Forward-Looking Statements and Non-GAAP Measures

Certain statements in this presentation may constitute "forward-looking statements" within the meaning of federal securities laws, including, but not limited to, Rockwell's expectations regarding revenue, profitability, financial position, 2023 guidance, potential EBITDA margin from the Evoqua Water Technologies transaction, future net sales, reliance on capital investments, ability to grow, industry leadership position, and maintain concentrate sales. Words such as "may," "might," "will," "should," "believe," "expect," "anticipate," "estimate," "continue," "can," "could," "would," "develop," "plan," "potential," "predict," "forecast," "project," "plan," "intend," "positioned to," "guidance" or the negatives of these terms, and similar expressions, or statements regarding intent, belief, or current expectations, are forward-looking statements. While Rockwell Medical believes these forward-looking statements are reasonable, undue reliance should not be placed on any such forward-looking statements, which are based on information available to us on the date of this presentation. These forward-looking statements are based upon current estimates and assumptions and are subject to various risks and uncertainties (including, without limitation, those set forth in Rockwell Medical's SEC filings), many of which are beyond our control and subject to change. Actual results could be materially different. Risks and uncertainties include: the risk that we do not become profitable or achieve revenue, gross profit or gross margin targets; the risk that we are unable to reduce our reliance on capital markets; the risk that we are unable to achieve our corporate goals and projected milestones, including geographic expansion, commercial partnerships and new product opportunities; the risk that we are not able to successfully integrate the EVOQUA acquisition; the risk that we are not able to develop FPC for other indications; the risk that FPC is unsafe or not efficacious for new indications; the risk that market opportunities are smaller than estimated; the impact of any further increases in raw material, labor, fuel or other input costs, particularly if we are unable to pass these cost increases along to our customers; the risk that we are unable to obtain additional financing and raise capital as necessary to fund operations or pursue business opportunities; expected financial performance, including cash flows, revenue, growth, margins, funding, liquidity and capital resources; and those risks more fully discussed in the "Risk Factors" section of our Annual Report on Form 10-K for the year ended December 31, 2022, as such description may be amended or updated in any subsequent reports we file with the SEC. Rockwell Medical expressly disclaims any obligation to update our forward-looking statements, except as may be required by law.

This presentation includes certain non-GAAP financial measures. Please see the section entitled "Reconciliation to GAAP Financial measures" in the Appendix for an explanation of management's use of these measures and reconciliations to the most directly comparable GAAP financial measures. These non-GAAP financial measures should be considered in addition to, and not a substitute for, or superior to, net income or other financial measures calculated in accordance with GAAP. Non-GAAP financial measures used by us may be calculated differently from, and therefore may not be comparable to, non-GAAP measures used by other companies.

All data as of June 30, 2023 unless otherwise noted.

ROCKWELL MEDICAL

What is Hemodialysis?

- Procedure whereby a dialysis machine and a special filter called an artificial kidney — or dialyzer — are used to clean a patient's blood.
- Filters out wastes, salts, and excess fluid, and corrects electrolyte and acid-base imbalances for people who have kidney failure, or end-stage kidney disease (ESKD).
- Standard of Care. Accounts for ~90% of all dialysis therapies.
- Performed at a free-standing outpatient dialysis center, a hospital-based outpatient center, or a patient's home.
- Approximately 475,000 patients in U.S. require in-center hemodialysis annually[(a)].
- Each patient receives approximately three treatments per week, totaling ~150 in-clinic procedures per patient per year.
- Each treatment requires 3.3 gallons of concentrate per patient per treatment.

Potential Growth Opportunities and Revenue Streams

Geographic Expansion

- Rockwell continues to increase its market share in Western U.S. and internationally
- Signed Co-Promotion Agreement with B. Braun, targeting customers in the West
- Acquired hemodialysis concentrates business from Evoqua Water Technologies
- Represents a ~$100M opportunity

At-Home

- Increase in home dialysis treatments
- Early estimates suggest that over time, the at-home dialysis and transition care markets have the potential to address up to 80% of the total dialysis market
- Rockwell is well-positioned to address this expanding market

Complementary Products

- Expand product opportunities
- Leverage domain expertise in manufacturing and distribution to develop and/or in-license new products including single-use formulations; new product formulations; additional products in dialysis

Market Consolidation

- Hemodialysis market ripe for consolidation
- Rockwell continues to secure commercial partnerships and seek opportunities in U.S. and ex-U.S. to expand hemodialysis concentrates business

Reconciliation to GAAP Financial Measures

Non-GAAP Financial Measures

To supplement the Company's financial results presented on a U.S. generally accepted accounting principles ("GAAP") basis, the Company has included information about non-GAAP measures of EBITDA and adjusted EBITDA as useful operating metrics. The Company believes that the presentation of these non-GAAP financial measures, when viewed with results under GAAP and the accompanying reconciliation, provides supplementary information to analysts, investors, lenders, and the Company's management in assessing the Company's performance and results from period to period. The Company uses these non-GAAP measures internally to understand, manage and evaluate the Company's performance. These non-GAAP financial measures should be considered in addition to, and not a substitute for, or superior to, net income or other financial measures calculated in accordance with GAAP. Non-GAAP financial measures used by us may be calculated differently from, and therefore may not be comparable to, non-GAAP measures used by other companies.
