Tyler Technologies Signs New Contracts with Two Texas School Districts

Dallas, April 21, 2009 -- Tyler Technologies, Inc. (NYSE: TYL) announced today that it has signed contracts totaling approximately $3.1 million to provide the Katy Independent School District (ISD) in Katy, Texas, and the Canyon Independent School District in Canyon, Texas, with Tyler's Financial Management by MUNIS solution. The agreements include software licenses, related professional services, maintenance and support.

Katy ISD will implement a full suite of financial applications including HR Management, Tyler Content Manager Enterprise Edition, and GASB 34 Reporter. The school district will deploy these Tyler applications using the Role Tailored Dashboard option.

Canyon ISD will also implement Tyler's Financial Management by MUNIS solution, including HR Management, Workflow Finance, Workflow HR, and Tyler Forms Processing.

"The selection of Tyler's financial management and human resources applications by Katy ISD and Canyon ISD continues to expand Tyler's strong presence in Texas' public school system," commented Dick Peterson, Jr., president of Tyler's MUNIS Financial Management Solutions. "We are excited about partnering with these two school districts and providing them with the tools they need to be successful."

"One of the main factors in our selection of Tyler was that they clearly stood out as a 'partner' in our journey, not just a software vendor," Kerry Rampelli, senior project manager for Katy ISD Technology, explained. "Functionally, they met all our key requirements and they have a proven track record in Texas with a large customer base solely in the public sector. Tyler Technologies' revenue and market share has continued to increase year after year. Additionally, they have a clearly defined vision for future plans and development," Rampelli continued.

"We spent a great deal of time evaluating finance software products and after several demonstrations and visits to other districts, we determined that Tyler's MUNIS product is the best product for Canyon ISD," commented Randy McDowell, assistant superintendent of business and operations for Canyon ISD. "We feel that Tyler is a very stable and proven company in the software industry and that they continue to be on the leading edge of software development. We are looking forward to working with Tyler for many years to come."

Approximately 30 miles west of Houston, Katy is located in Fort Bend, Harris, and Waller Counties within the Houston metropolitan area. Katy ISD had 53,762 students enrolled, which ranks among the nation's 100 largest school districts, and employed 6,786 staff members as of the 2007 – 2008 school year.

Canyon, Texas, is located in Randall County and serves as the county seat. The area is home to West Texas A&M University, the Panhandle-Plains Historical Museum, and Palo Duro Canyon State Park. Canyon ISD serves 8,600 students.

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to make local government more accessible to the public, more responsive to needs of citizens, and more efficient. Tyler's client base includes more than 8,000 local government offices throughout all 50 states, Canada, Puerto Rico and the United Kingdom. Tyler has been named one of "America's 200 Best Small Companies" for two consecutive years by *Forbes* Magazine. More information about Tyler Technologies can be found at www.tylertech.com.

Tyler Technologies, Inc. has included in this press release "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 concerning its business and operations. Tyler Technologies expressly disclaims any obligation to release publicly any updates or revisions to these forward-looking statements to reflect any change in its expectations. These expectations and the related statements are inherently subject to risks and uncertainties that could cause actual results to differ materially from those set forth in, contemplated by, or underlying the forward-looking statements. The risks and uncertainties which forward-looking statements are subject to include, but are not limited to, changes in competition, changes in general economic conditions, changes in the budgets and regulatory environments of the Company's customers, risks associated with the development of new products and the enhancement of existing products, the ability to attract and retain qualified personnel, and other risks detailed from time to time in the Company's filings with the Securities and Exchange Commission.
