TYLER TECHNOLOGIES AWARDED CONTRACT TO PROVIDE ODYSSEY COURTS SYSTEM FOR DALLAS COUNTY, TEXAS

Dallas, August 10, 2004 -- Tyler Technologies, Inc. (NYSE: TYL) today announced that it has signed a contract to provide its Odyssey Case Manager system for the civil and justice of the peace courts in Dallas County, Texas. The total estimated value of the contract, which includes software licenses and professional services, is more than $2.8 million.

Tyler's Odyssey system is the first completely new, Web-based court case management system for the state and local government market. Under this contract, Tyler will implement Odyssey to manage cases in Dallas County's civil, truancy and Justice of the Peace (JP) courts. The new system from Tyler will enable the County to consolidate multiple functions associated with case processing – including imaging, calendaring, reporting, forms management, and accounting – in a single software package.

"We are excited about the implementation of the Odyssey system from Tyler Technologies as part of our ongoing program to utilize technology to improve the efficiency of our courts," commented Dallas County Commissioner Mike Cantrell. "In addition, we believe that our constituents in the legal community and the general public will be pleased with the improvement in the level of service we will be able to provide with the Odyssey Case Management system."

Dallas County is the ninth-largest county in the United States, with a population of more than 2.2 million. The County's annual budget is nearly $700 million.

"As a Dallas-based company, we are particularly pleased to be chosen to help Dallas County update their civil and JP courts," said Glenn Smith, President of Tyler's Courts and Justice Division. "We expect that our relationship with the Dallas County courts will be long and mutually rewarding and that it will continue to expand over the years to come."

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services to local governments. Tyler partners with clients to make local government more accessible to the public, more responsive to needs of citizens, and more efficient. Tyler's client base includes more than 6,000 local government offices throughout all 50 states, Canada, Puerto Rico and the United Kingdom. More information about Tyler Technologies can be found on the World Wide Web at www.tylerworks.com.
