Bernalillo County, New Mexico Employs Tyler Technologies' Electronic Recording Solution to Win Technology Award

Dallas, April 13, 2009 -- Tyler Technologies, Inc. (NYSE: TYL) announced today that Bernalillo County, New Mexico leveraged Tyler's electronic recording solution and improved its business processes to win a technology award.

Bernalillo County's successful implementation of Tyler's eRecording solution earned a Technology Excellence Award from the New Mexico Technology Council (NMTC), the state's largest advocacy group for technology-related business. The awards recognize the best and most successful implementation of technology products, as well as implementations performed by a New Mexico-based company or organization. Bernalillo County took home one of nine awards at the fourth annual event.

In November 2008, Bernalillo County automated the management of land records for the Clerk's Office by effectively deploying Tyler's electronic recording solution. The solution makes it possible for title companies and banks to record documents using the Internet. The County originally invested in Tyler's Land & Vital Records solution in 2006, adding Tyler's Eagle Quickdocs eRecording solution two years later.

"Bernalillo County's use of Tyler's eRecording has grown by leaps and bounds since its implementation. During the first month our office had about 200 documents filed electronically. In February of 2009, that number rose to 2,200 documents," noted County Clerk Maggie Toulouse Oliver. "I am so pleased that our office has been recognized for implementing Tyler's solution. This award reflects our work to bring our business processes into the 21st century, combined with our ongoing effort to work with the business community and aid the taxpayer. We will continue updating and improving our business processes to serve the citizens of Bernalillo County."

"Tyler congratulates Bernalillo County for its recent technological achievement," commented Brett Cate, president of Tyler's Eagle Solutions. "The County's success in automating its land records and its commitment to providing excellent service to its citizens is commendable. Tyler is gratified that our solution has contributed to Bernalillo County's success."

Bernalillo County, which has also invested in Tyler's property tax assessment and courts software, as well as its property appraisal services, is the state's largest county with more than 600,000 residents. Located in central New Mexico, the county covers close to 1,200 square miles. The city of Albuquerque is the county seat.
