Cautionary Statements

This presentation contains forward-looking statements within the meaning of securities legislation in the United States and Canada, including statements involving strategic priorities and company strategies, expectations regarding environmental, social and governance ("ESG") initiatives, anticipated production, costs and expenses, exploration and development efforts, health and safety protocols, COVID-19 planning and response measures, operations, expectations and initiatives at the Palmarejo, Rochester, Kensington, Wharf and Silvertip mines, throughput, mining rates, grades, depletion, tons placed and crushed, mine life, growth, capital allocation, and hedging strategies. Such forward-looking statements involve known and unknown risks, uncertainties, and other factors which may cause Coeur's actual results, performance, or achievements to be materially different from any future results, performance, or achievements expressed or implied by the forward-looking statements. Such factors include, among others, the risk that the strategies, initiatives and expectations described in this presentation are not achieved on a timely basis or at all, the risks and hazards inherent in the mining business (including risks inherent in developing large-scale mining projects, environmental hazards, industrial accidents, weather, or geologically related conditions), changes in the market prices of gold, silver, zinc, and lead, and a sustained lower price or higher treatment and refining charge environment, the uncertainties inherent in Coeur's production, exploratory and developmental activities, including risks relating to permitting and regulatory delays (including the impact of government shutdowns), ground conditions, grade variability, any future labor disputes, or work stoppages, the uncertainties inherent in the estimation of mineral reserves and resources, changes that could result from Coeur's future acquisition of new mining properties or businesses, the loss or insolvency of any third-party smelter to which Coeur markets its production, the potential effects of the COVID-19 pandemic, including impacts to the availability of our workforce, continued access to financing sources, government orders that may require temporary suspension of operations at one or more of our sites and effects on our suppliers or the refiners and smelters to whom the Company markets its production and the communities where the Company operates, the effects of environmental and other governmental regulations and government shut-downs, the risks inherent in the ownership or operation of or investment in mining properties or businesses in foreign countries, Coeur's ability to raise additional financing necessary to conduct its business, make payments or refinance its debt as well as other uncertainties and risk factors set out in filings made from time to time with the United States Securities and Exchange Commission, and the Canadian securities regulators, including, without limitation, Coeur's most recent report Form 10-K. Actual results, developments, and timetables could vary significantly from the estimates presented. Readers are cautioned not to put undue reliance on forward looking statements. Coeur disclaims any intent or obligation to update publicly such forward-looking statements, whether as a result of new information, future events, or otherwise. Additionally, Coeur undertakes no obligation to comment on analyses, expectations, or statements made by third parties in respect of Coeur, its financial or operating results or its securities.

Christopher Pascoe, Coeur's Director, Technical Services and a qualified person under Canadian National Instrument 43-101, reviewed and approved the scientific and technical information concerning Coeur's mineral projects in this presentation. Mineral resources are in addition to mineral reserves and do not have demonstrated economic viability. Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of mineral reserves, and there is no certainty that the inferred mineral resources will be realized. For a description of the key assumptions, parameters and methods used to estimate mineral reserves and resources, as well as data verification procedures and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors, Canadian investors should see the Technical Reports for each of Coeur's properties as filed on SEDAR at www.sedar.com.

Cautionary Note to U.S. Investors - The United States Securities and Exchange Commission permits U.S. mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We may use certain terms in public disclosures, such as "measured," "indicated," "inferred" and "resources," that are recognized by Canadian regulations, but that SEC guidelines generally prohibit U.S. registered companies from including in their filings with the SEC. U.S. investors are urged to consider closely the disclosure in our Form 10-K which may be secured from us, or from the SEC's website at http://www.sec.gov.

Non-U.S. GAAP Measures - We supplement the reporting of our financial information determined under United States generally accepted accounting principles (U.S. GAAP) with certain non-U.S. GAAP financial measures, including adjusted net income (loss), operating cash flow excluding changes in working capital, adjusted EBITDA, adjusted EBITDA margin, total leverage, net leverage, free cash flow and adjusted costs applicable to sales per ounce/pound. We believe that these adjusted measures provide meaningful information to assist management, investors and analysts in understanding our financial results and assessing our prospects for future performance. We believe these adjusted financial measures are important indicators of our recurring operations because they exclude items that may not be indicative of, or are unrelated to our core operating results, and provide a better baseline for analyzing trends in our underlying businesses. We believe adjusted net income (loss), adjusted EBITDA, adjusted EBITDA margin, total leverage, net leverage, free cash flow and adjusted costs applicable to sales per ounce/pound are important measures in assessing the Company's overall financial performance. This presentation does not represent an offer of any securities for sale.

Headquartered in Chicago, IL, Coeur Mining (NYSE: CDE) is a well-diversified, growing precious metals producer with a repositioned portfolio, focused on generating sustainable, high-quality cash flow from its North American assets

Transformational Expansion at Rochester	The expansion of Rochester is **technically sound**, provides **excellent economics**, has a **solid funding plan,** and is expected to **fundamentally reshape** Coeur
High-Impact Exploration Growth	The Company's **higher-level** of exploration investment is a **key differentiator** and is leading to **new discoveries, longer mine lives** and **higher returns**
Silvertip Potential Restart	Recent **technical work** and **exploration results** are creating a **potentially compelling path forward**
Robust Three-Year Outlook	The three-year outlook reflects **strong returns** from the Company's portfolio followed by an anticipated **step change in cash flow** post-Rochester expansion

Compelling Strategy Aligned with Stockholder Priorities

Coeur's strategy is to safely and responsibly discover, develop and operate a balanced portfolio of quality precious metals assets in low-risk jurisdictions to maximize cash flow, returns and net asset value

- U.S.-based and NYSE-listed, mid-tier gold and silver producer
- Balanced portfolio of assets located solely in North America
- Targeting higher returns on invested capital and strong free cash flow[1] growth via high-impact organic growth
- Industry-leading investment in exploration
- Recognized as industry leader for ESG programs and initiatives
- Approaching key inflection point driven by Rochester expansion
- Approximately $47 million ADTV (~1.8% of market cap)[2]

Protecting the Environment

- Leading tailings management procedures and practices
- Published responsibility report in April 2020
- Recently entered into first-of-its kind sage-grouse habitat agreement in Nevada
- Partnership with Trout Unlimited to support abandoned mine legislation

Social and Community Impact

- 237 high-impact community partnerships[3]
- Innovative development and diversity initiatives
- First precious metals company to sign CEO Action for Diversity and Inclusion pledge
- 71% of employees from surrounding communities

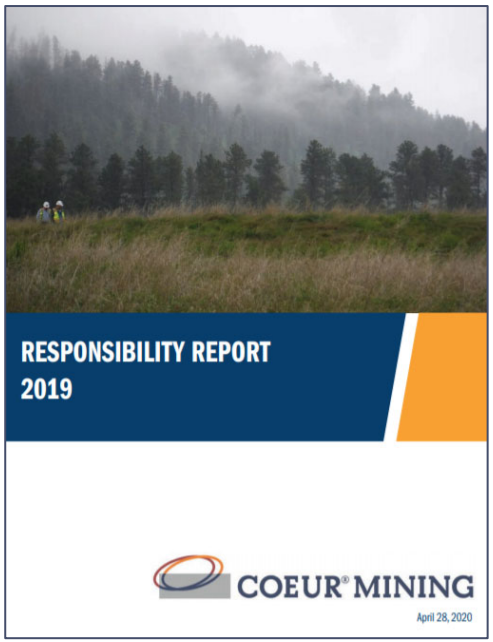

Governance Performance

- 50% of independent directors are diverse
- Innovative incentive compensation design aligned with stockholders
- ISS "1" Quality Score for Governance
- Proactive stockholder engagement
- Winner of 2020 & 2019 Corporate Secretary Magazine's Best Proxy Statement Award (mid-/small cap)

(1) Free cash flow is defined as cash flow from operating activities less capital expenditures.
(2) ADTV = Average Daily Trading Volume. Data observed over a 90-day trading period. FactSet as of February 24, 2021.

Coeur's Capital Allocation Framework

Mining is capital intensive and requires a disciplined approach to capital allocation with a view toward long-term reserve replacement and growth

Multiple High-Impact Organic Growth Opportunities

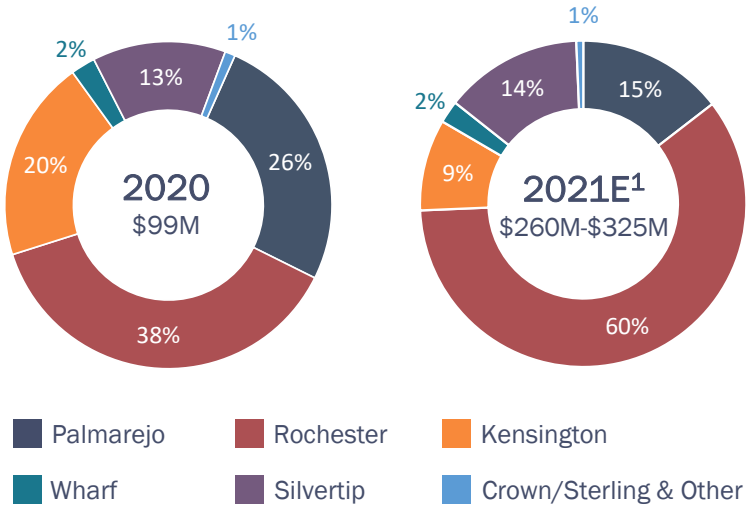

Coeur has multiple high-impact expansion, exploration and optimization opportunities embedded in its portfolio, which it is prioritizing and pursuing based on the Company's capital allocation framework

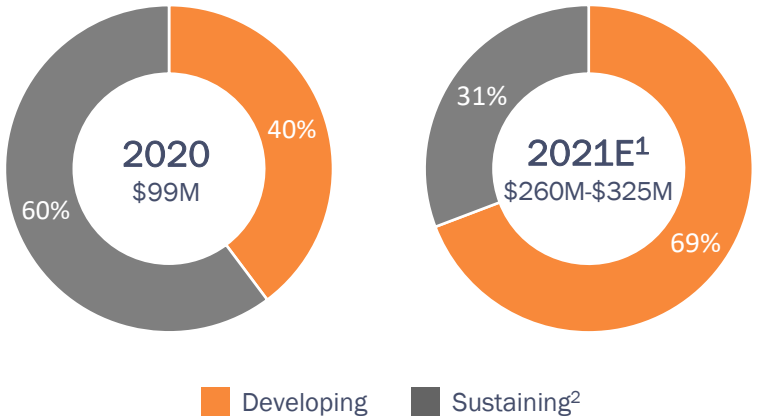

- ***Pursuing*** a higher standard
- ***Executing*** largest exploration program in Company history
- ***Allocating*** capital according to Company's framework
- ***Aligning*** organizational structure and incentive compensation
- ***Measuring*** success based on actual results
- ***Striving*** to achieve higher returns, longer mine lives and margin expansion

Rochester: Expansion Expected to Unlock Significant Value[1]

Coeur expects Rochester to generate over $100 million in average annual free cash flow[2,3] post-expansion, leading to an after-tax $NAV_{5\%}$ of $634 million with an internal rate of return of 31% based solely on proven and probable reserves

- ***Low*** *technical execution risk* — *Open pit, heap leach*
- ***Top-tier*** *mining jurisdiction* — *Nevada and U.S. NOLs*
- ***18-year*** *mine life with organic growth* — *Robust project pipeline*

- \+ *Economies of Scale*
- \+ *HPGR Crusher Impact on Silver Recoveries*
- = *Higher Returns*
- *Fundamental Step-Change for Coeur*

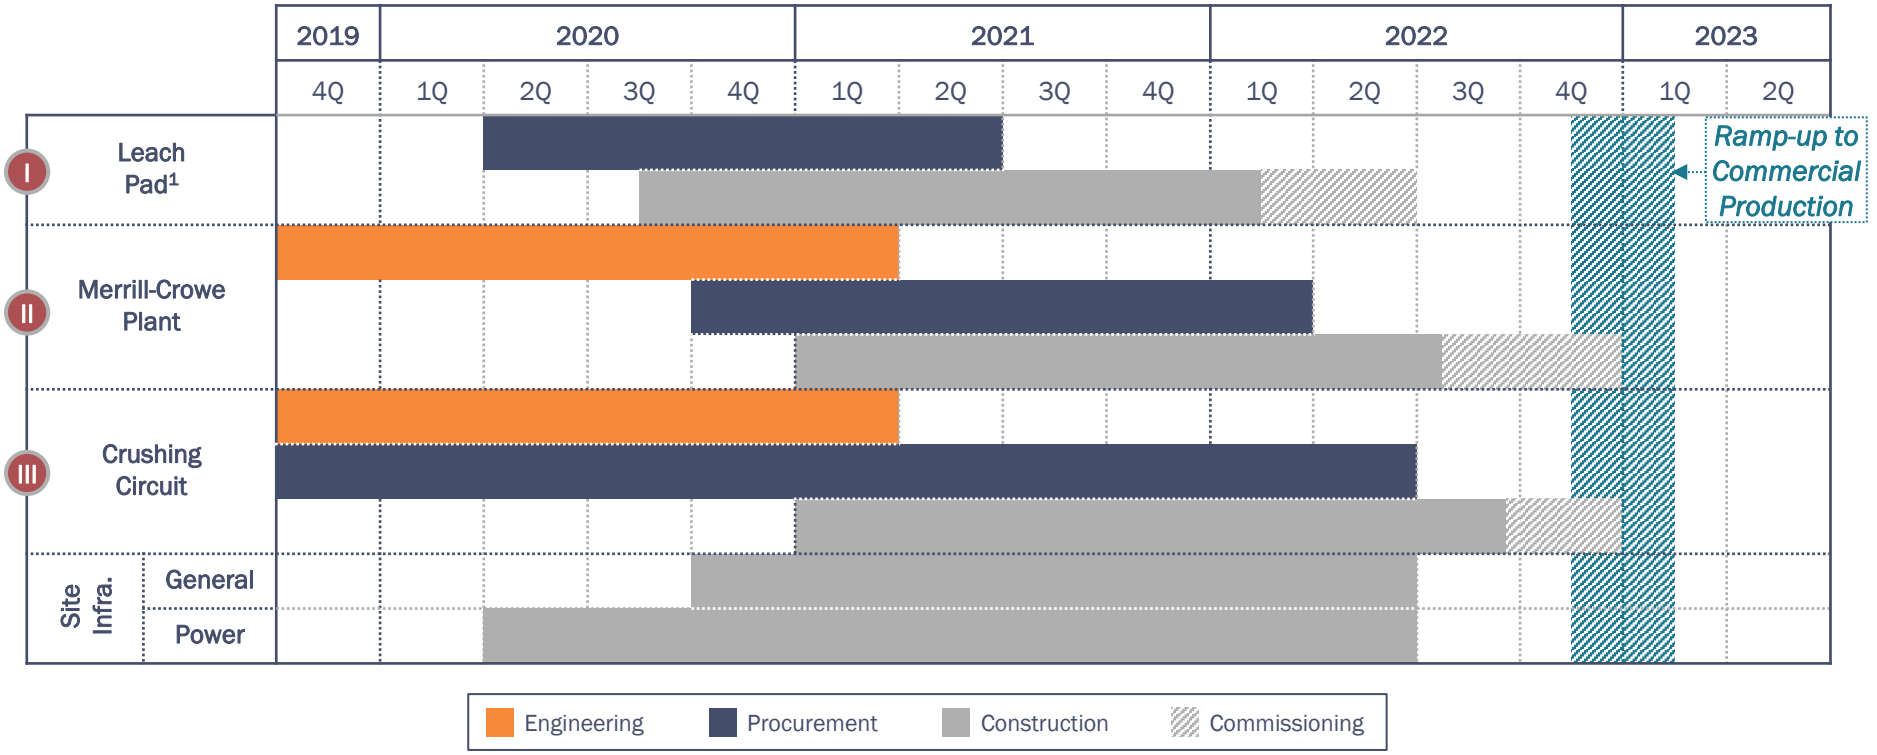

Facilitates Multiple Stockholder Priorities

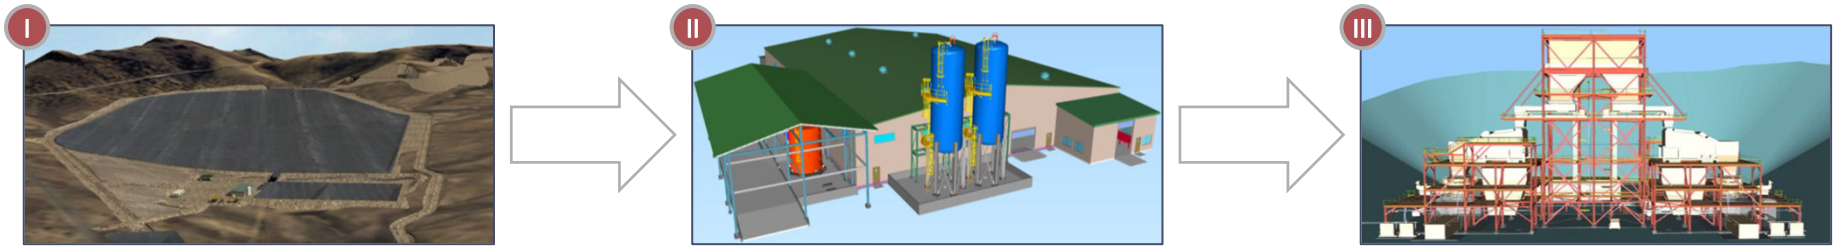

- Higher overall returns on invested capital
- Sustained, strong free cash flow[2]
- Further de-leveraging opportunities
- Leading, low-risk exposure to precious metals prices
- Funding of other high-quality growth opportunities
- Potential to return excess capital over the long term

(1) For additional information on the expansion of Rochester, Canadian investors should refer to the latest Technical Report for Rochester on file at www.sedar.com.
(2) Free cash flow is defined as cash flow from operating activities less capital expenditures.
(3) Reflects annual average free cash flow from 2023 to 2032.
(4) Reflects planned capital expenditures from 2021 to 2023.

Rochester: Expansion Project Timeline

Major construction activities commenced in January 2021 and are expected to be largely completed by late 2022

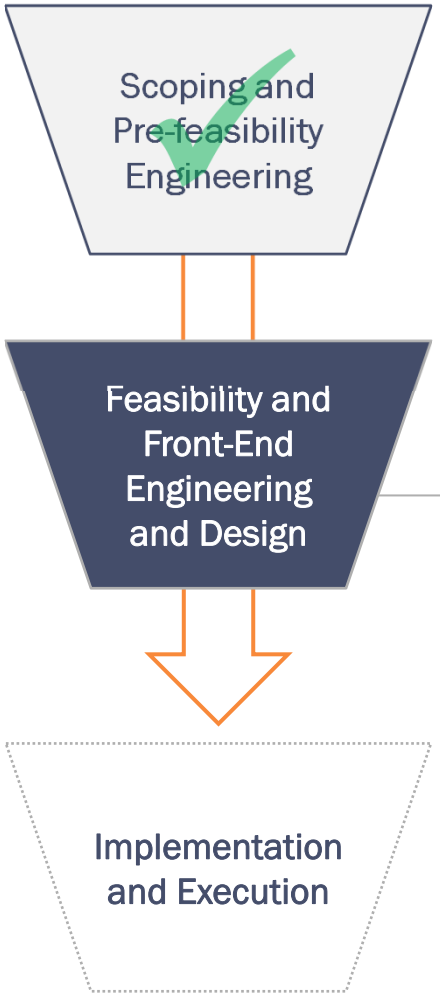

(1) Includes ancillary facilities.

Silvertip: Diligently Advancing Toward Potential Restart

Coeur has made significant progress to advance Silvertip; however, additional steps are required for the Company to further de-risk the project and enhance the economics of a potential restart

Front-End Engineering and Design

Project risk reduction phase with capital optimization, progression of engineering to execution level design and schedule, engagement of key partners in permitting and construction

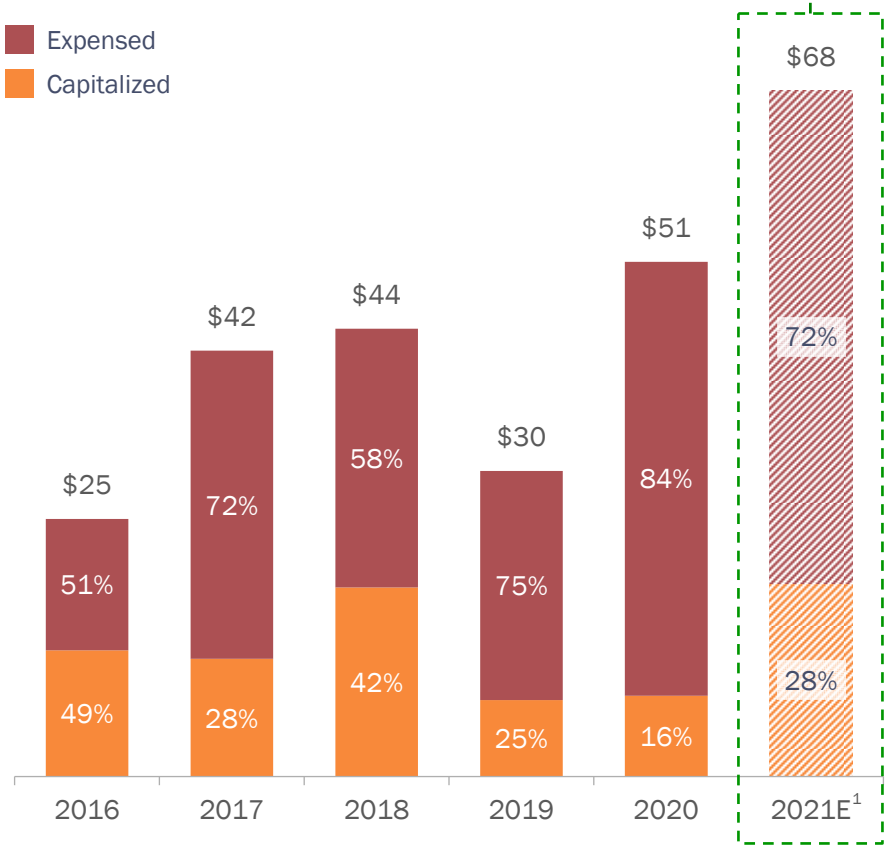

- Continue investing in exploration, extending mine life and project returns
- Evaluate potential financing alternatives (e.g., offtake agreements)
- Progress engineering through Detailed Design phase
- Finalize project implementation and construction schedule
- Prepare Project and Operational Readiness plans
- Obtain permit amendments for restart and expansion with stakeholder's support
- Plan to release results of updated technical report in 2H 2021

Evaluate investment according to Coeur's capital allocation framework

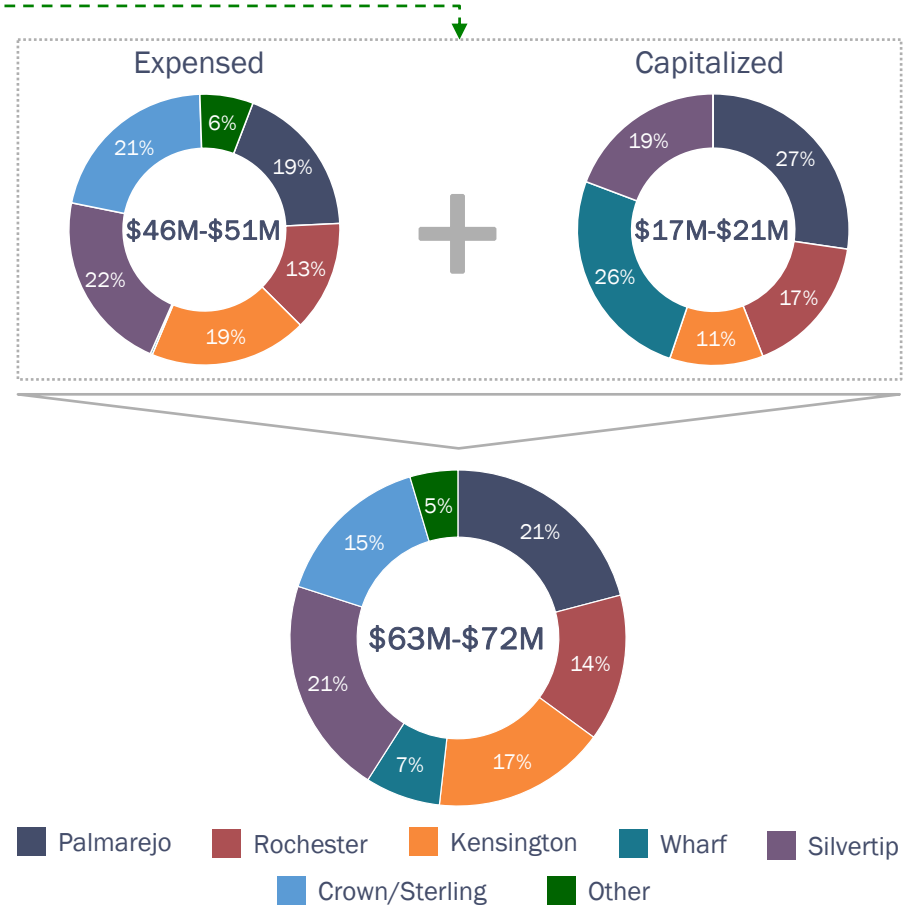

Sustaining a Higher-Level of Exploration Investment

Coeur successfully completed the largest exploration program in its history in 2020. The Company expects to maintain its commitment to a higher-level of exploration investment in 2021, while maintaining its results-driven focus on high-return targets

Total Exploration Investment

Nevada-Based Exploration Investment Opportunities

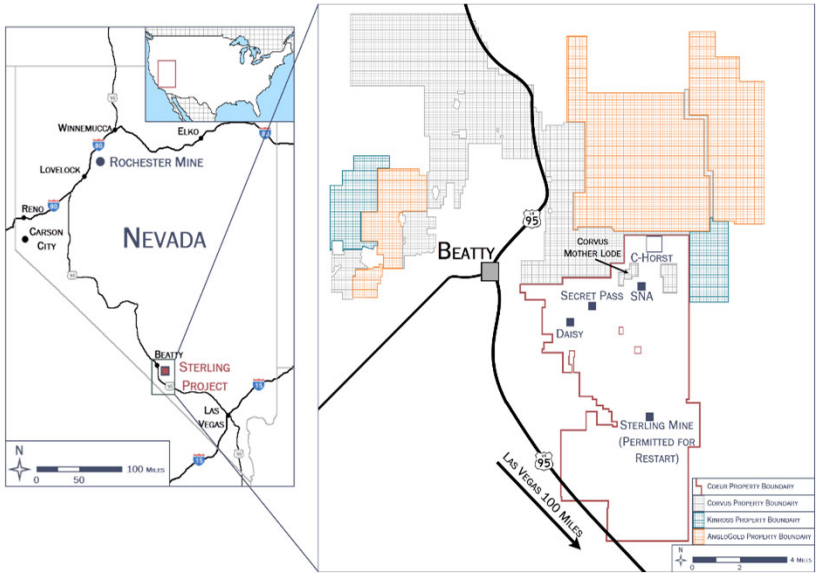

Coeur is uniquely positioned to build out its organic growth portfolio in the U.S., specifically in Nevada – the world's top mining jurisdiction[1]. The Company believes investing in these opportunities will drive long-term value for stockholders

Northern Nevada

- Significant potential to further grow reserves and leverage Rochester's existing infrastructure
- East Rochester represents potential for significant higher-grade addition to current reserves and resources
- Acquired property package adjacent to Rochester in late 2018 for ~$19 million
- Total land position of over 40,300 acres

Southern Nevada

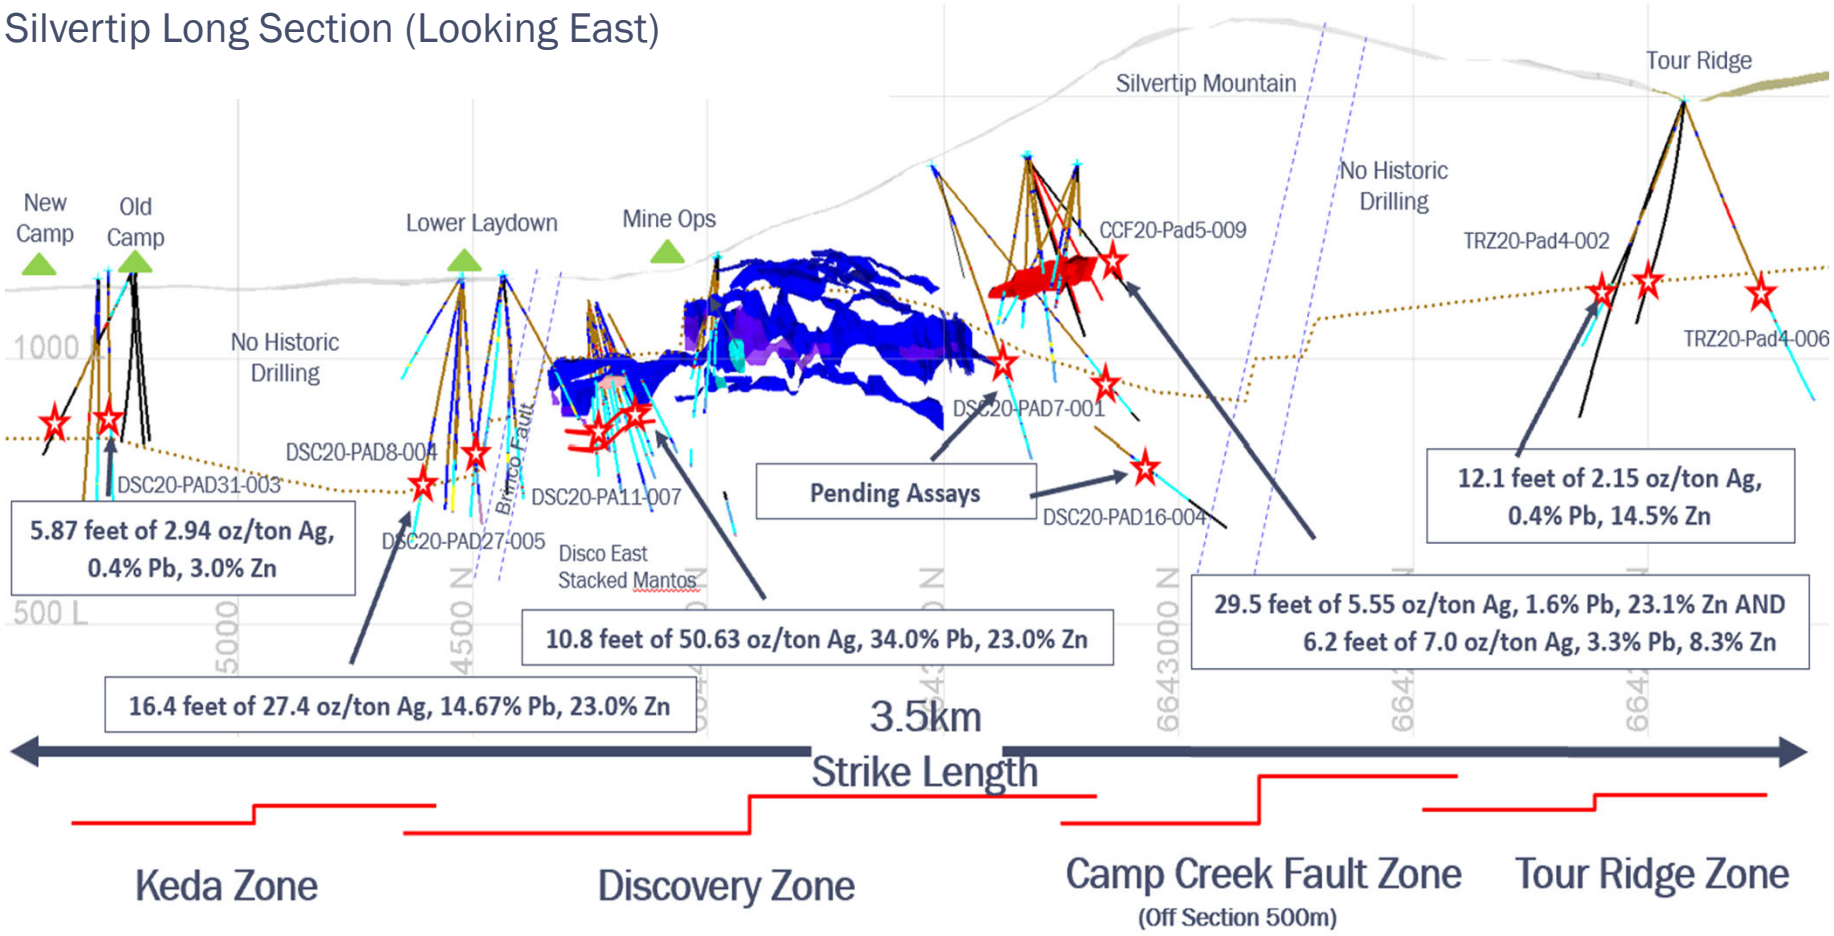

- Acquired in late 2018 containing multiple gold deposits
- ~35,500 net acres in southern Nevada near existing infrastructure
- New discovery results (e.g., C-Horst) by Coeur adjacent to other new gold discoveries
- Future potential sources of low cost, long-life open pit gold production

(1) Fraser Institute Annual Survey of Mining Companies (2020).

Continued Exploration Success in Canada

Coeur significantly increased the size of Silvertip's resource base in 2020, following the largest and most successful exploration program in the history of the property. Additionally, the Company more than tripled the strike length of the high-grade deposit

Expanded Reserve and Resource Base

Coeur's 2020 exploration program was highly successful in replacing production and growing resources via new discoveries. Continued near mine resource expansion and strong results reflect the potential for further mine life extensions and organic growth opportunities with continued drilling

	Proven & Probable Reserves	Measured & Indicated Resources	Inferred Resources
Gold (oz)	 *+22% YoY increase* • Significant increases at Palmarejo and Rochester • Partially offset by depletion at Kensington and Wharf	 *+18% YoY increase* • Solid growth from Palmarejo, Kensington and Wharf • Partially offset by conversions at Rochester	 *3% YoY decrease* • Decrease largely driven by successful conversions • Modest growth at Rochester and Kensington
Silver (oz)	 *+42% YoY increase* • Significant increases at Palmarejo and Rochester • Minimal infill drilling conducted at Silvertip during the year	 *+5% YoY increase* • ~50% growth in silver M&I at Palmarejo and Silvertip • Partially offset by conversions at Rochester	 *6% YoY decrease* • Decrease largely driven by successful conversions • ~3.8M oz added from successful drilling campaign at Silvertip
Zinc and Lead (lbs)	 *0% YoY increase in zinc* *2% YoY decrease in lead* • Minimal infill drilling conducted at Silvertip during the year	 *+45% YoY increase in zinc* *+50% YoY increase in lead* • Growth of measured and indicated resource base at Silvertip • ~628K tons of M&I resource added at Silvertip	 *+69% YoY increase in zinc* *+37% YoY increase in lead* • Successful resource expansion drilling program at Silvertip • ~476K tons of inferred resource added at Silvertip

Note: See slides in appendix for additional information related to mineral reserves and resources. Canadian investors should refer to the applicable technical reports on file at www.sedar.com.

Recent Balance Sheet Enhancements

Coeur has recently taken prudent steps to bolster its balance sheet, helping to strengthen the Company's financial flexibility ahead of the next two years of capital intensity

- Increased aggregate capacity of revolving credit facility from $250 million to $300 million
  - Fully repaid remaining outstanding borrowings[1]
  - Expects to extend the maturity from October 2022 to March 2025

- Issued $375 million 5.125% senior notes due 2029
  - Lowered interest rate and extended maturity vis-à-vis 5.875% senior notes due 2024
  - Opportunistically upsized offering to further bolster cash position to help underpin funding for key growth projects

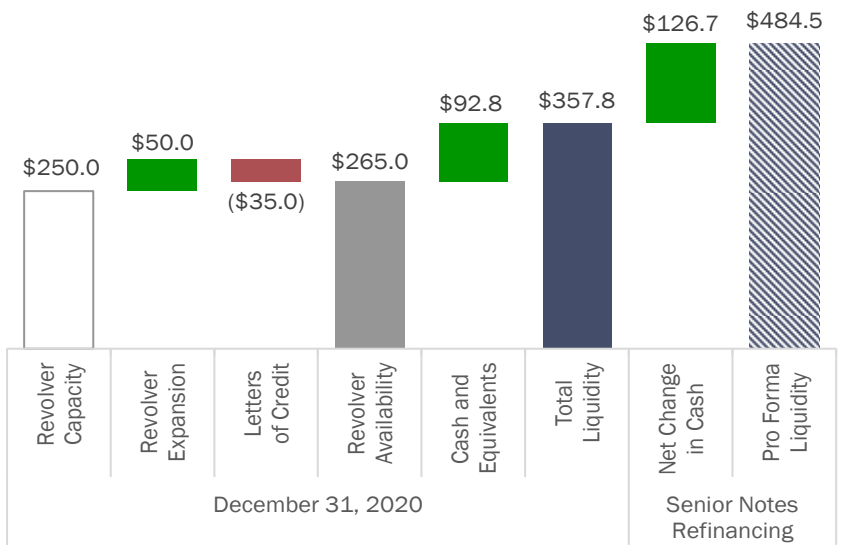

- Recently upgraded by Moody's from B3 to B2[2]
- Significantly improved cash position (67% higher year-over-year)

(1) As of December 31, 2020.
(2) Reflects Corporate Family Rating. 5.125% senior notes due 2029 rated B3.

Summary of Metal Sales Hedges

Strategy	• Opportunistically executing hedges to support funding of POA 11 – Targeting up to 50% of expected gold production through 2022
Instrument	• Zero-cost collar gold hedge – No upfront costs – "Guarantees" price floor and provides upside price participation up to a specified ceiling
Settlement	• Financially, against monthly average LBMA[4] pricing

Looking Ahead: Key Priorities for 2021

- Maintain focus on rigorous health and safety protocols
- Steadily increase production and continue executing major construction on POA 11 expansion at Rochester
- Remain committed to a higher-level of exploration investment to drive reserve and resource growth
- Continue evaluating potential expansion and restart of Silvertip; release results of updated technical report (later in the year)
- Allocate capital according to framework, prioritizing investments in highest-return growth opportunities
- Deliver consistent operating and financial results across portfolio

2021 Production Guidance Detail[1]

COEUR MINING

Gold Production (oz)

Operation	Guidance Range	Illustrative Production Profile	Commentary
Palmarejo	100,000 – 110,000		• Higher planned mining and throughput rates to offset lower expected gold grades due to the depletion of certain higher gold grade zones
Rochester	22,500 – 32,500		• Expecting fewer tons placed due to the generation of over-liner material for the Stage VI leach pad • Targeting ~35,000 crushed tons per day in 1Q; ~38,000 crushed tons for the remainder of the year[2]
Kensington	115,000 – 130,000		• Plan to incorporate material from the Eureka and Elmira veins into production profile • Anticipating slightly lower grades from the Kensington Main deposit and development ore from Elmira
Wharf	85,000 – 95,000		• Expecting another strong production year, despite plans to mine more tons as a result of increased strip
Consolidated	**322,500 – 367,500**		• Anticipating slightly weaker gold production in 1Q; however, gold production expected to increase in 2Q

Silver Production (K oz)

Operation	Guidance Range	Illustrative Production Profile	Commentary
Palmarejo	6,500 – 7,750		• Higher planned mining and throughput rates • Silver grades expected to be slightly lower in 2021
Rochester	3,200 – 4,400		• Expecting lower overall silver grades • See gold production commentary for additional details
Consolidated	**9,700 – 12,150**		• Silver production expected to increase in 2Q, following a slightly weaker anticipated 1Q

(1) Guidance as published by Coeur on February 17, 2021.
(2) Crusher throughput targets exclude scheduled downtime.

Coeur's principal objective to help combat COVID-19 is to safeguard the health, safety and well-being of its workforce, their families and the communities where the Company operates

Activities to Protect People and Places During COVID-19

 *People*	✓ Social distancing and enhanced cleaning ✓ Multilayered testing strategy ✓ Traditional contact tracing complemented by wearable technology ✓ Remote work for office employees ✓ Only essential business travel ✓ Pre-work and on-site health screenings ✓ Regular CEO and executive communications; talking points for local leaders ✓ Sick leave policies cover bonus payments to camp employees affected by extended schedules and quarantine
 *Places*	✓ Partner with communities in communication and response efforts ✓ Greatly reduced travel, limiting community risk of exposure ✓ Implementing company-provided testing and contact tracing organization-wide ✓ Donations, including PPE and supplies for vulnerable community members ✓ Palmarejo clinic open to the public

Industry-Leading Safety Performance

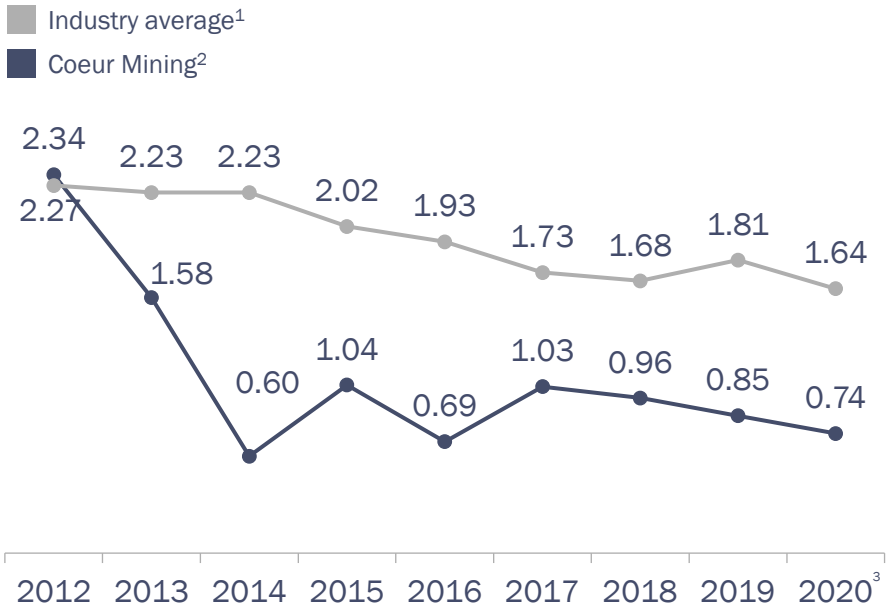

*Coeur has held the National Mining Association **CORE**Safety certification since 2017*

Coeur's injury frequency rate remains significantly below industry averages

Demonstrating Our Commitment

Governance Practices

- **Board Refreshment and Succession Planning**
  - Two new independent directors added to the Board in February 2018 and four directors – 50% of independent directors – added in last eight years
    - Also added a new independent director in early 2019, who recently had to resign in connection with a new professional position that did not allow outside board service
  - Active Board succession planning and refreshment
- **Robust Board and Committee Evaluations**
  - Annual evaluations promote Board and Board committee effectiveness
  - Chairman's one-on-one meetings with each director promote candor, effectiveness and accountability
- **No Related Party Transactions**
  - No related person transactions with directors or executive officers
- **Board-Level Risk Oversight**
  - The Board and Board committees take an active role in the Company's risk oversight and risk management processes
- **Active Stockholder Engagement**
  - During 2020, Coeur continued its proactive and robust stockholder outreach efforts on governance, executive compensation and other matters, contacting all institutional stockholders of 0.15% or more
- **Clawback Policy**
  - Added officer misconduct to the scope of clawback policy in addition to financial restatement-driven events

Stockholder Rights

- **Annual Election of Directors**
  - All directors are elected annually for one-year terms
- **Majority Voting for Director Elections**
  - Majority voting in uncontested director elections with a resignation policy
- **Stockholder Right to Call Special Meetings**
  - Stockholders owning 20% or more of Coeur's common stock have the right to call a special meeting of the Stockholders
- **No Poison Pill**
  - Coeur does not have a poison pill or similar anti-takeover defenses in place
- **Proxy Access**
  - Proactively adopted proxy access in March 2019, which allows stockholders who have satisfied specified requirements under the Company's Bylaws to include director nominees in the Company's proxy statement and form of proxy (greater of two nominees or 20% Board seats)

Diverse Board Led by Independent Chair

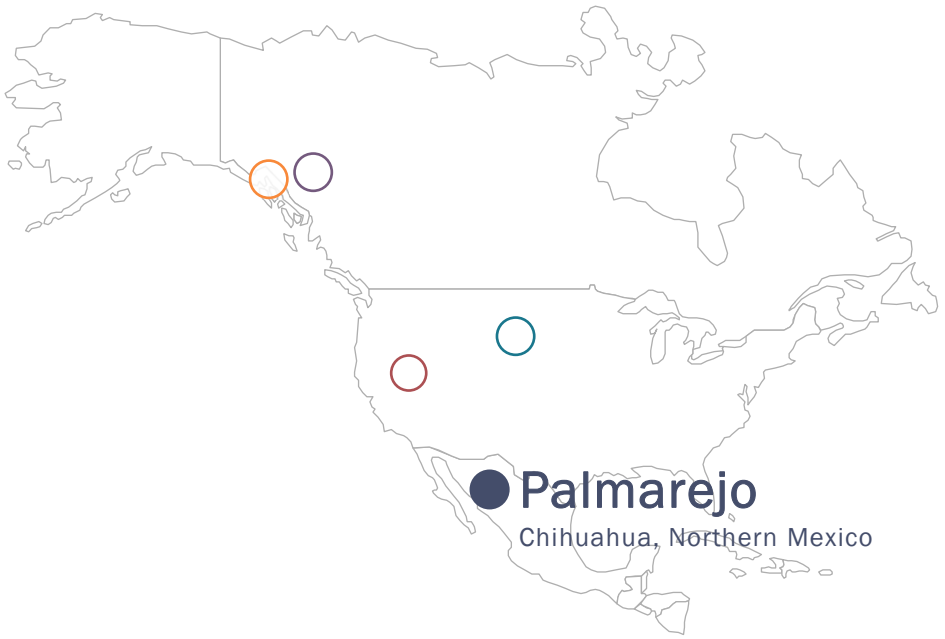

- Eight out of nine Directors are independent (all except CEO); all four main committees comprised of independent directors only
- Two directors elected in February 2018 having skills and experiences that complement other directors
- Balance of newer and longer serving directors; no mandatory retirement age
- Half of independent directors are diverse (gender or ethnicity), contributing to a variety of viewpoints

Notes to 2020 mineral reserves and resources:

(1) Effective December 31, 2020.

(2) Assumed metal prices for Mineral Reserves were $17.00 per ounce of silver, $1,400 per ounce of gold, $1.15 per pound zinc, $0.95 per pound lead.

(3) Assumed metal prices for estimated Mineral Resources were $20.00 per ounce of silver, $1,600 per ounce of gold, $1.30 per pound zinc, $1.00 per pound lead, except Lincoln Hill and Wilco at $1,350 per ounce gold and $22.00 per ounce silver, and La Preciosa at $1,500 per ounce gold and $20.00 per ounce silver.

(4) Mineral Resources are in addition to Mineral Reserves and do not have demonstrated economic viability. Inferred Mineral Resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of Mineral Reserves, and there is no certainty that the Inferred Mineral Resources will be realized. The preliminary economic assessment for the re-scoped mine plan at Kensington is preliminary in nature and includes Inferred Mineral Resources, and does not have as high a level of certainty as a plan that was based solely on proven and probable reserves and there is no certainty that the results from the preliminary economic assessment will be realized.

(5) Rounding of tons and ounces, as required by reporting guidelines, may result in apparent differences between tons, grade, and contained metal content.

(6) Excludes the impact of the gold stream agreement at Palmarejo.

(7) For details on the estimation of mineral resources and reserves, including the key assumptions, parameters and methods used to estimate the Mineral Resources and Mineral Reserves, Canadian investors should refer to the NI 43-101 Technical Reports for Coeur's properties on file at www.sedar.com.

Notes to 2019 mineral reserves and resources:

(1) Effective December 31, 2019.

(2) Assumed metal prices for Mineral Reserves were $17.00 per ounce of silver, $1,350 per ounce of gold, $1.15 per pound zinc, $0.95 per pound lead.

(3) Assumed metal prices for estimated Mineral Resources were $20.00 per ounce of silver, $1,500 per ounce of gold, $1.30 per pound zinc, $1.05 per pound lead, except Lincoln Hill and Wilco at $1,350 per ounce gold and $22.00 per ounce silver, and Sterling at $1,200 per ounce of gold.

(4) Mineral Resources are in addition to Mineral Reserves and do not have demonstrated economic viability. Inferred Mineral Resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of Mineral Reserves, and there is no certainty that the Inferred Mineral Resources will be realized. The preliminary economic assessment for the re-scoped mine plan at Kensington is preliminary in nature and includes Inferred Mineral Resources, and does not have as high a level of certainty as a plan that was based solely on proven and probable reserves and there is no certainty that the results from the preliminary economic assessment will be realized.

(5) Rounding of tons and ounces, as required by reporting guidelines, may result in apparent differences between tons, grade, and contained metal content.

(6) Excludes the impact of the gold stream agreement at Palmarejo.

(7) For details on the estimation of mineral resources and reserves, including the key assumptions, parameters and methods used to estimate the Mineral Resources and Mineral Reserves, Canadian investors should refer to the NI 43-101 Technical Reports for Coeur's properties on file at www.sedar.com.
