Tyler Technologies Completes Installation of BenchView Product

Web-based solution for access to court records installed in Denton County, TX

Dallas, Texas, October 9, 2000 —Tyler Technologies, Inc. (NYSE: TYL) announced today that it has completed the installation in Denton County, Texas of its new Web-based BenchView e-government solution for local government courts. BenchView provides presiding judges with quick and intuitive access to a vast array of courtroom-related information.

BenchView provides judges with access to information such as monthly and daily calendars, caseload aging statistics, court dockets, case details, full history of prior offenses and hearings, and disposition information. BenchView also provides access to sheriff and jail information, such as confinement details and electronic video mug shots of defendants in criminal cases. Additionally, judges can use BenchView to set or reset hearings, manage documents, and enter secure private notes regarding a case.

All of the courtroom information available through BenchView is managed by Tyler's integrated back-end information management solutions, including Criminal Case Management, Civil Case Management, Court Calendaring and Docketing, Court Fine and Fee Collections, Sheriff and Jail Management and Booking, as well as Tyler's electronic document management and imaging systems.

"Denton County has been utilizing Tyler's integrated justice management systems for many years. The addition of BenchView's easy-to-use Web interface to provide access to a wide range of information and to manage the work flow in courtrooms is an excellent example of how we are leveraging technology to make local government more efficient," commented John M. Yeaman, President of Tyler Technologies.

Denton County, one of the 100 largest counties in the United States, has a population of more than 275,000 and processes over 30,000 civil and traffic cases and over 14,000 criminal court cases annually. Denton County also provides Internet access to its criminal and civil court, sheriff and jail records utilizing Tyler's Internet public access solutions. The capabilities of this system can be viewed by accessing the Denton County Web site at http://www.co.denton.tx.us/ and selecting the "Justice System On-line Records" option.

Based in Dallas, Tyler Technologies is a leading provider of end-to-end e-government information management solutions to local government. Tyler partners with clients to make local government more accessible to the public, more responsive to the needs of citizens, and more efficient. Tyler's client base includes nearly 6,000 local government offices in 49 states, Canada and Puerto Rico. More information about Tyler Technologies can be found on the World Wide Web at http://www.tylertechnologies.com.
