Tyler Technologies Signs $2.8 Million Contract to Upgrade Forsyth County, Georgia's Courts & Justice System

Dallas, April 6, 2009 -- Tyler Technologies, Inc. (NYSE: TYL) announced today that it has signed an agreement valued at $2.8 million to migrate all Forsyth County, Georgia, courts to Tyler's integrated Courts & Justice software solution. The contract includes software licenses, professional services, maintenance and support.

Forsyth County, which has been a Tyler courts and justice client since 1998, conducted an intensive review of available justice solutions and determined that Tyler's newest Odyssey® software applications provide the Courts with the capabilities to meet their current and anticipated growth. The County's Superior, State, Magistrate, Juvenile and Probate courts will implement Tyler's Case Manager, Financial Manager, Prosecutor, Supervision and Jury applications to enhance court administration.

"When fully implemented, Tyler's Odyssey solution will provide the County's judicial system with an integrated product that will significantly reduce redundancies and errors," commented Forsyth County Chief Financial Officer Bill Thomas regarding the County's need for a fully integrated solution.

The Forsyth County Clerk of Courts, District Attorney, Solicitor, Indigent Defense, Pre-Trial and Court Administration will all upgrade to Tyler's solution.

"Tyler's Web-based Courts & Justice solution is a good fit for Forsyth County," said Bruce Graham, president of Tyler's Courts & Justice Solutions. "As a long-time Tyler client, the County is familiar with our experience, our record of successful implementations and our ability to deliver quality products with exceptional functionality. We're pleased to expand our existing relationship and look forward to serving Forsyth County for years to come."

Tyler's integrated Odyssey product suite includes a Web-based court case management system designed specifically to meet the needs of state and local governments. The Odyssey solution provides unparalleled access to court information and efficiently tracks court cases and administrative data, as well as enabling the courts to automate all aspects of case management, including imaging, accounting, docketing, calendaring and reporting.

Located in the Atlanta metro area, Forsyth County is home to approximately 168,000 residents and covers nearly 225 square miles of land. The county has consistently ranked among the fastest growing counties in the nation. Cumming is the county seat.
