TYLER TECHNOLOGIES WINS $6.35 MILLION COURTS & JUSTICE SOFTWARE CONTRACT WITH THE STATE OF NORTH DAKOTA UNIFIED JUDICIAL BRANCH

Dallas, December 4, 2008 -- Tyler Technologies, Inc. (NYSE: TYL) announced today that the State of North Dakota Unified Judicial Branch has signed a contract for the implementation of Tyler's courts & justice solution in district courts across the state. The agreement, which is valued at $6.35 million, includes software licenses, corresponding professional services, ongoing maintenance and support.

Tyler's Odyssey Case Manager will expedite court administration for the state's seven judicial districts, which serve all 53 counties, by easing the management of and access to case information. The courts will also deploy the Financial Manager product center to track financial data for court offices, while the Public Access feature will make courts and justice information available to citizens online. The agreement with the State of North Dakota represents Tyler's fifth statewide implementation of its Odyssey courts & justice solution. The solution has also been deployed by the states of Minnesota, New Hampshire, Indiana and New Mexico.

"We believe that Tyler's system is the leap forward in technology that we have been looking for. It is a comprehensive system that should meet all of our needs for an effective case management system and allow us to expand into the areas of e-filing, document management and Web response," stated Sally Holewa, North Dakota's state court administrator.

"The Tyler system will allow us to better meet the demands of the modern court customer looking for accurate, on-demand court information. We chose Tyler's court solution because of its proven technology in multiple settings, which clearly indicates an ability to adapt the system to meet the unique needs of each court jurisdiction. The system keeps the end user in mind, offering intuitive screen navigation and layout," Holewa added.

"Tyler's courts & justice solution will drive the North Dakota Unified Judicial Branch's efforts to bring its case management to the next level, as well as provide constituents with easy access to court information. We're pleased to have been selected and look forward to implementing our proven solution at district courts across the state," commented Bruce Graham, president of Tyler's Courts & Justice Solutions.

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to make local government more accessible to the public, more responsive to needs of citizens, and more efficient. Tyler's client base includes more than 7,000 local government offices throughout all 50 states, Canada, Puerto Rico and the United Kingdom. Tyler has been named one of "America's 200 Best Small Companies" for two consecutive years by *Forbes* Magazine and one of "America's 100 Most Trustworthy Companies" by Audit Integrity, an independent research firm.
