TYLER TECHNOLOGIES SECURES EDUCATION MANAGEMENT SOFTWARE CONTRACTS WITH FIVE GEORGIA SCHOOL DISTRICTS

Dallas, January 16, 2009 -- Tyler Technologies, Inc. (NYSE: TYL) announced today that it will ease the administration of student information for five school districts in Georgia by implementing Tyler's Education Management solution. In addition to software licenses, each agreement includes related professional services, ongoing maintenance and support.

The contracts include the following districts:

- Thomasville City Schools (Thomasville, GA), 2,800 students
- Calhoun County Schools (Morgan, GA), 700 students
- Thomas County Schools (Thomasville, GA), 5,700 students
- Terrell County Schools (Dawson, GA), 1,600 students
- McIntosh County Schools (Darien, GA), 2,000 students

As members of the Southwest Georgia Regional Educational Service Agency, Thomasville City Schools, Calhoun County Schools, Thomas County Schools and Terrell County Schools jointly evaluated Tyler's solution.

"Tyler's Education Management solution continues to grow its client base throughout the United States. Our integrated solution provides school districts with the rich functionality and exceptional reporting and tracking abilities they require to manage student and educational data. In the end, it gives districts the freedom to focus on the important work of educating their students," commented John S. Marr, Jr., president and chief executive officer of Tyler Technologies, Inc.

Tyler's .NET-based Education Management solution meets No Child Left Behind requirements and is SIF (Schools Interoperability Framework) certified. The solution, which is scalable to meet the needs of school districts of all sizes, facilitates the tracking and reporting of student information. Through Web-based applications, school administrators, teachers, parents and students have convenient access to information.

"We look forward to implementing Tyler's Education Management solution in our district," stated Danna Cooper, director of technology for Thomas County Public Schools. "Tyler's reputation for support and position at the forefront of technology are two of the main reasons we chose its student information system. The Web-based solution will allow us to eliminate issues such as multiple servers and databases, as well as overnight uploads and consolidations. Another key advantage of Tyler's system is that teachers, parents and administrators will all see the same data at the same time without waiting for uploads and consolidations to take place. After our initial conversion and cleanup of data, I expect our data to be more concise and accurate," she explained.
