TYLER TECHNOLOGIES SIGNS CONTRACT TO PROVIDE ODYSSEY COURTS SOFTWARE FOR CLAY COUNTY, FLORIDA

Clay County Becomes Tyler's Fifth Odyssey Client in Florida

Dallas, June 13, 2006 -- Tyler Technologies, Inc. (NYSE: TYL) announced today that it has signed a contract with Clay County, Florida, for Tyler's Odyssey Courts software. The contract is valued at approximately $1.1 million and includes software licenses, professional services and maintenance and support.

Odyssey is Tyler's new generation Web-based court case management solution for the state and local government market. Clay County will implement the Odyssey case management software to manage its civil and traffic courts. The system includes electronic document management for all court documents filed in these cases, judicial assignment and scheduling, and management and assessment of court fines and fees.

Clay County becomes the fifth Florida county to adopt Tyler's Odyssey software, joining Lee, Monroe, and Manatee counties, as well as Miami-Dade, which is the state's largest county. Clay County has a population of approximately 141,000 and is located on the banks of the majestic St. Johns River in northeast Florida. It includes the municipalities of Green Cove Springs (seat of the county's government) and Orange Park (adjacent to Jacksonville).

"We are pleased to build on the success of Odyssey in the Florida courts market with the addition of Clay County as a client," said Glenn Smith, Executive Vice President of Tyler Technologies. "Courts in Florida and throughout the nation recognize that Odyssey provides a combination of unmatched domain expertise and leading-edge technology that is unique in the marketplace."

James Jett, Clerk of the Circuit Court for Clay County, commented, "We look forward to dramatically improving the efficiency of our courts and the level of service for the public with Tyler's Odyssey system. We were extremely impressed with the technology incorporated in the Odyssey software. Tyler's commitment to local governments and deep understanding of our needs were evident in our interactions with Tyler staff and management and in references from other Tyler clients."

-more-

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to make local government more accessible to the public, more responsive to needs of citizens, and more efficient. Tyler's client base includes more than 6,000 local government offices throughout all 50 states, Canada, Puerto Rico and the United Kingdom. *Forbes* Magazine named Tyler one of the "200 Best Small Companies" in America in 2004.
