CITY OF INGLEWOOD, CALIFORNIA SELECTS TYLER TECHNOLOGIES TO PROVIDE FINANCIAL, PERSONNEL AND CITIZEN SERVICES SOFTWARE

Dallas, March 13, 2006 -- Tyler Technologies, Inc. (NYSE: TYL) announced today that it has signed a contract to implement its EDEN software at the city of Inglewood, California. Tyler will provide the city with EDEN core financials, personnel and citizen services software. The city will also implement Tyler's EDEN utility billing software to manage the process of billing and managing utility services accounts, from customer tracking to service orders. Under the contract, Tyler will also provide implementation, training and support services for Inglewood.

"Inglewood currently has many legacy business applications running on the mainframe," commented Jeff Muir, Assistant City Administrator for the city of Inglewood. "We need to migrate to an updated platform and want as many applications as possible in a unified system. The main factors that Inglewood considered when choosing a new software provider were functionality, California client references and value. Tyler's EDEN software was the best fit."

Mr. Muir noted that the city's current financial software applications, acquired in 1989, are very limited and require a great deal of staff time to update and maintain. Tyler provides a software solution that will reduce staff data entry and allow staff more time to focus on citizen needs.

"It is our goal," Mr. Muir continued, "to analyze and re-engineer many of our existing business processes that were created around the legacy system. We anticipate streamlining multiple operations and hope to provide more accurate and timely information to the public. We look forward to Tyler's implementation team reviewing our current processes and providing city staff with suggestions on how to improve them."

Jeff Green, President of Tyler's EDEN division, said, "The city of Inglewood is an important addition to Tyler's growing customer base in California. Our EDEN software will give the city an integrated solution to improve interdepartmental communication and business processes. Our advanced technology will help Inglewood's staff operate more efficiently and increase citizen satisfaction."

The city of Inglewood is located in Los Angeles County in southern California and has a population of approximately 119,000. With excellent accessibility to major freeways, harbors and the Los Angeles International Airport, Inglewood is a growing business area. The city has an annual budget of approximately $230 million and has a staff of approximately 730 full-time employees and 155 full-time equivalents. More information about the City of Inglewood can be found at www.cityofinglewood.org.

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to make local government more accessible to the public, more responsive to needs of citizens, and more efficient. Tyler's client base includes nearly 6,000 local government offices throughout all 50 states, Canada, Puerto Rico and the United Kingdom. *Forbes* Magazine named Tyler one of the "200 Best Small Companies" in America in November 2004.
