FOR IMMEDIATE RELEASE

TYLER TECHNOLOGIES SIGNS CONTRACT WITH STATE OF MINNESOTA FOR NEW COURTS SYSTEM

Contract for Odyssey Case Management System Valued at $11 Million

Dallas, Texas, July 16, 2002 —Tyler Technologies, Inc. (NYSE: TYL) announced today that the State of Minnesota has signed a contract for statewide implementation of Tyler's *Odyssey Case Management* system. The total estimated value of the software and professional services contract through acceptance is approximately $11,000,000. With the signing of this contract, Tyler puts a capstone on the launch of *Odyssey*, the first completely new, web-based case management system available to the court marketplace.

"We are very pleased to begin this long-term relationship with the State of Minnesota," said Glenn Smith, President of Tyler's Courts and Justice Division. "Courts throughout the country have been looking for a case management system that offers a revolutionary user experience and cutting-edge technology. Our goal was to leverage our years of experience and deep domain expertise in courts systems to be the first company to offer an all-new, truly web-based product for the high-end court marketplace. With this contract, we have achieved that goal."

Dale Good, the Chief Technology Officer for the Minnesota State Supreme Court, echoed Smith's enthusiasm. "We've gone through a very methodical, careful evaluation process. Tyler's combination of technology, user interface and functionality, plus Tyler's size and high customer care standards, made them by far the best choice for the State of Minnesota."

With a total population approaching 5,000,000, Minnesota's 87 counties have outgrown their current systems. Because Odyssey is a unified case management system as defined by the National Center for State Courts, every county will consolidate the functions of case processing – imaging, accounting, calendaring, reporting, forms merge and others – for every case type, in a single software package. Odyssey provides the State with a central data repository, making access to critical judicial information much more timely and efficient.

Minnesota's *Odyssey* project will begin with implementation of the new system in six counties, including Hennepin, the state's largest county. A statewide rollout of *Odyssey Case Managment* by the Court will then follow.
