Tyler Technologies to Provide Delaware River Joint Toll Bridge Commission with Integrated Financial Management Solution

Dallas, DECEMBER 3, 2009 -- Tyler Technologies, Inc. (NYSE: TYL) will provide the Delaware River Joint Toll Bridge Commission with its integrated Munis® ERP (Enterprise Resource Planning) solution to enhance workflow, data analysis and budget management. The contract includes software licenses, professional services, maintenance, and support.

Established in 1934, the Commission aims to provide safe, dependable, and efficient river crossings between Pennsylvania and New Jersey. Covering a 139-mile stretch along the Delaware River, it includes 20 bridges and has a 140 million yearly traffic average. As part of the agreement, the Commission has invested in a variety of Tyler's financial and human resource applications.

"The Delaware River Joint Toll Bridge Commission looks forward to its partnership with Tyler Technologies for the implementation of its Munis system. We believe Tyler's integrated approach to providing software, implementation services and maintenance will benefit the agency in a number of ways," stated Frank G. McCartney, executive director for the Commission.

McCartney said the Commission expects Tyler's user-friendly solution to reduce its reliance on manual subsystems as well as increase transparency and efficiency for financial, operating and project management data, and analysis. He also noted that Munis has strong centralized budget management features, including version control, what-ifs, spreading adjustments, targets, trends, and customizable approval rights that appeal to the Commission.

The Munis system is designed to integrate document management and workflow throughout the product suite. It will offer tighter integration between the finance and purchasing applications and process more invoices and payments electronically for the Commission.

"Tyler is pleased to provide the Commission with our Munis ERP solution to improve the transparency and efficiency of its operations," commented Richard E. Peterson, Jr., president of Tyler's ERP & School Division. "Easing daily operations with workflow, document management and integrated financial software is key to empowering the Commission to best serve its constituents."

Based in Dallas, Tyler Technologies is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to enable the public sector–cities, counties, schools and other government entities–to become more efficient, more accessible, and more responsive to the needs of citizens. Tyler's client base includes more than 8,000 local government offices throughout all 50 states, Canada, Puerto Rico and the United Kingdom. Tyler has been named one of "America's 200 Best Small Companies" for three consecutive years by *Forbes* Magazine. More information about Tyler Technologies can be found at www.tylertech.com.

This document contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 that are not historical in nature and typically address future or anticipated events, trends, expectations or beliefs with respect to our financial condition, results of operations or business. Forward-looking statements often contain words such as "believes," "expects," "anticipates," "foresees," "forecasts," "estimates," "plans," "intends," "continues," "may," "will," "should," "projects," "might," "could" or other similar words or phrases. Similarly, statements that describe our business strategy, outlook, objectives, plans, intentions or goals also are forward-looking statements. We believe there is a reasonable basis for our forward-looking statements, but they are inherently subject to risks and uncertainties and actual results could differ materially from the expectations and beliefs reflected in the forward-looking statements. We presently consider the following to be among the important factors that could cause actual results to differ materially from our expectations and beliefs: (1) economic, political and market conditions, including the recent global economic and financial crisis, and the general tightening of access to debt or equity capital; (2) our ability to achieve our financial forecasts due to various factors, including project delays by our customers, reductions in transaction size, fewer transactions, delays in delivery of new products or releases or a decline in our renewal rates for service agreements; (3) changes in the budgets or regulatory environments of our customers, primarily local and state governments, that could negatively impact information technology spending; (4) technological and market risks associated with the development of new products or services or of new versions of existing or acquired products or services; (5) our ability to successfully complete acquisitions and achieve growth or operational synergies through the integration of acquired businesses, while avoiding unanticipated costs and disruptions to existing operations; (6) competition in the industry in which we conduct business and the impact of competition on pricing, customer retention and pressure for new products or services; (7) the ability to attract and retain qualified personnel and dealing with the loss or retirement of key members of management or other key personnel; and (8) costs of compliance and any failure to comply with government and stock exchange regulations. A detailed discussion of these factors and other risks that affect our business are described in our filings with the Securities and Exchange Commission, including the detailed "Risk Factors" contained in our most recent annual report on Form 10-K. We expressly disclaim any obligation to publicly update or revise our forward-looking statements.
