Franco Nevada

2024

CORPORATE PRESENTATION

AUGUST

Forward-Looking Statements

This presentation contains "forward-looking information" and "forward-looking statements" within the meaning of applicable Canadian securities laws and the United States Private Securities Litigation Reform Act of 1995, respectively, which may include, but are not limited to, statements with respect to future events or future performance, management's expectations regarding Franco-Nevada's growth, results of operations, estimated future revenues, performance guidance, carrying value of assets, future dividends and requirements for additional capital, mineral resources and mineral reserves estimates, production estimates, production costs and revenue, future demand for and prices of commodities, expected mining sequences, business prospects and opportunities, the performance and plans of third party operators, audits being conducted by the Canada Revenue Agency ("CRA"), the expected exposure for current and future tax assessments and available remedies, and statements with respect to the future status and any potential restart of the Cobre Panama mine and related arbitration proceedings. In addition, statements relating to mineral resources and mineral reserves, gold equivalent ounces ("GEOs") or mine lives are forward-looking statements, as they involve implied assessment, based on certain estimates and assumptions, and no assurance can be given that the estimates and assumptions are accurate and that such mineral resources and mineral reserves, GEOs or mine lives will be realized. Such forward-looking statements reflect management's current beliefs and are based on information currently available to management. Often, but not always, forward-looking statements can be identified by the use of words such as "plans", "expects", "is expected", "budgets", "potential for", "scheduled", "estimates", "forecasts", "predicts", "projects", "intends", "targets", "aims", "anticipates" or "believes" or variations (including negative variations) of such words and phrases or may be identified by statements to the effect that certain actions "may", "could", "should", "would", "might" or "will" be taken, occur or be achieved. Forward-looking statements involve known and unknown risks, uncertainties and other factors, which may cause the actual results, performance or achievements of Franco-Nevada to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. A number of factors could cause actual events or results to differ materially from any forward-looking statement, including, without limitation: fluctuations in the prices of the primary commodities that drive royalty and stream revenue (gold, platinum group metals, copper, nickel, uranium, silver, iron-ore and oil and gas); fluctuations in the value of the Canadian and Australian dollar, Mexican peso and any other currency in which revenue is generated, relative to the U.S. dollar; changes in national and local government legislation, including permitting and licensing regimes and taxation policies and the enforcement thereof; the adoption of a global minimum tax on corporations; regulatory, political or economic developments in any of the countries where properties in which Franco-Nevada holds a royalty, stream or other interest are located or through which they are held; risks related to the operators of the properties in which Franco-Nevada holds a royalty, stream or other interest, including changes in the ownership and control of such operators; relinquishment or sale of mineral properties; influence of macroeconomic developments; business opportunities that become available to, or are pursued by Franco-Nevada; reduced access to debt and equity capital; litigation; title, permit or license disputes related to interests on any of the properties in which Franco-Nevada holds a royalty, stream or other interest; whether or not Franco-Nevada is determined to have "passive foreign investment company" ("PFIC") status as defined in Section 1297 of the United States Internal Revenue Code of 1986, as amended; potential changes in Canadian tax treatment of offshore streams; excessive cost escalation as well as development, permitting, infrastructure, operating or technical difficulties on any of the properties in which Franco-Nevada holds a royalty, stream or other interest; access to sufficient pipeline capacity; actual mineral content may differ from the mineral resources and mineral reserves contained in technical reports; rate and timing of production differences from resource estimates, other technical reports and mine plans; risks and hazards associated with the business of development and mining on any of the properties in which Franco-Nevada holds a royalty, stream or other interest, including, but not limited to unusual or unexpected geological and metallurgical conditions, slope failures or cave-ins, sinkholes, flooding and other natural disasters, terrorism, civil unrest or an outbreak of contagious disease; the impact of future pandemics; and the integration of acquired assets. The forward-looking statements contained herein are based upon assumptions management believes to be reasonable, including, without limitation: the ongoing operation of the properties in which Franco-Nevada holds a royalty, stream or other interest by the owners or operators of such properties in a manner consistent with past practice; the accuracy of public statements and disclosures made by the owners or operators of such underlying properties; no material adverse change in the market price of the commodities that underlie the asset portfolio; Franco-Nevada ongoing income and assets relating to determination of its PFIC status; no material changes to existing tax treatment; the expected application of tax laws and regulations by taxation authorities; the expected assessment and outcome of any audit by any taxation authority; no adverse development in respect of any significant property in which Franco-Nevada holds a royalty, stream or other interest; the accuracy of publicly disclosed expectations for the development of underlying properties that are not yet in production; integration of acquired assets; and the absence of any other factors that could cause actions, events or results to differ from those anticipated, estimated or intended. However, there can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Investors are cautioned that forward-looking statements are not guarantees of future performance. In addition, there can be no assurance as to (i) the outcome of the ongoing audit by the CRA or Franco-Nevada exposure as a result thereof, or (ii) the future status and any potential restart of the Cobre Panama mine or the outcome of any related arbitration proceedings. Franco-Nevada cannot assure investors that actual results will be consistent with these forward-looking statements. Accordingly, investors should not place undue reliance on forward-looking statements due to the inherent uncertainty therein.

For additional information with respect to risks, uncertainties and assumptions, please refer to Franco-Nevada's most recent Annual Information Form as well as Franco-Nevada's most recent Management's Discussion and Analysis filed with the Canadian securities regulatory authorities on www.sedarplus.com and Franco-Nevada's most recent Annual Report filed on Form 40-F filed with the SEC on www.sec.gov. The forward-looking statements herein are made as of the date hereof only and Franco-Nevada does not assume any obligation to update or revise them to reflect new information, estimates or opinions, future events or results or otherwise, except as required by applicable law.

Non-GAAP Measures

Cash Costs, Cash Costs per GEO sold, Adjusted Net Income, Adjusted Net Income per Share, Adjusted Net Income Margin, Adjusted EBITDA, Adjusted EBITDA per Share, and Adjusted EBITDA Margin are non-GAAP financial measures with no standardized meaning under International Financial Reporting Standards ("IFRS") and might not be comparable to similar financial measures disclosed by other issuers. For a quantitative reconciliation of each non-GAAP financial measure to the most directly comparable IFRS financial measure, refer to the appendix at the end of this presentation. Further information relating to these non-GAAP financial measures is incorporated by reference from the "Non-GAAP Financial Measures" section of Franco-Nevada's MD&A for the three and six months ended June 30, 2024 and filed on August 13, 2024 with the Canadian securities regulatory authorities on SEDAR+ available at www.sedarplus.com and with the U.S. Securities and Exchange Commission available on EDGAR at www.sec.gov.

This presentation does not constitute an offer to sell or a solicitation for an offer to purchase any security in any jurisdiction.

THE GOLD INVESTMENT THAT WORKS

Franco Nevada

- Proven Business Model
- Leading Track Record
- ESG Focused
- Diversified Portfolio
- Growth and Optionality

15% Compounded Return Since IPO[1]

SOLGOLD TRANSACTION HIGHLIGHTS

Franco Nevada

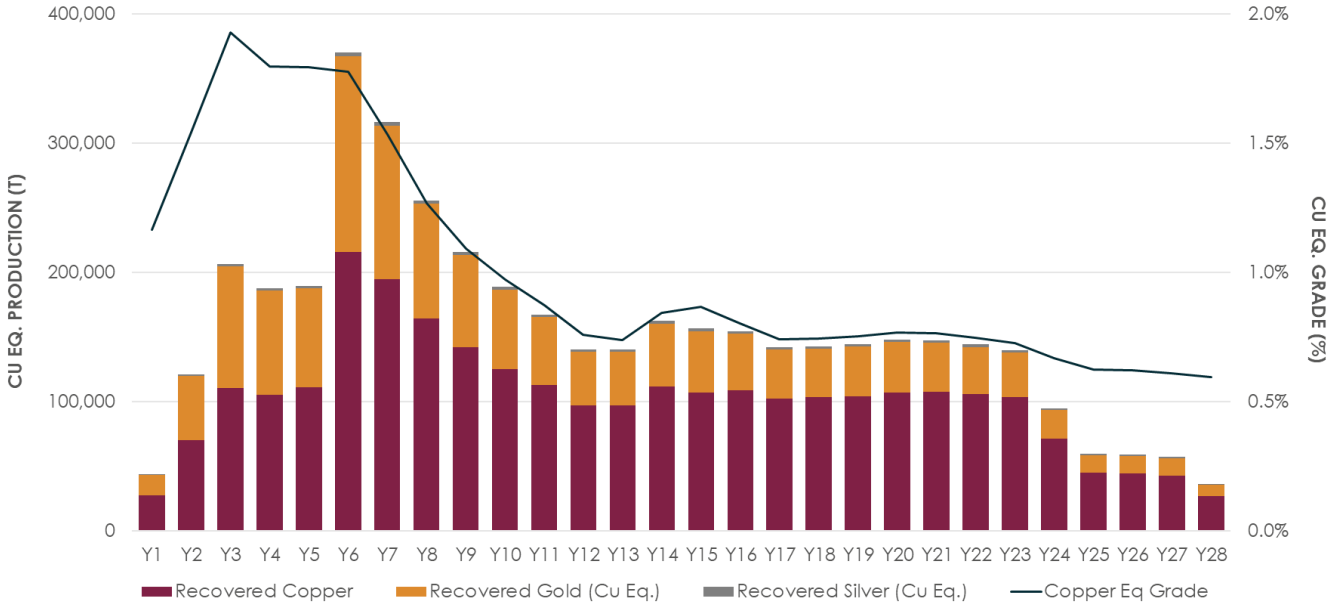

- Franco-Nevada (70%) and Osisko Royalties (30%) syndicated US$750M gold stream financing for the development and construction of SolGold's Cascabel deposit in Ecuador
- Franco-Nevada to make $70M available in tranches pre-construction and remaining $455M of construction funding available once project is derisked and fully funded
- Cascabel ranks amongst largest copper-gold development projects in the world (31.3 Moz Au M&I resource[1])
- Strong Government support for mining in Ecuador
- Ecuador Government approved the Cascabel Exploitation Contract on June 5, 2024, that outlines fiscal and legal frameworks for the development of Cascabel
- Potential long-life stream: 28 years of production based on reserves[2]
- Material GEO contribution to FNB: Estimated average of ~50 koz/year over first 10 years of full production[3]

1. PFS Study dated March 8, 2024 for Alpala and TAM deposits, more details available on SolGold's website. M&I resource (effective November 11, 2023) is comprised of Alpala Measured & Indicated Resource of 3,013 Mt at 0.35% Cu, 0.28 g/t Au and 0.94 g/t Ag and Tandayama- America Indicated Resource of 722 Mt at 0.23% Cu and 0.19 g/t Au as per the March 8, 2024, NI-43-101 Technical Report
2. Based on PFS Study dated March 8, 2024, more details available on SolGold's website
3. Based on attributable deliveries to FNB of 14.0% of gold produced in concentrate

CASCABEL PROJECT OVERVIEW

- Alpala deposit has high grade reserves that support a block caving operation with attractive development economics[1]
- Current mine plan represents only a small portion of the known resource
- Large underexplored land package with other geophysical anomalies identified on the concession

Positive PFS Study

(March 8, 2024)[1]

Franco Nevada

Total M&I Resource (Alpala + TAM)	18.2 Mt CuEq[2]
LOM Plan as % of M&I Resource	18%
Mining Type	Block Cave
Plant Capacity (Mtpa) (Phase 1 Phase 2)	12 / 24 Mtpa
Life of Mine	28 Years
Total CuEq. Production / CuEq Grade (100% Basis)	4.3 Mt / 1.0%
Total Gold Production (100% Basis)	6.9 Moz
Avg. Annual Au Production (koz)	734 Peak / 277 LOM
AISC (US$/lb Cu)	$0.69/lb
Development Capex	$1.55B
Average GEOs to Franco-Nevada (Over first 10 years of full production)	~50 koz GEOs

1. PFS Study dated March 8, 2024 for Alpala and TAM deposits, more details available on SolGold's website
2. Measured and Indicated Resource at Alpala of 3,013Mt @ 0.52% CuEq for contained CuEq of 15.6 Mt and Tandayama-América Indicated Resource of 722 Mt @ 0.36% CuEq for contained CuEq of 2.6 Mt as per the March 8, 2024, NI-43-101 Technical Report

GOLD STREAM SUMMARY

Franco Nevada

Key Stream Terms

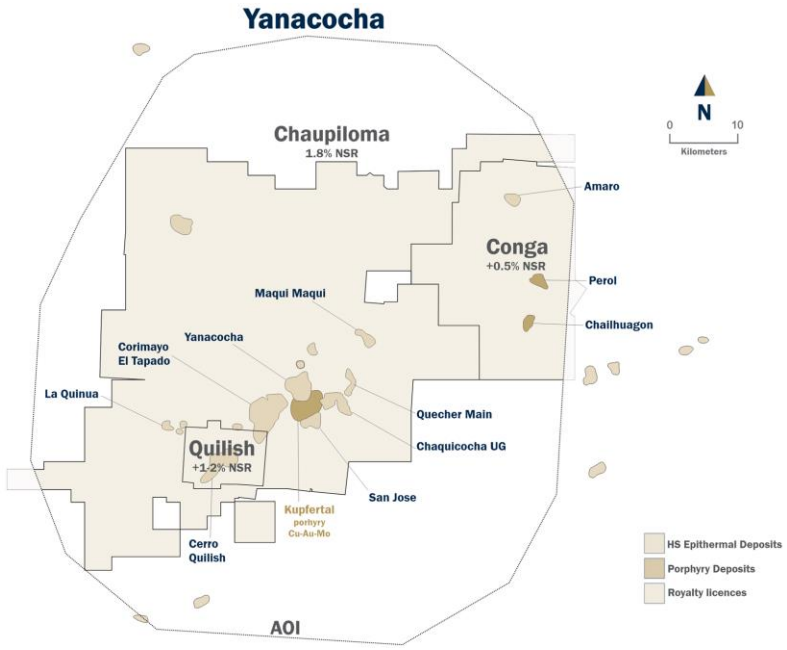

Syndication :	• **70%** Franco-Nevada **/ 30%** Osisko
Total Deposit:	• US$750M **(FNB US$525M)**
Location:	• Ecuador
Stream Parameters (100% basis):	• 20% (**FNB 14.0%)** of gold produced in concentrate until 750Moz (**FNB 525koz**) of gold have been delivered • Thereafter, 12% (**FNB 8.4%)** for the remaining life of mine
Franco-Nevada Commitment:	• **US$70M** which is available pre-construction; funded in three installments based on key milestones • **$455M** funded in installments alongside Osisko and other capital once project is fully derisked for construction, subject to various conditions being satisfied
Ongoing Payment:	• **20%** of spot gold
Change of Control:	• Change of control provisions including (i) FNB termination right and (ii) SolGold buyback option of 50% in year 1-3 and 33% year 4-5
Other:	• Adjustment mechanisms to preserve the economics in the event of changes to the scale or timeline of development • ROFR on future streams or royalties on the concession • Partnering on environmental and social initiatives

YANACOCHA 1.8% ROYALTY ACQUISITION

Franco Nevada

- Franco-Nevada has acquired a 1.8% net smelter return royalty from Buenaventura covering Newmont's Yanacocha mine and Yanacocha Sulfides project
  - Royalty also covers surrounding deposits, including Conga
- Upfront consideration of US$210M plus a US$15M contingent payment payable in shares
  - Franco-Nevada acquired the affiliate which held the royalty
- Prolific property has produced c.40 Moz Au since commencing production in 1993 with more than 47 Moz AuEq in total reserves and resources[1] remaining
  - Newmont forecasts 2024 production from oxides of 290 koz Au
- The Yanacocha Sulfides project is a world class copper-gold project with 1.2 Mt of copper resources and 7.2 Moz of gold resources[2]. Development decision deferred until 2025 while Newmont consolidates Newcrest acquisition
  - Expected to produce c.500 koz AuEq per year during the first five years with the initial phase extending Yanacocha's operations beyond 2040
  - Additional phases have potential to extend mine life for multiple decades
- The royalty also covers Conga, a large Cu/Au porphyry adjacent to Yanacocha with indicated resources of 14.6 Moz Au / 4.0 Blbs Cu and inferred resources of 2.9 Moz Au / 0.9 Blbs Cu[1]
- ROFR on additional 0.5% NSR on Conga and two additional royalties on portions of the property

Royalty Coverage (+750 km²)

Cash flowing, with significant growth potential on a prolific land package

1. Total reserves and resources per Newmont's 2023 Reserves and Resources Release, converted gold equivalent at long term prices of $1,915/oz Au and $4.08/lb Cu. Newmont's reserves and resources are prepared in compliance with Subpart 1300 of Regulation S-K adopted by the United States Securities and Exchanges Commission. Total reserves and resources include the following: Yanacocha Gold – 140.9 Mt at 1.22 g/t Au for 5.5 Moz Au proven and probable reserves, 134.8 Mt at 0.64 g/t Au for 2.8 Moz Au measured and indicated resources and 189.9 Mt at 0.88 g/t Au for 5.4 Moz Au inferred resources. Yanacocha Copper – 111.1 Mt at 0.63% Cu for 1.5 Blbs Cu proven and probable reserves, 101.3 Mt at 0.37% Cu for 0.8 Blbs Cu measured and indicated resources and 39.7 Mt at 0.37% Cu for 0.3 Blbs Cu inferred resources. Conga Gold – 693.8 Mt at 0.65 g/t Au for 14.6 Moz Au indicated resources and 230.5 Mt at 0.39 g/t Au for 2.9 Moz Au inferred resources. Conga Copper – 693.8 Mt at 0.26% Cu for 4.0 Blbs Cu indicated resources and 230.5 Mt at 0.19% Cu for 0.3 Blbs Cu inferred resources.
2. Included in the full Yanacocha estimate disclosed in footnote 1 above. This is the only publicly available resource estimate and is presented on a total reserves and resources basis, inclusive of inferred resources, as disclosed by Newmont in its Q3 2024 Investor Presentation.

COBRE PANAMA UPDATE

Franco Nevada

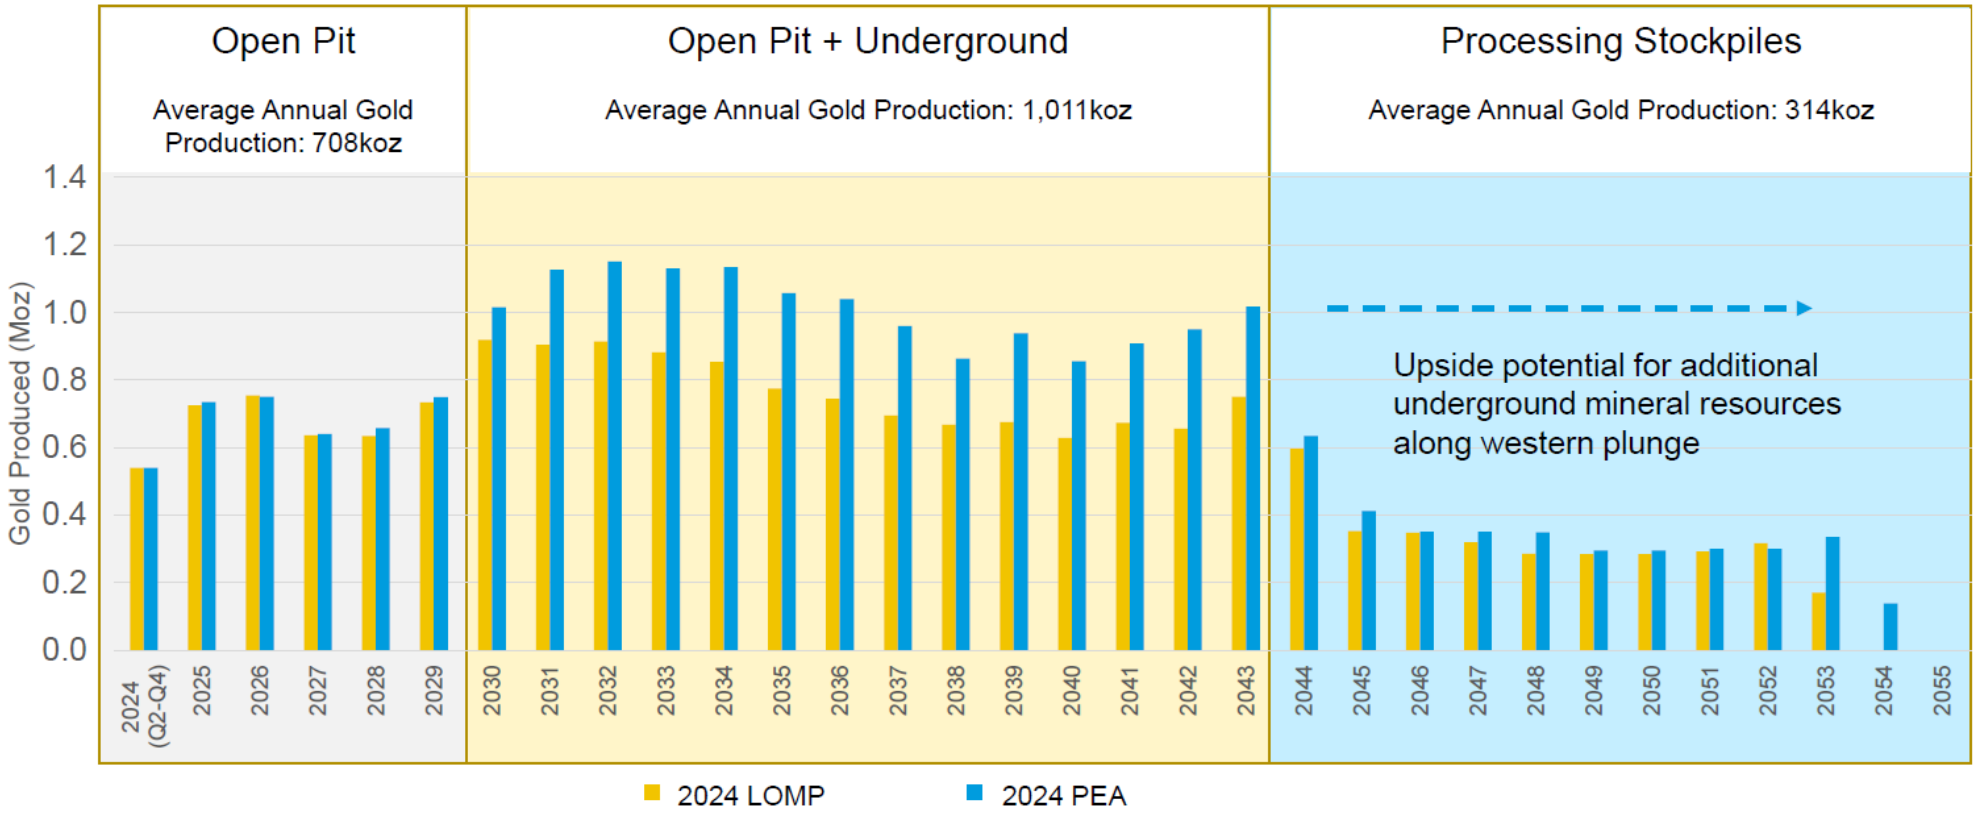

- Law 406 found to be unconstitutional (November 2023)[1]
- Mine on preservation and safe management
- Franco-Nevada international arbitration[2]
- $1,169.2 impairment recorded in 2023
- President José Raúl Mulino took office on July 1, 2024

1. Law 406 approved the revised contract for the Cobre Panama mine
2. Arbitration under the Canada/Panama Free Trade Agreement

DETOUR LAKE UPDATE

PATHWAY TO 1MOZ PER ANNUM

2024 LOM plan and UG PEA released in June 2024 with 27% increase in LOM production.

UG PEA extends mine life to 2054, adding additional 4Moz, with first UG ore expected in 2030.

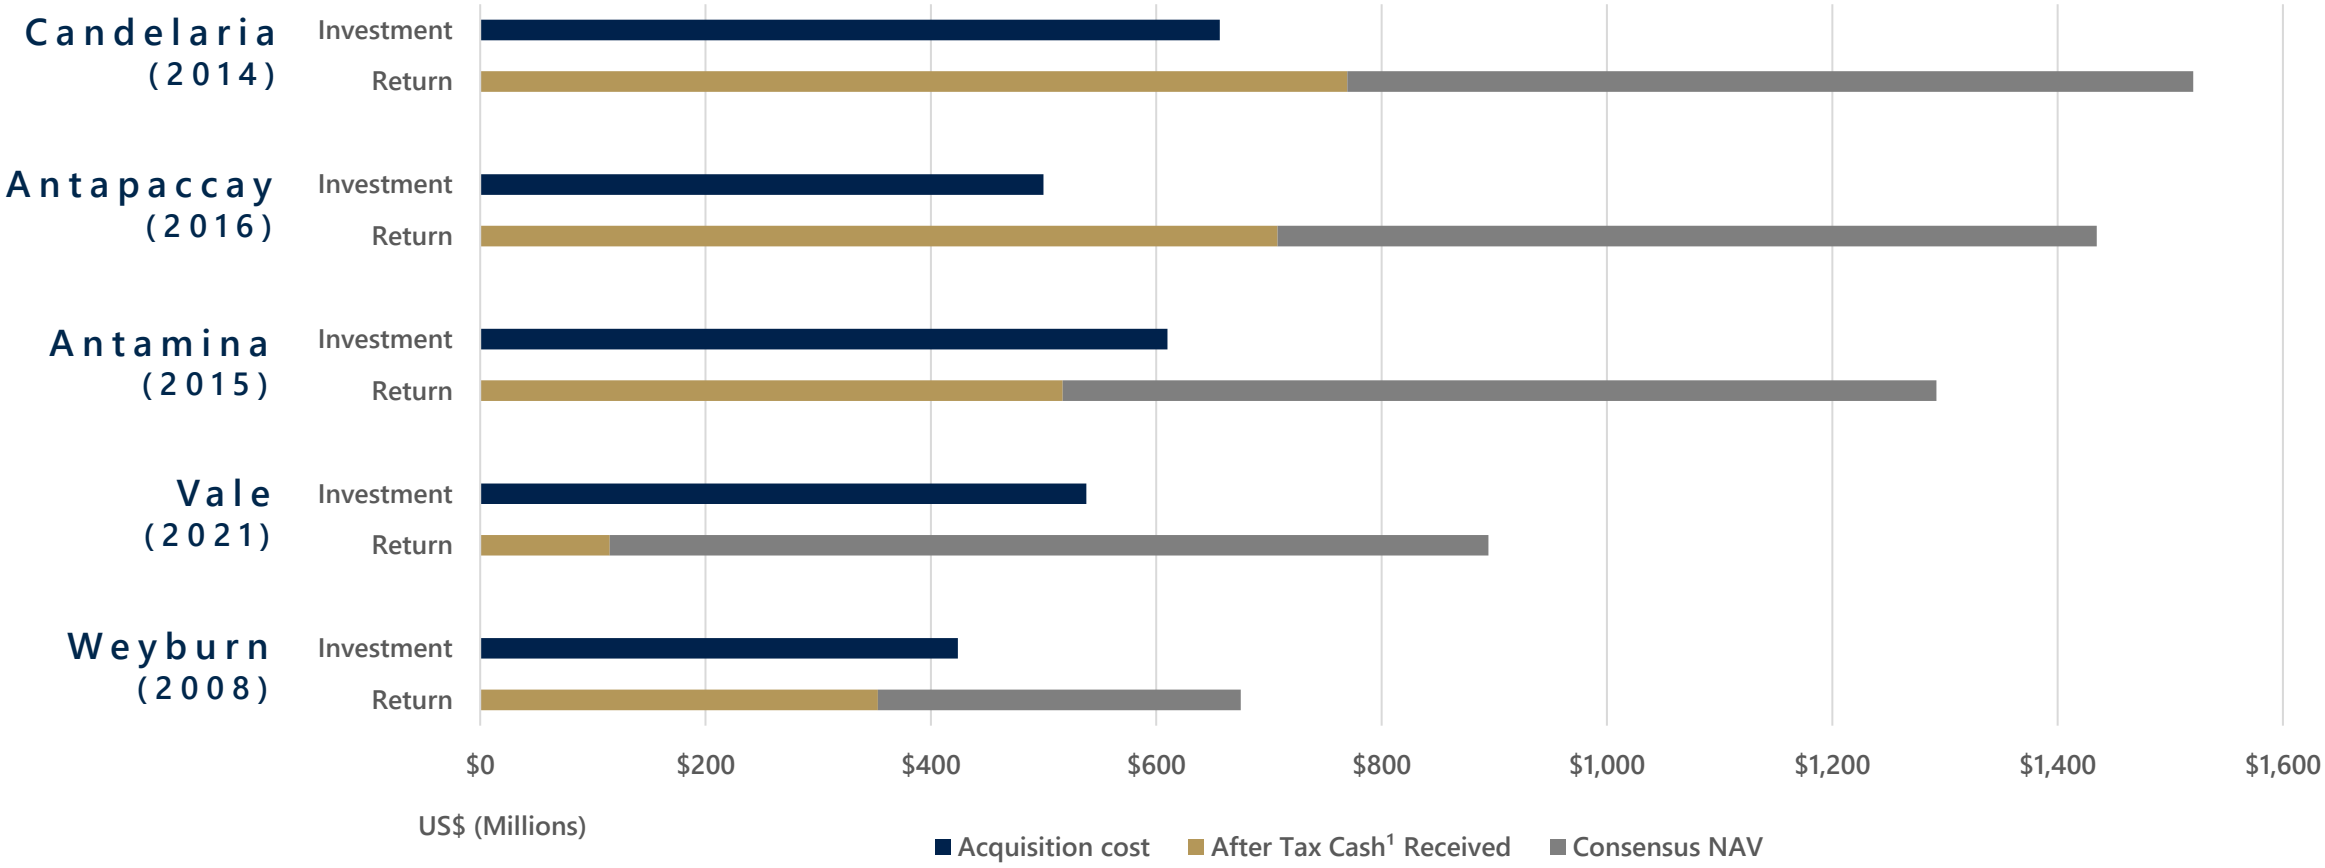

Proposed mill expansion to 29Mtpa with average production of 1Mozpa from 2030 to 2043.

Ongoing exploration of satellite targets.

Source: news release dated June 19, 2024, for Agnico Eagle Mines Limited which includes further details on the Detour Lake updated mineral reserve and mineral resource estimate and updated life of mine plan

APPENDIX - GEOS AND NON-GAAP MEASURES

1. GEOs include Franco-Nevada's attributable share of production from our Mining and Energy assets, after applicable recovery and payability factors. GEOs are estimated on a gross basis for NSR royalties and, in the case of stream ounces, before the payment of the per ounce contractual price paid by the Company. For NPI royalties, GEOs are calculated taking into account the NPI economics. Silver, platinum, palladium, iron ore, oil, gas and other commodities are converted to GEOs by dividing associated revenue, which includes settlement adjustments, by the relevant gold price. The price used in the computation of GEOs earned from a particular asset varies depending on the royalty or stream agreement, which may make reference to the market price realized by the operator, or the average price for the month, quarter, or year in which the commodity was produced or sold.

Average average prices and rates		H1 2024	H1 2023	Variance
Gold[1]	($/oz)	$ 2,205	$ 1,933	14.1 %
Silver[1]	($/oz)	26.11	23.37	11.7 %
Platinum[1]	($/oz)	945	1,011	(6.5)%
Palladium[1]	($/oz)	975	1,508	(35.3)%
Iron Ore Fines 62% Fe CFR China	($/tonne)	118	118	– %
Edmonton Light	(C$/bbl)	100.71	97.26	3.5 %
West Texas Intermediate	($/bbl)	78.77	74.95	5.1 %
Henry Hub	($/mcf)	2.22	2.54	(12.6)%
CAD/USD exchange rate[2]		0.7361	0.7416	(0.7)%

2. Non-GAAP Financial Measures: Cash Costs, Cash Costs per GEO sold, Adjusted Net Income, Adjusted Net Income per Share, Adjusted Net Income Margin, Adjusted EBITDA, Adjusted EBITDA per share, and Adjusted EBITDA Margin are non-GAAP financial measures with no standardized meaning under IFRS and might not be comparable to similar financial measures disclosed by other issuers. For a quantitative reconciliation of each non-GAAP financial measure to the most directly comparable IFRS financial measure, refer to the following tables. Further information relating to these Non-GAAP financial measures is incorporated by reference from the "Non-GAAP Financial Measures" section of Franco-Nevada's MD&A for the three and six months ended June 30, 2024 and filed on August 13, 2024 with the Canadian securities regulatory authorities on SEDAR+ available at www.sedarplus.com and with the U.S. Securities and Exchange Commission available on EDGAR at www.sec.gov.

PRODUCING ASSET NEWS

STREAMS

Cobre Panama	Panama	The mine is currently on preservation and safe management. President José Raúl Mulino took office on July 1, 2024.
Candelaria	Chile	2024 EIA approved September 2023. Potential expansion of UG operations.
Antapaccay	Peru	Coroccohuayco project could extend mine life to 27+ years.
Antamina	Peru	Medium term production growth from crushing and conveying project. Regulatory approval in February 2024, extending approved mine life from 2028 to 2036.
Condestable	Peru	Amended stream agreement to increase Phase 2 variable deliveries from 25% of gold and silver produced to 37.5%.

DIVERSIFIED

Vale Royalty	Brazil	Southeastern System contributions to the Royalty will start once a cumulative sales threshold of 1.7 Bt of iron ore has been reached, expected in 2025.
Haynesville	East Texas & Louisiana	$125M acquisition in January 2024 of 1,400 net acres of natural gas royalties in the Haynesville shale.

Indicated timing based on operator guidance

ROYALTIES

Detour Lake	Ontario	2024 LOM plan and UG PEA released in June 2024 with 27% increase in LOM production. Proposed mill expansion to 29Mtpa with average production of 1Mozpa from 2030 to 2043. UG PEA extends mine life to 2054, adding additional 4Moz, with first UG ore expected in 2030. Ongoing exploration of satellite targets.
Stillwater	Montana	Restructuring underway to reduce costs and ensure sustainability through lower palladium price environment.
Subika	Ghana	Production expected to increase relative to 2023 due to higher OP grade, strong UG mining rate, and reaching full processing rates in Q2 2024 after girth gear changeout.
Tasiast	Mauritania	UG potential discussed at October 2023 Kinross site visit. Ramp-up to operate consistently at 24 ktpd complete.
Macassa (Kirkland Lake)	Ontario	Macassa mill reached 1,650 tpd capacity target in Q2 2024. Exploration drilling targeting Lower/West SMC, SMC East and Main Break. AK in production guidance for Q4 2024 to 2026.
Canadian Malartic	Québec	UG development and surface activities at Odyssey progressing well, reaching third production level at East Gouldie in Q2 2024. Initial 5.17Moz mineral reserve at East Gouldie declared, with ongoing exploration success to the east and west of the existing mineral resource.
Magino	Ontario	Alamos announced acquisition of Argonaut Gold and indicated potential longer-term upside through a single optimized milling complex at Magino with an expansion to between 15,000 and 20,000 tonnes per day.
Séguéla[1]	Côte d'Ivoire	High grade exploration results in June 2024 at Kingfisher/Badior and Ancien support UG potential. Kingfisher maiden resource expected in 2025.
Caserones	Chile	Lundin Mining increased ownership to 70% in June 2024. Large scale exploration program in 2024.
Robinson	Nevada	Ruth West 6 pit and changes in mining sequence in the Liberty pit has enabled extension of LOM to 2036.
Dublin Gulch (Eagle)	Yukon	Heap leach pad at the Eagle Gold Mine experienced a failure in June 2024. Operations are temporarily suspended, there has been some damage to infrastructure with no injuries to personnel. Operator has been placed in receivership.
Mt Keith	Australia	BHP has announced plans to temporarily suspend operations at its Nickel West and West Musgrave project from October 2024.

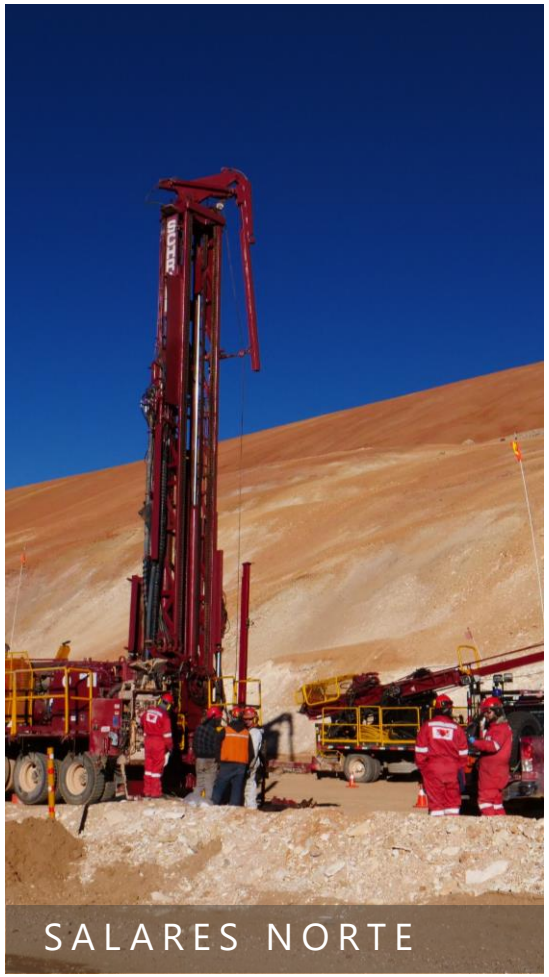

Indicated timing based on operator guidance

CONSTRUCTION AND RAMP-UP UPDATES

Posse (Mara Rosa) [1]	Brazil	First gold poured in February 2024. Commercial production achieved in May 2024.
Salares Norte[1]	Chile	First gold poured in March 2024. Commissioning and ramp-up impacted by earlier than planned winter conditions. UG option being studied for the mining of the Agua Amarga deposit.
Greenstone[1]	Ontario	First gold poured in May 2024. Commercial production expected by the end of Q3 2024. Equinox Gold consolidates ownership of mine in May 2024.
Tocantinzinho	Brazil	First gold poured in July 2024. Commercial production expected in H2 2024.
Valentine Gold	Newfoundland	Construction 77% complete. First production expected Q2 2025. 100,000 m Resource expansion and discovery drill program announced in July 2024, in addition to previously announced 60,000m drill program. Federal Environmental assessment approval for development at the Berry Pit received August 2024.

CRA AUDIT (2013-2020)

APPENDIX

Franco Nevada

With respect to the transfer pricing reassessments in relation to the Company's Mexican and Barbadian subsidiaries, the Company continues to believe that these reassessments are not supported by Canadian tax law and jurisprudence and intends to vigorously defend its tax filing positions.

	Taxation Years Reassessed	Potential Income Tax Payable[1]	Potential Interest & Penalties[1,3,4]
Transfer Pricing (Mexican Subsidiary)	2013-2016	$21.8M (C$29.9M)[2]	$24.7M (C$33.8M)
Transfer Pricing (Barbadian Subsidiary)	2014-2019[5]	$80.9M (C$110.7M)	$63.6M (C$87.3M)

1. Canadian dollar amounts in this table have been converted to US dollars at the exchange rate applicable at June 30, 2024 as quoted by the Bank of Canada
2. Tax payable before any double taxation relief under the Canada-Mexico tax treaty
3. Includes transfer pricing penalties: $21.6M (C$29.6M) for 2013-2017; $17.8M (C$24.4M) for 2018-2019 currently under review by the CRA
4. Interest calculated to June 30, 2024
5. Taxation year 2019 has been proposed for reassessment. Formal Notice of Reassessment expected to follow
