Gold Forum Americas Presentation

September 2023

COEUR MINING®
We pursue a higher standard

NYSE: **CDE**

Cautionary Statements

This presentation contains forward-looking statements within the meaning of securities legislation in the United States and Canada, including statements involving strategic priorities and company strategies, expectations regarding environmental, social and governance ("ESG") initiatives, goals and targets, growth, anticipated production, costs and expenses, exploration and development efforts, operations, expectations and initiatives at Palmarejo, Rochester, Kensington, Wharf and Silvertip including the Rochester expansion project, inflation and other cost pressures, capital allocation and estimates, liquidity sources, free cash flow, mineral reserve and resource estimates, growth, results and hedging strategies. Such forward-looking statements involve known and unknown risks, uncertainties, and other factors which may cause Coeur's actual results, performance, or achievements to be materially different from any future results, performance, or achievements expressed or implied by the forward-looking statements. Such factors include, among others, the risk that the Rochester expansion project is not completed on a timely basis or requires more capital than currently anticipated for completion, the risk that anticipated production, cost and expense levels are not attained, the risks and hazards inherent in the mining business (including risks inherent in developing and expanding large-scale mining projects, environmental hazards, industrial accidents, weather or geologically-related conditions), changes in the market prices of gold and silver and a sustained lower price or higher treatment and refining charge environment, the uncertainties inherent in Coeur's production, exploration and development activities, including risks relating to permitting and regulatory delays (including the impact of government shutdowns), mining law changes, ground conditions, grade and recovery variability, any future labor disputes or work stoppages (involving the Company and its subsidiaries or third parties), the risk of adverse outcomes in litigation, the uncertainties inherent in the estimation of mineral reserves and resources, impacts from Coeur's future acquisition of new mining properties or businesses, the loss of access or insolvency of any third-party refiner or smelter to whom Coeur markets its production, the continued effects of the COVID-19 pandemic, including impacts to workforce, materials and equipment availability, inflationary pressures, continued access to financing sources, government orders that may require temporary suspension of operations at one or more of our sites and effects on our suppliers or the refiners and smelters to whom the Company markets its production and on the communities where we operate, the effects of environmental and other governmental regulations and government shut-downs, the risks inherent in the ownership or operation of or investment in mining properties or businesses in foreign countries, Coeur's ability to raise additional financing necessary to conduct its business, make payments or refinance its debt, as well as other uncertainties and risk factors set out in filings made from time to time with the United States Securities and Exchange Commission, and the Canadian securities regulators, including, without limitation, Coeur's most recent reports on Form 10-K and Form 10-Q. Actual results, developments, and timetables could vary significantly from the estimates presented. Readers are cautioned not to put undue reliance on forward looking statements. Coeur disclaims any intent or obligation to update publicly such forward-looking statements, whether as a result of new information, future events, or otherwise. Additionally, Coeur undertakes no obligation to comment on analyses, expectations, or statements made by third parties in respect of Coeur, its financial or operating results or its securities.

The scientific and technical information concerning our mineral projects in this presentation have been reviewed and approved by a "qualified person" under Item 1300 of SEC Regulation S-K, namely our Senior Director, Technical Services, Christopher Pascoe. For a description of the key assumptions, parameters and methods used to estimate mineral reserves and mineral resources included in this presentation, as well as data verification procedures and a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, sociopolitical, marketing or other relevant factors, please review the Technical Report Summaries for each of the Company's material properties which are available at www.sec.gov. 2021 reserves and resources were determined in accordance with Item 1300 of SEC Regulation S-K. Reserves and resources for prior periods were determined in accordance with Canadian National Instrument 43-101. Both sets of reporting standards have similar goals in terms of conveying an appropriate level of confidence in the disclosures being reported, but the standards embody slightly different approaches and definitions. The ranges of potential tonnage and grade (or quality) of the exploration results described in this presentation are conceptual in nature. There has been insufficient exploration work to estimate a mineral resource. It is uncertain if further exploration will result in the estimation of a mineral resource. The exploration results described in this presentation therefore does not represent, and should not be construed to be, an estimate of a mineral resource or mineral reserve.

Non-U.S. GAAP Measures - We supplement the reporting of our financial information determined under United States generally accepted accounting principles (U.S. GAAP) with certain non-U.S. GAAP financial measures, including adjusted net income (loss), operating cash flow before changes in working capital, adjusted EBITDA, adjusted EBITDA margin, total leverage, net leverage, free cash flow, adjusted costs applicable to sales per ounce/pound and adjusted liquidity. We believe that these adjusted measures provide meaningful information to assist management, investors and analysts in understanding our financial results and assessing our prospects for future performance. We believe these adjusted financial measures are important indicators of our recurring operations because they exclude items that may not be indicative of, or are unrelated to our core operating results, and provide a better baseline for analyzing trends in our underlying businesses. We believe adjusted net income (loss), adjusted EBITDA, adjusted EBITDA margin, total leverage, net leverage, free cash flow, adjusted costs applicable to sales per ounce/pound and adjusted liquidity are important measures in assessing the Company's overall financial performance. This presentation does not represent an offer of any securities for sale.

Cautionary Statements (cont.)

Cautionary Statements Regarding Company Outlook

In connection with Coeur's regular planning process, Coeur's management prepared certain unaudited financial and operating projections, some portions of which are included in this presentation. These projections were not prepared with a view toward complying with published guidelines of the SEC, the guidelines established by the American Institute of Certified Public Accountants with respect to prospective financial information or GAAP, but, in the view of Coeur's management, were prepared on a reasonable basis, reflect the best then-available estimates and judgments, and present, to the best of management's knowledge and belief at the time, the expected course of action and the expected future financial and operating performance of Coeur. However, this information is not fact and should not be relied upon as necessarily indicative of actual future results, and readers of this presentation are cautioned not to place undue reliance on these projections.

These projections have been prepared by, and are the responsibility of, Coeur's management. Neither Coeur's independent auditors, nor any other independent accountants, have compiled, examined, or performed any procedures with respect to these projections, nor have they expressed any opinion or any other form of assurance on such information or its achievability, and assume no responsibility for, and disclaim any association with, such projections.

The assumptions and estimates underlying these projections are inherently uncertain and, although considered reasonable by the management of Coeur as of the date of their preparation, are subject to a wide variety of significant business, economic, and competitive risks and uncertainties that could cause actual results to differ materially from those contained in these projections, including, among others, risks and uncertainties relating to Coeur's businesses (including its ability to achieve strategic goals, objectives and targets over applicable periods), industry performance, the regulatory environment, general business and economic conditions and other factors described in the "Risk Factors" section of Coeur's most recent reports on Form 10-K and Form 10-Q and its other periodic reports filed with the SEC. Accordingly, there can be no assurance that these projections are indicative of the future performance of Coeur or that actual results will not differ materially from those presented. Inclusion of these projections in this presentation should not be regarded as a representation by any person that the results contained in these projections will be achieved.

Coeur does not intend to update or otherwise revise these projections to reflect circumstances existing since their preparation or to reflect the occurrence of unanticipated events, even in the event that any or all of the underlying assumptions are shown to be in error. Furthermore, Coeur does not intend to update or revise these projections to reflect changes in general economic or industry conditions.

Company Overview

Headquartered in Chicago, IL, Coeur Mining is a growing, multi-asset precious metals producer with a focus on generating sustainable, high-quality cash flow from its North American asset base

U.S. organic growth offers unique near-term catalyst

Coeur Mining Investment Case

45%	Expected ’23-25 silver production growth driven by Rochester (NV)
35% / 79%	Five-year AuEq.[1] reserve and resource growth
~$1B	Approximate investment in exploration and expansions (‘17–23)
~2/3rds	Portion of revenue derived from three U.S. operations
3x	Silvertip resource tonnage growth since acquisition

(1) See slide 12 for additional details on reserve and resource growth base.

Transformational Evolution at Rochester

Rochester has undergone a tremendous transformation over the past four years with the imminent completion of the POA 11 expansion project, which is one of the world's largest open pit / heap leach operations

September 2019 POA 11 Project Area

September 2023 POA 11 Project Area

Note: For additional information on the expansion of Rochester, please refer to the technical report summary for Rochester available at www.sec.gov.

Rochester Expansion: Transitioning to Ramp Up

The Rochester expansion was approximately 99% complete at the end of August 2023 with construction scheduled to be substantially wrapped up in 3Q 2023. First production from new Stage VI leach pad and Merrill-Crowe process plant began mid-September

Project Capital Overview

Total Estimated Capital	Capital Incurred[2]	2023 Capital Expenditures	Peak capital spend in 3Q 2023
$710 - $730 million[1]	$691 million	~$245 - $265 million[1]	

Estimated Project Ramp-Up

Forecasted Project Completion Schedule

	Mechanical Completion	Pre-Commissioning	Wet Commissioning	Ramp-Up
Merrill-Crowe Process Plant	1Q 2023	3Q 2023	3Q 2023	Early 2024 *~13 million tons on Stage VI*
Crusher Corridor	4Q 2023	4Q 2023	4Q 2023	Early 2024 *~88,000 tons per day*

Note: For additional information on the expansion of Rochester, please refer to the technical report summary for Rochester available at www.sec.gov.
(1) Guidance as published by Coeur on August 9, 2023.
(2) As of August 31, 2023.

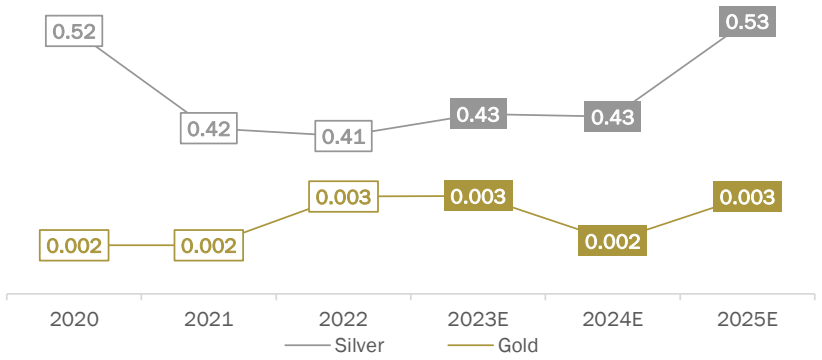

Expected Rochester Operational Performance

Operating results have been relatively consistent over the past few years; once ramped-up, production levels are expected to be ~2.5x higher with substantially lower costs and materially stronger free cash flow

Average Grade
(oz/t)

Production
(oz)

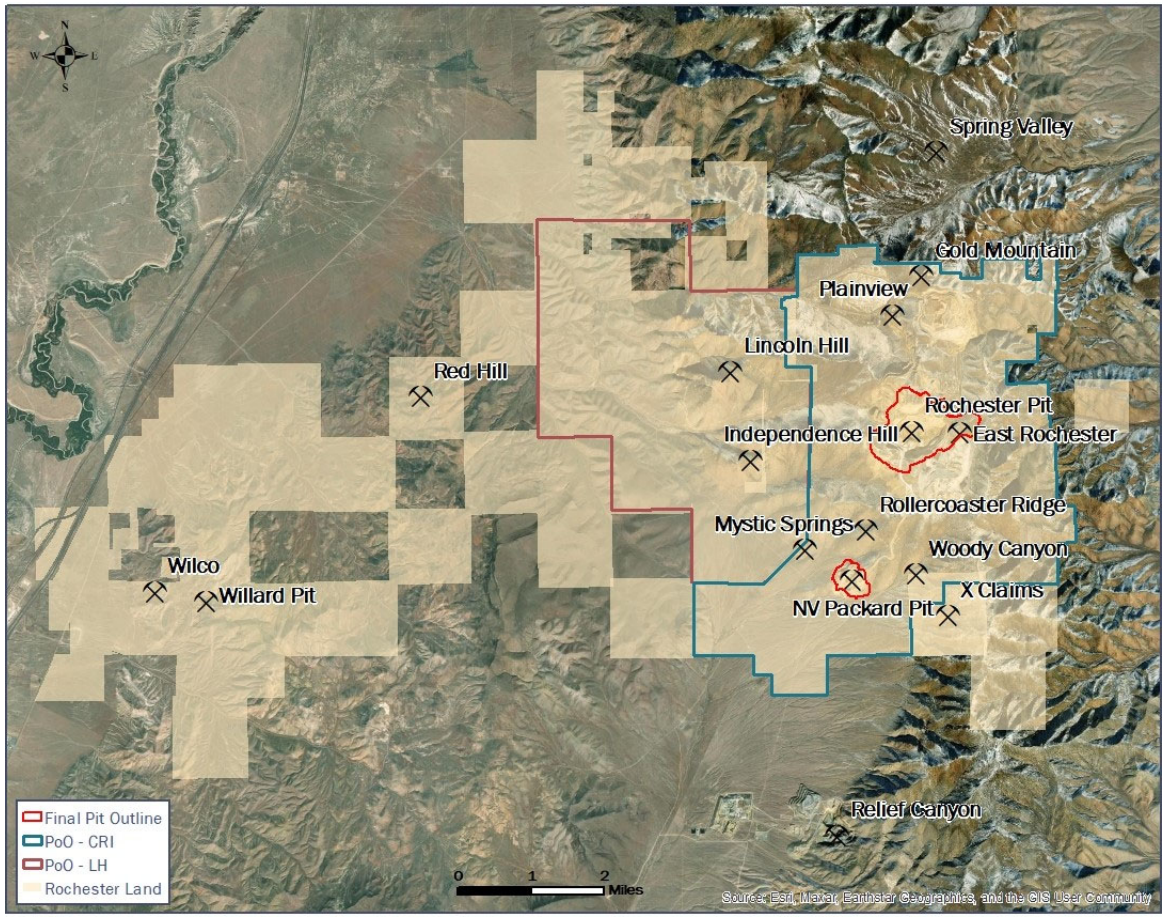

(1) Guidance as published by Coeur on August 9, 2023.

Untapped Exploration Potential at Rochester

The key focus at Rochester in 2023 is to enhance the geologic model at East Rochester (an area of large pit pushback in the future) and use it for exploration ranking and targeting across the district

- The largest reserves of any primary silver mine in the U.S.
- Satellite deposits and prospects:
  - Nevada Packard
  - Lincoln Hill
  - Independence Hill
  - Plainview
- Opportunity to target higher grades on these structures
- Near-term focus on two-mile corridor between East Rochester and Nevada Packard
- Medium-term objective to drill Lincoln Hill corridor

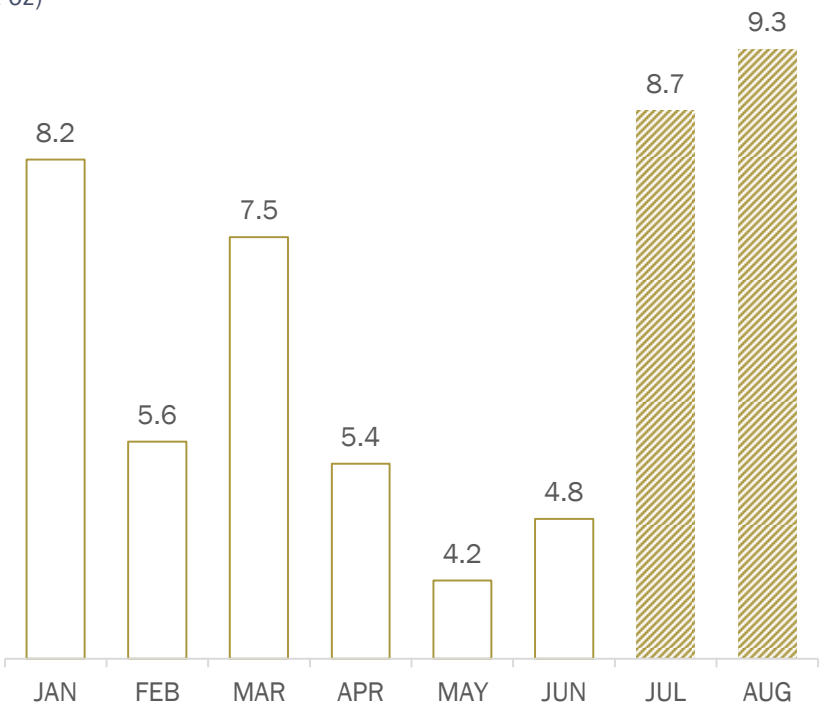

Note: See slides in appendix for additional information related to mineral reserves and resources.

Positive Kensington Production Trends in 3Q

Monthly production performance has improved significantly following a challenging first half at Kensington brought on by excessive water flows and paste backfill issues. Approximately 63% of full-year guidance, or 50,000-60,000 ounces, are anticipated to be produced during the second half of 2023

Average Grade
(oz/t)

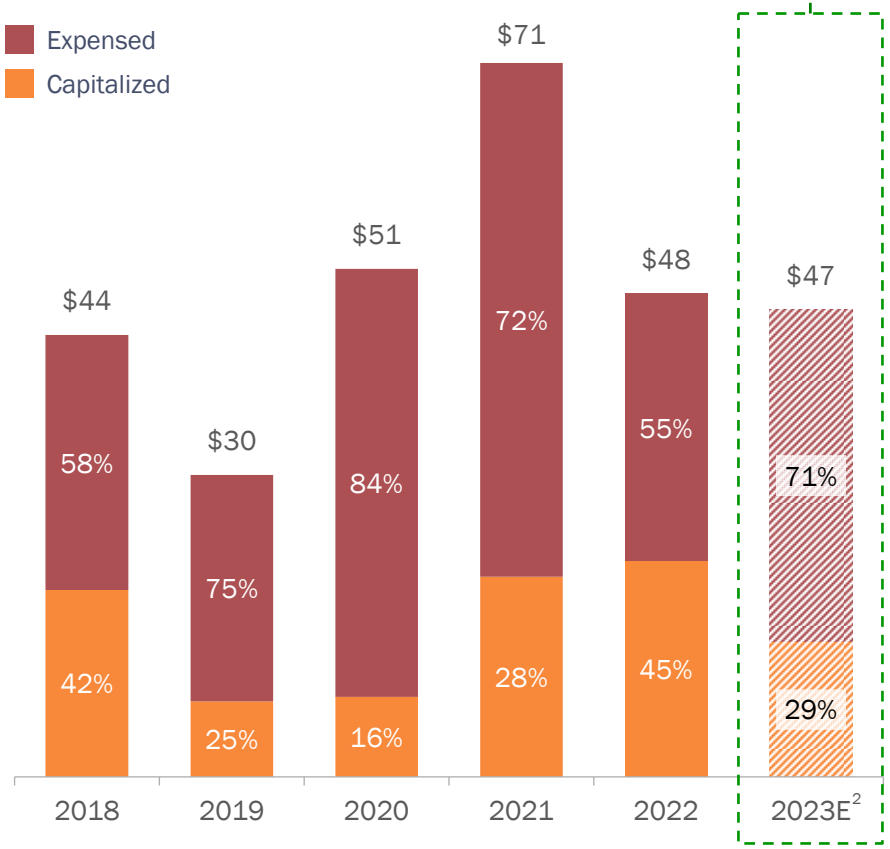

Sustaining a Higher Level of Exploration Investment

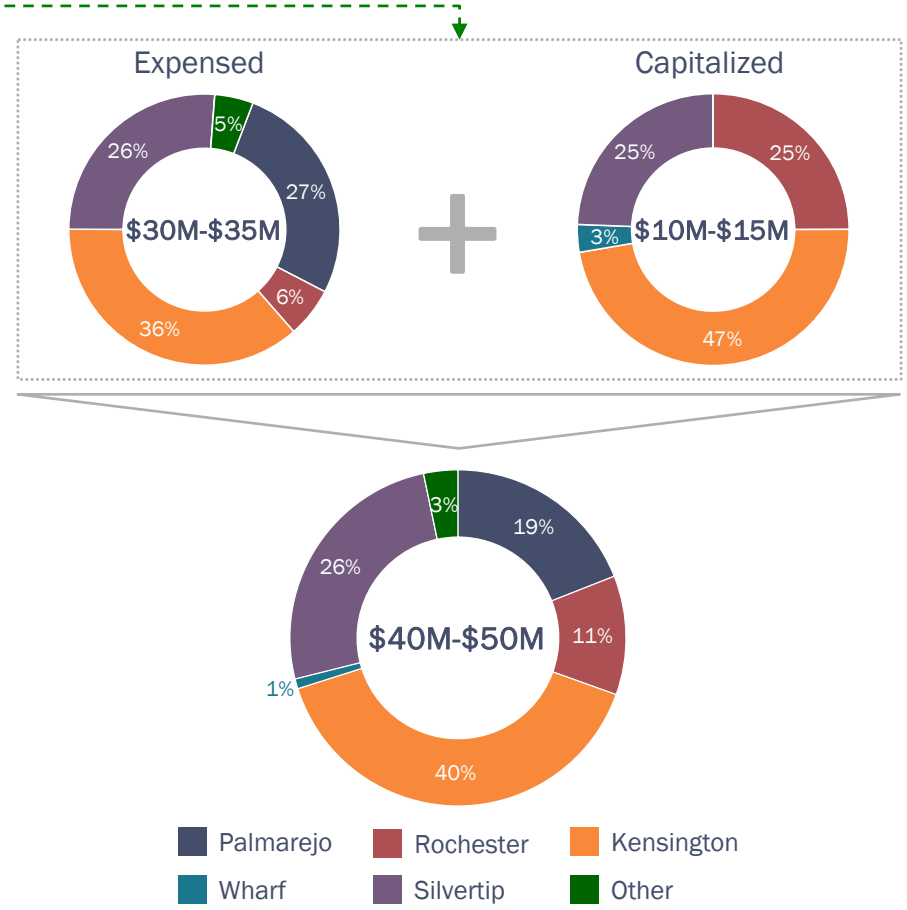

Coeur completed another strong year of exploration investment during 2022 and remains focused on delivering results through the drill bit in 2023 with significant planned investments at Kensington and Silvertip targeting resource expansion

Total Exploration Investment

($M)

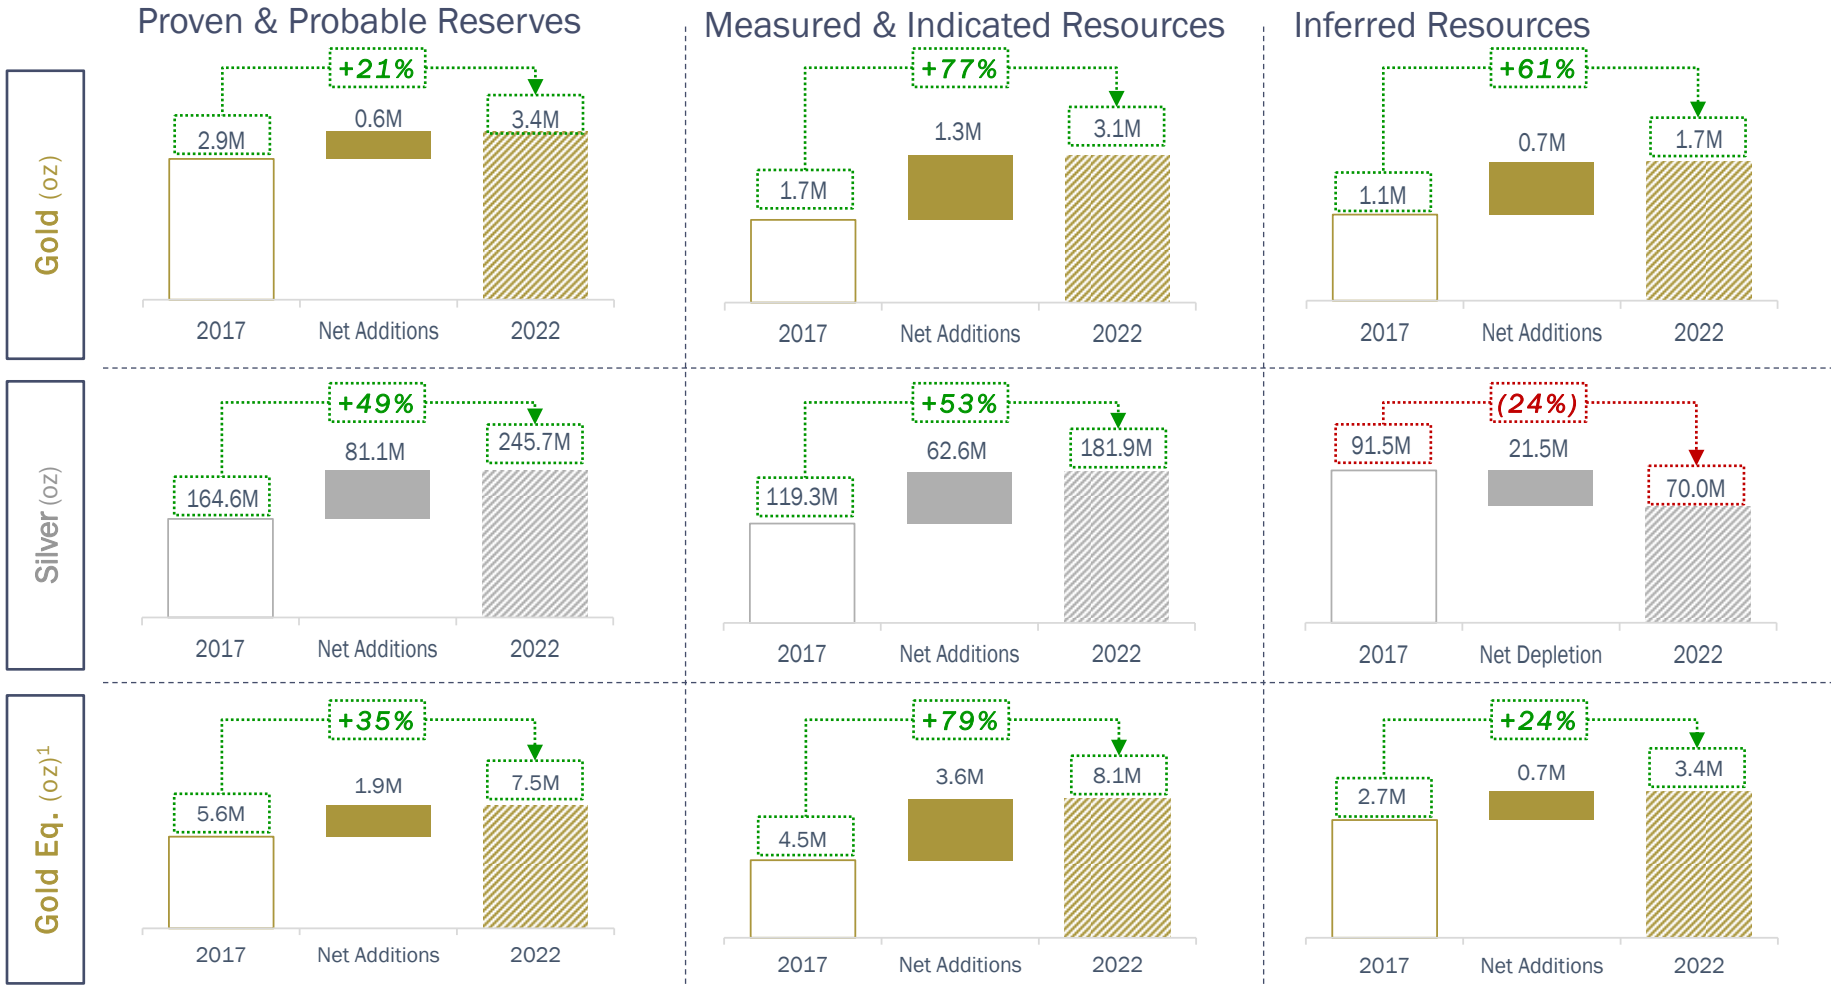

2023E Exploration Investment by Site[1,2]

(1) Guidance as published by Coeur on August 9, 2023.
(2) Figures and percentages reflect midpoint of guidance as published by Coeur on August 9, 2023.

Materially Expanded Reserve and Resource Base

Coeur's 2022 exploration program was highly successful in replacing depletion and growing resources. The Company has invested nearly $245 million in exploration over the past five years, contributing to significant overall reserve and resource growth from its large, prospective and underexplored land holdings

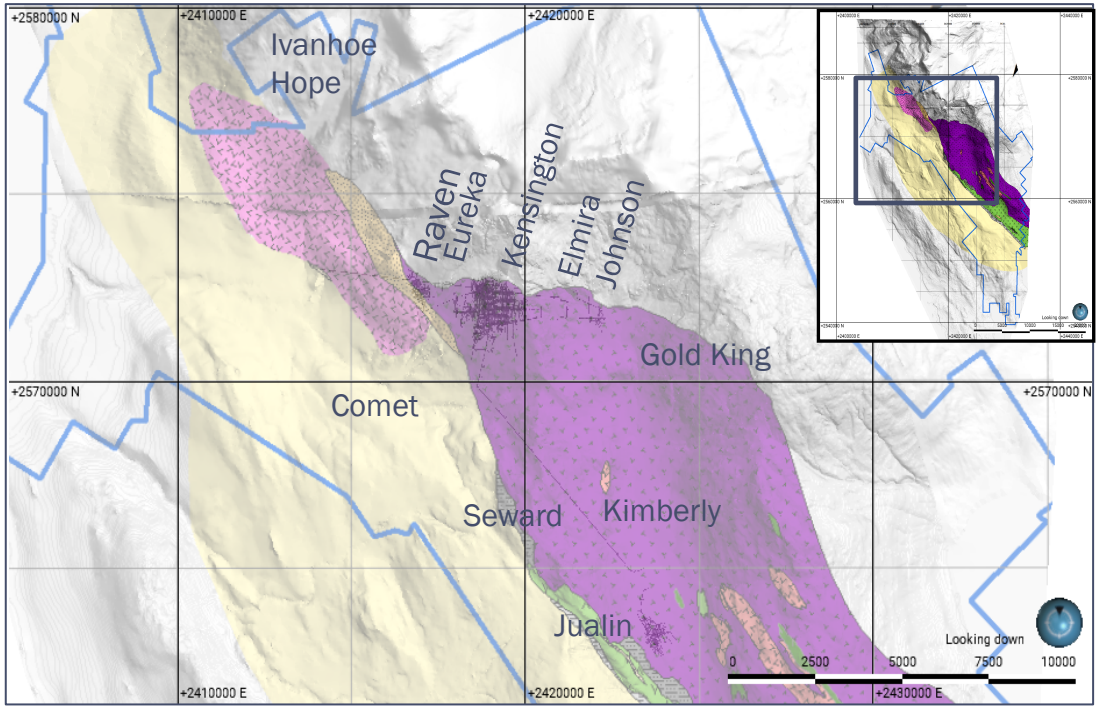

Note: See slides in appendix for additional information related to mineral reserves and resources.
(1) Gold equivalence assumes gold-to-silver, -lead, -zinc ratios of 1:60, 1:1,200 and 1:1,000, respectively.

Kensington: Blueprint for a Longer Mine Life

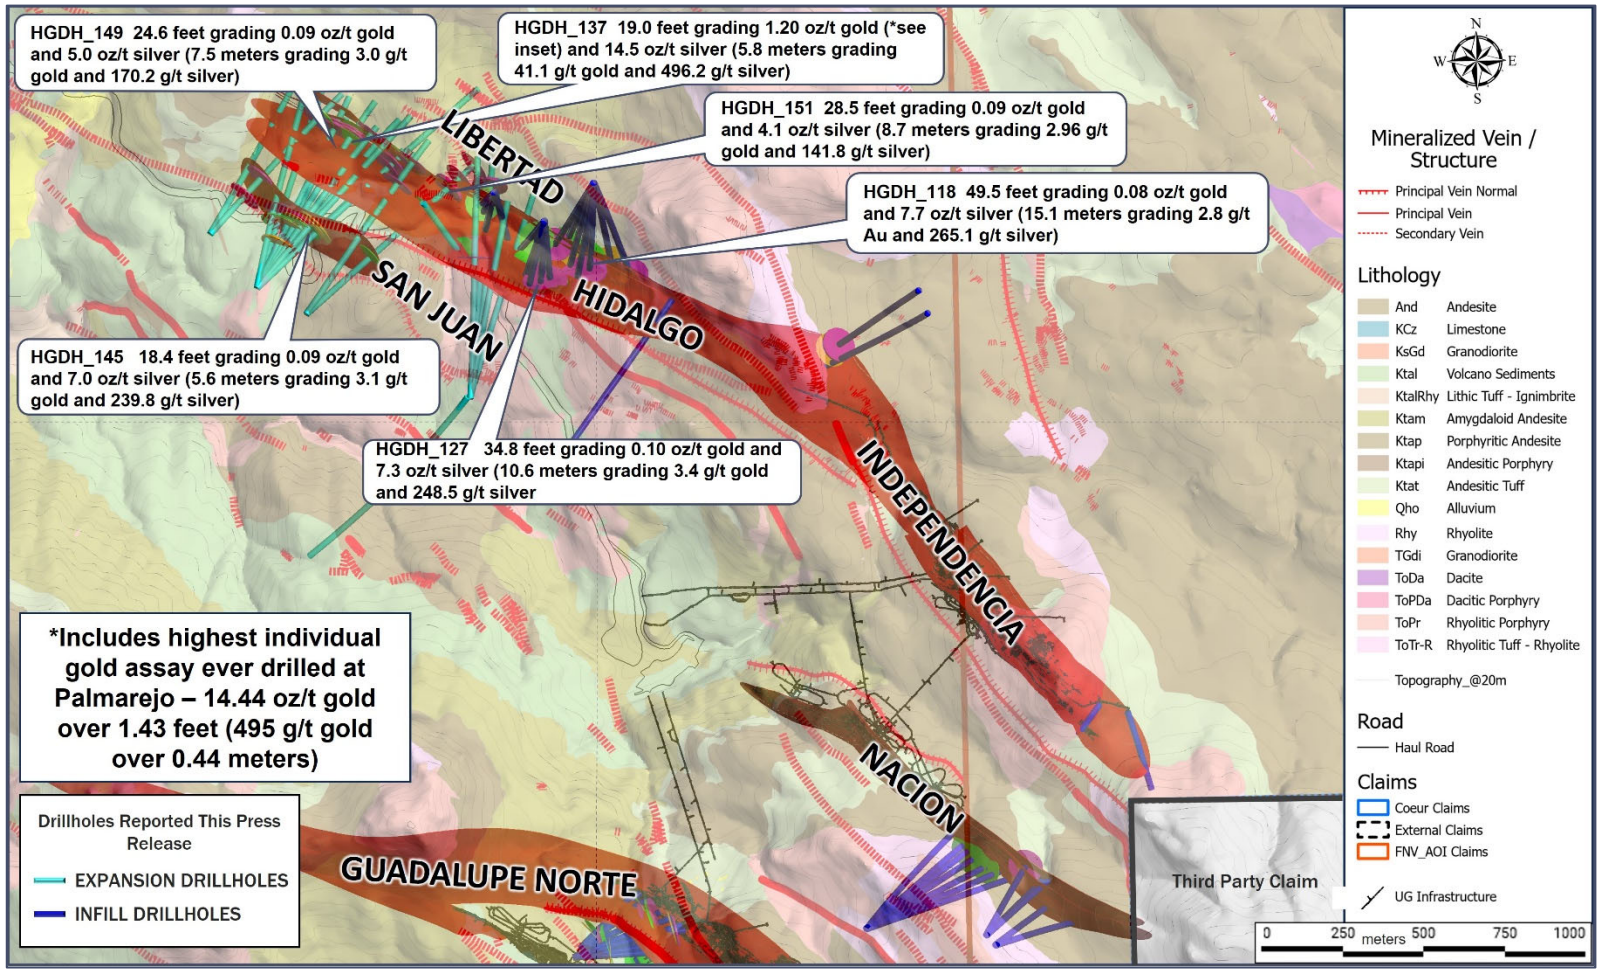

The Company began a multi-year exploration investment program in 2022 aimed at leveraging evolving geologic understanding of Kensington's primary deposits and extending the mine life beyond 2030

- Early project success resulted in the addition of 1.5 years of mine life, net of depletion, as of year-end 2022 (first reserve growth since 2018)
- Ongoing technical review and geologic modeling is enhancing the understanding of controls to mineralization with positive implication for near-mine targeting and resource growth
- Current program aims to add mine life for three key deposits (Kensington main, Elmira and Johnson) with recent drill results showing continuity to the south and down-dip
- POA 1 tailings and waste rock storage approval allows for infrastructure to accommodate longer mine life; investigating long-term line power solution

Continued Palmarejo Exploration Success

Recent drill results in the Hidalgo deposit at the Company's Palmarejo gold-silver complex located in Chihuahua, Mexico returned some of the best grade thicknesses in recent years including one assay returning 19 feet at an average gold grade of 1.3 ounces per ton

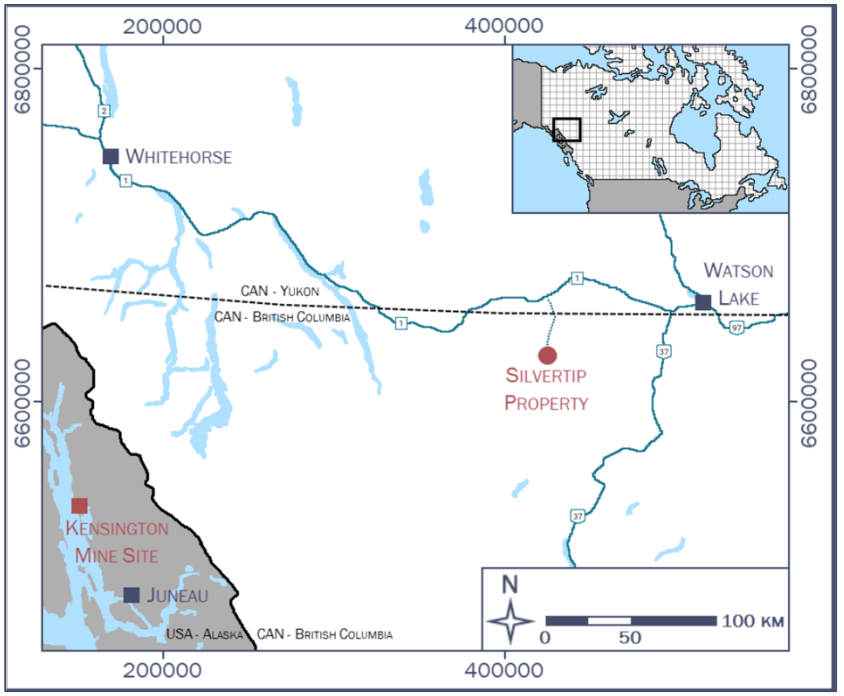

Note: For a complete table of all drill results published in 2023, please refer to the following link: https://s201.q4cdn.com/254090064/files/doc_downloads/2023/08/08/2023-08-09-Exploration-Update-Appendix-Final.pdf.

Silvertip: Critical Minerals in a Top Jurisdiction

Coeur remains optimistic about the long-term opportunity for Silvertip as a transformative cornerstone asset. The Company is focused on targeted exploration and prudent cost management to further grow this high-grade resource and advance a robust business case

- Between 2018 and 2022 Coeur invested approximately $53 million in exploration and drilled over 300,000 meters leading to considerable increases in the high-grade resource
- Measured and indicated resources have grown to over 7 million tons[1], with very high grades of silver, zinc and lead
- Significantly enhanced geologic understanding of existing deposits (Silver Creek, Discovery, Southern Silver and Camp Creek) within this large, prospective land package
- Key stakeholder engagement ongoing—including with the Canadian government—to pursue inclusion of Silvertip in the Canadian Critical Minerals Strategy
- Anticipated project development timetable provides window for balance sheet de-levering following planned Rochester POA 11

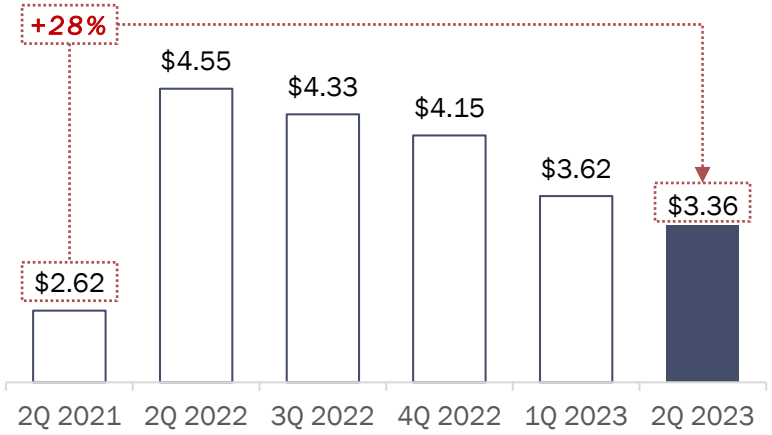

Note: See slides in appendix for additional information related to mineral reserves and resources.
(1) As of December 31, 2022.

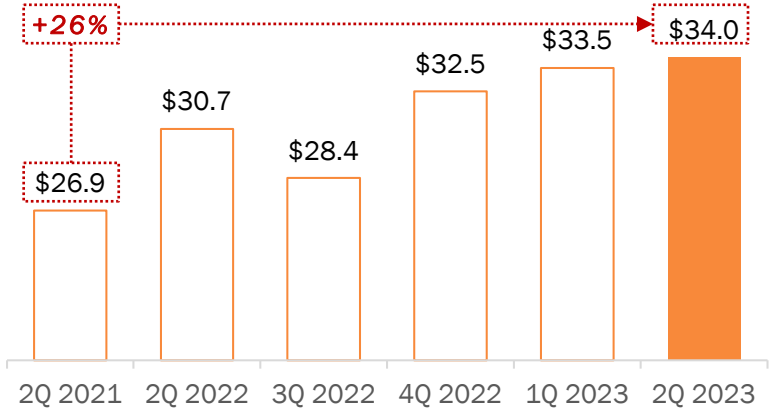

Inflationary Cost Pressures Remain

Coeur has continued to experience inflationary pressures – particularly compared to 24 months ago – with some recent easing in diesel prices

Diesel Cost Per Gallon

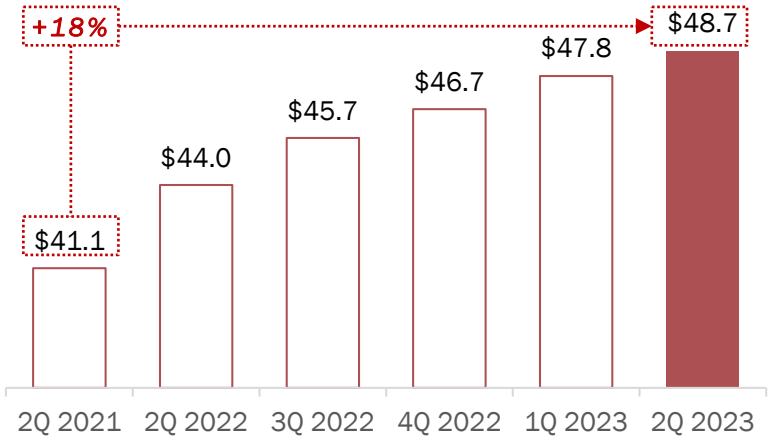

Materials, Parts and Supplies Cost

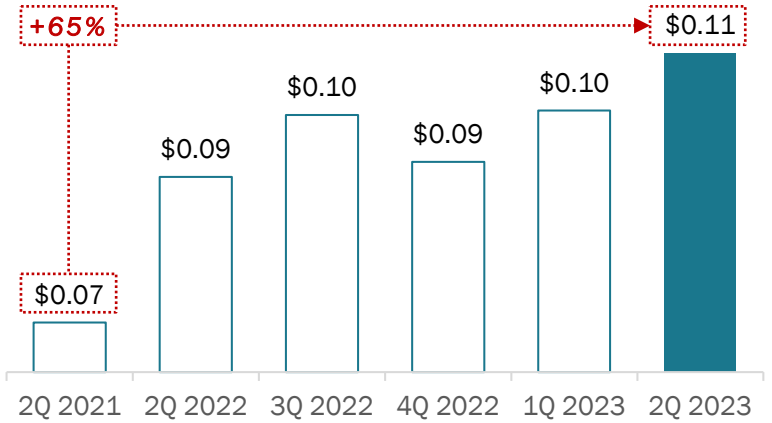

Labor Cost

Power Cost Per Kilowatt

Balance Sheet and Hedging Summary

Liquidity Profile[1,2]

($M)

Debt and Leverage Summary[1,3]

($M)

	Dec. 31, 2022	Mar. 31, 2023	Jun. 30, 2023
5.125% senior notes due 2029	369.2	369.4	321.9
Revolving credit facility	80.0	60.0	80.0
Capital lease obligations	66.7	64.6	66.7
TOTAL DEBT	$515.9	$494.0	$469.4
Cash and cash equivalents	$61.5	$67.0	$56.8
LEVERAGE RATIOS			
LTM adjusted EBITDA	$139.0	$122.6	$101.5
Total debt / LTM adjusted EBITDA	3.7x	4.0x	4.6x
Net debt / LTM adjusted EBITDA	3.3x	3.5x	4.1x

Recent Balance Sheet Initiatives

- Amended RCF agreement to include higher permitted net leverage ratios through 1Q 2024
- Completed innovative financing of Canadian flow-through shares, raising roughly $30 million at a premium share price
- Opportunistically entered into attractive gold and silver hedges for remainder of 2023
- Completed ~$19 million of debt-for-equity exchanges in 3Q 2023
- Completed $50 million ATM Program

Snapshot of Hedges

	3Q 2023	4Q 2023	Total 2023
Gold Ounces Hedged	55,749	55,749	**111,498**
Avg. Forward ($/oz)	$1,977	$1,977	**$1,977**
Silver Ounces Hedged	1,245,000	1,245,000	**2,490,000**
Avg. Forward ($/oz)	$25.34	$25.47	**$25.41**

(1) See non-GAAP reconciliation tables in the appendix to this presentation.
(2) Adjusted liquidity reflects the exercise of the flow-through overallotment completed on July 20, 2023 and the completion of the ATM as announced by the Company on September 18, 2023.
(3) Net debt equals total debt less cash and cash equivalents.

Financial Summary

($M, except metal sales, adj. EBITDA margin and per share amounts)	2Q 2023	1Q 2023	QoQ Δ	2Q 2022	YoY Δ
Metal Sales					
Gold ounces sold (oz)	67,090	70,866	(5%)	84,786	(21%)
Silver ounces sold (M oz)	2.3	2.6	(10%)	2.5	(8%)
Key Financials					
Revenue	$177.2	$187.3	(5%)	$204.1	(13%)
Exploration investment[1]	$5.0	$6.8	(27%)	$13.0	(62%)
Net income (loss)	($32.4)	($24.6)	NM	($77.4)	NM
Cash flow from operating activities	$39.4	($35.0)	NM	$22.6	NM
Capital expenditures	$85.6	$74.0	16%	$73.2	17%
Free cash flow[2,3]	($46.2)	($109.0)	NM	($50.6)	NM
Adjusted Financials					
Adjusted net income (loss)[2]	($20.2)	($33.1)	NM	($13.1)	NM
Adjusted EBITDA[2]	$22.2	$25.1	(12%)	$43.3	(49%)
Adjusted EBITDA margin[2]	13%	13%	(1%)	21%	(9%)
LTM Adjusted EBITDA[2]	$101.5	$122.6	(17%)	$162.2	(37%)
LTM Adjusted EBITDA margin[2]	13%	16%	(2%)	20%	(7%)
Cash flow from operating activities (before changes in working capital)[2]	($6.9)	$6.2	NM	$29.8	NM
Per Share Financials					
Net income (loss) per share	($0.10)	($0.08)	NM	($0.28)	NM
Adjusted net income (loss) per share	($0.06)	($0.11)	NM	($0.05)	NM

Note: "NM" means not meaningful. Percentages may differ due to rounding.
(1) Exploration investment includes expensed and capitalized exploration.
(2) See non-GAAP reconciliation tables in the appendix to this presentation.
(3) Free cash flow is defined as cash flow from operating activities less capital expenditures. See reconciliation tables in the appendix to this presentation.

Recent ESG Accomplishments

COEUR MINING®

Coeur remains committed to being an ESG leader

***Published** GHG emissions target: 35% reduction in net intensity by end of 2024*

Tied executive compensation** and individual incentive programs **to GHG goals

*Sourced **renewable power** for Rochester and Wharf*

***Committed to aligning** with Global Industry Standard on Tailings Management*

MSCI ESG RATINGS A

CCC | B | BB | BBB | A | AA | AAA

*As of 2021, Coeur received an MSCI **ESG Rating** of "**A**"[1]*

*Achieved industry leading & **Company record-low lost-time injury frequency rate** in 2022[1]*

ESR Empresa Socialmente Responsable

*Coeur Mexicana is a **13-time recipient** of Empresa Socialmente Responsable distinction*

After recent Board refreshment, **55% of directors are diverse**

ISS QualityScore GOVERNANCE
Highest Rating By INSTITUTIONAL SHAREHOLDER SERVICES

*ISS **QualityScore** of "1" for Governance (Highest Possible)*

*Mitch Krebs, President & CEO, **served as** Chair of NMA ESG Task Force. Now **serves as** Chair of NMA*

*2020 & 2019 **Winner***
*2021, 2022 & 2023 **Finalist***
Best Proxy Statement (mid-/small cap), Corporate Secretary

(1) Source(s): U.S. Department of Labor Mine Safety and Health Administration (MSHA): Metal Operators Mine Safety and Health Statistics; Coeur average 0.17 injuries per 200,000 employee-hours worked vs. Industry average 1.31.

Looking Ahead: Key Deliverables for 2023

- Complete and accelerate ramp-up of the Rochester expansion project
- Deliver stronger second-half operational performance at Kensington
- Deliver consistent operating and financial results across portfolio while mitigating inflationary cost pressures and achieving full-year guidance
- Accelerate incremental investments in high-potential exploration targets at Kensington, Palmarejo and Silvertip
- Maintain balance sheet flexibility during Rochester ramp-up
- Continue to advance Company's ESG leadership efforts and priorities

2023 Guidance[1]

Production Outlook

	Previous[2]		Updated	
	Gold (oz)	Silver (K oz)	Gold (oz)	Silver (K oz)
Palmarejo	100,000 – 112,500	6,500 – 7,500	100,000 – 112,500	6,500 – 7,500
Rochester	35,000 – 50,000	3,500 – 4,500	35,000 – 50,000	3,500 – 4,500
Kensington	100,000 – 112,500	-	84,000 – 95,000	-
Wharf	85,000 – 95,000	-	85,000 – 95,000	-
Consolidated	**320,000 – 370,000**	**10,000 – 12,000**	**304,000 – 352,500**	**10,000 – 12,000**

CAS Outlook[3]

	Previous[2]		Updated	
	Gold ($/oz)	Silver ($/oz)	Gold ($/oz)	Silver ($/oz)
Palmarejo (co-product)	$900 - $1,050	$14.25 - $15.25	$900 - $1,050	$14.25 - $15.25
Rochester (co-product)	-	-	-	-
Kensington	$1,500 - $1,700	-	$1,650 - $1,750	-
Wharf (by-product)	$1,200 - $1,350	-	$1,200 - $1,350	-

The Company expects Rochester's second half 2023 CAS[3] to be similar to actual first half 2023 CAS[3] as Coeur completes and ramps up the Rochester expansion

Capital, Exploration and G&A

($M)	Previous[2]	Updated
Capital Expenditures, Sustaining[4]	$120 - $145	$148 - $165
Capital Expenditures, Growth	$200 - $235	$230 - $264
Exploration, Expensed	$30 - $35	$30 - $35
Exploration, Capitalized	$10 - $15	$10 - $15
General & Administrative Expenses	$36 - $40	$36 - $40

Note: The Company's previous guidance figures assume estimated prices of $1,800/oz gold and $23.00/oz silver as well as CAD of 1.25 and MXN of 20.00. The Company's updated guidance figures assume estimated prices of $1,900/oz gold and $23.00/oz silver as well as CAD of 1.25 and MXN of 20.00. Guidance figures exclude the impact of any metal sales or foreign exchange hedges.

(1) Guidance as published by Coeur on August 9, 2023.
(2) Previous guidance as published by Coeur on May 10, 2023.
(3) See non-GAAP reconciliation tables in the appendix to this presentation.
(4) Sustaining capital expenditures exclude capital leases.

ESG Highlights

What Matters to Coeur

Coeur strives to be an industry leader in ESG, integrating factors into each aspect of its operations, activities and strategic decision-making as the Company looks to the future. The following list includes material environmental, social and governance issues that matter to Coeur

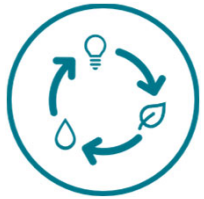

Governance

- Anti-Bribery & Anti-Corruption
- Board Diversity
- Board ESG Oversight
- Ethics & Compliance
- Sustainability Integral to Company Strategy

People

- Diversity, Equity & Inclusion
- Employee Training & Development
- Workforce Health and Safety

Environment

- Biodiversity
- Climate Change
- Greenhouse Gas Emissions
- Reclamation & Closure
- Tailings
- Water

Communities

- Human Rights
- Local Supply & Hiring
- Local Community Development & Engagement

ESG Goals and Targets

Environment: Lessen Coeur's overall environmental impact and reduce costs over time

- **GHG Emissions:** 35% reduction in net intensity by end of 2024 compared to baseline[1]
- **Permit discharge exceedances:** Sustain low incident frequency, 1 or less events in 2023 (0 events in 2022)
- **Biodiversity:** Develop biodiversity standard

People: Maintain Coeur as an employer of choice

- **Safety:** 7% year-over-year reduction in total reportable injury frequency rate of employees + contractors
- **Diversity:** Measure year-over-year (2023 versus 2022) progress on scores and actions identified through the inclusion index

Communities: In partnership with communities, contribute to mutual long-term prosperity

- **Community impact:** Conduct an internal review of the site-specific community grievance processes to promote alignment with the Company policy developed in 2022 and consistent application

Governance: Maintain best-in-class governance

- **Ethics & Compliance:** 95% or greater participation rate in Ethics & Compliance trainings

(1) Baseline average of 2018-2019 CO2 eq. intensity was 14.3 kg CO2 eq. / ton processed.

Committed to Reaching our GHG Target

In 2022, 20% of Coeur's executive performance share award was tied to the achievement of its 35% emissions net intensity reduction goal. Through site-specific analyses, additional initiatives were identified that are expected to reduce energy consumption, directly tied to our emissions

Objective: Lessen Coeur's overall environmental impact and reduce costs over time

- **GHG Emissions:** 35% reduction in net intensity by end of 2024 compared to baseline

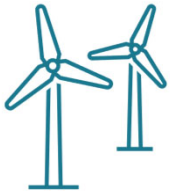

2022 Progress: In 2022, the Company recognized an 8.5% net intensity reduction in GHG emissions compared to the baseline

- **Coeur is on track** to achieve our goal to reduce greenhouse gas (GHG) emissions net intensity by 35% by the end of 2024

Key Changes

Identified additional initiatives that are expected to reduce energy consumption through our site-specific analyses

Sourced renewable energy at Rochester in 2022

Shifted to market-based accounting method to reflect differentiated energy options at Rochester[1]

(1) Based on the GHG Protocol Scope 2 guidance.

Diversity, Equity & Inclusion

In 2022, we advanced our work on Diversity, Equity and Inclusion initiatives at all levels of our organization which included achieving both of our publicly stated DE&I goals

- ✓ *Increase the number of female directors by the 2023 Annual Stockholders' Meeting*
- ✓ *Establish and roll out an inclusion index with piloted adoption across all sites*

Appointed Jeane Hull as director in July 2022	*Elected Paramita Das as director at the 2023 Annual Stockholders' Meeting*	*Enhanced the overall diversity of Coeur's board with 5 out of 9 directors elected in 2023 either gender or ethnically diverse leading to 55% board diversity*
Established inclusion index with baseline rollout across all sites	*Continued to support the CEO Action for Diversity and Inclusion initiatives with member signatories and internal training*	*Provided career opportunities to over 80 current and former U.S. military personnel with our Coeur Heroes program*

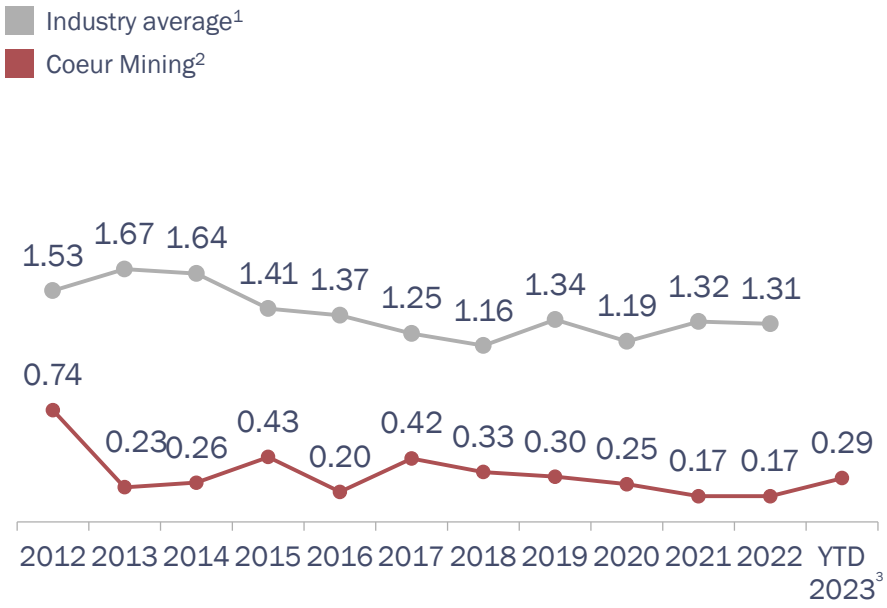

Industry-Leading Safety Performance

Coeur has been certified in the National Mining Association's CORESafety program since 2017 and completed its recertification in July 2021

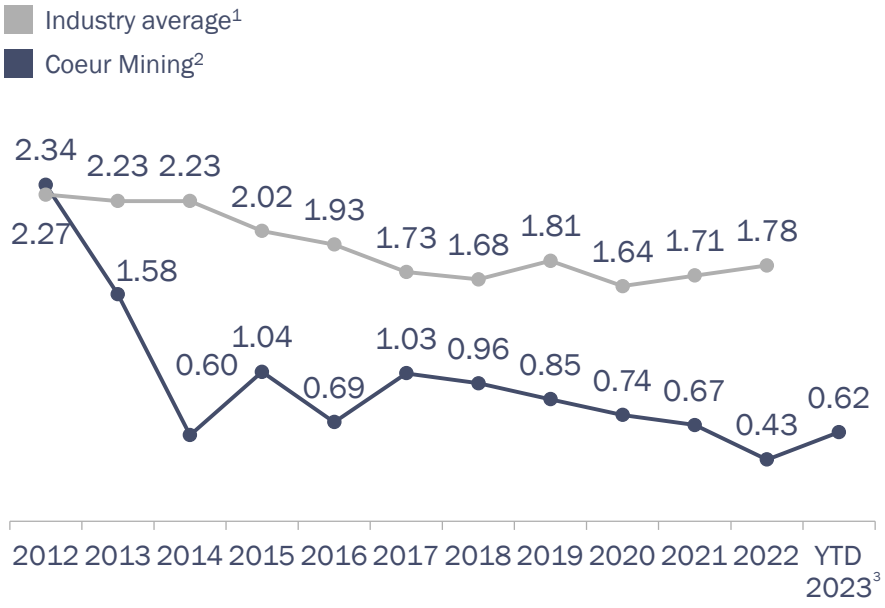

CORESAFETY® Certified

Coeur's injury frequency rate remains significantly below industry averages, achieving a Company record-low lost-time injury frequency rate in 2022

Lost-Time Injury Frequency Rate

Total Reportable Injury Frequency Rate

(1) Source(s): U.S. Department of Labor Mine Safety and Health Administration (MSHA): Metal Operators Mine Safety and Health Statistics. Injuries per 200,000 employee-hours worked.
(2) Includes both Coeur employees and contract workers.
(3) Coeur YTD information through July 31, 2023.

Precious Metals Are *Coeur* to Everyday Life

Coeur is an important part of the supply chains for gold and silver. Due to their unique properties, gold and silver have numerous innovative uses that shape the way we live today and enable a more sustainable, healthier tomorrow

Au

Coeur's Palmarejo, Rochester, Kensington and Wharf mines produce gold, which is a critical component of:

Medical Devices
COVID-19 diagnostic test kits, pacemakers, CAT scan equipment and others

Electronics
Nanotechnology and touch screen monitors

Electrification Devices
Batteries and solar panels

Transportation
GPS technology and catalytic converters in motor vehicles & electric vehicle circuit boards

Ag

Coeur's Palmarejo and Rochester mines produce silver, which is a critical component of:

Medical Devices
Bandages, pharmaceuticals and anti-microbial coating for equipment

Renewable Energy
Photovoltaic cells in solar panels

Transportation
Electric vehicle controls and charging stations; multifunctional automotive glass

Household Items
Mirrors, clothing, jewelry, "smart" home systems

Public Health
Water purification systems

Appendix

Coeur's Capital Allocation Framework

Mining is capital intensive and requires a disciplined approach to capital allocation with a view toward long-term reserve replacement and growth

Palmarejo

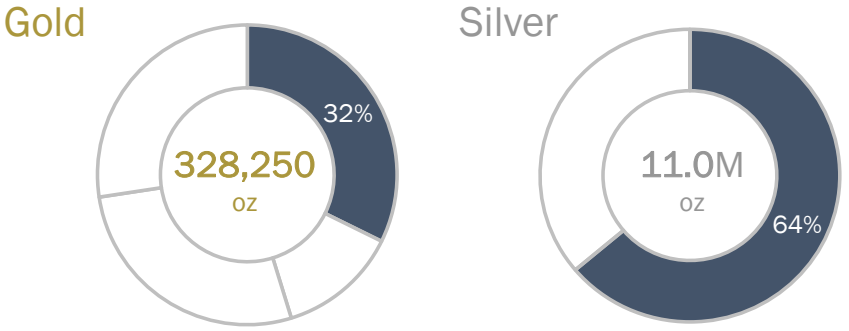

The Palmarejo gold-silver complex is located in the state of Chihuahua, Mexico, consisting of a legacy open pit mine, current underground mining and processing operations as well as several other deposits and exploration targets

Asset Overview

Ownership	100%
Employees[1]	942
Claims	67,296 net acres
Type	Underground
Processing	Crushing, grinding, flotation, CIL, Merrill-Crowe precipitation, refining
Metals	Silver and gold doré
Mine life	~8 years

Share of Companywide 2023E[2] Production

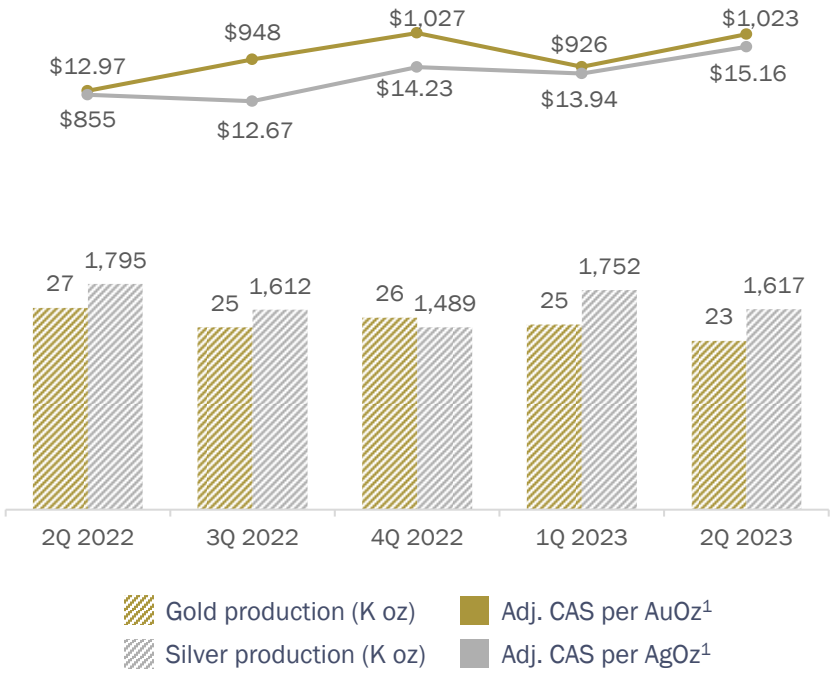

Reserves & Resources[3]

(1) As of December 31, 2022.
(2) Guidance (or with respect to percentages, midpoint of guidance) as published by Coeur on August 9, 2023.
(3) See slides in appendix for additional information related to mineral reserves and resources.

(1) See applicable non-GAAP reconciliation tables in the appendix to this presentation.
(2) Excludes third-party refining charges.
(3) Excludes management fee allocated from corporate.

Rochester

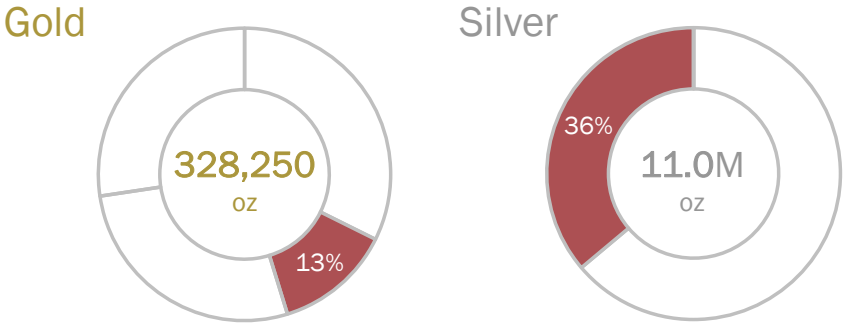

The Rochester mine is an open pit, heap leach silver-gold operation, located in northern Nevada, which is currently completing a significant expansion that is expected to drive a step-change in production and cash flow

Asset Overview

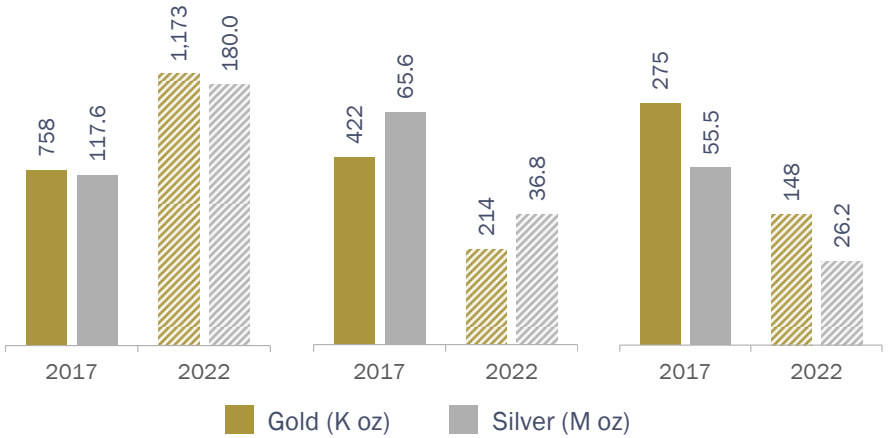

Ownership	100%
Employees[1]	337
Claims	17,044 net acres
Type	Open pit and heap leach
Processing	Crushing, dump heap leaching, Merrill-Crowe precipitation, refining
Metals	Silver and gold doré
Mine life	~13 years

Share of Companywide 2023E[2] Production

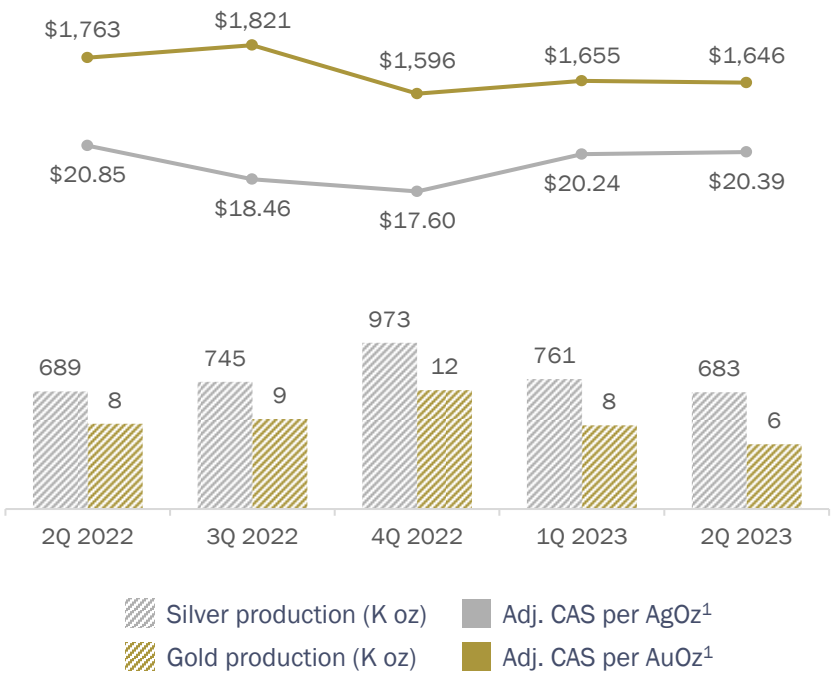

Reserves & Resources[3]

(1) As of December 31, 2022.
(2) Guidance (or with respect to percentages, midpoint of guidance) as published by Coeur on August 9, 2023.

(3) Excludes third-party smelting charges, which are reflected in average realized selling prices of concentrate production.
(4) Excludes management fee allocated from corporate.

Wharf

The Wharf mine is an open pit, heap leach gold operation located in western South Dakota. The property consists of several areas of adjoining gold mineralization, which have been mined as a series of open pits

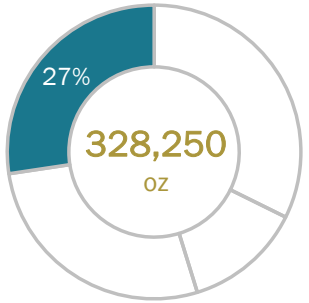

Asset Overview

Ownership	100%
Employees[1]	245
Claims	7,852 net acres
Type	Open pit and heap leach
Processing	Crushing, "on-off" heap leaching, spent ore neutralization, carbon absorption/desorption
Metals	Electrolytic cathodic sludge
Mine life	~8 years

Reserves and Resources (cont.)

Notes to 2022 Mineral Reserves:

(1) The Mineral Reserve estimates are current as of December 31, 2022 and are reported using the definitions in Item 1300 of Regulation S–K (17 CFR Part 229) (SK1300) and were prepared by the company's technical staff.

(2) 3Assumed metal prices for 2022 Mineral Reserves were $21.00 per ounce of silver, $1,600 per ounce of gold, $1.15 per pound of zinc, $0.95 per pound of lead, except for Kensington at $1,700 per ounce of gold.

(3) Mineral Reserve estimates use the following key input parameters: Assumption of conventional longhole underground mining; reported above a variable gold equivalent cut-off grade that ranges from 2.02–2.07 g/t AuEq and an incremental development cut-off grade of 1.05 g/t AuEq; metallurgical recovery assumption of 90.5% for gold and 82.5% for silver; mining dilution assumes 0.4-1.0 meter of hanging wall waste dilution; mining loss of 20% was applied; variable mining costs that range from US$44.74–US$47.13/tonne, surface haulage costs of US$4.01/tonne, process costs of US$29.17/tonne, general and administrative costs of US$12.56/tonne, and surface/auxiliary support costs of US$3.24/tonne. Excludes the impact of the Franco-Nevada gold stream agreement at Palmarejo in calculation of Mineral Reserves.

(4) Mineral Reserve estimates are tabulated within a confining pit design and use the following input parameters: Rochester oxide variable recovery Au = 77.7-93.7% and Ag = 59.4%; Rochester sulfide variable recovery Au = 15.2-77.7% and Ag = 0.0-59.4%; with a net smelter return cutoff of $3.25/st oxide and US$3.35/st sulfide; Nevada Packard oxide recovery Au = 92.0% and Ag = 61.0%; with a net smelter return cutoff of $4.40/st for oxide, where the NSR is calculated as resource net smelter return (NSR) = silver grade (oz/ton) * silver recovery (%) * (silver price ($/oz) - refining cost ($/oz)) + gold grade (oz/ton) * gold recovery (%) * (gold price ($/oz) - refining cost ($/oz)); variable pit slope angles that approximately average 43° over the life-of-mine.

(5) Mineral Reserve estimates use the following key input parameters: assumption of conventional underground mining; gold price of $1700/oz; reported above a gold cut-off grade of 0.133-0.135 oz/st Au; metallurgical recovery assumption of 94%; gold payability of 97.5%; mining dilution varies from 15-23%; mining loss of 5% was applied; variable mining costs that range from US$87.13–90.00/ton mined; process costs of US$54.38/ton processed; general and administrative costs of US$54.76/ton processed; and concentrate refining and shipping costs of US$88.39/oz sold.

(6) Mineral Reserve estimate uses the following key input parameters: assumption of conventional open pit mining; reported above a gold cut-off grade of 0.010 oz/ton Au; average metallurgical recovery assumption of 79.1%; royalty burden of US$64/oz Au; pit slope angles that vary from 34–50°; mining costs of US$2.39/ton mined, process costs of US$11.91/ton processed (includes general and administrative costs)..

(7) Rounding of short tons, grades, and troy ounces, as required by reporting guidelines, may result in apparent differences between tons, grades, and contained metal contents.

Reserves and Resources (cont.)

Notes to 2022 Mineral Resources:

(1) Mineral Resource estimates are reported exclusive of Mineral Reserves, are current as of December 31, 2022, and are reported using definitions in SK1300 on a 100% ownership basis. Mineral Resource estimates were prepared by the Company's technical staff.

(2) Assumed metal prices for 2022 estimated Mineral Resources were $25.00 per ounce of silver, $1,800 per ounce of gold, $1.30 per pound of zinc, $1.00 per pound of lead, unless otherwise noted.

(3) Mineral Resource estimates use the following key input parameters: Assumption of conventional longhole underground mining; reported above a variable gold equivalent cut-off grade that ranges from 1.75-1.84 g/t AuEq; metallurgical recovery assumption of 90.5% for gold and 82.5% for silver; variable mining costs that range from US$42.50–US$47.13/tonne, surface haulage costs of US$4.01/tonne, process costs of US$29.17/tonne, general and administrative costs of US$12.56/tonne, and surface/auxiliary support costs of US$3.24/tonne. Excludes the impact of the Franco-Nevada gold stream agreement at Palmarejo in calculation of Mineral Resources.

(4) Mineral Resource estimates use the following key input parameters: assumption of conventional longhole underground mining; reported above a variable gold cut-off grade that ranges from 0.125–0.191 oz/ton Au; metallurgical recovery assumption of 94%; gold payability of 97.5%, variable mining costs that range from US$87.13–175.48/ton mined; process costs of US$54.38/ton processed; general and administrative costs of US$54.76/ton processed; and concentrate refining and shipping costs of US$88.39/oz sold.

(5) Mineral Resource estimate uses the following key input parameters: assumption of conventional open pit mining; reported above a gold cut-off grade of 0.010 oz/ton Au; average metallurgical recovery assumption of 78.7% across all rock types; royalty burden of US$64/oz Au; pit slope angles that vary from 34–50°; mining costs of $2.39/ton mined, process costs of US$11.91/ton processed (includes general and administrative costs).

(6) Mineral Resource estimates are tabulated within a confining pit shell and use the following input parameters: Rochester oxide variable recovery Au = 77.7-93.7% and Ag = 59.4%; Rochester sulfide variable recovery Au = 15.2-77.7% and Ag = 0.0-59.4%; with a net smelter return cutoff of $3.25/st oxide and US$3.35/st sulfide; Nevada Packard oxide recovery Au = 92.0% and Ag = 61.0%; with a net smelter return cutoff of $4.40/st for oxide, where the NSR is calculated as resource net smelter return (NSR) = silver grade (oz/ton) * silver recovery (%) * (silver price ($/oz) - refining cost ($/oz)) + gold grade (oz/ton) * gold recovery (%) * (gold price ($/oz) - refining cost ($/oz)); variable pit slope angles that approximately average 43° over the life-of-mine.

(7) Underground Mineral Resource estimates are reported using a net smelter return ("NSR") cutoff of US$130/tonne. Mineral Resources are reported insitu using the following assumptions: The estimate use the following key input parameters: lead recovery of 89-90%, zinc recovery of 82-83% and silver recovery of 83-84%. Lead concentrate grade of 53-54%; zinc concentrate grade of 56-57%; mining costs of US$68.77/tonne; processing costs of US$58.20/tonne and US$46.49/tonne, where the NSR ($/tonne) = tonnes x grade x metal prices x metallurgical recoveries – royalties – TCRCs – transport costs over the life of the mine.

(8) Open Pit Mineral Resource estimate is reported in-situ and are contained within a confining pit shell and use the following key input parameters: reported above an oxide gold equivalent cutoff of 0.15 ounces per ton and 0.20 oz ounces per ton assuming a silver to gold ratio of 60:1; gold recoveries of 64%; silver recoveries of 59%; mining costs of US$3.10/ton; process costs of US$3.60/ton; general and administrative costs of $1.50/ton processed; average pit slope angles of 45° over the life-of-mine. The technical and economic parameters are those that were used in the 2018 Resource Estimation. Based on the QPs review of the estimate, there would be no material change to the Mineral Resource if a gold price of US$1,700/oz, a silver price of US$22/oz or economic parameters were updated. Therefore the 2018 Mineral Resource is considered current and is presented unchanged.

Reserves and Resources (cont.)

Notes to 2022 Mineral Resources (cont.):

(9) Open Pit Mineral Resource estimates are reported using an equivalent gold cutoff of 0.20 ounces per ton assuming a silver to gold ratio of 60:1. Resources are reported in-situ and contained withed a conceptual measured, indicated and inferred optimized pit shell. Silver price of US$20/oz, gold price of US$1,400/oz. Average oxide and sulfide gold recovery is 70%, average carbonaceous gold recovery is 50%. Average oxide and sulfide gold recovery is 60%. Average carbonaceous silver recovery is 50%. Open pit mining cost is US$1.50/ton, processing and processing and G&A cost is US$5.46/ton; average pit slope angles of 50°. The technical and economic parameters are those that were used in the 2017 Resource Estimation. Based on the QPs review of the estimate, there would be no material change to the mineral resources if a gold price of US$1,700/oz, a silver price of US$22/oz or economic parameters were updated. Therefore the 2018 Mineral Resource report is considered current and is presented unchanged.

(10) Rounding of short tons, grades, and troy ounces, as required by reporting guidelines, may result in apparent differences between tons, grades, and contained metal contents.

Reserves and Resources (cont.)

Notes to 2021 Mineral Reserves:

(1) The Mineral Reserve estimates are current as of December 31, 2021 and are reported using the definitions in Item 1300 of Regulation S–K (17 CFR Part 229) (SK1300) and were prepared by the company's technical staff.

(2) Assumed metal prices for 2021 Mineral Reserves were $20.00 per ounce of silver, $1,400 per ounce of gold, $1.15 per pound of zinc, $0.95 per pound of lead.

(3) Palmarejo Mineral Reserve estimates use the following key input parameters: Assumption of conventional longhole underground mining; reported above a variable gold equivalent cut-off grade that ranges from 1.94–2.51 g/t AuEq and an incremental development cut-off grade of 1.08 g/t AuEq; metallurgical recovery assumption of 93.1% for gold and 81.9% for silver; mining dilution assumes 1 meter of hanging wall waste dilution; mining loss of 5% was applied; variable mining costs that range from US$36.01–US$41.75/tonne, surface haulage costs of US$3.52/t, process costs of US$27.29/tonne, general and administrative costs of US$11.00/tonne, and surface/auxiliary support costs of US$3.19/tonne. Excludes the impact of the Franco-Nevada gold stream agreement at Palmarejo in calculation of Mineral Reserves.

(4) Rochester Mineral Reserve estimates are tabulated within a confining pit shell and use the following input parameters: Rochester oxide recovery Au = 85% and Ag = 59%; Nevada Packard oxide recovery Au = 95% and Ag = 61%; with a net smelter return cutoff of $2.55/st oxide and US$2.65/st sulfide, where the NSR is calculated as resource net smelter return (NSR) = silver grade (oz/ton) * silver recovery (%) * silver price ($/oz) - refining cost ($/oz) + gold grade (oz/ton) * gold recovery (%) * gold price ($/oz) - refining cost ($/oz); variable pit slope angles that approximately average 43° over the life-of-mine.

(5) Kensington Mineral Reserve estimates use the following key input parameters: assumption of conventional underground mining; gold price of $1400/oz; reported above a gold cut-off grade of 0.143-0.201 oz/st Au; metallurgical recovery assumption of 95%; gold payability of 97.5%; mining dilution varies from 15-23%; mining loss of 5% was applied; variable mining costs that range from US$90.91–150.73/ton mined; process costs of US$46.93/ton processed; general and administrative costs of US$38.83/ton processed; and concentrate refining and shipping costs of US$60.00/oz sold.

(6) Wharf Mineral Reserve estimate uses the following key input parameters: assumption of conventional open pit mining; reported above a gold cut-off grade of 0.010 oz/ton Au; metallurgical recovery assumption of 80%; royalty burden of US$56/oz Au; pit slope angles that vary from 34–50°; mining costs of US$2.15/ton mined, rehandle costs of US$1.65/ton rehandled, process costs of US$10.34/ton processed (includes general and administrative costs).

(7) Silvertip Underground Mineral Resource estimates are reported using a net smelter return ("NSR") cutoff of US$130-160/tonne. Mineral Resources are reported insitu using the following assumptions: The estimate use the following key input parameters: lead recovery of 87-88%, zinc recovery of 81-82% and silver recovery of 88-89 %. Lead concentrate grade of 51-53%; zinc concentrate grade of 48-50%; mining dilution varies from 5-25%; mining loss of 5% was applied; mining costs of US$68.77/tonne; processing costs of US$58.20/tonne and US$46.49/tonne, where the NSR ($/tonne) = tonnes x grade x metal prices x metallurgical recoveries – royalties – TCRCs – transport costs over the life of the mine.

(8) Rounding of short tons, grades, and troy ounces, as required by reporting guidelines, may result in apparent differences between tons, grades, and contained metal contents.

Reserves and Resources (cont.)

Notes to 2021 Mineral Resources:

(1) Mineral Resource estimates are reported exclusive of Mineral Reserves, are current as of December 31, 2021, and are reported using definitions in SK1300 on a 100% ownership basis. Mineral Resource estimates were prepared by the Company's technical staff.

(2) Assumed metal prices for 2021 estimated Mineral Resources were $22.00 per ounce of silver, $1,700 per ounce of gold, $1.30 per pound of zinc, $1.00 per pound of lead, unless otherwise noted.

(3) Palmarejo Mineral Resource estimates use the following key input parameters: Assumption of conventional longhole underground mining; reported above a variable gold equivalent cut-off grade that ranges from 1.59-2.21 g/t AuEq; metallurgical recovery assumption of 93.1% for gold and 81.9% for silver; variable mining costs that range from US$36.01–US$41.75/t, surface haulage costs of US$3.52/tonne, process costs of US$27.29/tonne, general and administrative costs of US$11.00/tonne, and surface/auxiliary support costs of US$3.19/tonne. Excludes the impact of the Franco-Nevada gold stream agreement at Palmarejo in calculation of Mineral Resources.

(4) Kensington Mineral Resource estimates use the following key input parameters: assumption of conventional longhole underground mining; reported above a variable gold cut-off grade that ranges from 0.116–0.164 oz/ton Au; metallurgical recovery assumption of 95%; gold payability of 97.5%, variable mining costs that range from US$90.91–150.73/ton mined, process costs of US$46.93/ton processed, general and administrative costs of US$38.83/ton processed. and concentrate refining and shipping costs of US$60.00/oz sold.

(5) Wharf Mineral Resource estimate uses the following key input parameters: assumption of conventional open pit mining; reported above a gold cut-off grade of 0.010 oz/ton Au; metallurgical recovery assumption of 78.7% across all rock types; royalty burden of US$56/oz Au; pit slope angles that vary from 34–50°; mining costs of $2.15/ton mined, rehandle costs of US$1.65/ton rehandled, process costs of US$10.34/ton processed (includes general and administrative costs).

(6) Rochester Mineral Resource estimates are tabulated within confining pit shells that uses the following input parameters: oxide gold recovery of 77.7%-93.7% and silver recovery with range of 59%-61%; sulfide gold recovery range of 15.2%-77.7% and silver recovery with range of 0.0%-59% with a net smelter return cutoff of US$2.55–US$3.70/ton oxide and US$2.65/ton sulfide, where the NSR is calculated as resource net smelter return (NSR) = silver grade (oz/ton) * silver recovery (%) * silver price ($/oz) - refining cost ($/oz) + gold grade (oz/ton) * gold recovery (%) * gold price ($/oz) - refining cost ($/oz); and variable pit slope angles that approximately average 43° over the life-of-mine.

(7) Silvertip Underground Mineral Resource estimates are reported using a net smelter return ("NSR") cutoff of US$130/tonne. Mineral Resources are reported insitu using the following assumptions: The estimate use the following key input parameters: lead recovery of 87-88%, zinc recovery of 81-82% and silver recovery of 88-89 %. Lead concentrate grade of 51-53%; zinc concentrate grade of 48-50%; mining costs of US$68.77/tonne; processing costs of US$58.20/tonne and US$46.49/tonne, where the NSR ($/tonne) = tonnes x grade x metal prices x metallurgical recoveries – royalties – TCRCs – transport costs over the life of the mine.

(8) Lincoln Hill Open Pit Mineral Resource estimate is reported in-situ and are contained within a confining pit shell and use the following key input parameters: reported above an oxide gold equivalent cutoff of 0.15 ounces per ton and 0.20 oz ounces per ton assuming a silver to gold ratio of 60:1; gold recoveries of 64%; silver recoveries of 59%; mining costs of US$3.10/ton; process costs of US$3.60/ton; general and administrative costs of $1.50/ton processed; average pit slope angles of 45° over the life-of-mine. The technical and economic parameters are those that were used in the 2018 Resource Estimation. Based on the QPs review of the estimate, there would be no material change to the Mineral Resource if a gold price of US$1,700/oz, a silver price of US$22/oz or economic parameters were updated. Therefore the 2018 Mineral Resource is considered current and is presented unchanged.

Reserves and Resources (cont.)

Notes to 2021 Mineral Resources (cont.):

(9) Wilco Open Pit Mineral Resource estimates are reported using an equivalent gold cutoff of 0.20 ounces per ton assuming a silver to gold ratio of 60:1. Resources are reported in-situ and contained withed a conceptual measured, indicated and inferred optimized pit shell. Silver price of US$20/oz, gold price of US$1,400/oz. Average oxide and sulfide gold recovery is 70%, average carbonaceous gold recovery is 50%. Average oxide and sulfide gold recovery is 60%. Average carbonaceous silver recovery is 50%. Open pit mining cost is US$1.50/ton, processing and processing and G&A cost is US$5.46/ton; average pit slope angles of 50°. The technical and economic parameters are those that were used in the 2018 Resource Estimation. Based on the QPs review of the estimate, there would be no material change to the Mineral Resource if a gold price of US$1,700/oz, a silver price of US$22/oz or economic parameters were updated. Therefore the 2018 Mineral Resource report is considered current and is presented unchanged.

(10) Rounding of short tons, grades, and troy ounces, as required by reporting guidelines, may result in apparent differences between tons, grades, and contained metal contents.

Notes to 2017 mineral reserves and resources:

(1) Effective December 31, 2017.

(2) Assumed metal prices for estimated Mineral Reserves were $17.50 per ounce of silver and $1,250 per ounce of gold.

(3) Assumed metal prices for estimated Mineral Resources were $20.00 per ounce of silver, $1,400 per ounce of gold, $1.15 per pound Zinc and $1.00 per pound Lead.

(4) Mineral Resources are in addition to Mineral Reserves and do not have demonstrated economic viability. Inferred Mineral Resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of Mineral Reserves, and there is no certainty that the Inferred Mineral Resources will be realized.

(5) Rounding of tons and ounces, as required by reporting guidelines, may result in apparent differences between tons, grade, and contained metal content.

(6) For details on the estimation of mineral resources and reserves, including the key assumptions, parameters and methods used to estimate the Mineral Resources and Mineral Reserves, Canadian investors should refer to the NI 43-101 Technical Reports for Coeur's properties on file at www.sedar.com.

Executive Leadership

Mitchell J. Krebs – President and Chief Executive Officer. During his twenty-year tenure with Coeur, Mr. Krebs has led nearly $2 billion in capital raising and debt restructuring activities and has facilitated over $2 billion of acquisitions and divestitures. Mr. Krebs was previously Coeur's Chief Financial Officer and held various positions in the corporate development department, including Senior Vice President of Corporate Development. Mr. Krebs is a Director of Kansas City Southern Railway Company and the National Mining Association, is Chairman of the National Mining Association, is on the Board of World Business Chicago, and on the Executive Committee of the Silver Institute.

Thomas S. Whelan – Senior Vice President and Chief Financial Officer. Prior to joining Coeur, Mr. Whelan served as CFO of Arizona Mining Inc. from September 2017 to August 2018, when the company was acquired from South32 Limited. Previously, Mr. Whelan served as CFO for Nevsun Resources Ltd. from January 2014 to August 2017. He is a chartered professional accountant and was previously a partner with the international accounting firm Ernst & Young ("EY") LLP where he was the EY Global Mining & Metals Assurance sector leader, the leader of the EY Assurance practice in Vancouver and previously EY's Canadian Mining & Metals sector leader. Mr. Whelan graduated with a Bachelor of Commerce from Queen's University.

Michael "Mick" Routledge – Senior Vice President and Chief Operating Officer. Mr. Routledge has over 25 years' experience with Rio Tinto in various roles beginning in 1987, including as the Chief Operating Officer (2011-2012) and Vice President HSE, Projects & Operational Value (2012-2014) of the Kennecott Utah Copper mine business and served as the Chief Operating Officer of Asahi Refining from 2015 to 2017. As the Senior Director of Operational Excellence at Anagold Madencilik from 2017 to 2020, Mr. Routledge designed and implemented an operational excellence program for the Copler District in Turkey. Most recently, Mr. Routledge served as the Vice President of Major Projects and Studies of Alacer Gold Corp. from February 2020 until May 2020. Mr. Routledge currently chairs the Health & Safety Division Executive Committee for the Society for Mining, Metallurgy & Exploration board. He received an undergraduate degree from the University of Sunderland, England in Electrical and Control Engineering and received his MBA with a focus on business and strategic transformation from Henley Management College in England.

Casey M. Nault – Senior Vice President, General Counsel, and Chief ESG Officer. Mr. Nault has approximately 25 years of experience as a corporate and securities lawyer, including prior in-house positions with Starbucks Corporation and Washington Mutual, Inc. and law firm experience with Gibson, Dunn & Crutcher. His legal experience includes securities compliance and SEC reporting, corporate governance and compliance, mergers and acquisitions, public and private securities offerings, other strategic transactions, general regulatory compliance, cross-border issues, land use and environmental issues, and overseeing complex litigation. In addition to leading the legal function, since 2018 Mr. Nault has overseen the Company's ESG initiatives, and he also has executive responsibility for several other corporate functions including compliance, internal audit, cybersecurity and IT infrastructure, government affairs and land management.

Aoife M. McGrath – Senior Vice President, Exploration. Ms. McGrath has over 20 years of mining industry experience, spanning all stages of exploration from greenfield works to continental-scale exploration programs. Most recently, Ms. McGrath served as Vice President Exploration, Africa and Middle East at Barrick Gold Corp. Prior to that time, she served as head of Exploration and Geology for Beadell Resources Limited as well as serving in various roles at Alamos Gold Inc., including Director, Exploration and Corporate Development and Vice President, Exploration. She holds a Master of Science in Mineral Exploration from the University of Leicester as well as a Master of Science in Engineering Geology from the Imperial College London.

Emilie C. Schouten – Senior Vice President and Chief Human Resources Officer. Ms. Schouten has 15 years of experience in Human Resources, starting her career at General Electric, where she graduated from GE's Human Resources Leadership Program. After 6 years as an HR Manager with GE, her division was acquired by the world's largest electrical distribution company, Rexel, and Ms. Schouten went on to become the Director of Training and Development. Ms. Schouten has a B.A. in Sociology from Michigan State University and a M.S. in Industrial Labor Relations from University of Wisconsin-Madison.

Board of Directors

Robert E. Mellor – Independent Chairman of the board of Monro, Inc. (auto service provider) since June 2017, and appointed Interim Chief Executive Officer from August 2020 to April 2021. Previously Mr. Mellor was lead independent director from April 2011 to June 2017 and a member of the board of directors since August 2010; Former Chairman, Chief Executive Officer and President of Building Materials Holding Corporation (distribution, manufacturing and sales of building materials and component products) from 1997 to January 2010, director from 1991 to January 2010; former member of the board of directors of CalAtlantic Group, Inc. (national residential home builder) from October 2015 to February 2018, when CalAtlantic was acquired by Lennar Corporation; former member of the board of directors of the Ryland Group (national home builder, merged with another builder to form CalAtlantic) from 1999 to October 2015; and former member of the board of directors of Stock Building Supply Holdings, Inc.
