TYLER TECHNOLOGIES SECURES $6.3 MILLION ASP CONTRACT WITH FORT WORTH, TEXAS SCHOOLS

Dallas, October 17, 2007 -- Tyler Technologies, Inc. (NYSE: TYL) announced today it has signed a contract with the Fort Worth Independent School District (ISD) in Texas to provide its MUNIS financial management software solution and related professional services. The three-year Application Service Provider (ASP) agreement, which is valued at nearly $6.3 million, includes a full suite of Tyler's MUNIS financial applications, as well as human resources, revenues and integrated solutions.

Tyler's ASP option—a software as a service model—gives clients the freedom to focus on other internal initiatives, while Tyler manages and hosts the software and data from its secure facility in Falmouth, Maine. Application, hardware and operating system upgrades are included in the service, as are ongoing maintenance and support. The ASP solution also simplifies the budgeting process with its all-inclusive, fixed fee.

John S. Marr, Jr., president and CEO of Tyler Technologies, believes Tyler's ASP solution is a solid investment choice for the public sector market and anticipates it will continue to grow in popularity. "Tyler has gained a national reputation as a leading provider of enterprise-wide solutions for the public sector. As such, we're always pleased to offer our clients services that enable them to better serve their constituents. With our ASP model, challenges typically associated with the acquisition of a new software system, such as hosting and management, are handled by Tyler. We're especially pleased to welcome the Fort Worth Independent School District as our largest ASP client to date, and look forward to a long and successful partnership," he stated.

According to Ronald M. Wilson, Chief Financial Officer for the Fort Worth ISD, Tyler's ability to provide a comprehensive business solution was key to the District's decision to purchase the MUNIS Enterprise Resource Planning (ERP) software. "The Fort Worth Independent School District chose Tyler's MUNIS software because it provides integrated, feature-rich solutions for our Business and Human Resource areas. Additionally, the ASP option will simplify the implementation and make it easier for us to add capacity. More importantly, MUNIS will allow the Fort Worth ISD to achieve the strategic goal of increased efficiency. Improving efficiency means we can return more resources to the classroom, and improving education is really the bottom line," he explained.

The Fort Worth ISD educates approximately 80,200 students from grades pre-K through 12 at 131 schools, making it the 36th largest school district in the nation by student population. With a population of over 624,000, Fort Worth is the fifth largest city in Texas and the 19th largest in the United States.
