Tyler Technologies Signs Contract with Nation's 7th Largest City

San Antonio to Implement Tyler Municipal Courts Solution

Dallas, June 2, 2009 -- Tyler Technologies, Inc. (NYSE: TYL) announced today that it has reached an agreement to provide the City of San Antonio, Texas, the 7th largest city in the nation, with Tyler's INCODE municipal court case management solution. Valued at over $2.2 million, the contract is the largest municipal court contract in Tyler Technologies' history and includes software licenses, professional services, maintenance and support.

In addition to the municipal court solution, San Antonio will implement Tyler's Document Management solution, allowing for a paperless environment. The City's courts previously used a mainframe-based document management system and a separate, non-integrated fee collection system. This resulted in massive amounts of paperwork that proved difficult to track and file. Dispositions were often hand-written, causing delays in the data entry process.

The first of eleven courts will go live in the summer of 2009 and implementation will continue over the next eighteen months. By implementing Tyler's municipal court solution, the city is moving forward with a fully integrated, workflow enabled case management solution. The City of San Antonio's nine judges, 11 associate judges, and staff of 250 users will benefit greatly from their new system.

"By deploying Tyler's Courts and Justice and Document Management solutions, the City of San Antonio will be able to improve the efficiency of their municipal courts and enhance the overall management of their critical documents," said Brett Cate, president of Tyler's INCODE solution. "We are looking forward to working with the City."

San Antonio, the county seat for Bexar County in South Texas, has a diverse economy focused on financial services, government, health care, and tourism. Home to the Alamo, San Antonio is the seventh largest city in the United States and the second largest city in the state of Texas. With a population of 1,328,984 as of the 2007 U.S. Census estimate, the City was the nation's fourth fastest-growing large city from 2000-2006.

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to make local government more accessible to the public, more responsive to needs of citizens, and more efficient. Tyler's client base includes more than 8,000 local government offices throughout all 50 states, Canada, Puerto Rico and the United Kingdom. Tyler has been named one of "America's 200 Best Small Companies" for two consecutive years by *Forbes* Magazine. More information about Tyler Technologies can be found at www.tylertech.com.

Tyler Technologies, Inc. has included in this press release "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 concerning its business and operations. Tyler Technologies expressly disclaims any obligation to release publicly any updates or revisions to these forward-looking statements to reflect any change in its expectations. These expectations and the related statements are inherently subject to risks and uncertainties that could cause actual results to differ materially from those set forth in, contemplated by, or underlying the forward-looking statements. The risks and uncertainties which forward-looking statements are subject to include, but are not limited to, changes in competition, changes in general economic conditions, changes in the budgets and regulatory environments of the Company's customers, risks associated with the development of new products and the enhancement of existing products, the ability to attract and retain qualified personnel, and other risks detailed from time to time in the Company's filings with the Securities and Exchange Commission.
