CORPORATE PRESENTATION

MAY

Forward-Looking Statements

This presentation contains "forward-looking information" and "forward-looking statements" within the meaning of applicable Canadian securities laws and the United States Private Securities Litigation Reform Act of 1995, respectively, which may include, but are not limited to, statements with respect to future events or future performance, management's expectations regarding Franco-Nevada's growth, results of operations, estimated future revenues, performance guidance, carrying value of assets, future dividends and requirements for additional capital, mineral resources and mineral reserves estimates, production estimates, production costs and revenue, future demand for and prices of commodities, expected mining sequences, business prospects and opportunities, the performance and plans of third party operators, audits being conducted by the Canada Revenue Agency ("CRA"), the expected exposure for current and future tax assessments and available remedies, and statements with respect to the future status and any potential restart of the Cobre Panama mine and related arbitration proceedings. In addition, statements relating to mineral resources and mineral reserves, gold equivalent ounces ("GEOs") or mine lives are forward-looking statements, as they involve implied assessment, based on certain estimates and assumptions, and no assurance can be given that the estimates and assumptions are accurate and that such mineral resources and mineral reserves, GEOs or mine lives will be realized. Such forward-looking statements reflect management's current beliefs and are based on information currently available to management. Often, but not always, forward-looking statements can be identified by the use of words such as "plans", "expects", "is expected", "budgets", "potential for", "scheduled", "estimates", "forecasts", "predicts", "projects", "intends", "targets", "aims", "anticipates" or "believes" or variations (including negative variations) of such words and phrases or may be identified by statements to the effect that certain actions "may", "could", "should", "would", "might" or "will" be taken, occur or be achieved. Forward-looking statements involve known and unknown risks, uncertainties and other factors, which may cause the actual results, performance or achievements of Franco-Nevada to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. A number of factors could cause actual events or results to differ materially from any forward-looking statement, including, without limitation: fluctuations in the prices of the primary commodities that drive royalty and stream revenue (gold, platinum group metals, copper, nickel, uranium, silver, iron-ore and oil and gas); fluctuations in the value of the Canadian and Australian dollar, Mexican peso and any other currency in which revenue is generated, relative to the U.S. dollar; changes in national and local government legislation, including permitting and licensing regimes and taxation policies and the enforcement thereof; the adoption of a global minimum tax on corporations; regulatory, political or economic developments in any of the countries where properties in which Franco-Nevada holds a royalty, stream or other interest are located or through which they are held; risks related to the operators of the properties in which Franco-Nevada holds a royalty, stream or other interest, including changes in the ownership and control of such operators; relinquishment or sale of mineral properties; influence of macroeconomic developments; business opportunities that become available to, or are pursued by Franco-Nevada; reduced access to debt and equity capital; litigation; title, permit or license disputes related to interests on any of the properties in which Franco-Nevada holds a royalty, stream or other interest; whether or not Franco-Nevada is determined to have "passive foreign investment company" ("PFIC") status as defined in Section 1297 of the United States Internal Revenue Code of 1986, as amended; potential changes in Canadian tax treatment of offshore streams; excessive cost escalation as well as development, permitting, infrastructure, operating or technical difficulties on any of the properties in which Franco-Nevada holds a royalty, stream or other interest; access to sufficient pipeline capacity; actual mineral content may differ from the mineral resources and mineral reserves contained in technical reports; rate and timing of production differences from resource estimates, other technical reports and mine plans; risks and hazards associated with the business of development and mining on any of the properties in which Franco-Nevada holds a royalty, stream or other interest, including, but not limited to unusual or unexpected geological and metallurgical conditions, slope failures or cave-ins, sinkholes, flooding and other natural disasters, terrorism, civil unrest or an outbreak of contagious disease; the impact of future pandemics; and the integration of acquired assets. The forward-looking statements contained herein are based upon assumptions management believes to be reasonable, including, without limitation: the ongoing operation of the properties in which Franco-Nevada holds a royalty, stream or other interest by the owners or operators of such properties in a manner consistent with past practice; the accuracy of public statements and disclosures made by the owners or operators of such underlying properties; no material adverse change in the market price of the commodities that underlie the asset portfolio; Franco-Nevada ongoing income and assets relating to determination of its PFIC status; no material changes to existing tax treatment; the expected application of tax laws and regulations by taxation authorities; the expected assessment and outcome of any audit by any taxation authority; no adverse development in respect of any significant property in which Franco-Nevada holds a royalty, stream or other interest; the accuracy of publicly disclosed expectations for the development of underlying properties that are not yet in production; integration of acquired assets; and the absence of any other factors that could cause actions, events or results to differ from those anticipated, estimated or intended. However, there can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Investors are cautioned that forward-looking statements are not guarantees of future performance. In addition, there can be no assurance as to (i) the outcome of the ongoing audit by the CRA or Franco-Nevada exposure as a result thereof, or (ii) the future status and any potential restart of the Cobre Panama mine or the outcome of any related arbitration proceedings. Franco-Nevada cannot assure investors that actual results will be consistent with these forward-looking statements. Accordingly, investors should not place undue reliance on forward-looking statements due to the inherent uncertainty therein.

For additional information with respect to risks, uncertainties and assumptions, please refer to Franco-Nevada's most recent Annual Information Form as well as Franco-Nevada's most recent Management's Discussion and Analysis filed with the Canadian securities regulatory authorities on www.sedarplus.com and Franco-Nevada's most recent Annual Report filed on Form 40-F filed with the SEC on www.sec.gov. The forward-looking statements herein are made as of the date hereof only and Franco-Nevada does not assume any obligation to update or revise them to reflect new information, estimates or opinions, future events or results or otherwise, except as required by applicable law.

Non-GAAP Measures

Cash Costs, Cash Costs per GEO sold, Adjusted Net Income, Adjusted Net Income per Share, Adjusted Net Income Margin, Adjusted EBITDA, Adjusted EBITDA per Share, and Adjusted EBITDA Margin are non-GAAP financial measures with no standardized meaning under International Financial Reporting Standards ("IFRS") and might not be comparable to similar financial measures disclosed by other issuers. For a quantitative reconciliation of each non-GAAP financial measure to the most directly comparable IFRS financial measure, refer to the appendix at the end of this presentation. Further information relating to these non-GAAP financial measures is incorporated by reference from the "Non-GAAP Financial Measures" section of Franco-Nevada's MD&A for the three months ended March 31, 2024 and filed on May 1, 2024 with the Canadian securities regulatory authorities on SEDAR+ available at www.sedarplus.com and with the U.S. Securities and Exchange Commission available on EDGAR at www.sec.gov.

This presentation does not constitute an offer to sell or a solicitation for an offer to purchase any security in any jurisdiction.

THE GOLD INVESTMENT THAT WORKS

Franco Nevada

- Proven Business Model
- Leading Track Record
- ESG Focused
- Diversified Portfolio
- Growth and Optionality

15% Compounded Return Since IPO[1]

17 Consecutive Dividend Increases

#1 Ranked by Sustainalytics

118 Cash Flowing Assets

GUIDANCE

GROWTH AND OPTIONALITY

Franco Nevada

2024 Guidance[1]

Total GEOs

480,000-540,000

– Assumes lower oil and gas prices[1]

Precious Metal GEOs

360,000-400,000

– Cobre Panama placed in preservation and safe management[2] and not included in guidance

+ Tocantinzinho, Greenstone, Posse (Mara Rosa), Salares Norte commencement

+ Full year of Magino, Séquéla

+ Candelaria higher grade year

- Antapaccay lower grade year

2028 Outlook[1]

Total GEOs

540,000-600,000

+ Vale Northern and Southeastern Systems

+ Copper World

Precious Metal GEOs

385,000-425,000

+ Mine starts and expansions: Valentine Gold, Stibnite Gold, Eskay Creek, Castle Mountain (Phase 2)

+ Higher production: Guadalupe-Palmarejo, Antamina

- MWS cap ends 2024

- Candelaria step down in 2027

- Antapaccay step down in 2028

Funding Commitments

$75M term loan to G Mining Ventures (fully funded)

$10M-$20M for Continental Royalty Acquisition Venture

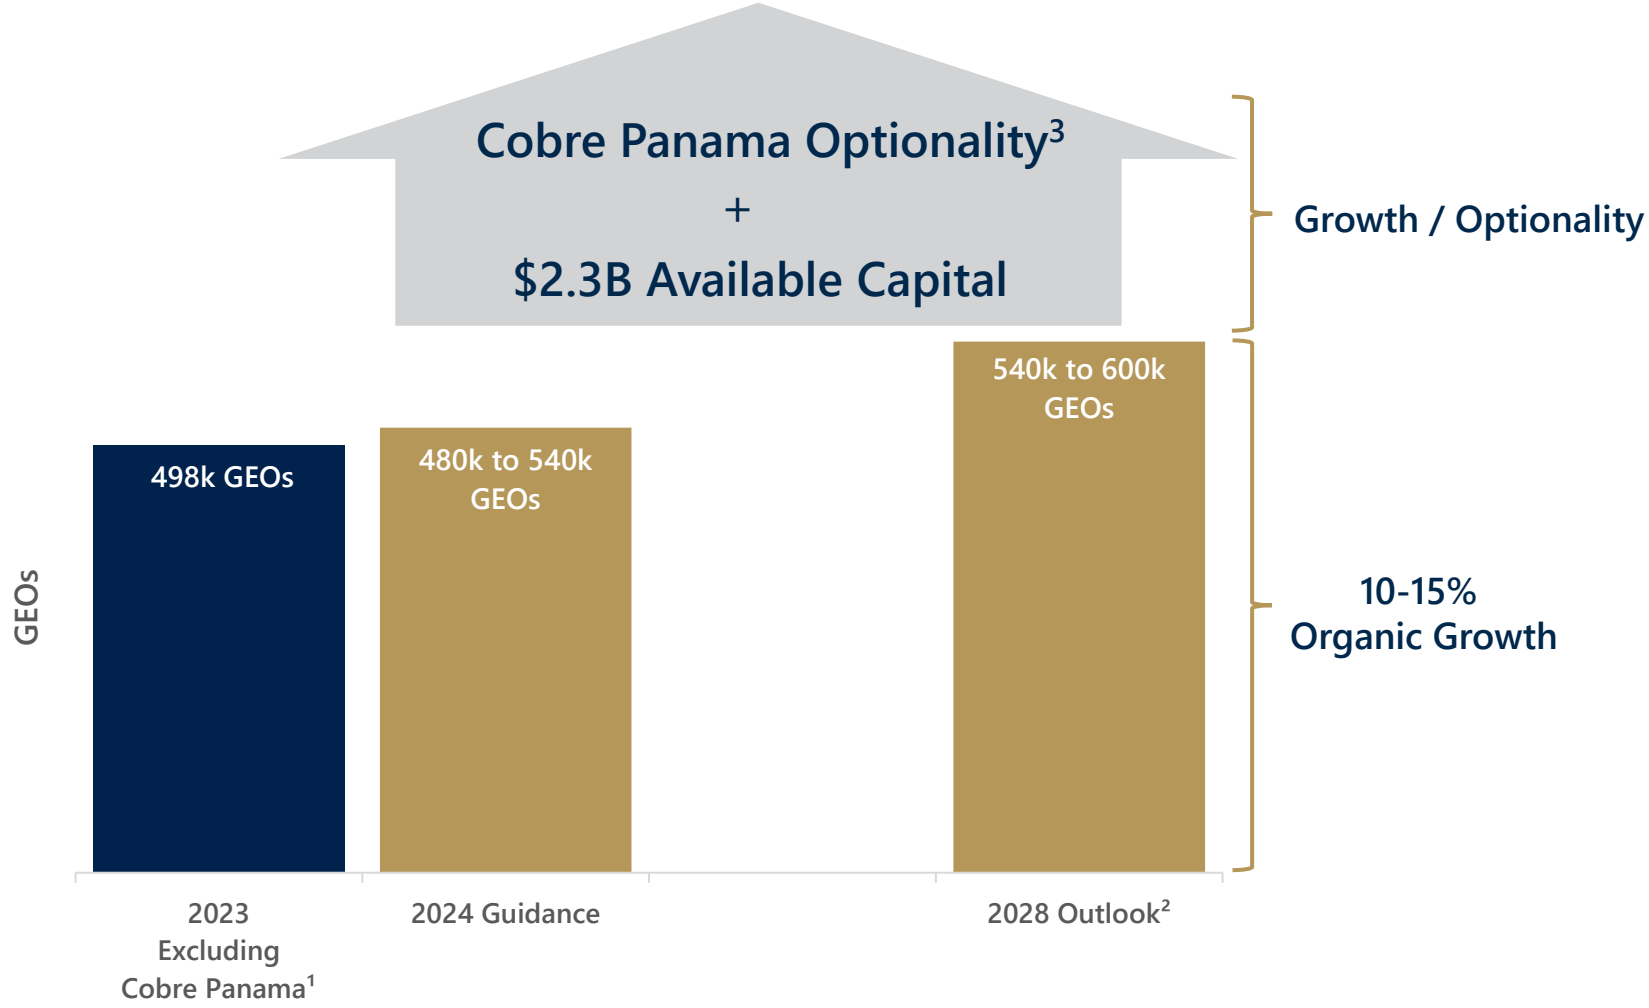

Depletion

Estimate $230-$260 million

1. Prices used for 2024 Guidance and 2028 Outlook: $1,950/oz Au, $22.50/oz Ag, $850/oz Pt, $900/oz Pd, $115/tonne Fe 62% CFR China, $75/bbl WTI oil and $2.50/mcf Henry Hub natural gas
2. Cobre Panama halted operations in November 2023. Please refer to Franco-Nevada's MD&A for year ended December 31, 2023 which provides updates on Cobre Panama

GROWTH OUTLOOK

GROWTH AND OPTIONALITY

1. 2023 Actuals GEOs excluding Cobre Panama
2. 2028 Outlook estimate versus 2023 (excluding Cobre Panama)

TSX/NYSE: FNV

APPENDIX - GEOS AND NON-GAAP MEASURES

1. GEOs include Franco-Nevada's attributable share of production from our Mining and Energy assets, after applicable recovery and payability factors. GEOs are estimated on a gross basis for NSR royalties and, in the case of stream ounces, before the payment of the per ounce contractual price paid by the Company. For NPI royalties, GEOs are calculated taking into account the NPI economics. Silver, platinum, palladium, iron ore, oil, gas and other commodities are converted to GEOs by dividing associated revenue, which includes settlement adjustments, by the relevant gold price. The price used in the computation of GEOs earned from a particular asset varies depending on the royalty or stream agreement, which may make reference to the market price realized by the operator, or the average price for the month, quarter, or year in which the commodity was produced or sold.

Quarterly average prices and rates		Q1 2024	Q1 2023	Variance
Gold[1]	($/oz)	$ 2,072	$ 1,889	9.7 %
Silver[1]	($/oz)	23.36	22.56	3.5 %
Platinum[1]	($/oz)	910	994	(8.5)%
Palladium[1]	($/oz)	978	1,567	(37.6)%
Iron Ore Fines 62% Fe CFR China	($/tonne)	126	124	1.6 %
Edmonton Light	(C$/bbl)	95.44	99.92	(4.5)%
West Texas Intermediate	($/bbl)	76.96	76.13	1.1 %
Henry Hub	($/mcf)	2.09	2.76	(24.3)%
CAD/USD exchange rate[2]		0.7414	0.7398	0.2 %

2. Non-GAAP Financial Measures: Cash Costs, Cash Costs per GEO sold, Adjusted Net Income, Adjusted Net Income per Share, Adjusted Net Income Margin, Adjusted EBITDA, Adjusted EBITDA per share, and Adjusted EBITDA Margin are non-GAAP financial measures with no standardized meaning under IFRS and might not be comparable to similar financial measures disclosed by other issuers. For a quantitative reconciliation of each non-GAAP financial measure to the most directly comparable IFRS financial measure, refer to the following tables. Further information relating to these Non-GAAP financial measures is incorporated by reference from the "Non-GAAP Financial Measures" section of Franco-Nevada's MD&A for the three months ended March 31, 2024 and filed on May 1, 2024 with the Canadian securities regulatory authorities on SEDAR+ available at www.sedarplus.com and with the U.S. Securities and Exchange Commission available on EDGAR at www.sec.gov.

PRODUCING ASSET NEWS

STREAMS

Cobre Panama	Panama	The mine is currently on preservation and safe management. Panama election May 5, 2024.
Candelaria	Chile	2024 EIA approved September 2023. Potential expansion of UG operations.
Antapaccay	Peru	Coroccohuayco project could extend mine life to 27+ years.
Antamina	Peru	Medium term production growth from crushing and conveying project. Regulatory approval in February 2024, extending approved mine life from 2028 to 2036.
Condestable	Peru	Amended stream agreement to increase Phase 2 variable deliveries from 25% of gold and silver produced to 37.5%.

DIVERSIFIED

Vale Royalty	Brazil	Southeastern System contributions to the Royalty will start once a cumulative sales threshold of 1.7 Bt of iron ore has been reached, expected in 2025.
Haynesville	East Texas & Louisiana	$125M acquisition in January 2024 of 1,400 net acres of natural gas royalties in the Haynesville shale.

Indicated timing based on operator guidance

ROYALTIES

Detour Lake	Ontario	Mill throughput to reach 28.0 Mtpa by the end of 2024, targeting 29.0 Mtpa by 2026 and longer-term production of 1 Moz per year. Ongoing exploration success with expansion and UG mining study expected in Q2 2024.
Stillwater	Montana	Restructuring underway to reduce costs and ensure sustainability through lower palladium price environment.
Subika	Ghana	Production expected to increase relative to 2023 due to higher OP grade, strong UG mining rate, and reaching full processing rates in Q2 2024 after girth gear changeout.
Tasiast	Mauritania	UG potential discussed at October 2023 Kinross site visit. Ramp-up to operate consistently at 24 ktpd complete.
Macassa (Kirkland Lake)	Ontario	Shaft #4 and ventilation system upgrade commissioned. Macassa mill expected to reach 1,650 tpd capacity by mid-2024. Exploration drilling at Macassa targeting Lower/West SMC, SMC East and Main Break. AK in production guidance for Q4 2024 to 2026.
Canadian Malartic	Québec	UG development and surface activities at Odyssey progressing well, reaching first production level at East Gouldie in February 2024. Initial 5.17Moz mineral reserve at East Gouldie declared, with ongoing exploration success.
Island Gold	Ontario	Additional high-grade mineralization intersected near existing infrastructure. Expansion to 2,400 tpd expected to be complete in H1 2026, continuing to extend high-grade gold mineralization. Alamos Gold acquired Orford Mining.
Magino[1]	Ontario	Commercial production achieved in November 2023. Alamos announced acquisition of Argonaut Gold and closes private placement. Alamos indicated potential longer-term upside through a single optimized milling complex at Magino with an expansion of between 15,000 and 20,000 tonnes per day.
Caserones	Chile	Lundin Mining acquired 51% ownership in July 2023 with option to increase to 70%. Lundin Mining launching largest exploration program since the mine began operations.

Indicated timing based on operator guidance

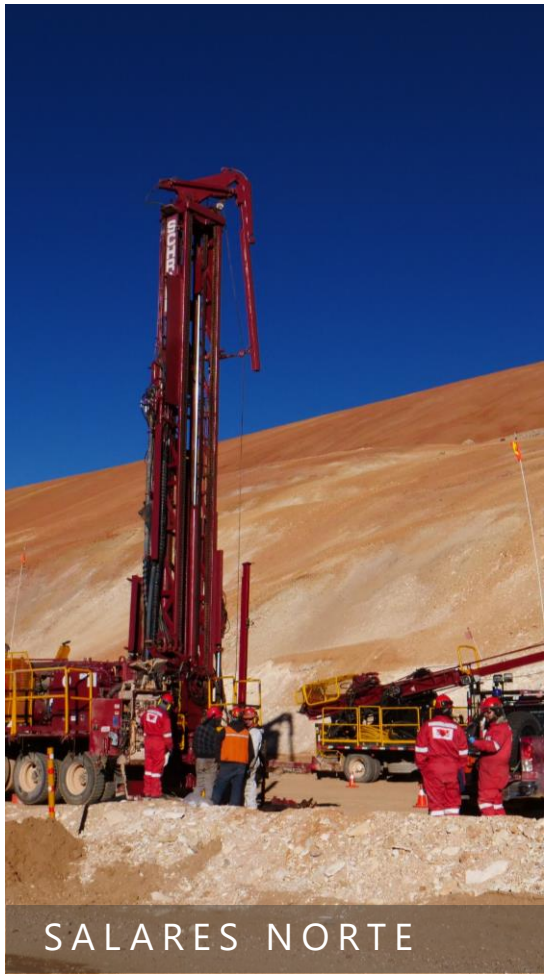

CONSTRUCTION AND RAMP-UP UPDATES

Séguéla[1]	Côte d'Ivoire	First gold poured in May 2023. Sunbird Deposit incorporated into updated Mineral Resource and Mineral Reserve. Fortuna Silver Mines exercised option to buy-back 0.6% of 1.2% NSR.
Posse (Mara Rosa)	Brazil	First gold poured in February 2024. Commercial production expected end of Q2 2024.
Salares Norte	Chile	First gold poured in March 2024. UG option being studied for the mining of the Agua Amarga deposit.
Greenstone	Ontario	First gold pour expected in May 2024, with ore introduced into the grinding circuit in April 2024. Commercial production targeted for Q3 2024. Equinox Gold consolidating ownership of mine.
Tocantinzinho	Brazil	Construction 89% complete. First production expected H2 2024. Early completion and commissioning of power transmission line project underway. $75M FNV term loan fully funded.
Valentine Gold	Newfoundland	Construction 61% complete. First production expected H1 2025. Calibre acquired Marathon in January 2024. Ore control drilling targeting the Leprechaun deposit highlights positive reconciliation.

CRA AUDIT (2013-2019)

APPENDIX

Franco Nevada

With respect to the transfer pricing reassessments in relation to the Company's Mexican and Barbadian subsidiaries, the Company continues to believe that these reassessments are not supported by Canadian tax law and jurisprudence and intends to vigorously defend its tax filing positions.

	Taxation Years Reassessed	Potential Income Tax Payable[1]	Potential Interest & Penalties[1,3,4]
Transfer Pricing (Mexican Subsidiary)	2013-2016	$22.1M (C$29.9M)[2]	$24.2M (C$32.4M)
Transfer Pricing (Barbadian Subsidiary)	2014-2019[5]	$81.8M (C$110.7M)	$62.1M (C$84.2M)

1. Canadian dollar amounts in this table have been converted to US dollars at the exchange rate applicable at March 31, 2024 as quoted by the Bank of Canada
2. Tax payable before any double taxation relief under the Canada-Mexico tax treaty
3. Includes transfer pricing penalties: $21.9M (C$29.6M) for 2013-2017; $18.0M (C$24.4M) for 2018-2019 currently under review by the CRA
4. Interest calculated to March 31, 2024
5. Taxation year 2019 has been proposed for reassessment. Formal Notice of Reassessment expected to follow
