TYLER TECHNOLOGIES COMPLETES NEW $30 MILLION BANK CREDIT FACILITY

Dallas, February 14, 2005 -- Tyler Technologies, Inc. (NYSE: TYL) announced today that it has successfully completed a new three-year $30 million secured revolving credit facility. The new credit facility amends and restates the Company's previous $10 million revolving credit facility that was to expire this month. Bank of Texas, N.A. and Texas Capital Bank are the lenders under the new facility.

"This expanded credit facility provides us with additional liquidity and increased financial flexibility to support our long-term growth strategy and positions us to take advantage of future opportunities," said John S. Marr, Jr., President and Chief Executive Officer of Tyler Technologies. "We are especially pleased with the confidence that our banking partners have shown in Tyler's financial strength and business strategy."

Proceeds from the loans available under the credit facility may be used for working capital, capital expenditures, and other general corporate purposes, including acquisitions and stock repurchases, and for the issuance of letters of credit. The interest rate is either LIBOR plus 1.50% or U.S. prime rate. The Company does not expect to draw on the credit facility in the immediate future, as it has no debt outstanding, a significant level of cash, cash equivalents and investments, and is generating consistent free cash flow.

About Tyler Technologies
Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments.
