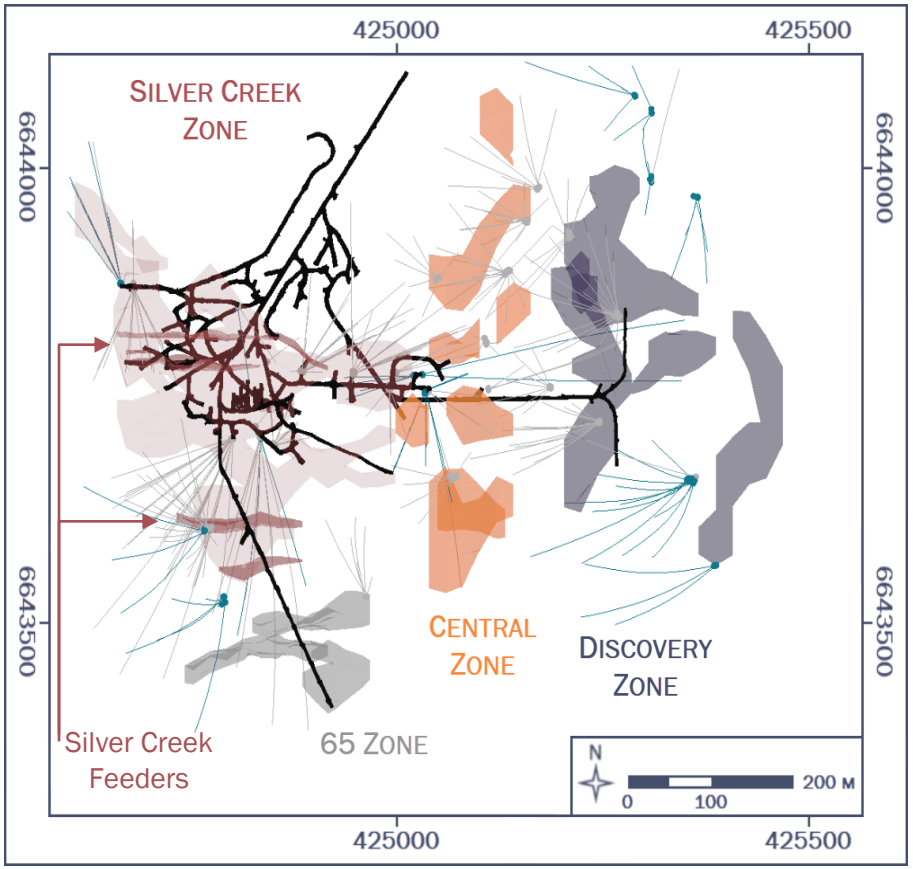

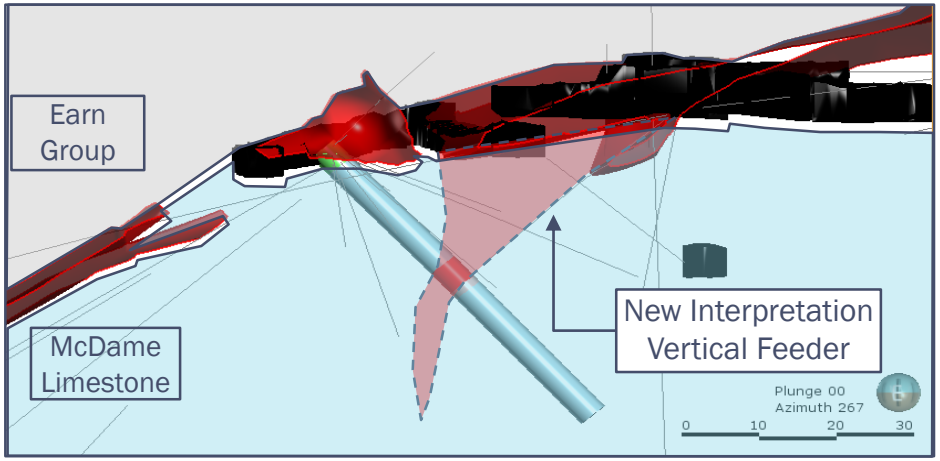

Hole ID	From (m)	To (m)	Length (m)	Silver (g/t)	Zinc (%)	Lead (%)
DSC18-Pad2-005	198.1	212.8	14.5	146.8	18.2	1.9

Note: For complete tables of all drill results, please refer to the following links: https://www.coeur.com/_resources/pdfs/180725_SILVERTIP_Exploration_PR_Appendix_v2.pdf; https://www.coeur.com/_resources/pdfs/181212_COEUR_Exploration_PR_Appendix_vFinal.pdf.

2018 Silver Creek Zone Feeder Structures and Manto

- 2018 Underground Drilling focused on delineating/expanding vertical feeders within Silver Creek, and manto horizon at Central Zone
- Several holes crossed the mineralized Camp Creek Fault and sub-parallel mineralized feeder structures at Silver Creek
- Although this is a base metal system, these structures contain enhanced silver and gold grades

Hole ID	From (m)	To (m)	Length (m)	Silver (g/t)	Zinc (%)	Lead (%)
SCZ18-153-484-009	23.1	28.0	5.0	155.8	10.8	2.6

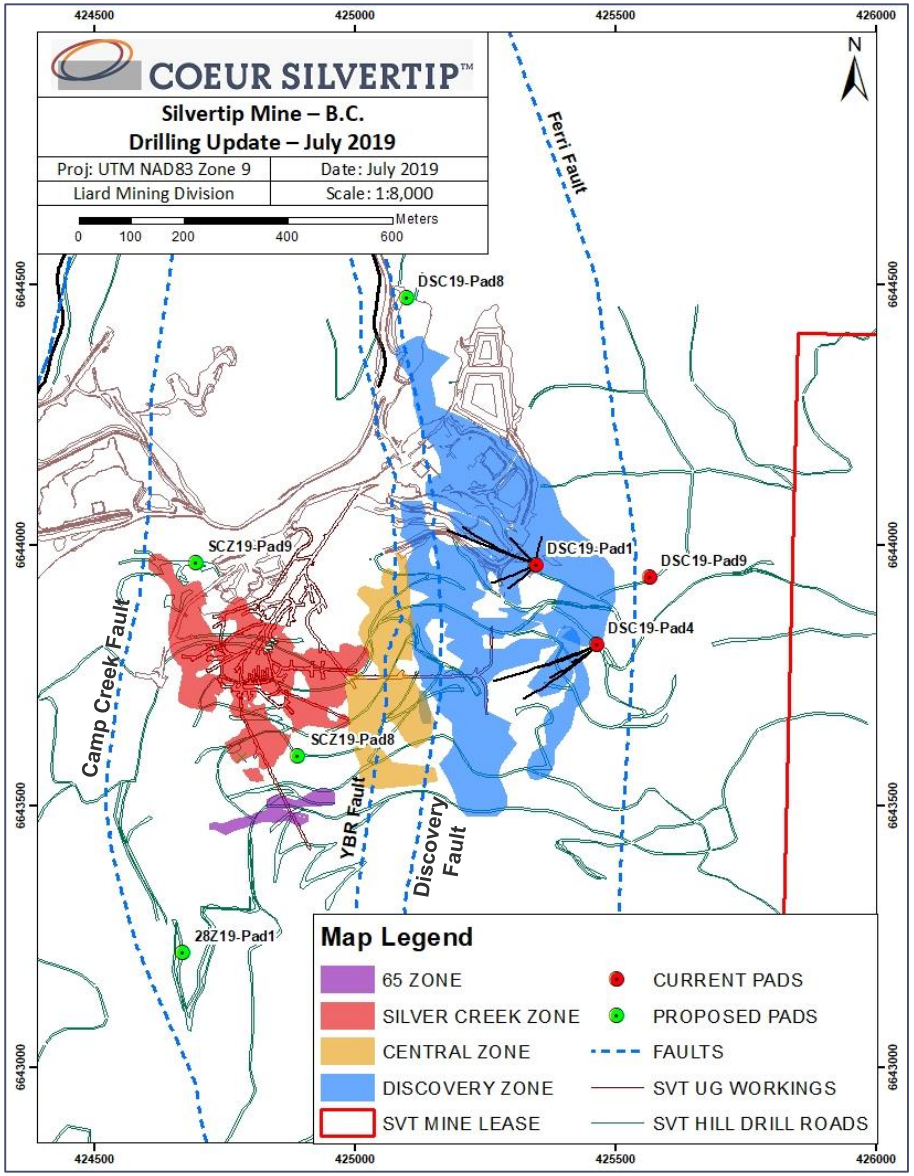

Note: For complete tables of all drill results, please refer to the following links: https://www.coeur.com/_resources/pdfs/180725_SILVERTIP_Exploration_PR_Appendix_v2.pdf; https://www.coeur.com/_resources/pdfs/181212_COEUR_Exploration_PR_Appendix_vFinal.pdf.

2019 Drilling Expected to Grow and Convert Resources

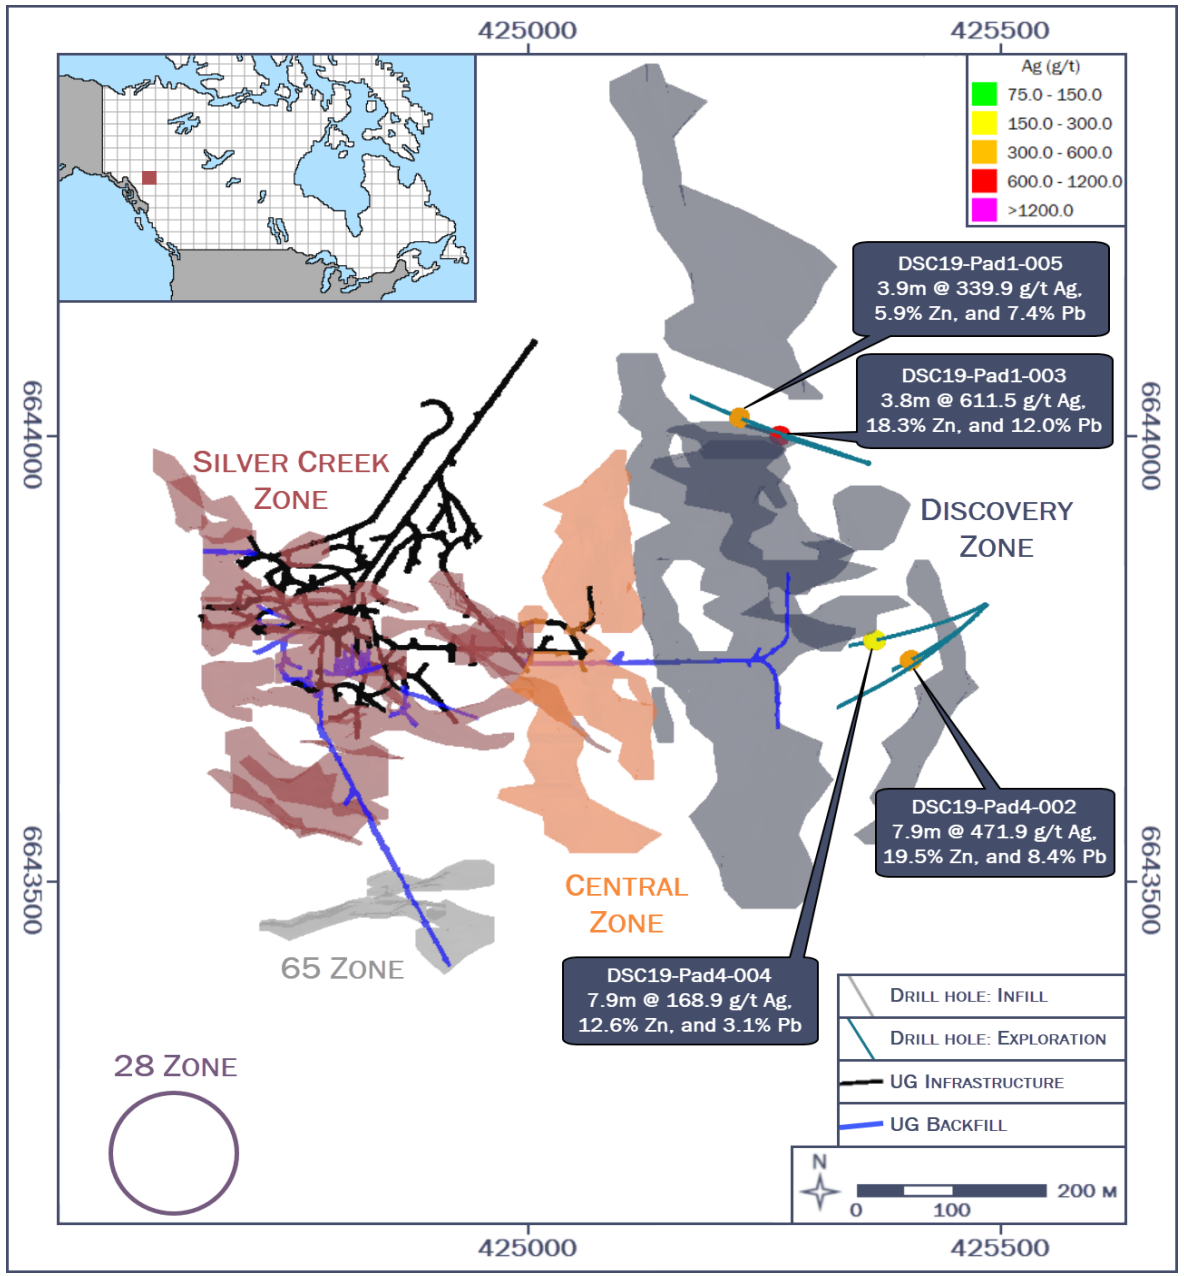

COEUR MINING®

Selected Commentary

- 2018 drilling at Silvertip focused on infill and resource conversion
- Primary focus of 2019 drilling program is resource growth and expansion
- Top priority areas for 2019 resource expansion drilling include Discovery East and North
  - Historic intercepts in these areas demonstrate good potential for expanding high-grade silver-zinc-lead manto mineralization to the east and north
- Zone 28 drilling will test high-grade historic intercepts south of Silver Creek Zone, and adjacent to Camp Creek Fault
- High-grade feeder and manto mineralization in the Silver Creek Zone will be targeted from surface in 2019

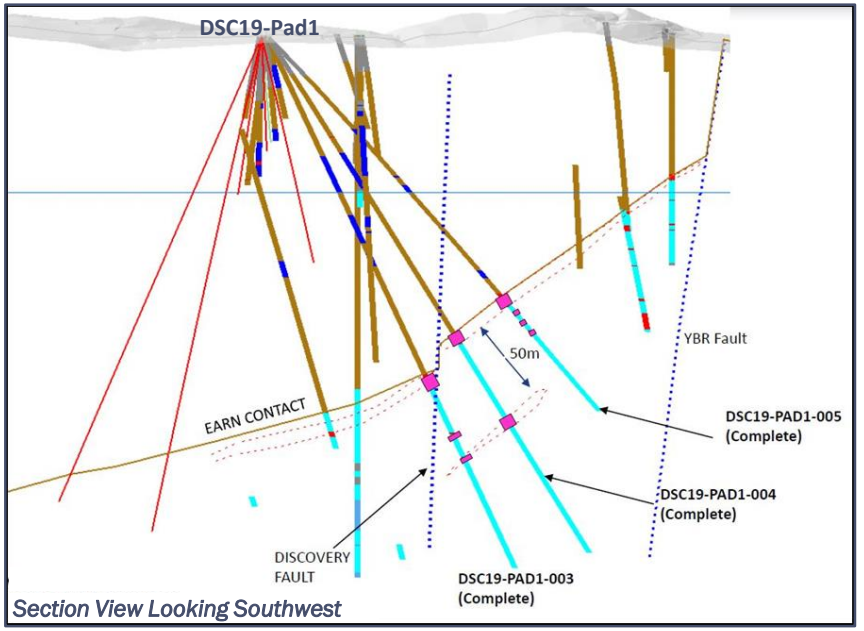

Plan View of Expanded Resource (2019)

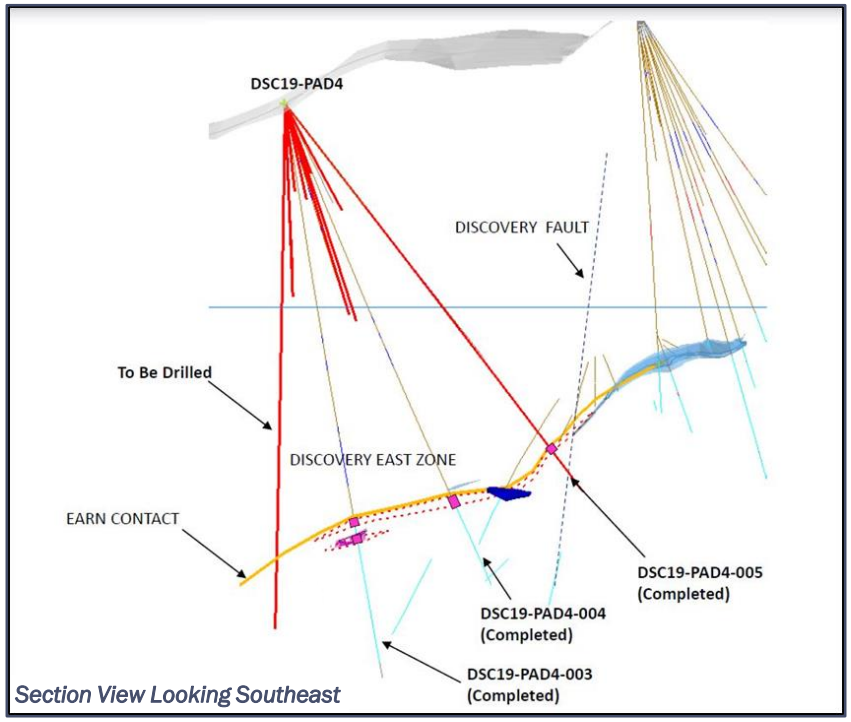

Note: Please refer to the appendix of this presentation for a complete table of all 2019 drill results.

Current Progress of 2019 Drilling

- Three surface rigs currently drilling expansion holes at Discovery East
- 13 of 15 resource expansion holes drilled at Discovery East have successfully intercepted manto mineralization
- Stacked manto horizons have been intercepted in early-2019 drilling at Discovery East
- Discovery North will be targeted next in 2019

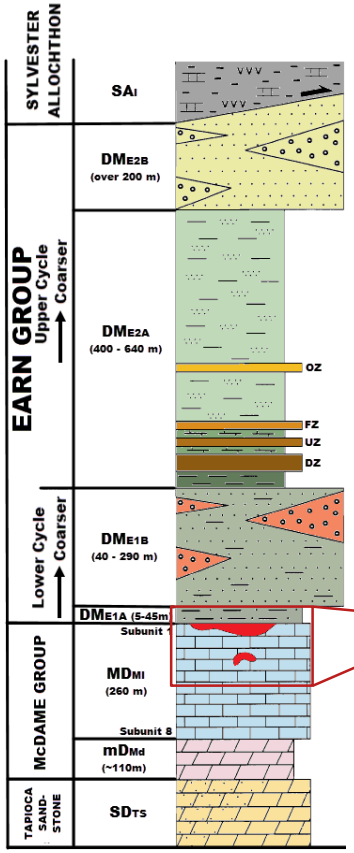

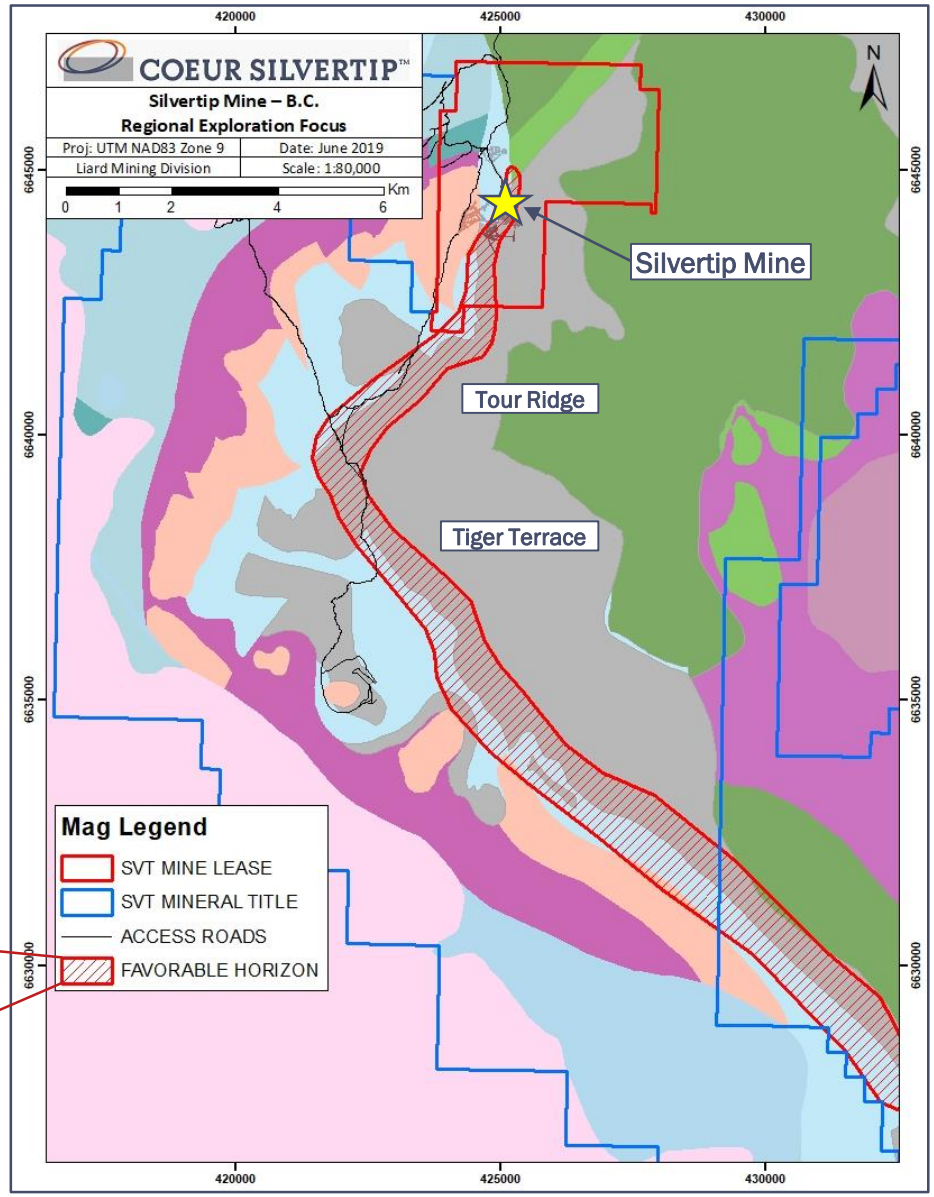

Note: Please refer to the appendix of this presentation for a complete table of all 2019 drill results.

Favorable Horizon Largely Unexplored

- Over 20 kilometer of Earn-McDame contact within Coeur Silvertip claims
- Predominately unexplored
- Main focus for near-term regional exploration programs
- Potential for discovering another “Silvertip-style” deposit along this trend

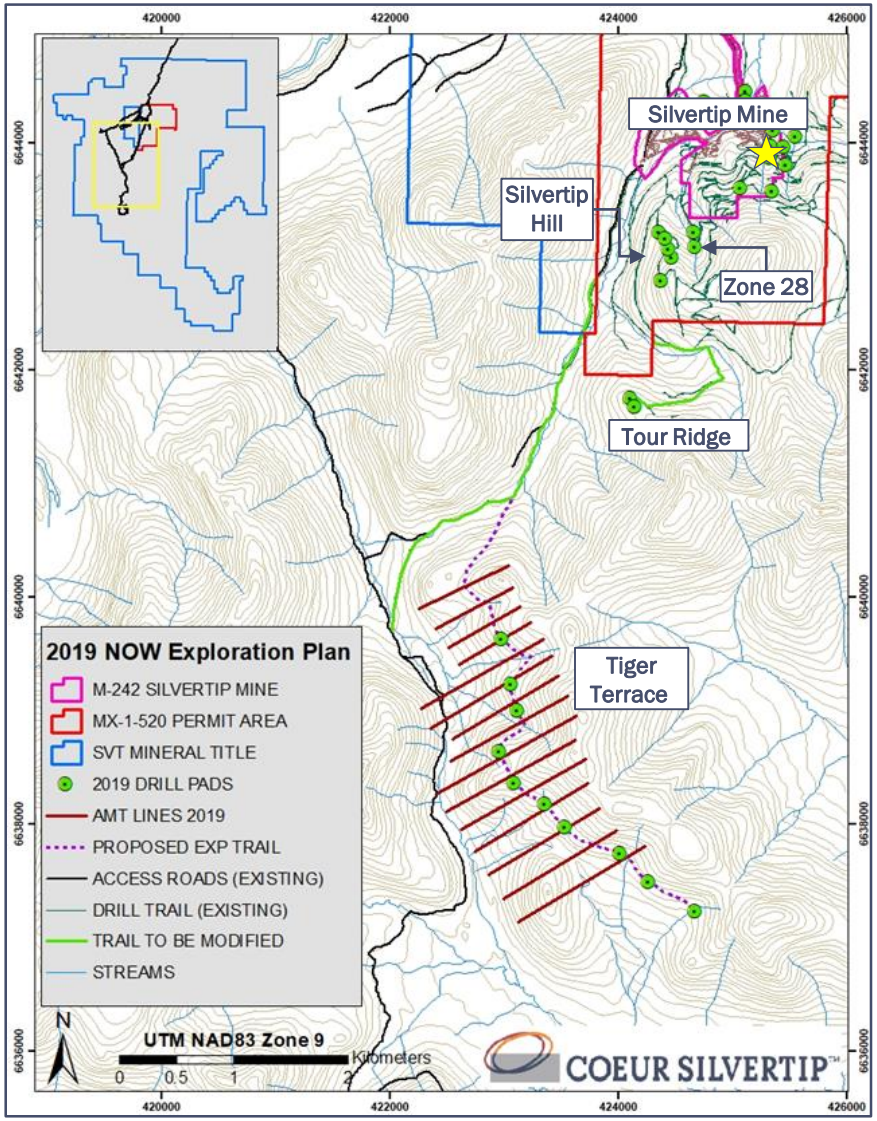

2019 Regional Exploration Program: Making New Discoveries

Exploration within the Silvertip Exploration Concessions has been limited to less than ~5% of the overall area

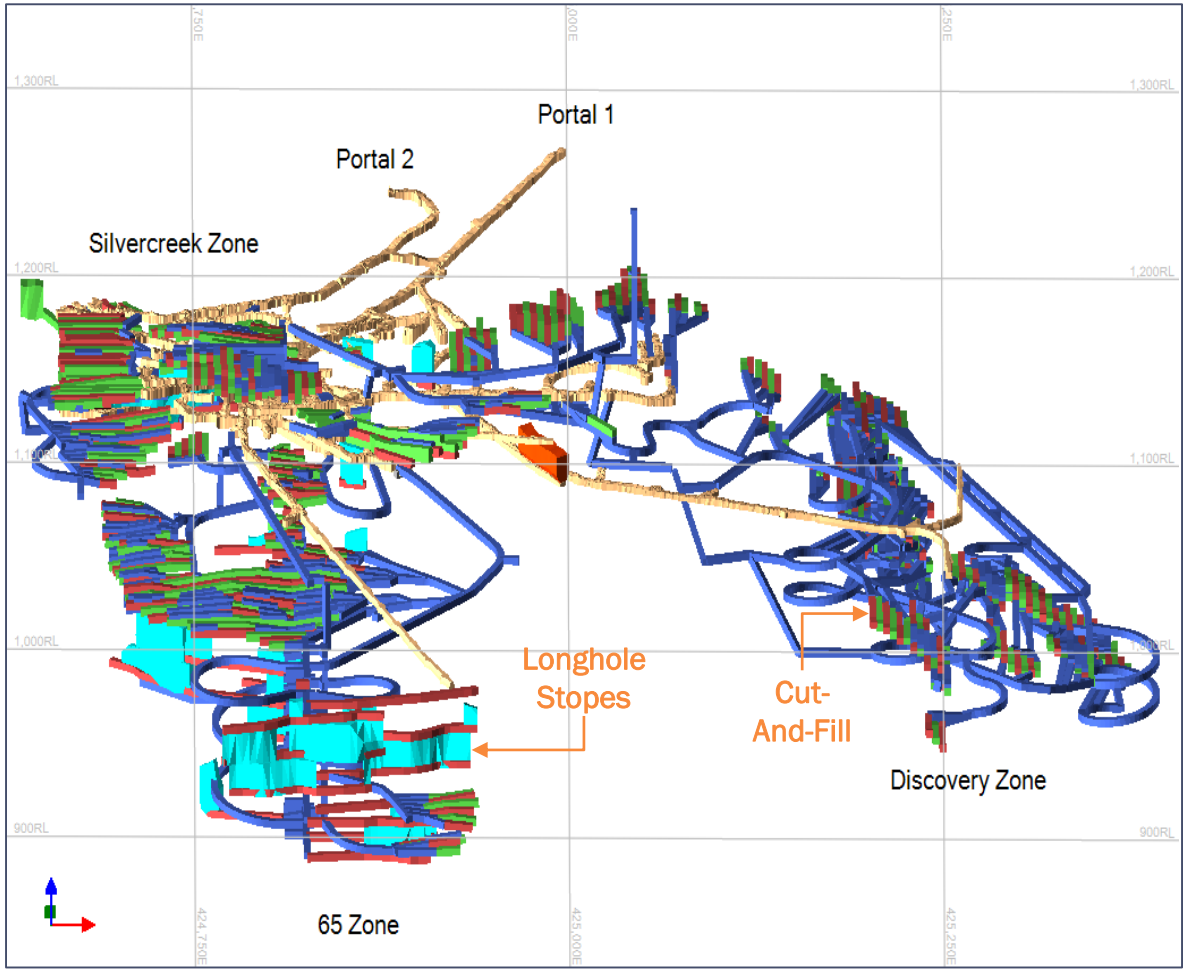

- Goal of 2019 Regional Exploration Program is making a "*New Discovery*"
  - **Tiger Terrace:** Top "Near-Silvertip" Target
- Regional Exploration Objectives for 2019
  - Early-season stream-sediment sampling to help validate historic geochemical and develop new targets
  - Mid-season ground-based AMT[1] geophysical survey to help refine structures and high-priority drill targets
  - 2,000 meter late-season drilling to test northern portion of eight-kilometer trend
- Multiple overlapping indicators of "Silvertip-style" silver-zinc-lead manto mineralization
  - Same stratigraphic horizon and structural setting as Silvertip
  - Anomalous silver-zinc-lead soil samples and coincident geophysical anomalies confirm strength of sulfide target

(1) Audio-frequency Magneto-Telluric.

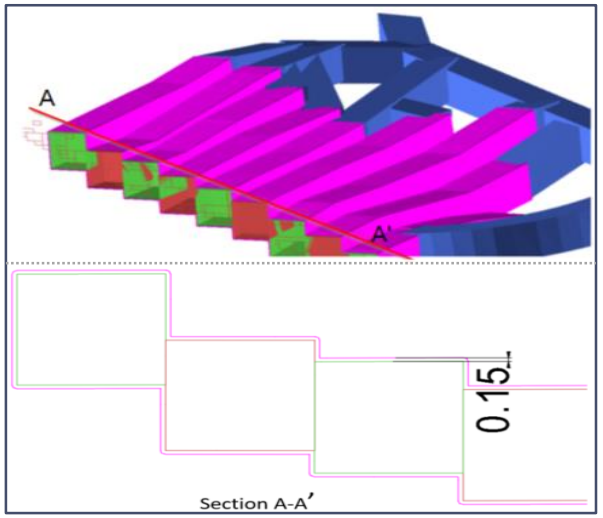

Silvertip Mine Design and Mining Method

The life-of-mine plan at Silvertip consists of approximately 75% cut-and-fill and 25% longhole stoping

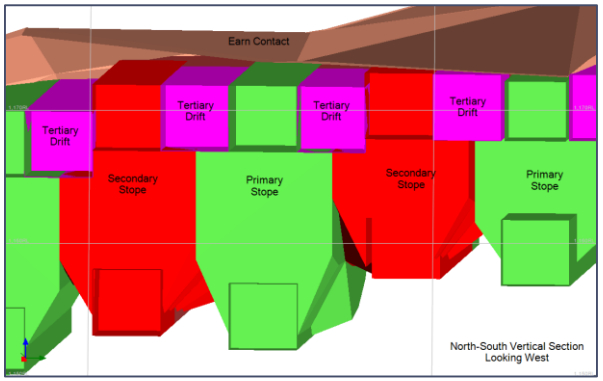

Mine Design

Typical Cut-And-Fill Layout

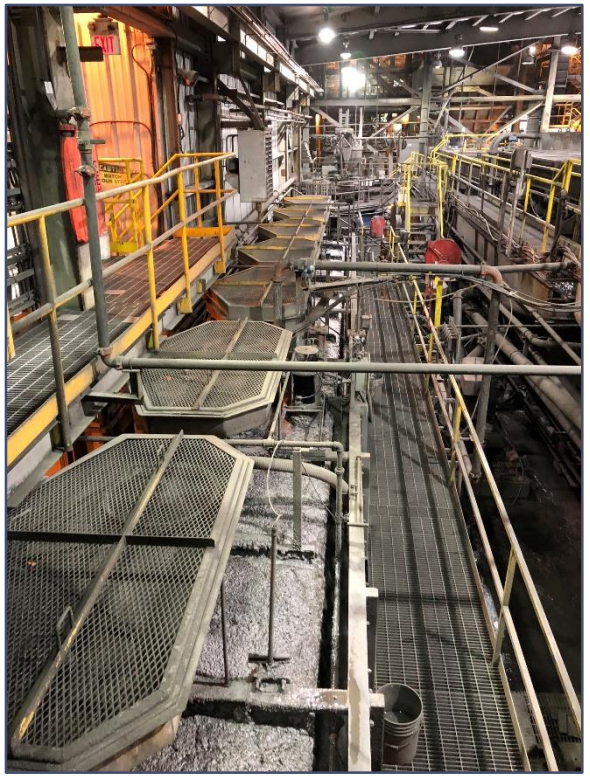

Typical Longhole Stoping Layout

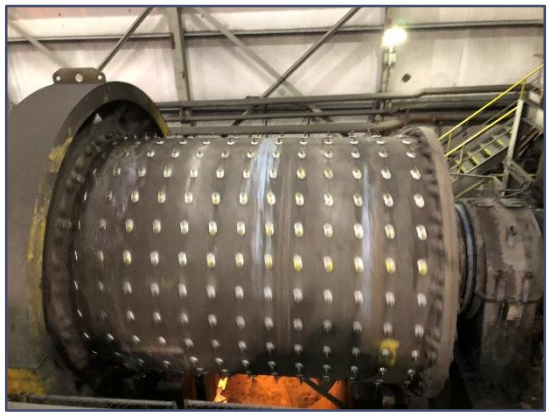

Silvertip Mill Building

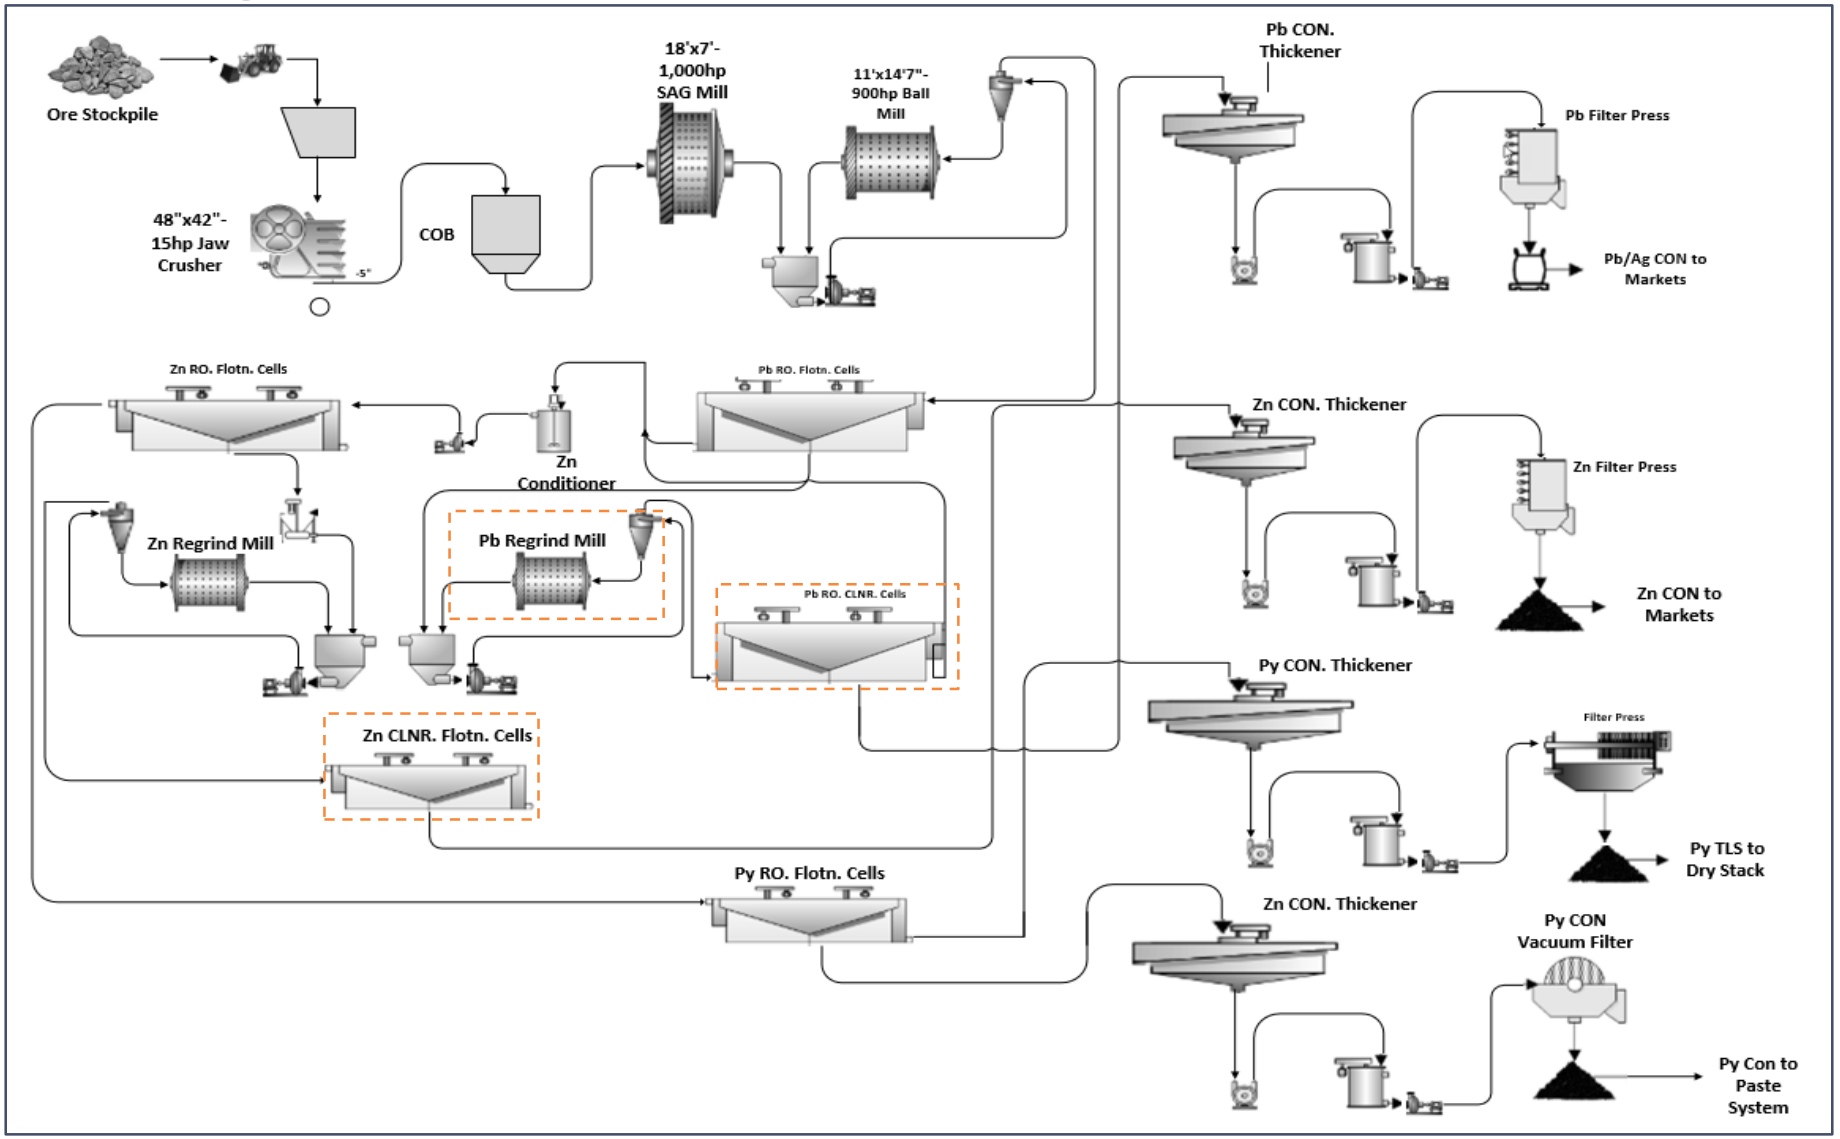

Simplified Silvertip Mill Process Flowsheet[1]

Mineral processing includes: (i) crushing, (ii) grinding, (iii) flotation, and (iv) dewatering circuits

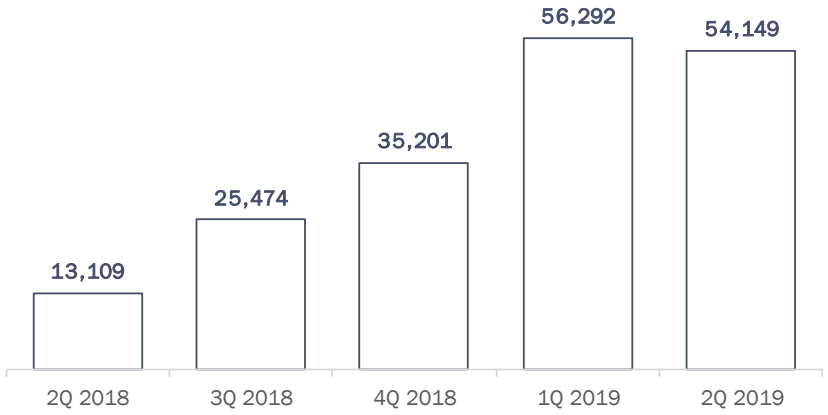

Note: Lead regrind mill not currently part of mill configuration and additional flotation capacity would need to be added to accommodate 1,250 mtpd.

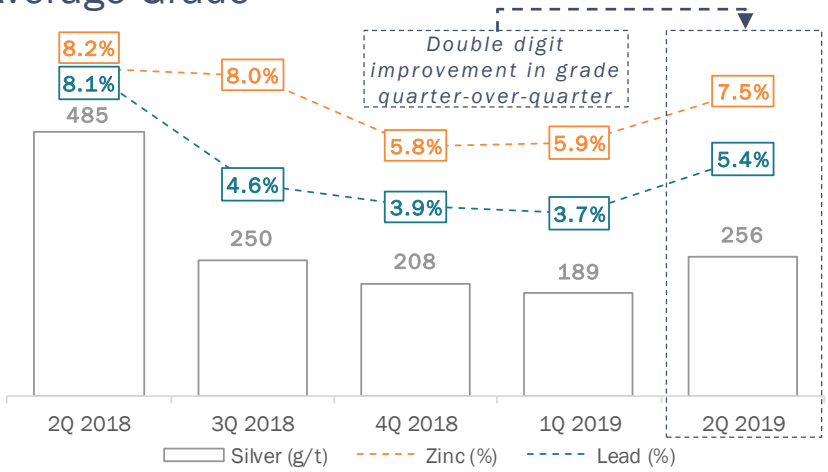

Review of Silvertip Operational Performance[1]

Despite the slower than anticipated ramp-up, operations at Silvertip have been improving with 2Q 2019 representing the best period of operational performance since acquisition

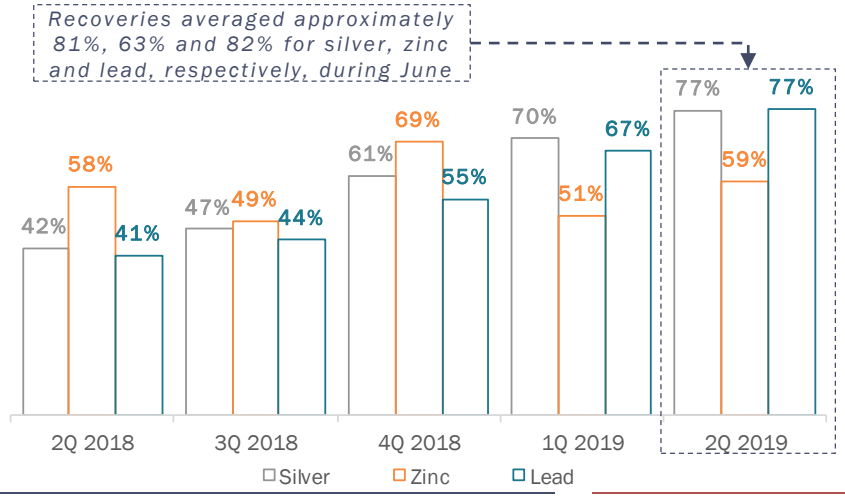

Tonnes Milled

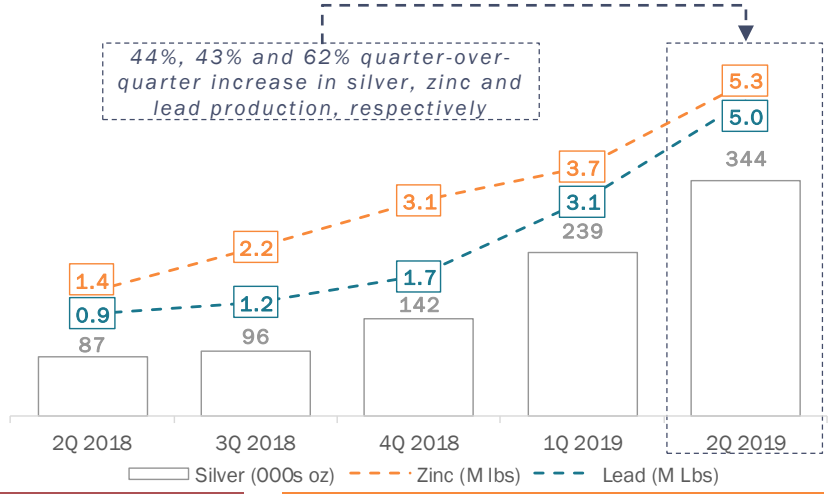

Average Grade

Average Recovery Rates[2]

Production

(1) Silvertip achieved commercial production on September 1, 2018. All figures above include pre-commercial production.

Overview of Silvertip Technical Report

Highlighted below are key assumptions and summary operational data from Silvertip's technical report[1]

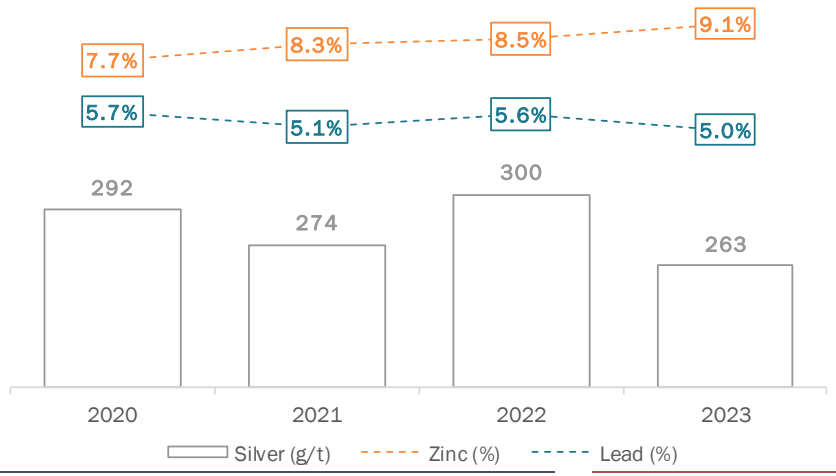

Key Assumptions[2]

Metal Price Assumptions		
Silver	$/oz	$17.00
Zinc	$/lb	$1.25
Lead	$/lb	$1.00
Average Metallurgical Recoveries		
Silver	%	88%
Zinc	%	90%
Lead	%	92%
Average Concentrate Grades		
Zinc [3]	%	50%
Lead [4]	%	52%

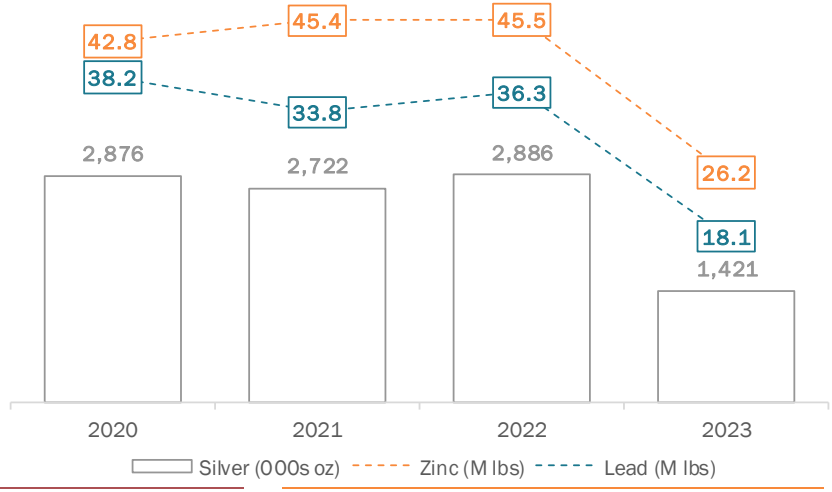

Annual Throughput
(000s tonnes)

Average Head Grade

Payable Metal

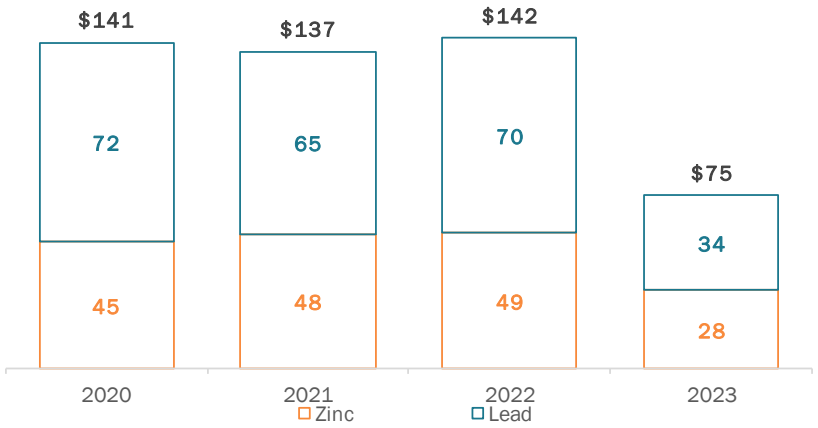

(1) Canadian investors should refer to the technical report effective November 1, 2018 for Silvertip on file at www.sedar.com.
(2) Assumptions for life-of-mine analysis.
(3) Average silver grade in zinc concentrate is 244 g/t.
(4) Average silver grade in lead concentrate is 2,474 g/t.

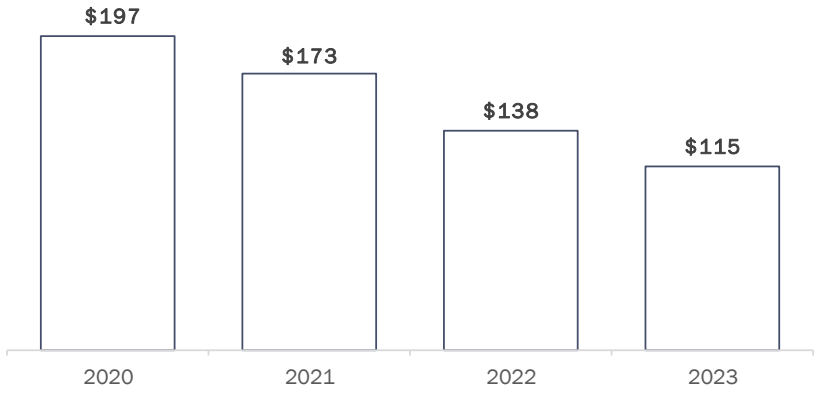

Overview of Silvertip Technical Report (cont.)

Highlighted below is the high-level financial information from Silvertip's technical report, which utilizes the assumptions outlined on the previous page[1]

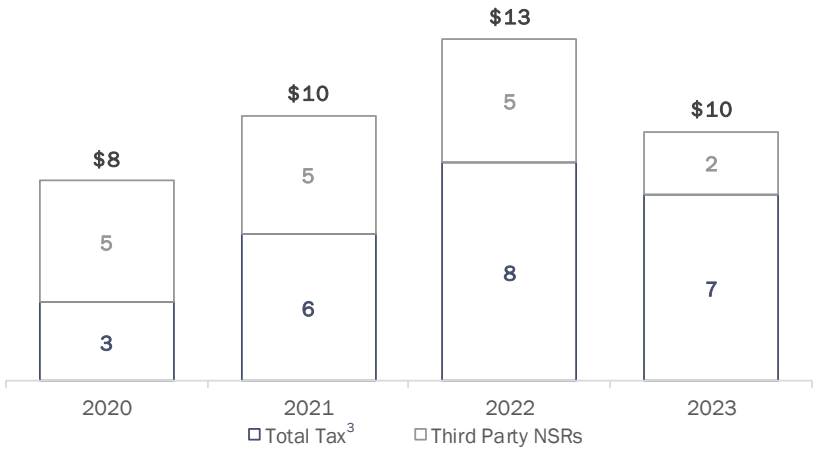

Net Revenue[2]
($M)

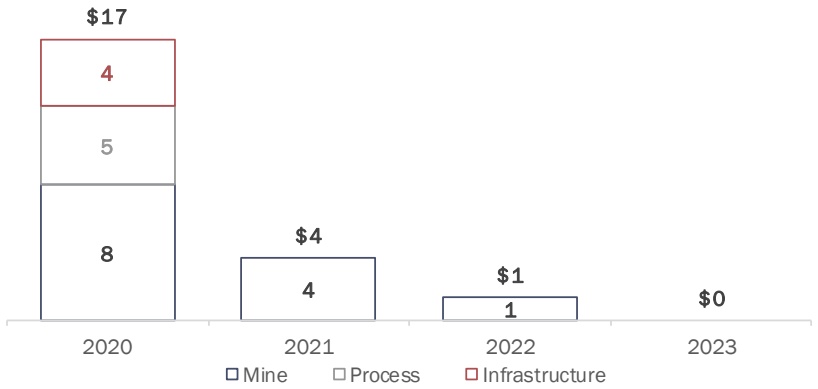

Operating Cost Breakdown
($/tonne milled)

Taxes and Royalties
($M)

Capital Expenditures
($M)

(1) Canadian investors should refer to the technical report for Silvertip on file at www.sedar.com.
(2) Revenue net of treatment and refining charges, transportation and penalties.
(3) Provincial Mining Tax of 13% and Canadian Income Tax of 27% (Canadian rate of 15% and British Columbia rate of 12%). Provincial Mining Tax is tax deductible in calculating income tax expense. Analysis assumes usage of Coeur's net operating losses.

Silvertip Reserve and Resource Summary

	Tons	Grade			Contained Metal		
		Ag (oz/ton)	Zn (%)	Pb (%)	Ag (oz)	Zn (lbs)	Pb (lbs)
Proven	280,000	10.81	9.83%	7.53%	3,026,000	55,039,000	42,156,000

Inferred	**583,000**	**7.91**	**9.31%**	**5.02%**	**4,612,000**	**108,621,000**	**58,593,000**

Notes to Mineral Reserves and Mineral Resources:

(1) Mineral Reserves were estimated by Rodrigo Simidu, P.Eng. and Talha Khan, P.Eng., as of December 31, 2018.

(2) Mineral Resources were estimated by Scott Jimmerson, as of December 31, 2018.

(3) Assumed metal prices for Mineral Reserves were $17.00/oz silver, $1.25/lb zinc and $1.00/lb lead.

(4) Assumed metal prices for Mineral Resources were $20.00/oz silver, $1.30/lb zinc and $1.05/lb lead.

(5) Mineral Reserves are reported at a cut-off grade of Net Smelter Return ("NSR") $160/tonne. Mineral Resources are in addition to Mineral Reserves, depleted, and at a cut-off grade of NSR $130/tonne.

(6) Mineral resources are in addition to mineral reserves and do not have demonstrated economic viability. Inferred Mineral Resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of Mineral Reserves.

(7) An Inferred Mineral Resource has a lower level of confidence than that applied to an Indicated Mineral Resource and must not be converted to a Mineral Reserve. It is reasonably expected that some of the Inferred Mineral Resources could be upgraded to Indicated Mineral Resources with continued exploration.

(8) Rounding of tonnes, tons, average grades, and contained metal may result in apparent discrepancies with total rounded tonnes, tons, average grades, and total contained metal.

(9) For details on the estimation of mineral resources and reserves, including the key assumptions, parameters and methods used to estimate the Mineral Resources and Mineral Reserves, Canadian investors should refer to the NI 43-101 Technical Reports for Silvertip on file at www.sedar.com.

Silvertip Concentrate Quality and Marketing

Coeur has exclusive offtake agreements with Ocean Partners, pursuant to which it has agreed to sell all zinc and lead concentrate produced at Silvertip

Concentrate Quality

Key Elements to Control and Monitor

	Standard Payable Elements	Typical Deleterious Elements
Zinc Concentrate	Zinc and silver	Lead, iron, silica, cadmium, mercury and arsenic
Lead Concentrate	Lead and silver	Iron, silica, mercury and arsenic

Marketing Overview

- Coeur currently has offtake agreements in place with Ocean Partners USA Inc. ("Ocean Partners") for both its zinc and lead concentrate produced at Silvertip
  - Ocean Partners then sells the concentrates onto the final smelter(s)
- The agreements cover Silvertip's production over the next four years
  - Provides Coeur with a reputable and reliable counterparty, reasonable terms and stability
- Silvertip is currently delivering under its lead offtake agreement; however, it has not yet been able to achieve the contractual specification under its zinc offtake agreement
- There are currently numerous smelters and traders who are aggressively pursuing Coeur's zinc and lead concentrates
  - This number is expected to grow as recoveries improve and the overall quality of the zinc and lead concentrates are optimized

Breaking of the Silvertip lead concentrate bags in Korea for the purpose of sampling the concentrate

Treatment and Refining Charge Landscape

COEUR MINING

Overview of Concentrate Benchmark Terms

2019 Benchmarks[1]	Zinc Concentrate	Lead Concentrate
Treatment Charge ($/dmt)	• $245.00	• $98.00
Silver Refining Charge ($/oz)[2]	• N/A	• $0.60
Escalators/ De-Escalators	• $0.05 per dmt for each $1.00 exceeding $3,000[3] • $0.00 per dmt for each $1.00 exceeding $2,700[3] • $0.02 per dmt for each $1.00 below $2,700[3]	• N/A

Selected Perspectives

- There is currently ample supply of zinc concentrate in the market and the surplus is expected to increase over the coming years, forecasted to remain intact until at least the end of 2021
  - Supports an elevated annual benchmark but also heavily dictates the upwards movement of treatment charges in the spot market
  - Smelters are equipped with leverage in all aspects of negotiations and spot treatment charges are currently above the annual benchmark for 2019
- The lead concentrate market is relatively stable and is expected to remain well-balanced throughout the duration of 2019 and 2020
  - Spot treatment charges currently favor the miner and are below the annual benchmark for 2019
- As zinc and lead concentrate production increases at Silvertip, treatment and refining charges will be key components to the overall profitability of the operation
  - Treatment and refining charges are driven by the volume of concentrate being sold

Note: All figures in USD.
(1) Benchmarks are annual.
(2) Dollar per payable troy ounce of silver.
(3) Figures represent prices for zinc.

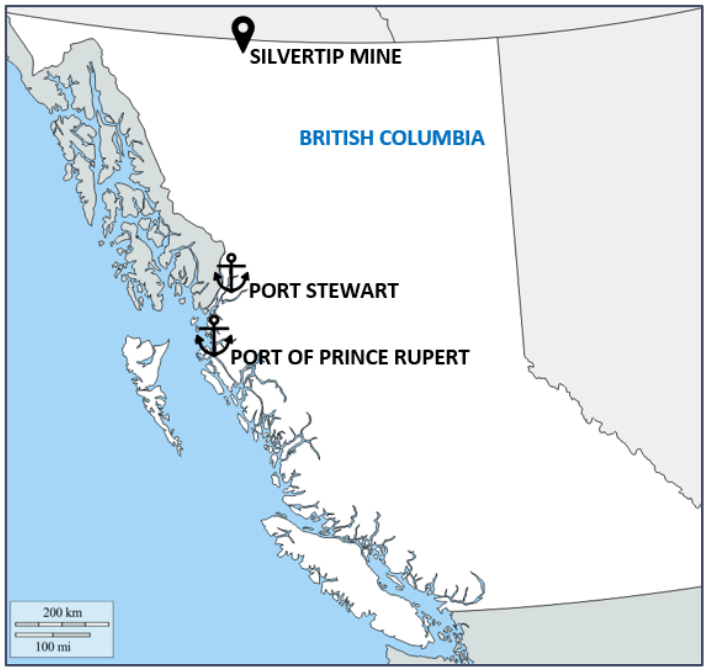

Silvertip Transportation and Logistics

The transportation process at Silvertip is operating efficiently and effectively. Costs associated with transportation are critical to manage and have potential to be further optimized as Silvertip achieves steady state production

Overview of Transportation and Logistics

	Zinc Concentrate	Lead Concentrate
Port/ Location	Port of Stewart, British Columbia	Port of Prince Rupert, British Columbia
Shipping Method	Bulk	Bags in containers
Distance (km)[1]	~750	~1,020
Trucking Provider	Tahltan-Arrow Transportation	Tri-Line Carriers
All-in Cost ($/wmt)[2]	C$175–200	C$190–215

Transportation Map

- The Ports of Stewart and Prince Rupert provide final destination shipping options ensuring global reach and marketability for Silvertip's zinc and lead concentrate
  - Some final destinations include Onsan, Korea and Fangcheng, China
- Coeur has well established relationships with all parties involved throughout Silvertip's transportation chain
  - The Company looks forward to bolstering these relationships as Silvertip continues to ramp-up its production

(1) Distance from Silvertip to respective port outlined above.
(2) Reflects all-in transportation costs from Silvertip mine to final destination(s).

Transitioning From Stabilization to Optimization

Optimization opportunities designed to improve key metrics and lead to lower costs as well as improved productivity:

- Mining and process rate
  - Impact of 1,250 mtpd vs. 1,000 mtpd
- Improving recoveries and concentrate grades
- Workforce optimization
  - Rationalization of contractors
  - Retention/wage initiatives
- Optimize the mine plan
  - Incorporate new drilling results
  - Further optimize mine design
- Prioritize value maximizing capital opportunities
- Others
  - Power
  - Cement usage
  - Logistics

COEUR MINING®
We pursue a higher standard

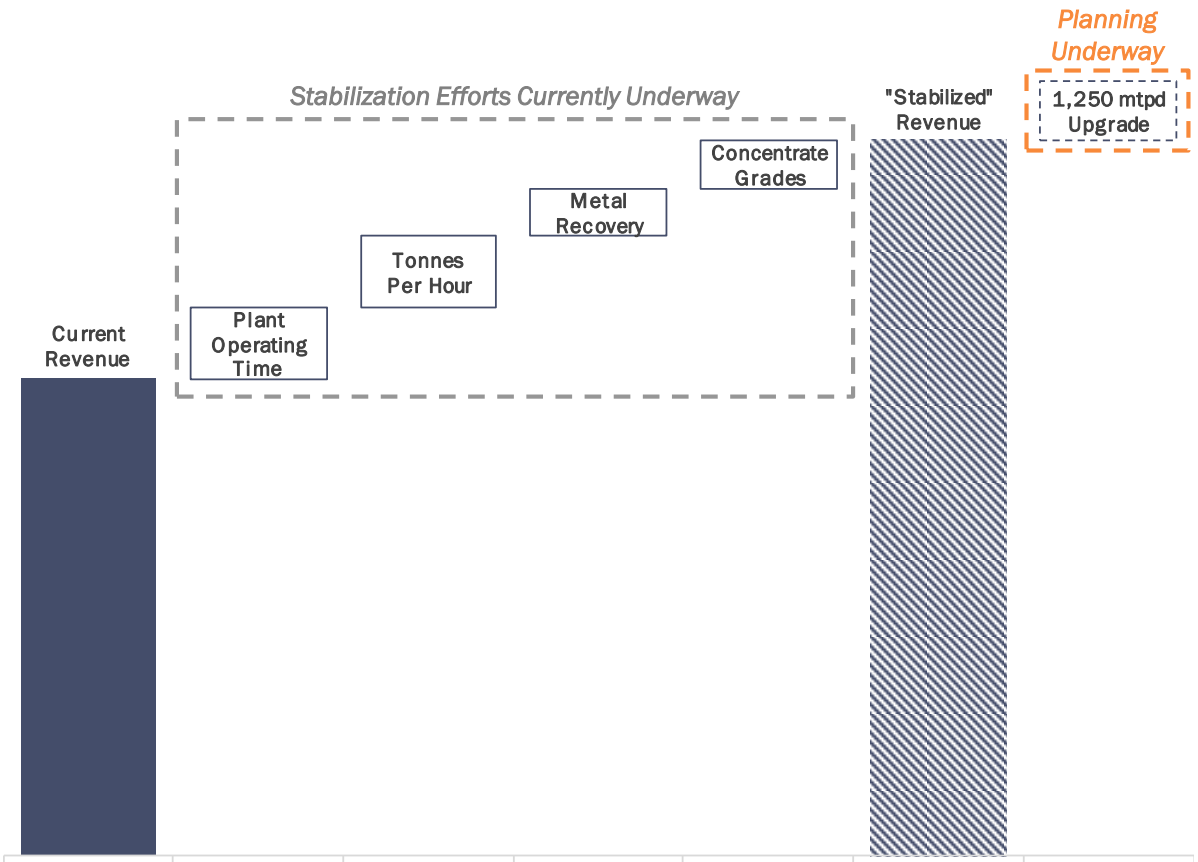

Illustrative Silvertip Revenue Stabilization

Coeur has undertaken various revenue stabilization efforts over the past several quarters to improve Silvertip's top-line performance. The opportunity to expand the mill to 1,250 mtpd represents a potential opportunity to further expand Silvertip's revenue

Breakout of Illustrative Revenue Stabilization Efforts

Note: Figures are not to scale and are for illustrative purposes only.

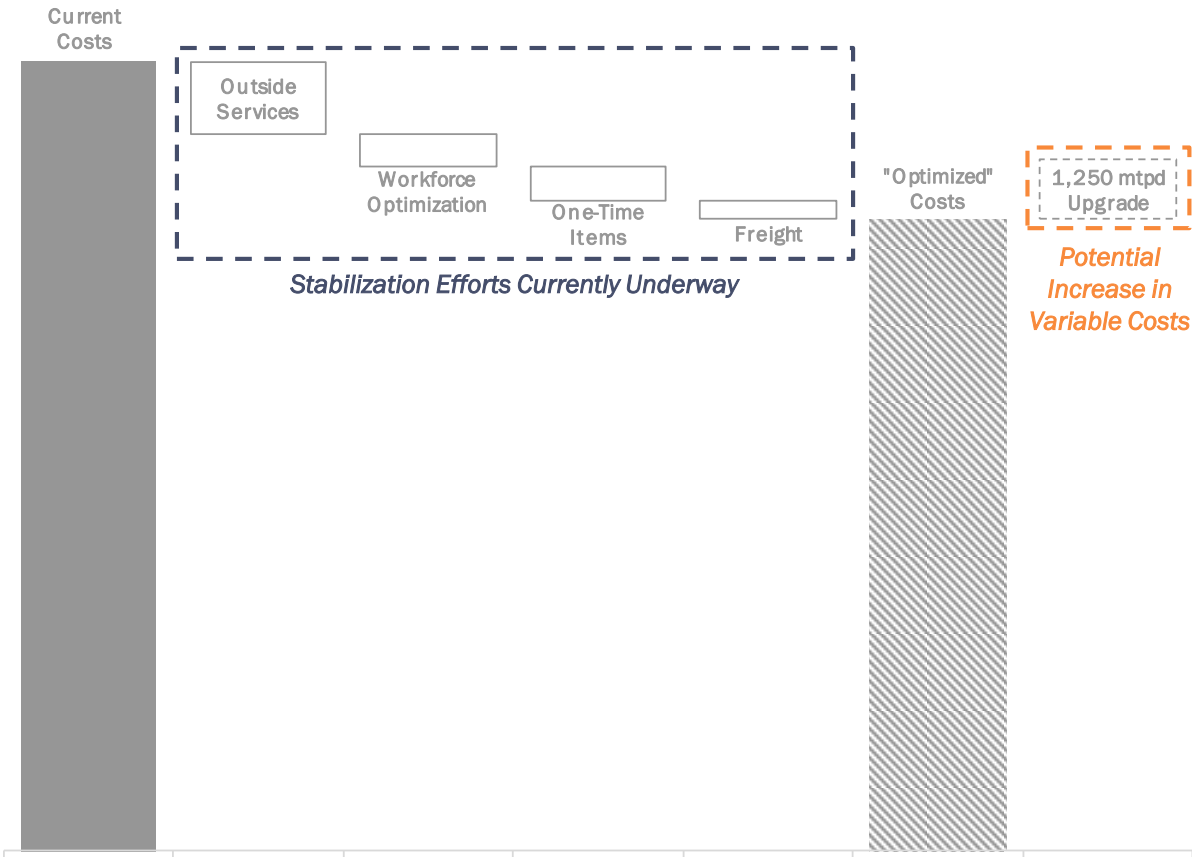

Selected Commentary

- Key mill projects and maintenance procedures targeting improved availability
  - Leading to more consistent plant operating time
  - Allowing for additional tonnage and higher throughput
- Improved consistency in the mill to drive higher recoveries
  - Ultimately helping to generate higher quality concentrates
- Potential to expand mill to 1,250 mtpd
  - Capitalizing on high-grade ore body and operating leverage

Illustrative Silvertip Cost Optimization

With revenue stabilization efforts largely underway, Coeur is shifting its focus to optimizing Silvertip's cost structure. Optimizing Silvertip's cost structure is one of the critical elements that will help drive overall profitability at the operation

Breakout of Illustrative Cost Optimization Efforts

Note: Figures are not to scale and are for illustrative purposes only.

Selected Commentary

- Reassess outside service agreements, including power generation
- Ability to optimize workforce
  - Curtailment of on-site contractors and overtime management
- Incorporate opportunities to lower operating costs
  - Transition to emulsion
  - Cement usage
  - Mining method
- Renegotiate key logistic agreements (e.g., trucking)
- Further evaluate added costs of increasing mill capacity to 1,250 mtpd

Appendix

2019 Guidance[1]

Production Outlook

	Gold (oz)	Silver (K oz)	Zinc (K lbs)	Lead (K lbs)
Palmarejo	95,000 – 105,000	6,500 – 7,200	-	-
Rochester	40,000 – 50,000	4,200 – 5,000	-	-
Kensington	117,000 – 130,000	-	-	-
Wharf	82,000 – 87,000	-	-	-
Silvertip	-	1,500 – 2,500	25,000 – 40,000	20,000 – 35,000
Consolidated	**334,000 – 372,000**	**12,200 – 14,700**	**25,000 – 40,000**	**20,000 – 35,000**

CAS Outlook[2]

	Gold ($/oz)	Silver ($/oz)	Zinc ($/lb)	Lead ($/lb)
Palmarejo (co-product)	$650 - $750	$9.00 - $10.00	-	-
Rochester (co-product)	$1,000 - $1,100	$12.50 - $13.50	-	-
Kensington	$950 - $1,050	-	-	-
Wharf (by-product)	$850 - $950	-	-	-
Silvertip (co-product)	-	$14.00 - $16.00	$1.00 - $1.25	$0.85 - $1.05

Capital, Exploration and G&A

($M)	
Capital Expenditures, Sustaining[3]	$70 – $80
Capital Expenditures, Growth	$30 – $40
Exploration, Expensed	$18 – $22
Exploration, Capitalized	$8 – $12
General & Administrative Expenses	$32 – $36

Note: The Company's guidance figures assume $1,275/oz gold, $15.50/oz silver, $1.15/lb zinc and $0.95/lb lead as well as CAD of 1.30 and MXN of 20.00.
(1) Production guidance as published by Coeur on July 11, 2019. Cost and other guidance as published by Coeur on May 1, 2019.
(2) See non-GAAP reconciliation table in the appendix to this presentation.
(3) Sustaining capital expenditures exclude capital leases.

Silvertip Expansion Drilling Intercepts (2019)

Silvertip Expansion Drilling Intercepts

	Mineralized Intercept (meters)				Assay Results		
Hole ID	From	To	Length	Est. Thick	Silver (g/t)	Zinc (%)	Lead (%)
DSC19-Pad1-003	220.3	225.7	5.4	3.8	611.5	18.3	12.0
DSC19-Pad1-005	207.0	213.0	6.0	3.9	339.9	5.9	7.4
DSC19-Pad4-001	*No Significant Intercepts*						
DSC19-Pad4-002	306.6	314.5	7.9	-	471.9	19.5	8.4
DSC19-Pad4-004	303.6	312.7	9.1	7.9	168.9	12.6	3.1

Note: The potential quantity and grade for the exploration targets and deposits described herein are conceptual in nature. There is insufficient exploratory work to define a mineral resource and it is uncertain if further exploration will result in the applicable target being delineated as a mineral resource.

Notes to 2018 mineral reserves and resources:

(1) Effective December 31, 2018.

(2) Assumed metal prices for Mineral Reserves were $17.00 per ounce of silver, $1,250 per ounce of gold, $1.25 per pound zinc, $1.00 per pound lead.

(3) Assumed metal prices for estimated Mineral Resources were $20.00 per ounce of silver, $1,400 per ounce of gold, $1.30 per pound zinc, $1.05 per pound lead, except Lincoln Hill and Wilco at $1,350 per ounce gold and $22.00 per ounce silver, and Sterling at $1,200 per ounce of gold.

(4) Mineral Resources are in addition to Mineral Reserves and do not have demonstrated economic viability. Inferred Mineral Resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of Mineral Reserves, and there is no certainty that the Inferred Mineral Resources will be realized. The preliminary economic assessment for the re-scoped mine plan at Kensington is preliminary in nature and includes Inferred Mineral Resources, and does not have as high a level of certainty as a plan that was based solely on proven and probable reserves and there is no certainty that the results from the preliminary economic assessment will be realized.

(5) Rounding of tons and ounces, as required by reporting guidelines, may result in apparent differences between tons, grade, and contained metal content.

(6) For details on the estimation of mineral resources and reserves, including the key assumptions, parameters and methods used to estimate the Mineral Resources and Mineral Reserves, Canadian investors should refer to the NI 43-101 Technical Reports for Coeur's properties on file at www.sedar.com.

Executive Leadership

Mitchell J. Krebs – President and Chief Executive Officer. During his twenty-year tenure with Coeur, Mr. Krebs has led nearly $2 billion in capital raising and debt restructuring activities and has facilitated over $2 billion of acquisitions and divestitures. Mr. Krebs was previously Coeur's Chief Financial Officer and held various positions in the corporate development department, including Senior Vice President of Corporate Development. Mr. Krebs is a Director of Kansas City Southern and the National Mining Association, is on the Board of World Business Chicago, and was formerly President of the Silver Institute.

Thomas S. Whelan – Senior Vice President and Chief Financial Officer. Prior to joining Coeur, Mr. Whelan served as CFO of Arizona Mining Inc. from September 2017 to August 2018, when the company was acquired from South32 Limited. Previously, Mr. Whelan served as CFO for Nevsun Resources Ltd. from January 2014 to August 2017. He is a chartered professional accountant and was previously a partner with the international accounting firm Ernst & Young ("EY") LLP where he was the EY Global Mining & Metals Assurance sector leader, the leader of the EY Assurance practice in Vancouver and previously EY's Canadian Mining & Metals sector leader. Mr. Whelan graduated with a Bachelor of Commerce from Queen's University.

Terry F.D. Smith. – Senior Vice President, Operations. Mr. Smith joined Coeur in 2013 as the Vice President of North American Operations. Prior to joining Coeur, he served as Vice President of Project Development and Assessments of Hunter Dickenson Inc. Mr. Smith has managed projects ranging from scoping to the feasibility level, coordinated field investigations, metallurgy laboratory testing, and engineering design. He also has significant experience in strategic project planning and due diligence reviews for potential acquisitions including environmental, metallurgical, geotechnical and mining inputs. Mr. Smith has also served as Manager of Operations Support for Barrick Gold Corporation in Toronto and as Senior Mining Engineer for Teck Cominco Ltd. in Vancouver. Mr. Smith holds a Bachelor of Mining Engineering from Laurentian University in Sudbury, Ontario.

Casey M. Nault – Senior Vice President, General Counsel, and Secretary. Mr. Nault has over 20 years of experience as a corporate and securities lawyer, including prior in-house positions with Starbucks Corporation and Washington Mutual, Inc. and law firm experience with Gibson, Dunn & Crutcher. His experience includes securities compliance and SEC reporting, corporate governance and compliance, mergers and acquisitions, public and private securities offerings, other strategic transactions, general regulatory compliance, cross-border issues, land use and environmental issues, and overseeing complex litigation.

Hans Rasmussen – Senior Vice President, Exploration. Mr. Rasmussen has 30 years of experience in the mining business, 16 years of which were with senior producers Newmont Mining and Kennecott/Rio Tinto; as well as serving as a consultant for senior producers such as BHP, Teck-Cominco, and Quadra Mining. From 2004 to 2013, he was an officer or served on the Board of Directors of several junior public exploration companies with gold and silver projects in Quebec, Nevada, Argentina, Chile, Colombia, Peru, and Bolivia, including serving on the Board of Directors of Columbia Crest Gold Corp. since 2006.

Emilie C. Schouten – Senior Vice President, Human Resources. Ms. Schouten has 15 years of experience in Human Resources, starting her career in General Electric, where she graduated from GE's Human Resources Leadership Program. After 6 years as an HR Manager with GE, her division was acquired by the world's largest electrical distribution company, Rexel, and Ms. Schouten went on to become the Director of Training and Development. Ms. Schouten has her B.A. in Sociology from Michigan State University and her M.S. in Industrial Labor Relations from University of Wisconsin-Madison.

Board of Directors

Robert E. Mellor – Former Chairman, Chief Executive Officer, and President of Building Materials Holding Corporation (distribution, manufacturing, and sales of building materials and component products) from 1997 to January 2010, director from 1991 to January 2010; member of the board of directors of Monro Muffler/Brake, Inc. (auto service provider) since August 2010 as independent Chairman of the board of directors since June 2017 and as lead independent director from April 2011 to June 2017; member of the board of directors of CalAtlantic Group, Inc. (national residential home builder) from October 2015 to February 2018, when CalAtlantic was acquired by Lennar Corporation; member of the board of directors of The Ryland Group, Inc. (national home builder, merged with another builder to form CalAtlantic) from 1999 until October 2015; and former member of the board of directors of Stock Building Supply Holdings, Inc. (lumber and building materials distributor) from March 2010 until December 2015, when it merged with another company.

Mitchell J. Krebs – President and Chief Executive Officer. See prior slide.

Linda L. Adamany – Member of the board of directors of Jefferies Financial Group (formerly known as Leucadia National Corporation), a diversified holding company engaged in a variety of businesses, since March 2014, and a member of the board of directors of Jefferies Group Inc., a wholly-owned subsidiary of Jefferies Financial Group Inc., since November 2018; non-executive director of the Wood plc since October 2017 following its acquisition of Amec Foster Wheeler plc, an engineering, project management, and consultancy company, where Ms. Adamany was previously a non-executive director since October 2012; non-executive director of BlackRock Institutional Trust Company since March 2018; member of the board of directors of National Grid plc, an electricity and gas generation, transmission, and distribution company, from November 2006 to November 2012. Served at BP plc in several capacities from July 1980 until her retirement in August 2007, most recently from April 2005 to August 2007 as a member of the five-person Refining & Marketing Executive Committee responsible for overseeing the day-to-day operations and human resource management of BP plc's Refining & Marketing segment, a $45 billion business at the time. She was recently selected as one of Women Inc. Magazine's 2018 Most Influential Corporate Directors.

Sebastian Edwards – Henry Ford II Professor of International Business Economics at the Anderson Graduate School of Management at the University of California, Los Angeles (UCLA) from 1996 to present; Co-Director of the National Bureau of Economic Research's Africa Project from 2009 to present; taught at IAE Universidad Austral in Argentina and at the Kiel Institute from 2000 to 2004; Chief Economist for Latin America at the World Bank Group from 1993 to 1996.
